

Portable Traffic light aftercare

Government
of South Australia
Department for Infrastructure
and Transport

Have you put aftercare processes in place for the holiday period?

Mitigations to consider.

- Emergency contact details are clearly displayed to guide public in the event of traffic light failure.
- Risk assessments undertaken and controls determined to mitigate any likelihood of disconnection (signal or battery failure).
- Aftercare procedure including traffic management set up inspections, battery status and traffic device maintenance and cleaning.
- All plant and equipment effectively locked to prevent theft and vandalism.
