

# New non-practitioner training course for temporary traffic management (TTM) qualification

## Purpose and participant of this training:

This training is targeted to the cohort of people who are not going to work in a traffic management role in the field erecting signs, controlling traffic or designing traffic management plans.

It is targeted to people who require the knowledge in relation to temporary traffic management for the purpose of auditing worksites or approving and auditing traffic guidance schemes or traffic management plans.

## Training Course

You would attend the same training course as a person who is enrolled to be a practitioner in the qualification. You will be required to successfully complete all theory and simulated on course practical assessments.

You are not required to complete the post course practical placements, assignments or assessments.

Successful participants will receive a statement of completion for non-practitioner training course. This statement of completion will provide the individual with non-practitioner status which excludes the individual from using a STOP/SLOW bat to control traffic, erect signs or design traffic guidance schemes or traffic management plans.

Once you have successfully completed the classroom training and assessments then the training provider will inform the department and you will be issued a non-practitioner WZTM card. It will be green in colour and the letters NP will be next to the training you have undertaken. i.e., NP TMI 1.

The currency of this card is for a period of three years.
