

Hancock Road Pedestrian Actuated Crossing Upgrade

Advance Notification of Works

The Department for Infrastructure and Transport (the Department) will be undertaking works to install a pedestrian actuated crossing on Hancock Road. Works will include the removal of the existing Koala crossing and the installation of a pedestrian actuated (push button) crossing and traffic signals in order to improve safety for all crossing users.

The project is one of eight locations across South Australia identified for upgrade as part of the broader strategy to improve road safety for all pedestrians but in particular children walking to and from school.

What to expect

Early works, including vegetation management, are scheduled to commence in **late April 2023**. Major construction is scheduled to commence in **June 2023** and is expected to be completed by **August 2023**, weather permitting. Works will be undertaken during the **day between the hours of 8am and 5pm Monday to Friday. No works will be undertaken on weekends.**

To facilitate these works, speed and lane restrictions will be in place throughout the project area. Please follow the directions of on-site traffic controllers and observe traffic signage when travelling through the area.

Access to properties will be maintained during the works, with advance notice provided to residents if there is a need to temporarily restrict driveway access.

Pedestrians and cyclists are advised to take care when travelling throughout the area. For safety reasons there may be some restricted access. When required, signage will be in place to direct pedestrians and cyclists to alternative access and/or detours. Every effort will be made to minimise impacts on the community.

Some noise disturbances can be expected at times while these works are completed however works will be managed to minimise disturbances as much as practically possible.

To achieve these pedestrian safety upgrades, some vegetation removal will be required. The Department will work with an arborist to ensure impacts of removal are minimised.

Please see overleaf for a concept map of upgrades.

Notification will be provided before major construction commences. Please register to receive project updates by any of the below options.
