Adel7

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

**Early Victorian Houses (1837 to 1869)**

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

**Victorian Houses (1870 to 1899)**

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

**Inter-War Houses (1916 to 1942)**

In the period between the First World War and Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Archer Street

Victorian period.

Architectural styles include, but are not limited to, Victorian terrace housing and cottages, Victorian institutional buildings, and a former traditional corner hotel.

Ashley Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

Beviss Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

Curtis Street

Victorian period.

Architectural styles, including but not limited to Victorian cottages.

George Street

Victorian and Edwardian periods.

Architectural styles, including but not limited to Victorian and Edwardian row cottages, along with a former sawmill and ancillary buildings.

Gover Street

Victorian and Edwardian periods.

Architectural styles include but are not limited to Victorian and Edwardian cottages and villas, and some terrace houses.

Little Archer Street

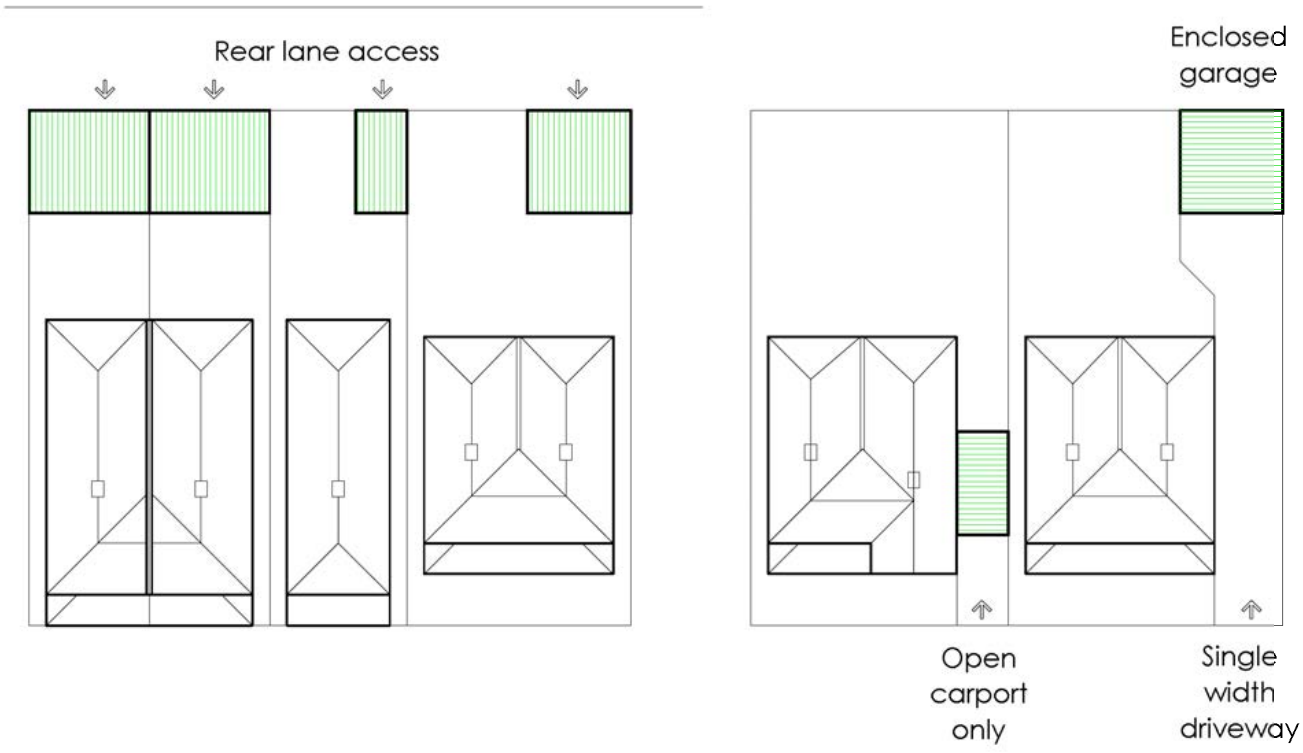
Victorian and Edwardian periods.

Architectural styles include but are not limited to Victorian and Edwardian cottages and a two-storey Victorian outbuilding.

Margaret Street

Mostly Victorian cottages with some Inter-war style.

Murray Street



Architectural styles include but are not limited to Victorian cottages.

Ralston Street

Victorian and Edwardian periods.

Architectural styles include but are not limited to Victorian and Edwardian cottages and villas.

| | | Tynte Street<br>Victorian, Edwardian and Inter-war periods.<br>Exhibits a diverse collection of architectural styles, including, but not limited to Victorian cottages and terraces, a Queen Anne mansion, some inter-war style residential infill, and public, shop and other commercial buildings of various styles.<br>Verandahs or balconies are not over footpaths, other than alterations to those on existing non-residential corner buildings.<br>Ward Street<br>Victorian, Edwardian and Inter-war periods.<br>Architectural styles include but are not limited to Victorian cottages and two-storey villas, with Edwardian and Inter-war elements.<br>William Buik Court<br>Victorian period.<br>Architectural styles, including but not limited to Victorian two-storey former office of horse tram depot, which is prominent in the vista from the street entrance on Gover Street. |
| | Building height | Low-scale, one and two-storey residential and other buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings.<br>Single and two-storey along Gover Street.<br>Single storey along Ward Street, Ralston Street and Beviss Streets.<br>Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality. |
| | Materials | Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following:<br>Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered.<br>Brick or rendered quoin work and plinths.<br>Red brick and rendered chimneys.<br>Painted timber window frames, doors and roof trim.<br>Vertical proportioned timber windows with double sliding sashes.<br>Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges.<br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br>Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing.<br>Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders.<br>Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources. |
| | Fencing | Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings.<br>Stone and cast-iron boundary fencing.<br>Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites.<br>The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources.<br>Fencing is characterised by a variety of architectural styles, including:<br>**Early Victorian Houses (1837 to 1869)**<br>Fences typically were timber pickets, paling or corrugated iron with timber capping.<br>**Victorian Houses (1870 to 1899)**<br>Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing.<br>**Edwardian Houses (1900 to 1915)**<br>Fencing contains elements of Victorian and Inter-war fencing.<br>**Inter-War Houses (1916 to 1942)**<br>Fencing was typically low masonry walls, built from materials matching the main building. |
| | Setting, landscaping, streetscape and public realm features | Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres.<br>Generous footpaths and verge areas with areas of original stone kerbing and guttering, and landscaped front gardens to residences.<br>Driveways/crossovers of single width with minimal interruption of the primary street frontages and their footpaths, soft landscaped verges, kerbing and guttering.<br>Rear lane access, where traditionally vehicle access is not characteristic to the primary street frontage.<br>Stone in concrete kerbing along Ralston Street, Curtis Street and Murray Street.<br>Stone in the concrete water table along Curtis Street and Murray Street.<br>Heritage lighting in Gover Street.<br>Cast iron street name plates at Margaret Street and Murray Street.<br>Blue enamel house number plates with white numbering along Gover Street and Ward Street.<br>Nature strips of generous proportion along Tynte Street and Ward Street.<br>Significant avenue of trees along Gover Street.<br>Significant vistas from Lefevre Terrace through Gover Street. |
| | Representative Buildings | Identified - refer to SA planning database. |
| | **North Adelaide LeFevre Historic Area Statement (Adel 8)** | |
| | Eras, themes and context | Themes and Context<br>Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008.<br>North Adelaide is part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time.<br>Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas.<br>The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid intersected by a hierarchy of street widths, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings, and for the residences of many notable Adelaide community members.<br>Town Acres along Le Fevre Terrace were only partly subdivided by 1880. After the introduction of the tramway in 1878, there was a rising demand for fashionable parkland frontages. Elevated frontages to the Adelaide Park Lands offered sites for mansions, capturing longer views over the Adelaide Park Lands and were considered prestigious residential addresses. This trend for building mansions persisted until about 1910. After this period, some of these properties were transformed into hospitals, schools, or apartments. The large scale of these buildings, the large size of allotments, and the diversity in architectural expression establish a distinctive residential character along the Adelaide Park Lands edge.<br>Eras<br>1837 to 1899 - Victorian period.<br>1900 to 1915 - Edwardian period.<br>1916 to 1942 - Inter-war period. |

| Statement# | | Statement |
|---|---|---|
| | Allotments, subdivision and built form patterns | This Area is one of the lowest density areas of Upper North Adelaide, containing large residential buildings designed in a grand manner and set in generous landscaped grounds.<br><br>The Area has retained much of its historic grid pattern, including major and minor streets and lanes.<br><br>The Town Acre layout and later patterns of subdivision and development created large allotments, and a low-density residential character derived from moderate to generous building setbacks, orientation and patterns established by the prevailing Heritage Places, typically large-scale dwellings some accompanied by significant outbuildings.<br><br>A cohesive pattern of setbacks from the street frontage is established by the dwellings, which are Heritage Places.<br><br>Side setbacks are often generous and asymmetrical, with greater separation of the building and side boundary on one side.<br><br>The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings.<br><br>Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site.<br><br>The historic built-form character of the Area is established by State and Local Heritage Places, reinforcing the character of the historic built form, allotments and settlement patterns as described below:<br><br>Barton Terrace East<br><br>The high amenity streetscape is formed by the wide street setting and Adelaide Park Lands frontage. The historic character comprises single-storey detached and semi-detached dwellings with outlooks to the Adelaide Park Lands, with shallow and deeper front garden areas. The Heritage Places establish the side and front setback pattern.<br><br>Lefevre Terrace<br><br>The historic character is derived from the cohesive pattern of large-scale one and two-storey detached and semi-detached dwellings set in generous landscaped grounds with outlooks to the Adelaide Park Lands.<br><br>The generous building setbacks and scale are established by Heritage Places that front Lefevre Terrace.<br><br>Brougham Place<br><br>The historic character is derived from the cohesive pattern of one and two-storey large-scale detached dwellings and visually prominent former residences within the campus of Lincoln College, set in generous landscaped grounds with outlooks to the Adelaide Park Lands.<br><br>The generous building setbacks and scale are established by Heritage Places that front Brougham Place.<br><br>Ward Street (southern side)<br><br>The historic streetscape character is formed by the wide street setting and the historic outbuildings associated with the State Heritage residences on Brougham Place.<br><br>(The northern side of the street is in the Margaret Street Historic Area.)<br><br>Margaret Street (south of Ward Street)<br><br>The historic streetscape character is derived from the narrow street setting of Margaret Street and the open streetscape of Brougham Place with its large setbacks and generous landscaped areas between buildings. A strong built form definition has been created on the north-eastern corner of Margaret Street and Ward Street through the placement of historic outbuildings along the street frontage. |
| | Architectural styles, detailing and built form features | Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s-1940s, with varying localised concentrations of styles which are exhibited by the Heritage Places and Representative Buildings.<br><br>The prevailing built form features of the Area includes pitched roofs (hipped and/or gable ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches.<br><br>The pitch and form of the roof and the design, form, and composition of facades reflect the traditional proportions of Heritage Places and Representative Buildings.<br><br>Buildings address the street frontages.<br><br>Design elements of a Heritage Place, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places.<br><br>Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building.<br><br>Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street.<br><br>Carports, garages and side additions located behind the main face of building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages.<br><br><br> |
| Adel8 | | Undercroft parking is inconsistent with the historic character and value of the Area.<br><br>The Area is characterised by a variety of architectural styles, including but not limited to:<br><br>**Victorian Houses (1870 to 1899)**<br><br>During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. | Statement# | | Statement |
|---|---|---|
| | | Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.<br>**Inter-War Houses (1916 to 1942)**<br>In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. **North Adelaide Cathedral Historic Area Statement (Adel 9)**

