

Road Safety Program

ATLM works notice

We are delivering critical road safety upgrades and improvements on remote, regional, urban roads, footpaths and cycle paths around South Australia.

The \$168 million program is jointly funded by the Australian (50%) and South Australian (50%) governments over three years.

What's happening

Works are progressing well across the Road Safety Program. Major works are complete on the Mallee Highway, Lincoln Highway, Thiele Highway, RM Williams Way, Mannum Road and Main South Road.

Throughout the remainder of the year, we will be undertaking Audio Tactile Line Marking (ATLM) installation at suitable locations across all Road Safety Program project corridors.

ATLM is used to reduce rural 'run-off-road' road crashes by providing a noise (audio) and vibratory (tactile) warning to road users.

ATLM will only be installed in areas where posted speeds are 100kmh or higher and will not be installed within 200m of dwellings.

Please see map overleaf for more information on the Road Safety Program highway corridor locations.

How this affects you

To keep everyone safe speed and lane restrictions will be required where works are underway. Work areas will move progressively along corridors as ATLM installation is undertaken. Advance notice of upcoming impacts will be provided through onsite signage.

Outside of work hours all traffic restrictions will be lifted.

When

Ongoing until late 2025

Hours of work

Monday to Sunday
6am to 7pm

Where
