What's happening

To support the Mount Barker Interchange Upgrade, site establishment works will begin in early December 2025. These works include preparation for the project site offices, car parking, and storage facilities on vacant land next to the interchange on Adelaide Road.

Site establishment works will take place Monday to Friday, between 7am and 5pm, weather permitting. Please see work zone map for locations of the site compound overleaf.

We will also be undertaking service relocation works on the South Eastern Freeway and Mount Barker eastbound exit ramp. These works will take place mostly during the day, but some night works may be required. Advance notice of any nights works will be provided.

How this affects you

To ensure the safety of all road users and workers, localised speed restrictions will be in place while works are occurring. Please follow all signage and take care when travelling through the area.

There may be some noise disturbance during these works, but we will do our best to keep these to a minimum.

There will be no works or traffic restrictions in place between 19 December and 5 January. Works will resume on 5 January to complete the site compound setup and services modification activities.

Improved safety for all road users

Better access for cyclists and pedestrians

Smoother and safer journeys
