Alberton Railway Station

Accessibility and Amenity Improvements Project Update – November 2026

We're improving accessibility, safety and amenity at Alberton Railway Station for all users.

The improvements at Alberton Railway Station will enhance safety, accessibility and the passenger experience while also improving the station's appearance and amenity for the local community.

When

Continuing with completion in late 2026, weather permitting.

Hours of work

Day works - 7am to 7pm Monday to Saturday

Sunday 22 November 2026 7am to 7pm.

Night works – 10pm to 6am

Where

Alberton Railway Station

What's happening

Improvement works at Alberton Railway Station are continuing and are progressing well.

Since our last update, we've installed Tactile Ground Surface Indicators (TGSIs) along the platform edges and under the station building awning and have completed the fencing.

We're completing the upgrade of the platform access ramp on Station Place and moving across to Sussex Terrace. Once completed, both ramps will include Disability Discrimination Act (DDA) compliant grades, TGSIs, handrails and retaining walls.

Landscaping will start shortly to include a new irrigated garden beneath the pedestrian overpass on the outbound platform and extending the existing garden bed on the inbound platform.

The raised boarding ramp on the outbound platform was unable to be installed during previous night works as some additional design work was required around heritage listed platform infrastructure.

Government of South Australia
Department for Infrastructure and Transport

SA IS BUILDING

Some construction activities to install the raised boarding ramp on the outbound platform will need to be done at night while there are no trains running.

Night works will start on **Thursday 19 November 2026 for up to 6 nights between 10pm and 6am** each night. Day works will continue between the hours of 7am and 7pm and **will include Sunday 22 November 2026**.

During this period, we will also be reinstating the light pole on the inbound platform and replacing the Alberton Station sign. The temporary lighting will be removed once this is complete.

How this affects you

Nearby residents and businesses may experience some noise from construction activity while work is underway, but every effort will be made to minimise impacts to the community.

There will be no impact to train services during these works.

We appreciate your patience as we work to deliver these important improvements.