| | |
|---|---|
| Eras, themes and context | Themes and Context<br><br>Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008.<br><br>North Adelaide is an integral part of the historic plan of the City of Adelaide. The historic character of North Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time.<br><br>Significant features include the natural and cultural landscape, which creates the physical setting for North Adelaide, the hierarchy of wide and narrow streets, Squares and gardens, and the differing orientation of upper and lower North Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale along many frontages. Pockets of North Adelaide developed compactly with small cottages and worker housing provide evidence of a different way of life to that experienced by the residents of the more substantial villas.<br><br>The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s, namely the original 'Town Acre' pattern grid, the further development of North Adelaide character as a residential village (particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services), and the settling of major religious and institutional organisations and their buildings. It exhibits residential architecture from all periods of the city's development and includes the residences of many notable Adelaide community members.<br><br>Following the survey and settlement, the natural landscape was converted to a cultural landscape, which now reflects the divisions of wealth and influence in the early colony. The elevated land adjacent to the Adelaide Park Lands, such as Pennington Terrace, provided prestigious residential addresses. The topography of the City of Adelaide explains many of its patterns of development. Elevated land was selected to avoid flooding but was also prestigious and offered the best views.<br><br>The built form of North Adelaide is indicative of the social divisions and occupations of Adelaide society from early settlement. It retains many buildings and sites of State and Local Heritage value, ranging from large mansions to simple row cottages, corner shops and hotels to major churches and institutional buildings that reflect the different periods of development. The diversity of scale and integrity of the remaining historic built form is a microcosm of development periods and traditional housing styles in the State as a whole.<br><br>St Peter's Cathedral, dating from 1869, is a major landmark and visually dominates this Area, which is characterised by large institutional buildings, with residential development located primarily to the west. St Mark's College is grouped around substantial early residences along Pennington Terrace.<br><br>Until 1856, Kermode Street was the 'High Street' of North Adelaide. The characteristic collection of shops, a police station, a church and a hotel (the still trading Queens Head) were located along this street, and there are several pre 1850s buildings remaining in this Area.<br><br>Small cottages and worker housing, such as those in Brougham Court, provide a contrast with the more substantial villas with Adelaide Park Lands frontage around Palmer Place and along Pennington Terrace and are indicative of the diverse social composition of the early resident population.<br><br>Eras<br><br>1837 to 1899 - Victorian period.<br><br>1900 to 1915 - Edwardian period.<br><br>1916 to 1942 - Inter-war period.<br><br>1943 plus - Post War Period. |
| Allotments, subdivision and built form patterns | The Cathedral Area is the entry point to Adelaide and Upper North Adelaide. Its unique streetscape character is established by its distinctive topography, diverse range of nineteenth-century architecture and its extensive Adelaide Park Lands frontages. The cohesive lines of buildings set behind attractive landscaping visually define the perimeter of the Area.<br><br>The Town Acre layout and later patterns of subdivision and development created large allotments. The low-density residential character is also derived from generous building setbacks, orientation and patterns established by the prevailing Heritage Places and Representative Buildings.<br><br>The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places. Buildings do not project forward of Heritage Places, including adjacent sites, nor do buildings extend to side boundaries other than for party walls in semi-detached and row dwellings.<br><br>Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 50 percent of the site.<br><br>The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below:<br><br>Abbott Lane<br><br>Minor street characterised by one and two-storey buildings on or close to the street frontage and providing rear laneway access to carports and garaging for residences fronting another street.<br><br>Brougham Court<br><br>The historic streetscape is formed by the narrow width of the street and is almost exclusively characterised by closely sited single-storey semi-detached and detached Local Heritage Places, with generally consistent setbacks and allotments of consistent size and pattern. The side and front building setbacks are established by Heritage Places. The strong built form definition at the junction of Brougham Place and Brougham Court encloses Brougham Court.<br><br>Brougham Place and Palmer Place<br><br>The high amenity streetscape is formed by the wide street setting and their frontage to Brougham Gardens and Palmer Gardens Park Lands. The historic streetscape comprises low scale, late nineteenth century detached housing character in contrast to the larger mansion buildings along the northern (opposite) edge of Brougham Place and Palmer Place.<br><br>The historic character comprises one and two-storey detached semi-detached dwellings of State and Local Heritage value. The dwellings are setback from the street with small front garden areas, and the rhythm and pattern of their siting contribute to their historic character.<br><br>Kermode Street<br><br>The streetscape is derived from the moderately sized street width and the gentle eastward slope, with the concentration of smaller houses at the western end and more institutional scale of college and apartment buildings at the eastern end.<br><br>The historic streetscape west of Bagot Street is derived from the late nineteenth century, one and two-storey detached and semi-detached residences of Local Heritage value on individual allotments.<br><br>The historic streetscape east of Bagot Street comprises the Greenways Apartments, one and two-storey detached and semi-detached residences sited on or close to the street frontage with small garden areas and St Mark's College, which is also located close to the street with a garden frontage.<br><br>The built form pattern is established by the pattern and siting of Heritage Places on individual allotments.<br><br>King William Road<br><br>The historic streetscape is formed by St Peters Cathedral and the grand, spacious character of the streetscape.<br><br>The physical dominance and grandeur of the Cathedral complex on the western corner of Pennington Terrace and King William Road, created by its angled siting, towering height, and the juxtaposition of spires, together with the Cathedral Hotel and the Anglican Church Offices on the eastern side of King William Road, also contribute to the historic streetscape.<br><br>Lakeman Street<br><br>The intimate character and enclosure of this narrow minor street are derived from the single-storey cottages sited on the street frontage. The side boundary walling of larger residences with frontages to Pennington Terrace and Kermode Street are a dominant feature.<br><br>Palmer Lane<br><br>Minor street providing rear laneway access to carports and garaging for residences fronting another street.<br><br>Pennington Terrace<br><br>The high amenity streetscape is formed by the grand spacious character of Pennington Terrace, the setting of the Adelaide Park Lands frontage and the residences and Cathedral set within open garden settings providing an attractive public and private landscape domain.<br><br>The historic built form streetscape comprises predominantly State Heritage Places (including those forming part of St Marks College) with siting, setback, scale and character variation. The landscape garden setting around the buildings that are well setback from the street frontage forms an integral part of the area's historic character.<br><br>The cathedral complex's physical dominance on the corner of Pennington Terrace and King William Road contributes to the historic streetscape. |
| Architectural styles, detailing and built form features | Characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s and from the 1960s, with varying concentrations of styles localised to areas established by the prevailing patterns set by Heritage Places.<br><br>It retains many buildings and sites of State and Local Heritage value, ranging from large mansions to simple row cottages, corner shops and hotels to major churches and institutional buildings that reflect the different periods of development. The diversity of scale and integrity of the remaining historic built form is a microcosm of development periods and traditional housing styles in the State as a whole.<br><br>The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches.<br><br>The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places.<br><br>Buildings address the street frontages.<br><br>Design elements of a Heritage Place and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Places.<br><br>Building additions incorporate materials and proportions that reflect the character of the Heritage Place and are materially compatible with the building.<br><br>Second storey development located within the roof space or to the rear of the dwelling behind the ridgeline of the roof and not readily visible from the street.<br><br>Carports, garages, and side additions located behind the main face of the building and facade do not dominate the street frontage or significantly alter the historic character of the Heritage Places. The illustration below illustrates the typical and appropriate siting of carports and garages. |

Adel9

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

**Early Victorian Houses (1837 to 1869)**

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

**Victorian Houses (1870 to 1899)**

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

**Edwardian Houses (1900 to 1915)**

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses with face brick walling and decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped and doors were often divided into three or four horizontal panels.

**Inter-War Houses (1916 to 1942)**

In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

**Post War Housing (1943 plus)**

During this period, a range of new styles became popular. The styles constructed in North Adelaide included Old English and Georgian Revival. Houses in these styles were constructed both before and after the Second World War and were either infills or replacements for earlier houses.

The Old English Revival style used elements which made some reference to Elizabethan/Tudor architectural details, including brick or white rendered walls to simulate limewash, steeply pitched roof form, and tall chimneys.

The Georgian Revival style was based on an interpretation of English Georgian architecture, using a symmetrical elevation with rendered or brick walls, a fanlight above the central entrance door, a hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico.

Some later notable architecturally designed residences, which were based on the post-war International Style, illustrate the avant-garde trend of domestic architecture in the 1960s. These houses were generally cubiform and were constructed with flat roofs, with large areas of glass in smooth masonry walls. Cantilevered elements and recessed porch areas were typical of the style.

Abbott Lane

Victorian period.

Architectural styles include, but are not limited to, the side frontage of an early Victorian terrace house.

Brougham Court

Late Victorian and Edwardian periods.

Architectural styles include, but are not limited to, detached and semi-detached Victorian and Edwardian villas and the former Ebenezer Chapel.

Brougham Place and Palmer Place

Victorian, Inter-War and Post-War periods.

Exhibits a diverse collection of architectural styles including but not limited to Georgian Revival Villas, Victorian Villas, Neo-Gothic, Terraces and cottages.

Kermode Street

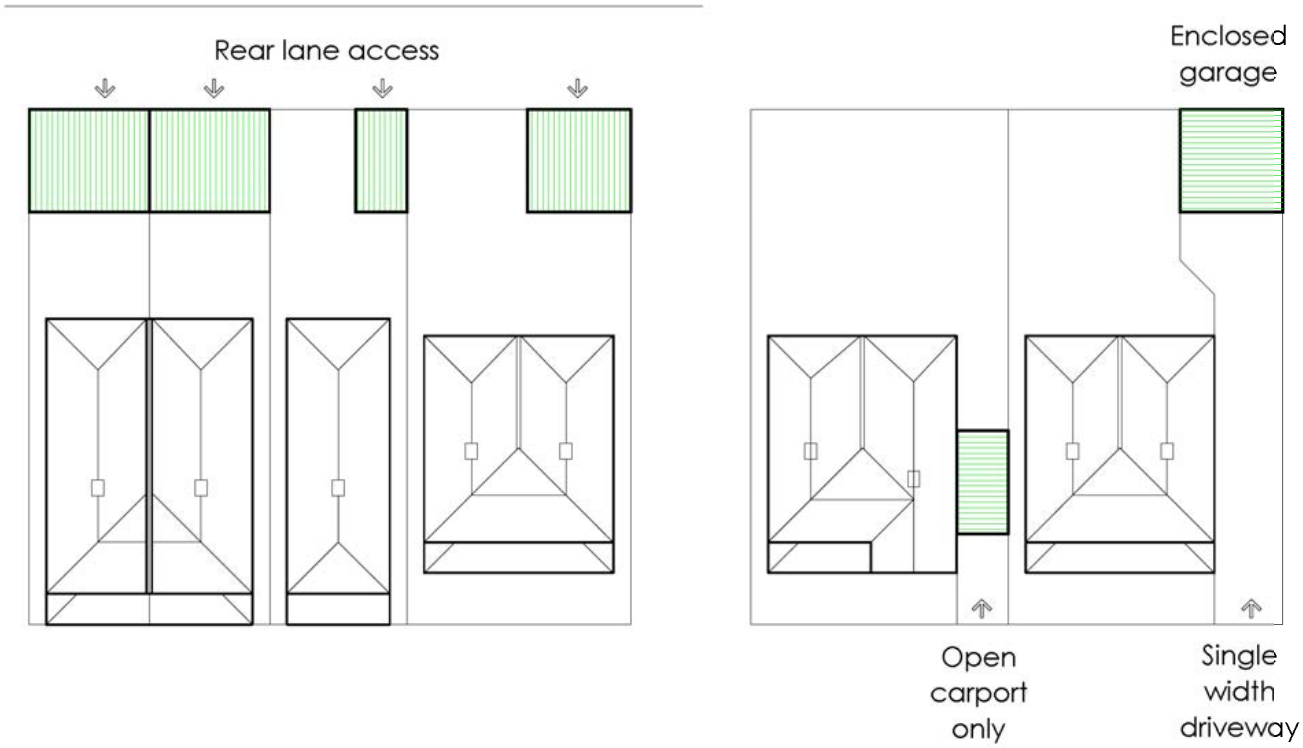
Victorian and Inter-War periods.

Exhibits a diverse collection of architectural styles, including but not limited to Art Deco, Neo-Georgian St Marks College (Memorial Building), an Edwardian villa, Victorian villas, Queens Head Hotel, Old English, Bungalow, Romanesque, Kermode Street Chapel, Italianate Victorian villa and Victorian terraces.

King William Road

Victorian and Inter-War periods.

Exhibits a diverse collection of architectural styles including but not limited to Gothic St Peters Cathedral, Gothic Anglican Church offices, Victorian Italianate Cathedral Hotel, Art Deco Greenways Apartments, Allan Campbell Buildings, Elder Laboratory, Tudor Gothic hospital and Moderne.



Lakeman Street

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

Adel11

**Early Victorian Houses (1837 to 1869)**

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

**Victorian Houses (1870 to 1899)**

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

**Edwardian Houses (1900 to 1915)**

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.

**Inter-War Houses (1916 to 1942)**

In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Brougham Place

Victorian, Edwardian and Inter-war periods.

Architectural styles including but not limited to Victorian villa, Mediterranean villa, Italianate Brougham Place Uniting Church and Victorian residences in St Ann's College.

Jerningham Street

Victorian period.

Architectural styles include, but are not limited to, a Victorian shop with attached dwellings, Victorian detached and semi-detached cottages, and a Victorian villa.

Kingston Terrace

Victorian and Inter-war periods.

Architectural styles, including but not limited to Victorian villas and Neo-Georgian villa, a Coach house relating to Nurney House fronting Stanley Street, and outbuildings relating to St Andrews fronting Stanley Street.

Includes Victorian outbuildings of grand dwellings fronting Stanley Street.

LeFevre Terrace

Victorian and Inter-war periods.

Architectural styles, including but not limited to Queen Anne villa and Arts and Crafts.

New Street

Victorian period.

