

Immunisation, PPE and Access Requirements for Workers

Requirements for all AGFMA workers attending South Australian Government Health sites.

This is an Administrator's Instruction for **all workers** attending South Australian Government Health sites delivering services under the Across Government Facilities Management Arrangements (AGFMA).

SA Health

A person must not engage in work or perform duties in a healthcare setting from 1 November 2021 unless:

- (a) the person has received at least one dose of a Therapeutic Goods Administration (TGA) approved COVID-19 vaccine; and
- (b) the person has received, or has evidence of a booking to receive, a second dose of a TGA approved COVID-19 vaccine within one month of the first dose.

Proof of vaccination includes electronic (through myGov app) or hard copy record.

These entry conditions will be enforced on all SA Health sites.

All Agencies

It is important to verify and confirm requirements prior to attendance and confirm these aspects at the site. These **may** include but are not limited to:

- *displaying proof as detailed above.*
- *specific PPE including but not limited to personally fitted N95 masks or training.*
- *having personal details and attendance recorded on an approved contact tracing system (COVID Safe Check in QR app or written record).*
- *having temperature taken by a nursing staff member at the entrance.*
- *minimising time and interactions on site and following local site or agency specific instructions.*
- *keep up to date with changes to requirements to avoid service delivery impacts, delays or being refused site entry.*

The COVID-19 situation is ever-changing, and government strongly encourages vaccination and recommends this requirement be considered as part of wider risk assessments and duty of care approaches for other/all sites.

Issued: 13 October 2021
