

Tram Grade Separation Projects

South Road Tram Overpass

Night works

As part of the \$15.4 billion North-South Corridor, River Torrens to Darlington Project a rebuild of the tram overpass at South Road is required to facilitate the construction of the T2D motorway.

This upgrade will be delivered as part of the Tram Grade Separation Projects, which also includes the level crossing removals at Marion Road and Cross Road, Plympton.

What's happening:

Ground investigations are continuing with **one night of works required on South Road, north and south of the tram overpass**. These investigations are required at night to undertake works safely and reduce impacts to road users.

How this affects you:

There will be changes to traffic conditions to keep everyone safe. Speed and lane restrictions will be in place while works are underway. One lane of traffic will remain in place in both directions throughout the works. Please follow traffic management directions and onsite signage.

Outside of working hours, traffic will be reopened with all speed and lane restrictions removed. Access to properties will be maintained during the works at all times.

During these works there may be some noise disruptions, however we will minimise noise where possible.

There will be no impacts to pedestrian/cyclist areas or bus and tram stops/services as part of these works.