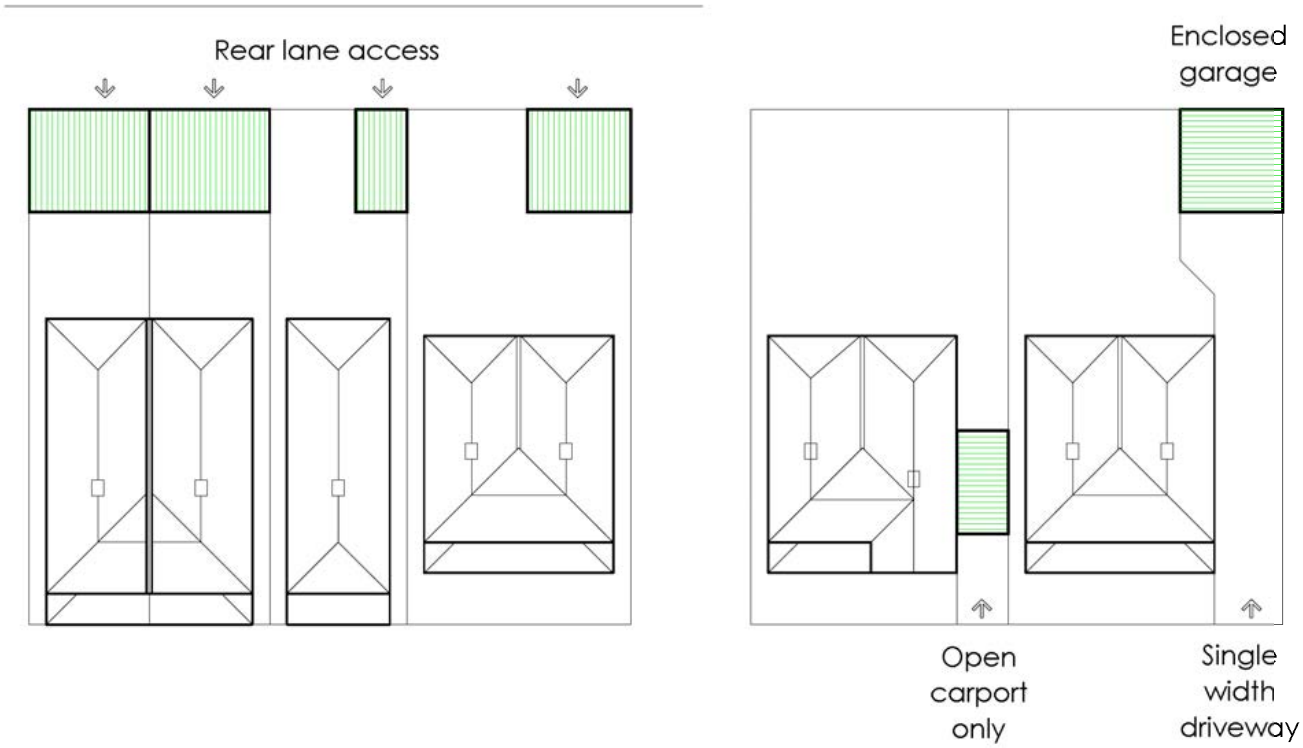
Architectural styles including but not limited to Victorian villa.

Old Street (north side)

Victorian period.

Victorian cottage.

Stanley Street



Victorian, Edwardian and Inter-war periods.

Exhibits a diverse collection of architectural styles including but not limited to Arts and Crafts, Nurney House, St Andrews, Neo-Georgian, Victorian villas, Queen Anne villas, Victorian Gothic Church, Inter-war Mediterranean, Transitional Edwardian – Inter-war, Victorian Italianate villa, Victorian Second Empire and Victorian cottages.

| Statement# | | Statement |
|---|---|---|
| | Building height | Apart from the significantly taller former Congregational Church building at 196 - 210 Brougham Place, there are low-scale, one and two-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings.<br><br>Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality. |
| | Materials | Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following:<br><br>Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered.<br><br>Brick or rendered quoin work and plinths.<br><br>Red brick and rendered chimneys.<br><br>Painted timber window frames, doors and roof trim.<br><br>Vertical proportioned timber windows with double sliding sashes.<br><br>Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges.<br><br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br><br>Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing.<br><br>Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders.<br><br>Paint colours consistent or complementary with the era and style of the dwelling as defined by archival sources. |
| | Fencing | Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings.<br><br>Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites.<br><br>The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources.<br><br>Fencing is characterised by a variety of architectural styles, including:<br><br>**Early Victorian Houses (1837 to 1869)**<br><br>Fences typically were timber pickets, paling or corrugated iron with timber capping.<br><br>**Victorian Houses (1870 to 1899)**<br><br>Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing.<br><br>**Edwardian Houses (1900 to 1915)**<br><br>Fencing contains elements of Victorian and Inter-war fencing.<br><br>**Inter-War Houses (1916 to 1942)**<br><br>Fencing was typically low masonry walls, built from materials matching the main building. |

Undercroft parking is inconsistent with the historic character and value of the Area.

Adel12

The Area is characterised by a variety of architectural styles, including but not limited to:

**Early Victorian Houses (1837 to 1869)**

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

**Victorian Houses (1870 to 1899)**

During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration was used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

**Edwardian Houses (1900 to 1915)**

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.

**Inter-War Houses (1916 to 1942)**

In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.

Arthur Street

Edwardian period.

Architectural styles include but are not limited to Edwardian-Inter-war transitional style red-brick row cottages.

Bower Street

Victorian period.

Architectural styles include but are not limited to late Victorian row cottages on either side of the street exhibiting matching roof and verandah profiles, materials and detailing, and facades unified by continuous verandahs.

Colley Street

Edwardian period.

Architectural styles include, but are not limited to, small Edwardian workers' cottages on the eastern side.

Dunn Street

Victorian and Edwardian periods.

Architectural styles include but are not limited to late Victorian terrace (one) and Edwardian semi-detached dwellings (two) on the eastern side.

East Pallant Street and Mann Street

Victorian period.

Architectural styles include but are not limited to early Victorian corner shop and dwelling of simple design.

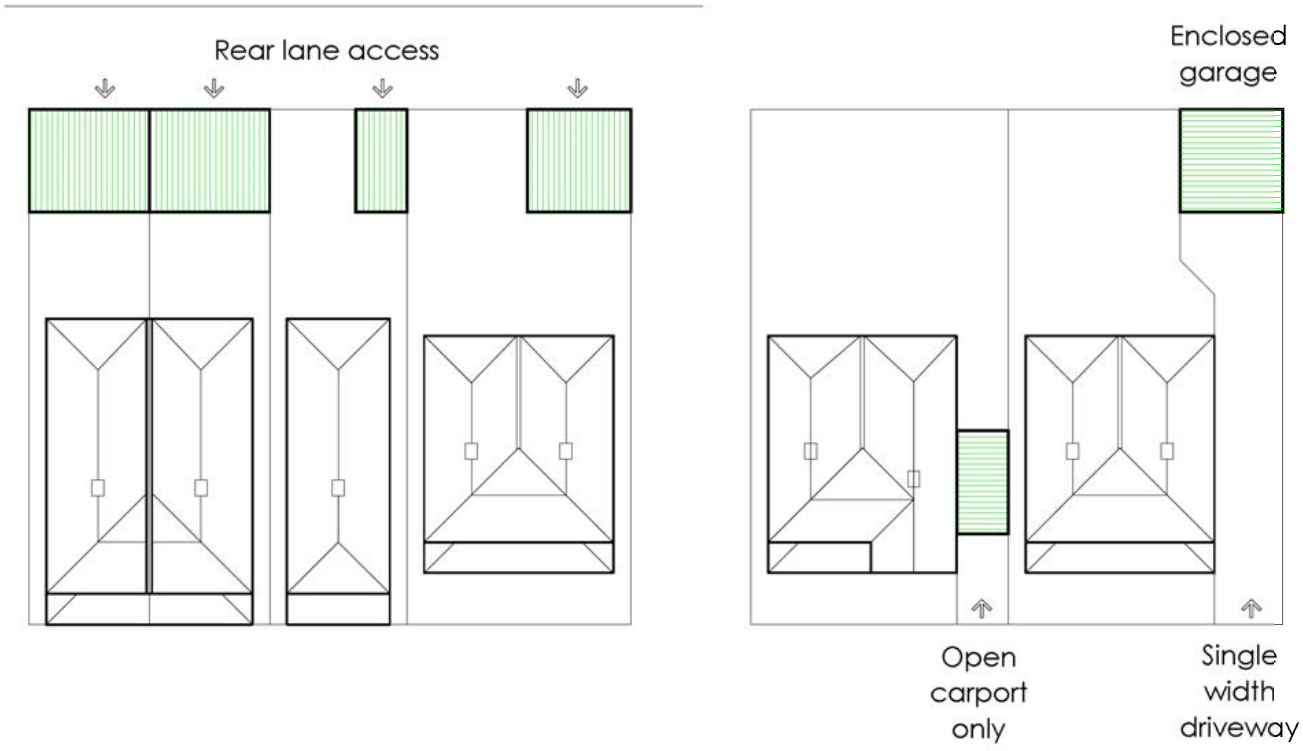
Francis Street East

Victorian period.

Architectural styles include but are not limited to Victorian row cottages on the southern side.

Francis Street

Inter-war period.



Architectural styles include, but are not limited to, an Inter-war Bungalow on the southern side.

Hart Street

Victorian period.

Its topography is characterised by a steep rise from Melbourne Street to Stanley Street, below which the Area is relatively flat. The ridge of the North Adelaide scarp along Kingston Terrace/Stanley Street and the frontages to the Adelaide Park Lands provided the wealthy with 'views and airs' and were considered prestigious residential addresses.<br><br>This Historic Area encompasses lower elevations than the nearby Stanley Historic Area to the north. It accommodates a range of mainly detached housing, from large-scale to modest in scale, representing a broad segment of the historic social mix of North Adelaide.<br><br>Eras<br><br>1837 to 1899 - Victorian period.<br><br>1900 to 1915 - Edwardian period.<br><br>1916 to 1942 - Inter-war period. |
| | Allotments, subdivision and built form patterns | This Area is characterised by intact, low-scale residential development on rectangular allotments of varied size.<br><br>The Area has retained much of its historic grid pattern with major and minor streets, lanes and places.<br><br>A significant feature of this Area is the distinctive, varied alignments of MacKinnon Parade along the perimeter of the Adelaide Park Lands.<br><br>The historic built form character is established by predominantly detached dwellings of low density, with other buildings associated with local services or institutions.<br><br>The far west of the Area is characterised by generally larger, wider allotments with detached dwellings, a pattern with similarities to and merging with the more open, low-density character of the adjoining Stanley Historic Area.<br><br>Narrower and smaller allotments with attached dwellings are more prevalent in the remainder of the Area, including along Stanley Street and Kingston and Mann Terraces, Sussex Street, and other minor streets.<br><br>Typically, deep allotments are located on the northern side of Finnis Street. Other larger allotments tend to be prominent sites facing the Adelaide Park Lands.<br><br>Kathleen Lumley College occupies a large site extending from Finniss Street through to MacKinnon Parade.<br><br>Generally, shallow setbacks from the primary street frontage prevail in minor streets, and more generous setbacks prevail along major streets.<br><br>On larger sites, detached dwellings are set within spacious landscaped open space.<br><br>The building setbacks from front, side and rear allotment boundaries are established by the prevailing Heritage Places and Representative Buildings and do not project forward of Heritage Places or Representative Buildings, including on adjacent sites, nor do they extend to side boundaries other than for party walls in semi-detached and row dwellings.<br><br>Heritage Places and Representative Buildings create a cohesive pattern of shallow setbacks, including buildings on the street frontage.<br>Generally, buildings are set within landscaped grounds and extensive gardens, which typically cover 40 percent of the site.<br><br>The historic built-form character of the Area is established by State and Local Heritage Places and Representative Buildings, reinforcing the character of the historic built form, allotments and subdivision patterns as described below:<br><br>Brougham Place<br><br>The historic streetscape and built form character for this short section of Brougham Place is characterised by corner sites with large dwellings, spacious landscaped open space and an outlook to the Adelaide Park Lands. The pattern, siting and setback of dwellings is established by the Heritage Places.<br><br>Finniss Street<br><br>The historic streetscape is formed by the relatively wide street setting and the one-story detached dwellings set back from the street frontage with front garden areas. There is generally little variation in the setbacks from the street frontage on the northern side, except that the two-storey British Hotel protrudes well forward of adjoining buildings.<br><br>The dwellings on the southern side are consistently set back from the street except for the corner two-storey shop and residential building on the Finniss Street and MacKinnon Parade frontages.<br><br>The area between Finniss Street and MacKinnon Parade also contains the Kathleen Lumley College site, a State Heritage Place, including three primary buildings ranging from two to four storeys. In front of these buildings on the Finniss Street side are cottages.<br><br>The pattern, siting and setback of dwellings is established by the Heritage Places and Representative Buildings.<br><br>MacKinnon Parade<br><br>Significant built edge with outlooks to the Adelaide Park Lands, including low-density Victorian detached dwellings, some of more substantial scale, moderately set back from the primary street frontage.<br><br>The high amenity streetscape is formed by the wide street setting and the Adelaide Park Lands frontage. The historic character comprises single-storey detached dwellings of Local Heritage value setback from the street frontage with front garden areas.<br><br>The historic built form character is also formed by the visual prominence of the State Heritage listed Kathleen Lumley College, comprising three primary buildings ranging from two to four storeys. The landscaped gardens make an important contribution to the streetscape setting.<br><br>Edith Place<br><br>Minor street comprising single-storey detached and semi-detached dwellings set close to the street with verandahs extending to the street frontage (western side).<br><br>The street is characterised by a more intimate, compact built form than on other streets in the Area.<br><br>Finnis Court<br><br>Minor street containing a detached dwelling close to the street frontage with a small front garden area.<br><br>Archer Place and Hudson Street<br><br>Minor streets providing rear vehicle access to properties fronting other streets.<br><br>Johnstone Place<br><br>Minor street with consistent building setbacks and providing rear laneway access for residences facing another street.<br><br>MacKinnon Court<br><br>Minor street containing compact and single-storey detached and semi-detached dwellings with consistent setbacks.<br><br>Newlands Lane<br><br>Provides a pedestrian walkway between Melbourne Street and Finniss Street. |
| | Architectural styles, detailing and built form features | The Area is characterised by a range of architectural styles relating to North Adelaide's development as a residential village from the 1830s to the 1940s.<br><br>The prevailing built form features of the Area include pitched roofs (hipped and/or gable-ended), tall brick chimneys, pitched verandahs, vertically proportioned windows, panelled doors, and decorative mouldings and dressings to masonry. Cohesion is derived from the pattern of detached houses, the consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches.<br><br>The pitch and form of the roof, and the design, form and composition of facades reflect traditional proportions of Heritage Places and Representative Buildings.<br><br>Buildings address the street, and on corner sites, buildings provide facades that address each street frontage. |

