What's happening

Construction of the intersection upgrade is progressing well with the intersection expected to be open to traffic in early 2026.

Works are continuing over the coming months and will include:

- final asphaltting works and line marking
- installing footpaths
- installing new street lighting
- landscaping.

No works will occur during the holiday break from Saturday 20 December 2025 to Sunday 4 January 2026.

What you need to know

Night works

From Tuesday 13 January 2026, we'll be carrying out night works for around three weeks to complete the final asphaltting works.

Detours will be in place while works are happening, with roads re-opening to traffic each morning.

We will let you know in advance when these closures are required via variable message signs (electronic signage). Local stakeholders, including Emergency Services, will be notified directly in advance.

To keep everyone safe we will have onsite signage and traffic controllers in place. Please take care when travelling through the area and follow the traffic management in place. You might also notice some odours, which is normal during asphalt work.

All construction activities will be carried out with the health and safety of the local community as our top priority. We will keep everyone up to date as the project progresses.
