Mount Barker Interchange Upgrade

Works notice

We are upgrading the Mount Barker Interchange to create better connections between Adelaide Hills and the freeway, supporting population growth.

What's happening

Construction on the Mount Barker Interchange Upgrade is well underway, with concrete works now complete for the new bridge abutment walls and central pier.

The next stage of bridge construction will start from **Tuesday 10 November**, with bridge girders to be installed. This work will be carried out at night and is expected to take approximately one week to complete, weather permitting.

Works will be delivered in two stages:

Stage 1: Northern girder installation
Stage 2: Southern girder installation

During bridge girder installation, traffic on the South Eastern Freeway will temporarily switch between carriageways, with one lane of traffic maintained in each direction. **Please see the traffic maps overleaf for more information.**

How this affects you

Speed and lane restrictions will be in place on Adelaide Road and the South Eastern Freeway to keep road users and workers safe.

Please follow all signage, speed limits and lane restrictions when travelling through the interchange.

When

From **10** November, weather permitting

Hours of work

Night works: 7pm to 6am

Where

Adelaide Road, Mount Barker Interchange

South Eastern Freeway, Mount Barker Interchange

Department for Infrastructure and Transport

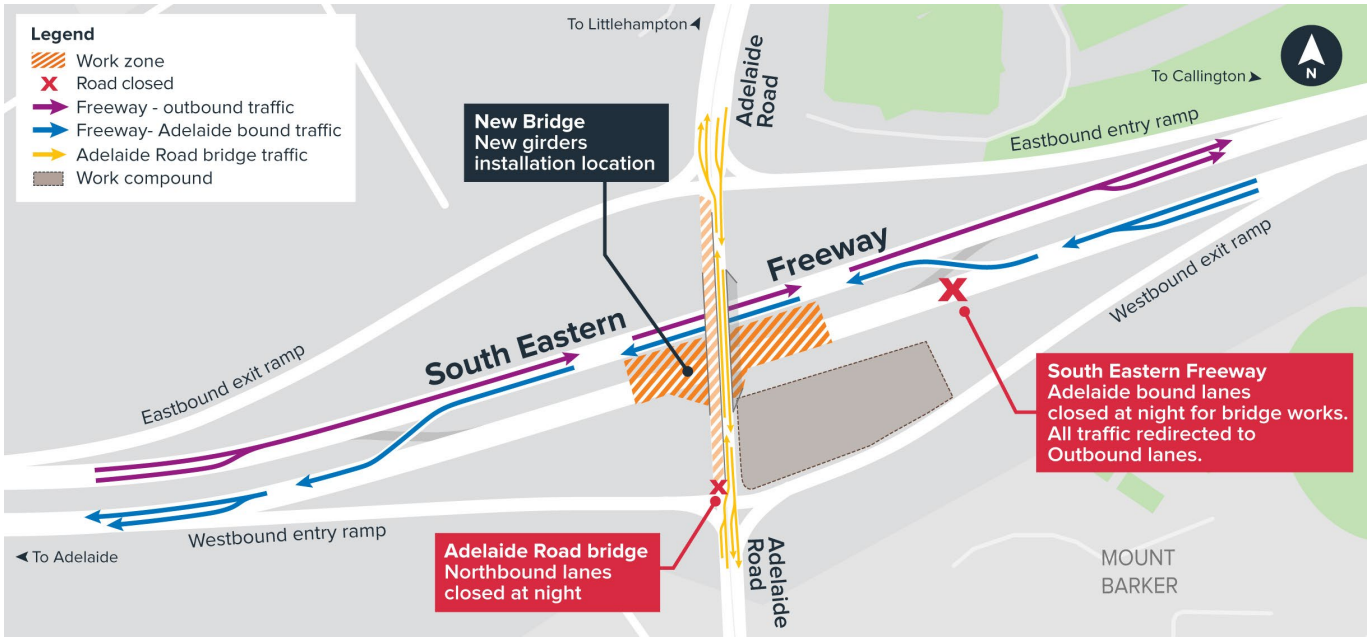

Some noise is expected, and we will work to minimise disruption. Nearby properties will be notified before night works begin.

Temporary local traffic changes – night works

Stage 1: Northern girder installation from 7pm Tuesday 10 November 2026

Stage 2: Southern girder installation after Stage 1 is complete

In addition to these works, we will also be undertaking road resurfacing works on the outbound lanes of the South Eastern Freeway between Echunga Road and the Adelaide Road off-ramp from Monday 9 November 2026.