| Adel13 | Design elements of Heritage Places and Representative Buildings, such as verandahs, roof forms or historic detailing, maintain historic proportions and are not extended at the same alignment as the main face of the Heritage Place or Representative Building.<br><br>Building additions incorporate materials and proportions that reflect the character of the Heritage Place or Representative Building and are materially compatible with the building.<br><br>Second-storey development is located within the roof space or to the rear of the dwelling behind the ridgeline of the roof.<br><br>Carports, garages, and side additions are located behind the main face of the building and facade and do not dominate the street frontage or significantly alter the historic character of the Heritage Places and Representative Buildings. The illustration below illustrates the typical and appropriate siting of carports and garages.<br><br><br><br><br>Undercroft parking is inconsistent with the historic character and value of the Area.<br><br>The Area is characterised by a variety of architectural styles, including but not limited to:<br><br>**Early Victorian Houses (1837 to 1869)**<br><br>In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.<br><br>**Victorian Houses (1870 to 1899)**<br><br>During this period of intensive development in North Adelaide, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped.<br><br>The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim. Cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.<br><br>**Edwardian Houses (1900 to 1915)**<br><br>Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.<br><br>**Inter-War Houses (1916 to 1942)**<br><br>In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built in North Adelaide during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.<br><br>Housing development essentially stopped in North Adelaide from 1942 to 1950 because of the materials shortages caused by the Second World War.<br><br>Brougham Place<br><br>Edwardian and Inter-war periods.<br><br>Architectural styles include but are not limited to substantial Edwardian Queen Anne and Inter-war Tudor Revival dwellings on prominent corner sites.<br><br>Architectural styles include but are not limited to predominantly Victorian and some Georgian Revival villas or cottages.<br><br>Prominence of the British Hotel with its fine detailing and cantilevered balcony.<br><br>Edith Place<br><br>Victorian period.<br><br>Architectural styles include but are not limited to Victorian detached and semi-detached cottages (western side).<br><br>Finnis Court<br><br>Victorian period.<br><br>Architectural styles include but are not limited to Victorian cottages.<br><br>Finniss Street<br><br>Victorian and Inter-war periods.<br><br>MacKinnon Court<br><br>Victorian period.<br><br>Architectural styles include but are not limited to Victorian detached and semi-detached cottages.<br><br>MacKinnon Parade |

| Statement# | | Statement |
|---|---|---|
| | | Victorian and Inter-war periods.<br><br>Architectural styles include but are not limited to Victorian cottages and villas, and the occasional Georgian Revival residence. |
| | Building height | Low scale, mainly one-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings, except where the following Concept Plan applies:<br><br>• Concept Plan 25 – Kathleen Lumley College<br><br>Two-storey buildings contributing to the prevailing historic character and/or of heritage value are the British Hotel and Finniss Corner (at 1-3 Finniss Street), and buildings of Heritage value (but more recent origin), ranging from two to four storeys in the Kathleen Lumley College site between Finniss Street and MacKinnon Parade.<br><br>Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality. |
| | Materials | Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following:<br><br>Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered.<br><br>Brick or rendered quoin work and plinths.<br><br>Red brick and rendered chimneys.<br><br>Painted timber window frames, doors and roof trim.<br><br>Vertical proportioned timber windows with double sliding sashes.<br><br>Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges.<br><br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br><br>Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing.<br><br>Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders.<br><br>Paint colours consistent or complementary with the era and style of the building as defined by archival sources. |
| | Fencing | Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences, sometimes with piers and cast-iron railings.<br><br>Typical fencing defining property frontages is constructed of brick, stone or stone and cast-iron boundary walls and new fencing should unify the streetscape through the use of traditional materials.<br><br>Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites.<br>The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources.<br><br>Fencing is characterised by a variety of architectural styles, including:<br><br>**Early Victorian Houses (1837 to 1869)**<br><br>Fences typically were timber pickets, paling or corrugated iron with timber capping.<br><br>**Victorian Houses (1870 to 1899)**<br><br>Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing.<br><br>**Edwardian Houses (1900 to 1915)**<br><br>Fencing contains elements of Victorian and Inter-war fencing.<br><br>**Inter-War Houses (1916 to 1942)**<br><br>Fencing was typically low masonry walls, built from materials matching the main building. |
| | Setting, landscaping, streetscape and public realm features | Characterised by the linear grid of tree-lined major streets as well as minor streets and lanes, areas of original stone kerbing and guttering, landscaped front grounds to residences, and driveways/crossovers of single width where vehicle access prevails on primary street frontages.<br><br>Views and vistas of the Adelaide Park Lands from Brougham Place and MacKinnon Parade.<br><br>An attractive pedestrian environment provides pedestrian shelter and amenity, provided by street trees and a high standard of paving and other landscaping to the public realm along major streets.<br><br>Vehicle access is provided from rear laneways or minor streets. Rear lane access, where vehicle access does not prevail on primary street frontages.<br><br>Stone kerbing and water table in Edith Place.<br><br>Stone in concrete kerbing and water table along MacKinnon Parade.<br><br>Enamel street number plates along Finniss Street and Brougham Place.<br><br>Established avenue planting in Finniss Street and MacKinnon Parade.<br><br>Prominence of the British Hotel with its fine detailing and cantilevered balcony.<br><br>Visual prominence of the State Heritage Place of Kathleen Lumley College.<br><br>Visual prominence to Brougham Place Uniting Church.<br><br>Vehicle access is via minor streets, side and rear lanes. Vehicle access points have been designed and located to maintain historic kerbing and trees. |

| | **Adelaide Historic Area Statement (Adel 14)** | |
| | Eras, themes and context | <u>Themes and Context</u><br><br>Adelaide's identity is shaped by its unique grid pattern and hierarchy of streets. Its rectangular geometry contrasts with the natural setting provided by the Adelaide Park Lands and views to the Adelaide Hills. The pattern of Squares reinforces the city's geometry. Colonel Light's visionary layout of Adelaide and its Park Lands was recognised through its National Heritage listing in 2008.<br><br>Adelaide is part of the historic plan of the city of Adelaide. The historic character of Adelaide provides strong cultural and historic evidence of the creation of the colony, the establishment and consolidation of early settlement and the subsequent development of South Australia's capital city over time.<br><br>Significant features include the natural and cultural landscape, which creates the physical setting and the hierarchy of wide and narrow streets, squares and gardens in the 'square mile' of Adelaide. The arrangement of the plan had the effect of creating interest in development facing the Adelaide Park Lands, resulting in characteristic housing of substantial scale in proximity to the Adelaide Park Lands.<br><br>The Area demonstrates the layout and settlement patterns of the City of Adelaide from the 1830s. Residential development of the area in Victorian times was accompanied by the establishment of shops and other services. The subdivision of Town Acres into a network of minor streets and lanes lined with cottages occurred in distinct phases, most rapidly during the late 1870s and 1880s. Some small cottages were built earlier, during the 1850s and 1860s, on some minor streets (e.g. Ada Street).<br><br>The historic character of the south-east corner of the city provides strong cultural and historical evidence of the creation of the colony and the consolidation of early settlement in Adelaide.<br><br>Light's Plan utilised a regular grid pattern, and although the original Town Acres within the south-east corner of the city have been divided and further developed, Light's Plan has been preserved as he conceived it. Adelaide was once predominantly a residential city. The existing late nineteenth-century character of the south-east corner of the city continues to reflect this. The Area retains a broad range of residential stock, from grand villas on South and East Terraces overlooking the Adelaide Park Lands to humble cottages lining the smaller streets, established during the course of successive subdivisions. The Area also includes a collection of building types important for any community. These include St John's Anglican Church, hotels and retail premises in Hutt Street.<br><br>The South Australian Company held title to many Town Acres, and until the 1860s, leased them for grazing and hay-making. On 4 January 1870, the Register newspaper noted that, particularly in the south-eastern portion of the city, the company had released allotments for sale and that this 'led to the erection of numerous cottages, many if not most of which have been built and are owned by the occupants'. The surviving cottages built in those years are typically small-scale, low-set with high-pitched roofs, small casement windows, low ceilings, and built close to neighbours. Killua Place (now Ada Street) forms part of the land originally comprising Town Acres 578 and 589 and illustrates several phases of development, typical of the Area. One house was built in 1857, with all houses on the western side of Ada Street built between 1874 and 1884 and five houses built on the eastern side in 1907. The more elaborate dwellings in the south-east corner of the city were erected for prosperous residents. Most of these grand residences were built during the economic boom period of the late 1870s and 1880s. Other substantial developments occurring during this period include row terraces and additional cross streets. The main shopping centres in Adelaide were located further to the north and west, but a small retail precinct developed along the nearby Hutt Street, with corner shops in the residential streets serving local residents' needs. The south-east corner of the city has remained devoid of industry and heavy trades, which were concentrated in the western portion of the city. This has further served to preserve the residential and relatively uniform character in the south-east.<br><br><u>Eras</u><br><br>1837 to 1899 - Victorian period.<br><br>1900 to 1915 - Edwardian period.<br><br>1916 to 1942 - Inter-war period. |
| | Allotments, subdivision and built form patterns | The subdivision of Town Acres in the south-east into a network of streets and lanes lined with cottages occurred in distinct phases, most rapidly during the later 1870s and 1880s, although small cottages were built from the 1850s. These cottages were built on small allotments, on the smaller streets, and fronted directly onto the footpath.<br><br>The Area has retained its historic rectilinear grid with major and minor streets, lanes and places.<br><br>The historic built form character is established by small-scale detached and attached dwellings exhibiting a regular pattern and rhythm of form, scale, and siting. |

| Statement# | | Statement |

Adel14

Undercroft parking is inconsistent with the historic character and value of the Area.

The Area is characterised by a variety of architectural styles, including but not limited to:

**Early Victorian Houses (1837 to 1869)**

In the initial period of settlement, corresponding with the early Victorian period, houses were typically small, low-scale and of a simple form. Small houses such as this were built on or close to the street alignment and were constructed of rubble walling of limestone and bluestone, or of locally fired bricks. Generally, these small cottages were straight fronted with a symmetrical arrangement of a central door and windows on either side. Variations in form included a front wall built up as a parapet, with a low hipped roof behind, or end gable walls, with a simple ridged roof line between the gable ends. Verandahs were sometimes added later, but the low scale of these buildings often made this difficult.

**Victorian Houses (1870 to 1899)**

During this period of intensive development, solid masonry houses of a range of forms and scales were constructed in large numbers. The detail on these houses is specifically derived from 'classical' Italianate sources, but the forms were varied, and included single-fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay-fronted projections. Each of these forms could be single or two-storey, and all were built in a variety of sizes and scales. Houses in this period characteristically had verandahs with the roof most commonly of concave or convex form, and were typically constructed of bluestone, limestone or sandstone, often with side and rear walls of brick or rubble. Roofs were generally hipped in form, but with the asymmetrical style, the roof to the projecting bay could be gable-ended or hipped. The vertically proportioned window and door surrounds were highlighted with either moulded render or brick dressings. The cast iron or timber posts to the verandahs were elaborated with moulded capitals and trim and cast iron brackets and frieze decoration were used widely. Windows and doors were timber framed, and doors were typically four panelled, with fanlights and often sidelights.

