

When will works begin?

Early works are expected to commence in late 2020.

Major construction is expected to commence in early 2021, and be completed by the end of 2021, weather permitting.

Join the conversation

We are committed to finding successful ways of keeping you informed and we would like to hear from you if you have any questions or comments on the concept design of the Flagstaff Road Upgrade Project.

Virtual information room

Explore the new Flagstaff Road Upgrade Project virtual information room: An interactive web-based space created for our stakeholders and communities to explore videos, maps, plans and information from your computer or mobile device.

How to navigate the room

1. Click on the virtual information room image located on the project's website at https://www.dit.sa.gov.au/flagstaff_road_upgrade_project
2. Click or touch and drag to move around.
3. Click or touch the coloured icons to learn more about the project.

Online feedback closes 25 September 2020.

Flagstaff Road Upgrade Project

September 2020
#15862001

We're seeking feedback on the concept design for the Flagstaff Road Upgrade Project.

Government of South Australia
Department for Infrastructure and Transport

Concept design

An additional lane will be constructed on Flagstaff Road as a permanent two-way dual carriageway between Hyland Avenue and Bonneyview Road.

Background

Flagstaff Road is a major arterial road used by approximately 21,100 motorists every day to commute to work, home or other parts of the city.

For 800 metres of its overall 3.3 kilometre length between Hyland Avenue and Bonneyview Road, Flagstaff Road consists of only three lanes.

Traffic in the centre lane is reversed daily to manage traffic flows during peak periods.

The reversible nature of the centre lane can cause confusion for motorists and remains a safety concern.

Project benefits

Once completed, the additional lane on Flagstaff Road (between Hyland Avenue & Bonneyview Road) will:

- reduce traffic congestion;
- reduce confusion;
- improve efficiency and safety for motorists; and
- allow traffic to pass slow or stopped vehicles.

Community engagement

As part of the planning and design phase, the Department for Infrastructure and Transport (the Department) held an information session at Aberfoyle Park Hub Shopping Centre on 16 December 2019 to meet members of the community and understand the specific issues of the current road alignment.

In addition to the information session, the community were invited to provide their feedback via the Government YourSAy website and feedback forms on the project website. This consultation commenced on 7 December 2019, and concluded on 7 January 2020.

Findings from this engagement period are available on the project website.

About the concept design

Community feedback received to date has been incorporated into the concept design and includes:

- Improvements to road safety.
- Increased accessibility for cyclists and pedestrians.
- Safer access into neighbouring streets.
