

# Verdun Interchange Upgrade

## Service Relocation Works Notification

**We are upgrading the Verdun and Mount Barker interchanges to create better connections between Adelaide Hills and the freeway, supporting population growth**

The existing Verdun Interchange will be upgraded to a full interchange, allowing access to and from the South Eastern Freeway in all directions. Upgrading this interchange will improve connectivity, traffic efficiency and commuter safety in the area.

### What's happening

From early March until mid-year, we will be relocating some underground services near the existing interchange to prepare for the upgrade. Main construction is scheduled to start in late 2025.

### How this affects you

To keep everyone safe, there will be some short-term localised speed and lane restrictions where works are occurring. Please observe signage and take care when travelling through the area.

There may be some noise, vibration and dust during these works, but we will do our best to keep these to a minimum.

We'll maintain access for properties throughout the works wherever possible, with advance notice provided if there is a need to temporarily restrict driveway access.

#### When

From early March to mid-2025, weather permitting

#### Hours of work

7am to 7pm, Monday to Friday (except public holidays)

#### Where

Area in the vicinity of the Verdun Interchange