**Edwardian Houses (1900 to 1915)**

Houses of this period reflected new sources of design and architectural approach current in Britain, Europe and to some degree, North America. The emphasis on a straightforward, often symmetrical, form was overwhelmed by a more picturesque approach to roof forms and elevations. Sources of styles for this period included Queen Anne, Arts & Crafts and Art Nouveau styles, which were often transmuted into a particularly Australian style as this period coincided with the Federation era. The earlier houses in this period continued with some transitional use of materials such as ashlar stone with brick dressings or moulded render, but with verandahs with convex (or bullnose) profile. Later in the period, distinctive 'rock face' sandstone (or freestone) was used in the wall material. Houses of face brick walling with decorative brick detailing were also constructed during this period. Other characteristic features of houses of this period include prominent strapped gables and detailing, tall brick chimneys, and verandahs that were often incorporated under the main pitch of the roof. During this period, imported unglazed terracotta Marseilles roof tiles were introduced, although corrugated iron also continued to be used for roof cladding. Windows and doors continued to be constructed of timber, but windows were often grouped, and doors were often divided into three or four horizontal panels.

**Inter-War Houses (1916 to 1942)**

In the period between the First World War and the Second World War, new styles developed, particularly the Bungalow (based on the Californian version) and Tudor Revival styles. Bungalows incorporated a broad spreading roof and verandah with typical masonry columns supporting verandah elements, and the expansive two-storey version was often known as a Gentlemen's Bungalow. The roof tiles used were Australian-made Wunderlich tiles of the same profile as earlier Marseilles tiles. The Tudor Revival style displayed steeply pitched roofs with half timber gable ends and variations of the verandah porch treatment. Other styles which were built during this period included Spanish Mission (or more often 'Mediterranean') and Art Deco/Moderne, although these are not as common. During this period, timber joinery remained characteristic of the housing styles, but there was some use of metal framed windows.

Housing development essentially stopped during the period 1942 to 1950 because of the materials shortages caused by the Second World War.

Ada Street

Victorian period.

Exhibits a collection of architectural styles, including but not limited to Victorian row cottages, semi-detached cottages and detached bay window cottages.

Consistent pitched roof profiles, verandahs, fenestration and material.

Allen Place

Edwardian and Inter-war periods.

Exhibits a collection of architectural styles, including but not limited to a cohesive group of small dwellings of a pre-WWI transitional Edwardian-Inter-war style.

Carrington Street (west of Hutt Street)

Victorian period.

Exhibits a collection of architectural styles including but not limited to Victorian detached and semi-detached and Victorian row cottages and terraces.

Carrington Street (east of Hutt Street)

Victorian period.

Exhibits a collection of architectural styles, including but not limited to Victorian Terrace houses, Victorian corner shop-dwelling and a larger number of single-storey Victorian cottages and row cottages.

Corryton Street (north of Gilles Street)

Victorian period.

Exhibits a collection of architectural styles, including but not limited to a long single-storey row of Victorian workers' cottages, with a horizontal emphasis created by common roof and verandah profiles.

Corryton Street (north of Halifax Street)

Victorian period.

Exhibits a collection of architectural styles, including but not limited to Victorian semi-detached and detached cottages with a rhythm of narrow dwelling facades, fenestration, pitched roof profiles and verandahs.

Gilles Street

Victorian, Edwardian and Inter-war periods.

Exhibits a collection of architectural styles, including but not limited to Bungalow, Gothic and Queen Anne influences, Victorian cottages, villas and terraces with some Gothic influences.

| | Building height | Low scale, predominantly one-storey residential buildings. Established by the prevailing patterns set by Heritage Places and Representative Buildings. The buildings are single-storey with the following exceptions:<br><br>• Two storey Victorian dwellings in Carrington Street (302, 304, 306, 308, 346, 355, 357, 359, 361, 361A, 363, 365, 365A and 367), and at 10 Ada Street, 348 Gillies Street, 298, 364 and 366 Halifax Street, 20 Kate Street, and 66, 71 and 73 McLaren Street.<br>• Taller St John's Church complex near corner of Halifax and St John Streets and two-storey factory in Regent Street South (1 Pope Court).<br><br>Second level additions not protruding above the roof line or apparent from the primary street.<br><br>Building height, including the floor-to-ceiling clearances of each level, references the prevailing floor levels and building heights of Heritage Places and Representative Buildings within the locality. |
| | Materials | Buildings utilise materials relating to their architectural style as described in the various sections of this Statement. The prevailing materials vary between streets but typically include the following:<br><br>Sandstone, bluestone, limestone/freestone and red brick and sometimes rendered.<br><br>Brick or rendered quoin work and plinths.<br><br>Red brick and rendered chimneys.<br><br>Painted timber window frames, doors and roof trim.<br><br>Vertical proportioned timber windows with double sliding sashes.<br><br>Some elaborate decorative elements include painted timber fretwork, cast iron lacework on verandahs, finials, cover battens on gables, and decorative barges.<br><br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br><br>Corrugated steel, slate, lead, zinc and terracotta (latter period) roofing.<br><br>Coated surfaces finished in natural render, limewash, cement or mineral paints, not plastic coatings or renders.<br><br>Paint colours consistent or complementary with the era and style of the building as defined by archival sources. |
| | Fencing | Low or open front fencing to the front property boundary line (including secondary streets to the main façade of the building) with the traditional period and style of the building nominally 1.2 metres, allowing views to the building, including simple timber picket styles, timber post and rail styles, and low masonry fences sometimes with piers and cast-iron railings.<br><br>Side and rear boundary fences behind the line of the main building façade rise to a maximum height of 2 metres, and 1.8 metres on corner sites.<br><br>The design of new fencing reflects historically sympathetic fencing styles evident in the streetscape and archival sources.<br><br>Fencing is characterised by a variety of architectural styles, including:<br><br>**Early Victorian Houses (1837 to 1869)**<br><br>Fences typically were timber pickets, paling or corrugated iron with timber capping.<br><br>**Victorian Houses (1870 to 1899)**<br><br>Fences were typically of masonry base and piers with cast iron panels or railings, although evidence of timber railing can still be found. Smaller houses continued to use timber picket fencing.<br><br>**Edwardian Houses (1900 to 1915)**<br><br>Fencing contains elements of Victorian and Inter-war fencing.<br><br>**Inter-War Houses (1916 to 1942)**<br><br>Fencing was typically low masonry walls, built from materials matching the main building. |
| | Setting, landscaping, streetscape and public realm features | Linear grid of tree-lined streets with laneways relating to the subdivision of the original Town Acres.<br><br>Intimate, enclosed streetscape along Ada, Gladstone, and McLaren Streets, and Regent Street South, maintained by highly consistent, closely spaced dwellings and front verandahs on or close to the frontages on both sides.<br><br>Landmark qualities of St John's Church, Meeting Hall and Rectory.<br><br>Landscaped open space with significant vegetation. |

| Statement# | Statement | |
|---|---|---|
| | | Public and private open spaces incorporating landscaping to street frontages.<br><br>Vehicle access is via minor streets, side and rear lanes.<br><br>Vehicle access points have been designed and located to maintain historic kerbing and significant trees.<br><br>Stone kerbing and water table in Ada Street. |
| | Representative Buildings | Identified - refer to SA planning database. |
| **Historic Areas Affecting Adelaide Hills Council** | | |
| AdHi1 | **Mylor Historic Area Statement (AdHI1)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880 to late 1890s. Commercial centre. Workingmen's Block movement. |
| | Allotments, subdivision and built form patterns | Uniform rectangular allotments fronting the main street. Large site areas. Large street frontages. Varying front setbacks (residential development has generous setbacks with commercial/retail development located closer to the front boundary to address the main street). Varying side setbacks, with limited boundary development. |
| | Architectural styles, detailing and built form features | 1890s commercial buildings interspersed with a variety of civic and residential buildings. |
| | Building height | Generally small scale, single storey construction with the exception of the larger public buildings such as the Uniting Church and the former Institute building. |
| | Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked and bullnose verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective incorporating a natural autumnal palate. |
| | Fencing | Front fences of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, to a height of 1200 millimetres. |
| | Setting, landscaping, streetscape and public realm features | Rustic character. The township is enclosed on three sides by highly valued remnant vegetation within the Mylor Parklands. Leslie Creek and Aldgate Creek meander through the township before joining up with the Onkaparinga River to the south. The main entrance to Mylor from the north is marked by bridge crossings over Leslie and Aldgate Creeks, the war memorial and views to an avenue of deciduous trees which define the centre of the township. Views of the historic building within the primary school.<br><br>Other important views along Strathalbyn Road include the heritage buildings containing the general store and rural supplies establishment which defines the southern entry to the township. Wide landscaped verge that incorporates an avenue of trees along Strathalbyn road accentuates the historic built form.<br><br>Vehicular access at the rear of allotments fronting Strathalbyn Road. |
| | Representative Buildings | *[Not identified]* |
| AdHi2 | **Stirling - Ayres Hill Road Historic Area Statement (AdHI2)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Mid to late 1880s residential. |
| | Allotments, subdivision and built form patterns | Large blocks of land. Larger houses on large, well vegetated grounds. Dwellings set well back from the street boundary. Smaller subordinate buildings located closer to the street boundary. |
| | Architectural styles, detailing and built form features | The architectural style of the buildings varies with their date of construction. |
| | Building height | Building height to 9 metres. Original scale of buildings. |
| | Materials | Consistent with the materials associated with the architectural style of the subject building. Random, coursed and dressed stone. Rendered stone. Brick, stone and rendered quoins. String courses. Hipped and gabled roofs. Dormer windows. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. Decorative cast iron features. Brick and stone chimneys. Stone Porticos. Decorative and ornate timber bargeboards. External finishes non-reflective and utilise natural colours. |
| | Fencing | Front fencing of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, with varying heights to between 1200-1800 millimetres. |
| | Setting, landscaping, streetscape and public realm features | 'Secluded' nature of houses, in most cases set well back on their blocks, hidden behind the gardens and hedges.<br><br>Streetscape is dominated by tree plantings and fencing behind which can be seen the larger trees and shrubs of the gardens. The lower section of the road (from Laurel Road to the roundabout near St Catherine's) is winding and bordered by hedges and trees. The upper portion of the road is straight and reveals a wider footpath margin than the lower section, adding to the feeling of privacy of the houses.<br><br>Wide footpath verges which are of a rustic nature.<br><br>Row and avenue plantings of exotic trees in the road verges. |
| | Representative Buildings | *[Not identified]* |
| AdHi3 | **Woodside Historic Area Statement (AdHI3)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Late 1880s. |
| | Allotments, subdivision and built form patterns | Original grid subdivision pattern. Uniform rectangular allotments. |
| | Architectural styles, detailing and built form features | The predominant character is single storey detached dwellings with an eclectic mix of European architecture set in large landscaped surrounds, interspersed with buildings including workers cottages and churches, at times built to the front boundary. The architectural style of the buildings varies with their date of construction. |
| | Building height | Primarily single storey detached buildings. |
| | Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective and utilise natural colours. |
| | Fencing | Front fencing of pickets, post and wire, and masonry (exposed or rendered brickwork or stonework), with maximum heights ranging from 1000 of 1200 millimetres. |
| | Setting, landscaping, streetscape and public realm features | Relatively narrow streets, typically featuring box-style kerb and gutters, do not often have footpaths. |

