Energy and Infrastructure

NOTICE OF CHANGES TO TRAFFIC CONDITIONS

Victoria Road and Veitch Road Junction

The Department for Transport, Energy and Infrastructure is currently improving transport links along the LeFevre Peninsula Transport Corridor. Part of this work will include the upgrade of the Veitch Road, Victoria Road junction.

Work is scheduled to commence between late February and early March, with completion of the junction scheduled for mid 2007.

The junction upgrade will improve safety and commence the upgrading required to meet the access needs for the growing Techport Precinct. The work will include a lighting upgrade and the removal and replacement of nearby vegetation as required.

Simultaneously, the construction of a road bicycle path from Veitch Road to Estelle Street will be completed, forming part of the LeFevre Peninsula bicycle route.

Motorists are advised that speed and lane restrictions will be in place for the duration of the works. Access to businesses along Veitch Road will be maintained throughout the construction period.

Normal construction hours are Monday to Friday between 7:00am and 6:00pm and Saturday between 7:00am to 3:30pm.

For further information please contact the Project Manager, Ms Alecia Wright on 0401 984 385.

Thankyou for your patience and cooperation during these essential works.
