

Horrocks Highway culvert upgrade

Project update - major works notice

We are improving safety and freight efficiency on the Horrocks Highway

The Horrocks Highway culvert replacement project is jointly funded (80:20) by the Australian and South Australian governments.

What's happening

We are upgrading an existing culvert on the Horrocks Highway, approximately 2kms north of Rhynie. These works will improve flood resilience, safety and heavy vehicle capacity along this important freight corridor.

Early works to construct a temporary access track, immediately adjacent to the Horrocks Highway, are now complete.

How this affects you

From mid-March 2025, all traffic on the Horrocks Highway will be diverted around the work area via the newly constructed temporary access track.

To safely navigate the access track traffic will be reduced to a single lane with traffic signals in place to control the direction of traffic, including outside work hours.

Speed restrictions will also be in place throughout the work area, including outside of work hours.

Please follow onsite traffic signage and traffic controller directions while work is in progress.

Horrocks Highway will remain open to traffic at all times.

We thank you for your patience while these important works are undertaken.

When

Mid March 2025 until mid-2025
Weather permitting

Hours of work

Monday to Friday
7am until 5pm
Some weekend work may be required

Where

Horrocks Highway,
approximately 2kms north of
Rhynie