| Alex6 | **Milang Neighbourhood, Township Activity Centre and Conservation Historic Area Statement (Alex6)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1850s-1920s<br><br>Milang's location on the western shore of Lake Alexandrina has been pivotal in its colonial development as a thriving river port. This economic influence, in addition to typical civic services has left a legacy of industrial, civic and domestic buildings, mostly built of local limestone, and a surviving subdivision<br>pattern from the 1850s.<br><br>Since the 1920s, with the decline of commercial activity, Milang has developed as a tourist, retiree and holiday destination.<br><br>The substantial Institute building and several commercial buildings including the old Butter Factory, former Lake Hotel and current Pier Hotel stand out as larger buildings in an essentially low-rise environment. These buildings should remain the most prominent structures within their localities, with new development subservient and reverential to them.<br><br>Surrounding residential development is characterised by a mixture of simple vernacular cottages built in the mid to late 1800s, of local random stone, and more substantial double fronted cottages, villas and the occasional asymmetrical cottage with Victorian stylistic influences. |
| | Allotments, subdivision and built form patterns | The original township pattern remains clearly evident and should be retained and reinforced by any new divisions.<br><br>The dominant subdivision pattern is rectilinear, with buildings parallel to boundaries. Front setbacks vary considerably, although as a rule older buildings are sited closer to front boundaries, some with zero setbacks.<br><br>There are minimal 'hammerhead' or cul-de-sac arrangements, and this form of division should be discouraged.<br><br>The distinct pattern of reserves and parklands surrounding Luard, Maroo and Lyon Streets should be retained as open landscaped areas surrounding the original central survey on three sides (the fourth side being the lake). |
| | Architectural styles, detailing and built form features | The early character of Milang can still be readily discerned through the historic buildings that remain from the 1850s to the early 1900s and the original subdivision pattern, which left a rich legacy of buildings including prominent public buildings, churches and a large number of private residences of varying scales and degrees of detail, mostly constructed of stone.<br><br>It is envisaged Coxe Street and Daranda Terrace will serve as the primary retail areas of Milang complemented by adjacent streets within the Township Activity Centre providing small scale retail facilities catering more for the holiday maker, such as art galleries and tea rooms. It is expected that development along these streets will be mindful of the backdrop to adjacent streetscapes in terms of building bulk, height, overshadowing and overlooking. The floor areas of new buildings will be in the order of those of adjacent historic buildings, but deferential to landmark sites. Overall, development will continue to accommodate the range of small-scale retail and commercial land uses to serve the day to day needs of the local population while retaining Milang's distinctive historic character. In the commercial/civic core of the township, buildings tend to be sited on or close to street boundaries. Many former shops and workshops have been converted to dwellings over the years although many original features remain and should be conserved.<br><br>It is desirable that sites currently containing development incompatible with the existing character of the policy area be redeveloped with residential development more in keeping with the prevailing historic character. The form of buildings, and the colours and materials used, need to be in keeping with those used on historic buildings existing within the policy area. Existing mature vegetation, walls and fences contribute to character and need to be retained and integrated with any future development.<br><br>Future residential development within the Historic Area Overlay will complement the existing single storey form, design, siting and appearance of the historic built form. Development closer to street frontages should have a higher degree of consideration to the historic character and development further from street frontages with less contribution to the streetscape character should be screened by substantial vegetation such as large trees, shrubs and hedges.<br><br>Outbuildings tend to be alongside or to the rear of the dwelling.<br><br>Front verandahs are common, both concave and convex and the more substantial dwellings have verandahs front and side.<br><br>Roof forms are a mixture of gable and hipped, typically at a pitch of 20° to 30° with corrugated iron roofs.<br><br>Exclusively single-storey, high solid to void ratio, vertical proportions to doors and windows, and fine grain detail in elements such as plinths, door and window quoins and projecting sills predominate. |
| | Building height | Single-storey residential with typical proportions of Victorian era cottages with wall heights of 3m plus and overall heights of 4m to 5m. |
| | Materials | Materials are typically random stone, stone and brick dressings, with brick chimneys and timber joinery. Typically, these materials would have been sourced locally including underlying limestone. There are three corrugated iron-clad dwellings, one of which is State Heritage listed. |
| | Fencing | Predominantly low, around 1metre high, timber picket, post and wire, open wire, corrugated iron and occasional hedges. Many properties have no front fencing and in others landscaping is used to delineate boundaries. Overall impression is of low, unobtrusive front and side fencing. |
| | Setting, landscaping, streetscape and public realm features | This is a low-scale, essentially residential lakeside township with a focus on the water and historic artefacts associated with 19th century river and lake trade.<br><br>There are significant pockets of tree cover which are prominent in the streetscape, in the surrounding parklands, along Luard Street and the central part of Daranda Terrace. Elsewhere landscaping is casual and scattered.<br><br>The township has an informal feel. Many streets have no stormwater infrastructure and in others, kerb and gutter are "under" rather than "over" engineered, presenting a more natural appearance more like a country lane. Verges are untended for the most part, or casually landscaped, and Marroo Street and Lyon Street are unsealed. |
| | Representative Buildings | [Not identified] |
| | **Milang Shacks Conservation Historic Area Statement (Alex7)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |

| Statement# | Statement | |
|---|---|---|
| Alex7 | Eras, themes and context | 1948-1960.<br><br>Milang's proximity to Adelaide made it a desirable riverside site for shacks. The first shack appeared in Milang in 1947. Shacks are a familiar feature of many coastal and riverine locations and have played a significant role in the holiday ethos of South Australia.<br><br>The shacks provide sleeping accommodation, a place to prepare meals, eat and relax, and a place to store fishing and other equipment for holiday use only, not permanent occupation. Each have their own macerator that pumps effluent to the main CWMS tanks at the Todds Hill / Daranda Terrace area. Rainwater is collected from the roof of each shack. Public facilities on the foreshore also provide toilets and showers. Shacks now have electricity connected and electric lights and appliances replace the ice-chests, and kerosene lamps and stoves once used. |
| | Allotments, subdivision and built form patterns | There are 92 shacks in three distinct rows on the foreshore. Allotments are typically 5-6m wide and 10-12m deep. |
| | Architectural styles, detailing and built form features | Uniform in design, being simple rectilinear forms with simple gabled roofs of 10-20 degrees, with simple detailing. Small, simple verandahs of low pitch. |
| | Building height | Predominantly single storey with minimal two-storey structures. Wall heights typically 2.4m. Overall heights approximately 3m. |
| | Materials | Lightweight materials including fibre cement sheet, weatherboard and corrugated materials with timber and aluminium windows and doors. Colours vary greatly which is part of the charm and character of the locality. |
| | Fencing | No fencing between shacks. Some balustrades and enclosed verandahs. |
| | Setting, landscaping, streetscape and public realm features | Intimate, informal setting with some grassed common areas and scattered trees of modest size. |
| | Representative Buildings | [Not identified] |

**Historic Areas affecting The Barossa Council**

Baro1

**Angaston Centre Historic Area Statement (Baro1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Early settlement in 1850s and 1860s. 19th and early 20th Century buildings and streetscapes. |
| Allotments, subdivision and built form patterns | Original development and subdivision pattern, especially in the vicinity of Hannay Crescent including the cemetery allotment. |
| Architectural styles, detailing and built form features | Banks, churches and hotels along Murray Street. Early post-supported verandas along sections of Murray Street. |
| Building height | Two storeys. |
| Materials | *[Not stated]* |
| Fencing | *[Not stated]* |
| Setting, landscaping, streetscape and public realm features | Significant visual backdrop formed by the hills, cemetery and stone walling when viewed from the Hannay Crescent area and Murray Street.<br><br>The configuration of Murray Street with a bend at the Sturt Street junction provides interesting vistas east and west along the street.<br><br>A vista is evident along Washington Street towards the Town Hall. Marble walling in front of the former Station Masters Residence, and former animal pound walls on the railway land.<br><br>Along Murray Street, the paddock like nature of the land adjoining the creek bank links with the residential surrounds and, in association with the Murray Street park and rural backdrop, creates an attractive setting.<br><br>Mature landscaping, deciduous street trees, Moreton Bay Fig trees, English Elm and the grouping of deciduous trees adjacent to the Laucke Mill on Murray Street. |
| Representative Buildings | Identified - refer to SA planning database. |

Baro2

**Angaston Residential Historic Area Statement (Baro2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Late 1800s.<br><br>1920s, second wave of prosperity for Angaston in the 20th Century. |
| Allotments, subdivision and built form patterns | *[Not stated]* |
| Architectural styles, detailing and built form features | Substantial residences in 1879-80.<br><br>Residences of the 1920s. |
| Building height | *[Not stated]* |
| Materials | Local stone. |
| Fencing | *[Not stated]* |
| Setting, landscaping, streetscape and public realm features | Tree lined streets, attractive gardens, varied topography, mature white cedars along Schilling Street, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature ficus at the base of Dean Street, mature gums along the creek, and cypress hedges to many 1920s dwellings.<br><br>Angas Recreation Park forms an important element located within the residential area. The park between Dean Street and Hill Street and Angaston Children's Reserve provides an open area for community use. |
| Representative Buildings | Identified - refer to SA planning database. |

Baro3

**Bethany Historic Area Statement (Baro3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Established in 1842 - one of the earliest substantial German settlements in the Barossa. |
| Allotments, subdivision and built form patterns | Subdivided according to the hufendorf principle of long strips. Houses built close to the road with long narrow allotments stretching out behind, together with significant timber structures, particularly farm buildings either close to the road or behind the farm houses. |
| Architectural styles, detailing and built form features | Early houses dating from the 1850s and the 1860s, many of which retain layouts and construction techniques clearly indicating their German origin. |
| Building height | *[Not stated]* |
| Materials | *[Not stated]* |
| Fencing | *[Not stated]* |
| Setting, landscaping, streetscape and public realm features | The Herberge Christi Lutheran Church and the cemetery in the eastern end of the settlement form a dominant element.<br><br>Vegetation and landscaping located within the public realm and mature street tree plantings lining the road, together with the mature gardens associated with the early dwellings. The Tanunda Creek, the Bethany Reserve and the creek crossing at Bethany Road are also important to the character of the settlement. |
| Representative Buildings | Identified - refer to SA planning database. |

**Krondorf Historic Area Statement (Baro4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | Statement | |
|---|---|---|
| Baro4 | Eras, themes and context | Established in 1847. First plan of division 1877. |
| | Allotments, subdivision and built form patterns | Division of land undertaken to the hufendorf arrangement. Linear nature. |
| | Architectural styles, detailing and built form features | Early farm complexes and buildings indicative of its early date of settlement. |
| | Building height | *[Not stated]* |
| | Materials | Pioneer building techniques and specifically German traditions in construction. Significant stone and timber structures, particularly farm sheds. |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | Buildings close to the road alignment. Zum Kripplein Christi Church ("Manger of Christ") forms a dominant building in the middle of the settlement. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Moculta Historic Area Statement (Baro5)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Baro5 | | |
|---|---|---|
| | Eras, themes and context | Early service town in the northern agricultural plains comprising small scale development. |
| | Allotments, subdivision and built form patterns | Simple linear nature. |
| | Architectural styles, detailing and built form features | Early residential and commercial buildings along Truro Road. |
| | Building height | *[Not stated]* |
| | Materials | *[Not stated]* |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | Row of mature Carob street trees lining Truro Road. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Mount Pleasant Centre Historic Area Statement (Baro6)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Baro6 | | |
|---|---|---|
| | Eras, themes and context | Service centre for the surrounding pastoral area. |
| | Allotments, subdivision and built form patterns | Linear nature of settlement along Melrose Street. |
| | Architectural styles, detailing and built form features | Consistent early dwellings, the former bank building at the pivotal junction of Melrose Street and Saleyards Road, the ruins of the Henry Giles' early flour mill on the corner of Glen Devon Road and Melrose Street. |
| | Building height | *[Not stated]* |
| | Materials | *[Not stated]* |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | Substantial buildings including the two hotels. Mature street planting. |
| | Representative Buildings | Identified - refer to SA planning database. |

Stockwell Historic Area Statement (Baro7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Baro7 | | |
|---|---|---|
| | Eras, themes and context | A rural character that highlights the early agricultural development of the district. |
| | Allotments, subdivision and built form patterns | Reflects the earliest periods of subdivision and also the later expansion of the town. |
| | Architectural styles, detailing and built form features | Significant public and private buildings located along Duckponds Road. Former steam powered flour mill. |
| | Building height | Low scale. |
| | Materials | *[Not stated]* |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | Central concentration of public and residential buildings with the prominence of the St Thomas Lutheran Church. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Williamstown Historic Area Statement (Baro8)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| | Eras, themes and context | 1860s and 1870s. |
| | Allotments, subdivision and built form patterns | Original street pattern including the junctions of the main roads in and out of town. Grid structure. |
| | Architectural styles, | Forrester's Lodge, the Institute, the Post Office and the Hotel at the northern end of Queen Street, the small stone commercial structures at the south end of Queen Street, the small, but representative Churches located within the town, including the Uniting Church, the |

| Statement# | Statement | |

**Historic Areas affecting City of Burnside**

**Rose Park Historic Area Statement (Bur1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1880 - 1917 Victorian and Federation.<br><br>1918 - 1940 Post WW1. |
| Allotments, subdivision and built form patterns | Traditional rectangular grid pattern. Generally large site areas. Generally large street frontage widths large. Large front of dwelling set-back. Vehicular access from rear lanes of many dwellings. |
| Architectural styles, detailing and built form features | Late 19th Century and early 20th Century dwellings with forms, scale and detailing reflective of the era<br><br>Villas and cottages in bluestone, freestone and/or brick.<br><br>Many substantial dwellings as well as some more modest, unornamented dwellings .<br><br>Brick quoinwork common.<br><br>Hip and gable roof forms with pitches above 25 degrees.<br><br>Various porch and verandah styles including return verandahs ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. |

