

# Horrocks Highway culvert upgrade

## Early works

### We are improving safety and freight efficiency on the Horrocks Highway

The Horrocks Highway culvert replacement project is jointly funded (80:20) by the Australian and South Australian governments.

## What's happening

We are upgrading an existing culvert on the Horrocks Highway, approximately 2kms north of Rhynie. These works will improve flood resilience, safety and heavy vehicle capacity along this important freight corridor.

Early works, including site surveys and the construction of a temporary access track adjacent the Horrocks Highway, are required.

## How this affects you

The Horrocks Highway will remain open to two-way traffic while early works are undertaken.

To keep everyone safe lane and speed restrictions will be in place throughout the work area, including outside of work hours where required.

**Following completion of these early works in early March 2025 the Horrocks Highway will be reduced to a single lane while major works are undertaken.** All traffic will be diverted around the work area via the temporary access track during this time.

Advance notice will be provided prior to commencement of major works including traffic impacts.

To stay up to date please subscribe to receive project updates via the project website.

#### When

Thursday 6 February 2025  
until early March 2025

Weather permitting

#### Hours of work

Monday to Friday

7am until 5pm

Some weekend work may be required

#### Where

Horrocks Highway,  
approximately 2kms north of  
Rhynie
