NOTES AND DEFINITIONS

INTRODUCTION

The publication presents information compiled from police reported road crashes in South Australia for 2010 and is the twenty-fourth in an annual series that commenced with 1986 data.

Currently, when a reportable road crash occurs, the South Australian Police collect the data via vehicle crash reports for entry to their Vehicle Collision System (VCS). The reports are then forwarded to the Road Crash Information Unit of the Department for Transport for further processing. The information is checked for accuracy and consistency to ensure the reliability of any published statistics. Processed crash data is stored in the DTEI 'Road Crash Register' (RCR).

Details in this publication may differ from information previously released or published and represent a revision of that information. Road crash information contained in this publication is derived from the DTEI 'Road Crash Register'.

SCOPE

The crash statistics included in this publication are confined to those crashes which:

- Were reported to the police
- Occurred on a road as defined in the South Australian Road Traffic Act
- Involved at least one moving vehicle
- Involved at least one person being killed or injured, or a vehicle towed away, or total property damage of \$3,000 or greater.

From 1 July 2003 the Department for Transport only processed 'property damage' crashes with an aggregated damage value of \$3,000 or greater. This represents a change from previous reporting, whereby the value of 'property damage' crashes processed by the Department since January 1998 was \$1,000.