| Statement# | Statement | |
|---|---|---|
| Bur1 | | Garages and carports are located behind the main façade of dwellings.<br>Visible chimneys. |
| | Building height | Predominantly single storey.<br>Upper storey elements are integrated sympathetically into the dwelling design and generally not visible from street. |
| | Materials | Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork.<br>Pitched roofs in galvanised iron sheet or terracotta tiles.<br>Some original slate tiles.<br>Retention of original materials and finishes and unpainted masonry. |
| | Fencing | Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Masonry and cast iron palisade. Some substantial hedging. |
| | Setting, landscaping, streetscape and public realm features | Substantial avenues, trees and gardens. Significant front landscaped gardens. Modest verges containing single line of streets trees. Double row of mature trees planted along Alexandra Avenue and Prescott Terrace as a war memorial.<br>Area includes school, churches, mews cottages and other community facilities. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Eastwood Historic Area Statement (Bur2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | | |
|---|---|---|
| Bur2 | Eras, themes and context | Majority 1870 - 1917 Victorian and Federation.<br>Few 1917 - 1940 Post WW1. |
| | Allotments, subdivision and built form patterns | Narrow allotments of varying widths.<br>Closely spaced small early dwellings and narrow streets.<br>Minimal front set-backs. Many with front verandah built to front boundary.<br>Minimal side set-backs. |
| | Architectural styles, detailing and built form features | Late 19th Century single fronted cottages, semi-detached and row dwellings.<br>Modest double fronted detached cottages and villas. Few Interwar dwellings.<br>Forms, scale and detailing reflective of the era.<br>Hip and gable roof forms with pitches above 25 degrees. |
| | Building height | Single storey. |
| | Materials | Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork.<br>Pitched roofs in galvanised iron sheet.<br>Retention of original materials and finishes and unpainted masonry. |
| | Fencing | Typical of the era of historic development.<br>Low and/or open fencing forward of the main building façade. Maximum height to 1.2m.<br>Timber picket or dowelling.<br>Simple masonry and cast iron palisade, or simple wrought iron.<br>Corrugated iron or mini orb within timber framing. |
| | Setting, landscaping, streetscape and public realm features | Narrow streets.<br>Boundaries positioned close to street with narrow footpaths.<br>Street trees penetrating footpath adjacent kerb.<br>Pocket park. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Wootoona Terrace Historic Area Statement (Bur3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | | |
|---|---|---|
| Bur3 | Eras, themes and context | Majority 1918 - 1940 Post WW1.<br>Few 1912 - 1914 Federation. |
| | Allotments, subdivision and built form patterns | Single street intersected by side streets at 90 degree.<br>Large site areas.<br>Large street frontage widths.<br>Generous front set-backs.<br>Consistent side set-backs. |
| | Architectural styles, detailing and built form features | A range of early 20th Century international styles including<br>Bungalows, Tudors and early English residential architecture.<br>Large dwellings of generous proportions.<br>Forms, scale and detailing reflective of the era.<br>Hip and gable roof forms with pitches above 25 degrees.<br>Various porch and verandah styles including return verandahs, usually of generous proportions, either projecting or as a continuation of the main roof structure. |
| | Building height | Mix of single storey and double story. Two storeys associated with grand residences.<br>Upper storey elements are integrated sympathetically into the dwelling design. |
| | Materials | Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork.<br>Roofs in galvanised iron sheet or terracotta tiles.<br>Retention of original materials and finishes and unpainted masonry. |
| | Fencing | Typical of the era of historic development.<br>Low and/or open fencing forward of the main building façade. Maximum height to 1.2m.<br>Often including masonry pillars as entry statements constructed in stone or brick matching dwelling façade. |

| Statement# | Statement | |
|---|---|---|
| | | Heavily vegetated. Some substantial hedging. |
| | Setting, landscaping, streetscape and public realm features | Wide verges.<br>Substantial trees on public and private land.<br>Expansive allotments, street frontages and gardens.<br>Significant front landscaped gardens. |
| | Representative Buildings | Identified - refer to SA planning database. |

| Representative Buildings | Identified - refer to SA planning database. |

**Romalo House Complex Historic Area Statement (Bur10)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | **Themes and Context**<br>This Historic Area encompasses the 'Romalo House' complex and demonstrates important aspects of the settlement of the foothills of the Mount Lofty Ranges, specifically the Magill district. It is the product of the amalgamation of a number of phases of development including development of the country sections of the Hundred of Adelaide surrounding Magill, first for orchardsand horticulture, then vineyards and significant semi-rural estates. Romalo House in particular.<br>Evolving from a small settler's cottage, Romalo House grew to become a substantial villa residence on a large semi-rural allotment with associated outbuildings, demonstrating the customs and way of life of closer settlement of the Magill area during the second half of the nineteenth century. This is further represented by the likely use of the outbuildings, first as barns or stables and coach house, before being used for the manufacture of wine, a characteristic function of the vineyards of the Magill foothills.<br>The development of the property with a much enlarged, high quality villa residence and associated outbuildings and features, demonstrates the important pattern of the transformation of early settlers' dwellings throughout the Burnside area to fine residential properties as their owner's fortunes prospered. Despite a long program of development, alterations and additions, original internal and external fabric and planning from all phases of development remains discernible. |

| Statement# | | Statement |
|---|---|---|
| Bur10 | | The Romalo House property has a close association with at least four notable South Australians, vignerons and winemakers and its proximity to the Penfolds Magill Estate reflects the significant role this area played in the significant and rapid expansion of the viticultural industry in South Australia.<br>**Eras**<br>Buildings and structures and landscaped setting from 1850s to 1909, reflecting early settlement and prosperity post settlement provide a prominent, distinctive and visual landmark in the locality. |
| | Allotments, subdivision and built form patterns | Large, irregular land parcel reflecting an early pattern of settlement and development.<br>Substantive historical buildings in a landscaped setting, including large dwelling and associated outbuildings and structures, including two bluestone and timber barns.<br>Main house and associated outbuildings and fountain are of particular value, as is their visual connection to each other.<br>Substantial curtilage around existing dwelling and outbuildings.<br>Remnant site planning and landscape layout, where extant.<br>Dwelling addresses Romalo Avenue to the north. |
| | Architectural styles, detailing and built form features | Notable original dwelling, "Romalo" and pair of associated outbuildings (including two bluestone and timber barns) and other historic elements, including Victorian-era fountain to north of Romalo House.<br>**House**<br>Bluestone walling and remnant rendered detailing (string courses, quoins, sills, banding, pilasters, florets, corbels, cornices, brackets and balustraded parapets).<br>Entrance steps including side walls, urns, slate step treads (north and west).<br>Slate and marble tiling to verandah and slate courtyard paving.<br>Timber-framed verandah, cast iron balustrade and corner brackets (may be of a later date).<br>Window fenestration, timber window frames and double-hung sashes (various).<br>Timber shutters, where extant or removed to other parts of the property for storage/salvage.<br>Parapet wall structure, rendered decoration and cast iron finials to projecting gabled bays.<br>Hipped roof structure and form.<br>Rendered masonry chimneys.<br>**Outbuildings**<br>Single storey.<br>Face random coursed rubble bluestone with face red brick quoins and dressings to openings.<br>Bluestone walling.<br>Brick detailing to quoins, gable vents, window and door surrounds.<br>Window fenestration and door openings.<br>Timber window frames and sashes.<br>Timber door frames and door leaves, including paired, timber-clad stable doors and louvred highlights and panelled timber doors to west elevation, southern outbuilding.<br>Gabled roof structure and form, including decorative barge timbers and finials. |
| | Building height | Single storey, with the exception of some later additions to south-east corner of the dwelling. |
| | Materials | Wall materials consistent with era of original construction including bluestone, sandstone and brickwork.<br>Pitched roofs in galvanised iron sheet.<br>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. |
| | Fencing | Eastern boundary defined by rural, open style post and wire fence reflecting original estate / use.<br>(Newer, modern Colorbond steel panel fencing to adjoining development is not reflective of fences associated with era and style of original building). |
| | Setting, landscaping, streetscape and public realm features | Mildly undulating, vegetated, natural landscape setting with minimal cut and fill.<br>Mature trees and remnant planting.<br>Strong visual connection between remnant historic built forms which are recognised as landmark buildings and are important elements of the locality.<br>Vistas and views into and out of the site are important, particularly the interspersed views to adjoining reserve and hills face escarpment. |
| | Representative Buildings | Identified – refer to SA planning database. |

| | Architectural styles, detailing and built form features | Single storey, detached and attached, single and double fronted workers' cottages.<br>Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street.<br>Separate verandah to higher front wall or parapet. |
| | Building height | Single storey with ceiling heights at least 3m. |
| | Materials | Bluestone and sandstone front walls, and red brick sidewalls.<br>Render to verandah piers, banding and parapets.<br>Corrugated steel roofing in galvanised or paint finish.<br>OG guttering in galvanised or paint finish.<br>Painted timber to window frames, doors and roof trim.<br>Chimneys; brick or painted render. |
| | Fencing | Low front fencing, typically picket fencing and low masonry walls or combination thereof. |
| | Setting, landscaping, streetscape and public realm features | Small setbacks from the street.<br>Narrow streets with minimal on-site car parking.<br>Original shopfronts and hotels to street corners.<br>Some industrial buildings constructed to street frontages. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt4 | **Blight Street, Ridleyton Historic Area Statement (ChSt4)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | From 1939.<br>Early SA Housing Trust. |
| | Allotments, subdivision and built form patterns | Regular rectangular allotments with generous frontage and depth, central shared boundary and small side boundary setbacks for driveways. |
| | Architectural styles, detailing and built form features | Single storey, 'early modern' style, typically semi-detached (duplex).<br>Symmetrical frontage to duplex.<br>Variable pattern of duplexes in street.<br>Vertical proportions to windows.<br>Hipped and gabled roofs, with porch a continuation of main roof or separate and awnings over front door and windows.<br>Some projecting hipped roofs.<br>Shallow roof pitch of 20 degrees maximum. |

| Statement# | Statement | |
|---|---|---|
| | Building height | Single storey with ceiling heights around 2.7m - 3m. |
| | Materials | Red brick, protruding courses, painted and rendered sections, generally ay high level to walls.<br>Corrugated steel and tiled roofing.<br>Porches either corrugated steel or curved flat concrete canopies.<br>Timber framed sunshade awnings with corrugated iron sheet roof.<br>Red brick chimneys.<br>Painted timber framed window frames, doors and roof trim. |
| | Fencing | Low open cyclone wire fencing or low tubular steel fencing. |
| | Setting, landscaping, streetscape and public realm features | Medium to large front setbacks.<br>Generous setting to each side of duplex. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt5 | **Bell Street, Pennington Historic Area Statement (ChSt5)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | From 1938.<br>Early SA Housing Trust. |
| | Allotments, subdivision and built form patterns | Layout reflects 'Garden Suburb' design concept, generally with shared central boundary and side boundary setbacks for driveways.<br>Strong urban focal points in Sinclair Square and Tulloch Avenue.<br>Regular rectangular allotments with generous frontage and depth central shared boundary and side boundary setbacks for driveways. |
| | Architectural styles, detailing and built form features | Austere, with late modern style, typically semi-detached (duplex).<br>Symmetrical frontage to duplex.<br>Variable pattern of duplexes in street.<br>Vertical proportions to windows.<br>Hipped and gable roof forms with porches continuous to main roof and separate awnings over windows.<br>Some projecting hipped roofs.<br>Shallow roof pitch of 20 degrees maximum. |
| | Building height | Single storey with ceiling heights around 2.7m - 3m. |
| | Materials | Red brick walls with protruding courses, painted and rendered sections, generally at high level to walls.<br>Corrugated steel roofing and terracotta tile roofing (Bell Street).<br>Porches either corrugated steel or curved flat concrete canopies.<br>Timber framed sunshade awnings with corrugated iron sheet roof.<br>Red brick chimneys.<br>Painted timber framed window frames, doors and roof trim. |
| | Fencing | Low open cyclone wire fencing or low tubular steel fencing. |
| | Setting, landscaping, streetscape and public realm features | Medium to large front setbacks.<br>Generous setting to each side of duplex. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt6 | **Croydon / West Croydon (North east of the railway line) Historic Area Statement (ChSt6)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1890s - 1910s.<br>1910s - 1940s (west of Brown Street, north of Herbert Road). |
| | Allotments, subdivision and built form patterns | Very regular, consistent and long, rectangular allotments, with generous widths.<br>Some combined shops and dwelling buildings to Rosetta and Elizabeth Street.<br>Generous allotments facing Railway line. |
| | Architectural styles, detailing and built form features | Detached dwellings on generous allotments.<br>Edwardian to early Federation.<br>Post-Edwardian villas along Day Terrace.<br>Early bungalow styles, including some Queen Anne, Tudor and Art Deco styles in latter period areas.<br>A number of more substantial buildings, particularly fronting the railway line.<br>Combined shop/dwellings and rows of shops (Elizabeth Street, Rosetta Street).<br>Hipped, gable and Dutch-gable (gambrel) roofs, 'M' roofs with ridge parallel to street and separate verandahs.<br>Some verandahs continuous with main roof line.<br>Typical bungalow verandahs as low height gable frontage.<br>Generous roof planes and eaves overhangs to bungalows. |
| | Building height | Single storey with generous ceiling and external wall heights of at least 3m. |
| | Materials | Bluestone, sandstone and redbrick, quoins and window surrounds.<br>Red brick and rendered chimneys.<br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br>Corrugated steel and terracotta (latter period) roofing.<br>Painted timber window frames, doors and roof trim.<br>Vertical proportioned timber windows with double sliding sashes.<br>Some elaborate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges. |
| | Fencing | Woven wire fences with painted timber posts.<br>Painted timber picket fencing reflecting era of associated dwelling. |

