

Gawler Rail Electrification Project

Pedestrian Crossing Upgrade, Chidda Railway Station

As part of the Gawler Rail Electrification Project, the existing southern pedestrian crossing at Chidda Railway Station will be replaced with a new active pedestrian crossing in the same location.

The activation of the crossing will be completed in two stages. The first stage of works involves the construction of a new pedestrian maze and path.

When: The first stage of works within the roadway will commence from **Monday, 19 April 2021** for approximately 4 weeks, weather permitting. Works will take place 7am to 7pm Monday to Saturday each week.

Location: Chidda Railway Station, Salisbury (refer to map over the page).

Works are currently underway within the rail corridor at the southern pedestrian crossing. Some work within the adjacent roadway is necessary to complete construction.

Traffic management and detours: During construction, the northern pedestrian crossing will remain open. Access for local residents and businesses will be maintained at all times.

The intersection of Leslie McIntyre Avenue and York Terrace will be closed to traffic for the remainder of the works. It is expected to re-open in late May. A short detour will be in place. Traffic management will be in place to direct motorists and pedestrians to the alternative access routes.

York Terrace will be reduced to one lane of traffic in the vicinity of the works, with traffic controllers in place during work hours. Automatic traffic lights will be in place either side of the work zone at other times. Please observe signage, speed restrictions and traffic controllers.

What you can expect: Some noise, dust and vibrations may be experienced from construction machinery. Every effort will be made to minimise disruption to residents and pedestrians during these works.

The second stage of works involves activating the pedestrian crossing by installing automated safety gates, signals and upgraded signage. It is expected to take place in the third quarter of 2021.