| Statement# | Statement | |
|---|---|---|
| | | Low masonry fencing with simple masonry piers, sometimes with simple iron and steel infill panels (from hume iron to tubular steel variations). |
| | Setting, landscaping, streetscape and public realm features | Medium to large front setbacks, typically set in mature gardens<br>Typically tree lined streets particularly Day Terrace with railway line in treed setting.<br>Generous side setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt7 | **Croydon / West Croydon (South west of the railway line) Historic Area Statement (ChSt7)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1890s - 1910s.<br>1940's bungalow style. |
| | Allotments, subdivision and built form patterns | Very regular and consistent rectangular allotments, with large widths. |
| | Architectural styles, detailing and built form features | Villas and symmetrical cottages, with some later, intrusive infill.<br>Some worker's cottages of earlier periods.<br>Some bungalow style.<br>Hipped and gable roofs, and separate verandahs. |
| | Building height | Single storey with ceiling heights at least 3m. |
| | Materials | Bluestone, sandstone and redbrick.<br>Corrugated steel roofing.<br>Ornate render surrounds to window.<br>Red brick and rendered chimneys.<br>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.<br>Corrugated steel and terracotta (latter period) roofing.<br>Painted timber window frames, doors and roof trim.<br>Vertical proportioned timber windows with double sliding sashes.<br>Some ornate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges. |
| | Fencing | Low masonry and original cast-iron and hume metal fencing.<br>Woven wire fences with painted timber posts.<br>Painted timber picket fencing reflecting era of associated dwelling. |
| | Setting, landscaping, streetscape and public realm features | Medium front setbacks.<br>Plane Trees to Euston Terrace. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt8 | **Allenby Gardens Historic Area Statement (ChSt8)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1920s - 1930s. |
| | Allotments, subdivision and built form patterns | Very regular and consistent rectangular allotments, with large widths.<br>Some angular allotments due to street pattern and subdivision layout between main roads abounding area. |
| | Architectural styles, detailing and built form features | Late Edwardian, Federation and bungalow styles.<br>Smaller number of Queen Anne and Tudor style houses.<br>Mainly detached housing.<br>Hipped, gable and Dutch gable roofs with decorative gable panelling and timber trim.<br>Ridge lines that are mainly perpendicular or parallel to street frontage.<br>Federation verandahs continuous with main roof.<br>Some projecting gable forms to street.<br>Low height bungalow style gables. |
| | Building height | Single storey with ceiling heights at least 3m. |
| | Materials | Terracotta tiles and corrugated steel roofing.<br>Red brick and sandstone walls; some render.<br>Red brick and render chimney. |
| | Fencing | Typically, low masonry fencing, sometimes with steel inserts.<br>Woven wire fences with painted timber posts.<br>Painted timber picket fencing reflecting era of associated dwelling. |
| | Setting, landscaping, streetscape and public realm features | Cohesive pattern of established detached dwellings with garden settings<br>Medium front setbacks. Tree lined streets.<br>Coombe Road is the natural focus of the area, and includes a school complex of a similar period to surrounding housing. |
| | Representative Buildings | Identified - refer to SA planning database. |
| | **Pre-World War One Pennington West Historic Area Statement (ChSt9)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1900s to 1920s, some 1940s/50s eastern side.<br>Edwardian/Federation/early Bungalow. |
| | Allotments, subdivision and built form patterns | Uniform allotment size and street layout.<br>Typically large frontages with deep allotments. |

| Statement# | Statement | |
|---|---|---|
| ChSt9 | Architectural styles, detailing and built form features | Edwardian, Federation and early bungalows. Predominantly detached.<br>Typical symmetrical frontage with return verandahs on corner allotments.<br>Vertical proportion windows to earlier housing with typical wider and lower bungalow proportion windows.<br>Steeply pitched Hipped, gable and Dutch gable (gambrel).<br>Some 'M' Roof with ridge parallel to street.<br>Some verandahs continuous with main roof.<br>Some detached verandahs with typically bullnose profile.<br>Generous simple roof planes to bungalow style with less steep roof.<br>Low height wide bungalow verandahs. |
| | Building height | Single storey with ceiling heights and external walls to at least 3.5m. |
| | Materials | Red brick, sandstone and render walling.<br>Render or brick chimneys.<br>Some pressed metal wall cladding on the fronts.<br>Some corrugated iron or small fluted iron cladding on the side walls.<br>Terracotta tile and corrugated iron roofing and verandahs.<br>Painted timber window frames, doors and roof trim.<br>Ornate cast iron to verandahs. Turned painted timber verandah posts. |
| | Fencing | Typically, low masonry, timber picket or wire mesh with timber post fencing.<br>Woven wire fences with painted timber posts.<br>Painted timber picket fencing reflecting era of associated dwelling.<br>Low small fluted metal fencing with painted timber trim. |
| | Setting, landscaping, streetscape and public realm features | Medium to large front setbacks.<br>Helen Street with Mt Carmel School as strong focal point. |
| | Representative Buildings | Identified - refer to SA planning database. |

ChSt10

**Pre-World War One West Hindmarsh Historic Area Statement (ChSt10)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1890s to 1910s.<br>1930 to 1940. |
| Allotments, subdivision and built form patterns | Uniform allotment size and street layout. Typically large frontages.<br>Some narrow allotments (Albermarle Street). |
| Architectural styles, detailing and built form features | Symmetrical cottages and villas.<br>Some single front cottages.<br>Edwardian, Federation and early bungalow periods.<br>Predominantly detached.<br>Hipped, gable, 'M' and louvre (gambrel) roofs.<br>Separate verandah of monopitch, concave and bullnose form.<br>Bungalow style verandah with generous width and low pitching height, with masonry piers and low wall.<br>Some original central verandah gable at entrance to symmetrical frontage.<br>Roof pitches vary from bungalow pitch of 20-25 degrees to steeper Edwardian pitch of up to 35 degrees. |
| Building height | Single storey with ceiling and external wall heights at least 3m - 3.5m. |
| Materials | Bluestone, sandstone and red brick walls with chimneys typical of era.<br>Rendered quoins and ornate surrounds to openings.<br>Corrugated iron roofs with verandahs.<br>Ornate painted timber to verandahs including fretwork and turned posts<br>Ornate cast iron lacework to verandahs.<br>Vertically proportioned windows with painted timber double-sash windows.<br>Square bungalow proportioned three vertical windows in painted timber. |
| Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| Setting, landscaping, streetscape and public realm features | Broad and some narrow tree-lined streets. Medium to large front setbacks. Historic setting of Glanton Street defined by former church Local Heritage Place as focal point. |
| Representative Buildings | Identified - refer to SA planning database. |

**Welland Historic Area Statement (ChSt11)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1910s to 1940s. |
| Allotments, subdivision and built form patterns | Very regular and consistent rectangular allotments, typically very wide.<br>Narrow deep allotments to Frederick Street. |
| Architectural styles, detailing and built form features | Late-Edwardian and Federation housing styles.<br>Predominantly detached with some early semi-detached housing, some designed to look like one dwelling (Frederick Street).<br>Early bungalows and 1940s Austerity houses.<br>Some bungalow makeovers to earlier symmetrical dwellings.<br>Hipped, gable and louvre roofs.<br>Separate bull nose verandah typically to earlier dwellings.<br>'M' roof forms with ridge parallel to street frontage.<br>Generous simple bungalow roof planes at shallower pitch to earlier housing with lower height generous width verandah. |

| Statement# | Statement | |
|---|---|---|
| ChSt11 | | Some verandahs continuous with main roof. |
| | Building height | Single storey with ceiling and external wall heights at least 3m - 3.5m. |
| | Materials | Red brick, bluestone and sandstone walls.<br>Terracotta tiles, corrugated iron and decorative timber trim roofs.<br>Painted metal gutters.<br>Wall vents at high level between top of verandah and underside of gutter<br>Red brick or render finish chimneys.<br>Flat Cantilever concrete canopy sunshades with steel suspension.<br>Ornate cast iron to some verandahs.<br>Ornate decorative painted timber to some verandahs.<br>Painted timber to window and door frames and timber roof trim. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Tree-lined streets.<br>Large front setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Woodville South Historic Area Statement (ChSt12)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | | |
|---|---|---|
| ChSt12 | Eras, themes and context | 1910s to 1940s. |
| | Allotments, subdivision and built form patterns | Substantial allotments with uniformity of layout and buildings, particularly in the 'Glen' Streets and Angus Street.<br>Predominantly large frontages. |
| | Architectural styles, detailing and built form features | Predominantly bungalows with one wide verandah and Tudors with two main gables and central porch.<br>Some Spanish Mission, Dutch Gable and Art Deco houses.<br>Predominantly detached.<br>Steep pitched gables associated with Tudor housing and Dutch Gables.<br>Some villa/bungalow hybrid gables.<br>Gable porches.<br>Bungalow style verandahs with low height pitching point.<br>Some verandah roofs continuous with main roof (bungalow and Spanish Mission).<br>Some flat roofed verandahs set behind arched parapet verandah (Spanish Mission).<br>Tall chimneys. |
| | Building height | Single storey with ceiling heights at least 3m.<br>Bungalow and Spanish Mission typically of lower wall appearance to the street, with broad frontage. |
| | Materials | Freestone, red brick, stucco and baked or glazed brick.<br>Exposed ornate timber work.<br>Terracotta tiles and some galvanised corrugated iron roofs.<br>Tapered and straight masonry piers and low walls to verandahs of bungalows, some with rendered capping to brickwork or rendered masonry.<br>Painted timber battens (Tudor curved) to painted panel gables of Tudor and Bungalow.<br>Painted timber framed window frames, door frames and roof trim. |
| | Fencing | Fencing generally low brick, stucco or wire and mostly integral with the design of the house.<br>Some painted timber fencing with pickets or woven wire. |
| | Setting, landscaping, streetscape and public realm features | Tree lined streets, well maintained gardens, abundant with mature vegetation.<br>Main-focus the landscaped Woodville Oval complex.<br>Buildings fronting Woodville Oval on Oval Avenue and Cedar Avenue are of a larger scale with wider allotments, particularly on corner allotments with 'Glen' Streets. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Kilkenny Historic Area Statement (ChSt13)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | | |
|---|---|---|
| ChSt13 | Eras, themes and context | 1850s to 1950s.<br>Predominant era is 1920s to 1930s in the north and 1910s to 1920s in the south. |
| | Allotments, subdivision and built form patterns | Typically regular and consistent rectangular allotments, typically very wide.<br>Narrow allotments to Wilpena Terrace, Arkaba Road and Mundulla Street. |
| | Architectural styles, detailing and built form features | Single front cottages.<br>Edwardian and post-Edwardian cottages in the south.<br>Federation and bungalow houses in the north.<br>Small group of Victorian former shops located at the southern end of Wilpena Terrace reflecting the original main street of Kilkenny.<br>High-quality 1930s houses on large allotments at the northern end<br>Predominantly detached and some attached housing.<br>Semi-Detached dwellings to Wilpena Terrace west of Mundulla Street.<br>Small scale hipped, gable and louvre roofs typically with ridge line perpendicular to the street.<br>Some 'M' roofs with ridge line parallel to the street.<br>Relatively steeper roof pitch.<br>Generous Bungalow roofing with simple roof plane and generous overhangs. |

| Statement# | Statement | |
|---|---|---|
| | | Some federation verandahs continuous with main roof.<br>Some separate bullnose verandahs lower than main wall height.<br>Some central gable to verandah with finial. |
| | Building height | Single storey with ceiling heights at least 3m.<br>Some traditional two storey. |
| | Materials | Freestone and red brick side walls.<br>Red brick quoins.<br>Rendered walling, tapered piers to bungalow verandahs and parapets.<br>Corrugated iron and terracotta tile roofs.<br>Brick or render chimneys with some decoration.<br>Painted timber frame windows and doors with painted timber roof trim. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Medium to large front setbacks.<br>Shop and attached dwelling a strong characteristic in Wilpena Terrace with corner shops and verandahs over footpaths.<br>Some dwellings and former shops constructed closer to front boundaries, especially if located on a corner allotment. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt14 | **Woodville Park Historic Area Statement (ChSt14)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1900s to 1950s. |
| | Allotments, subdivision and built form patterns | Very regular and consistent rectangular, deep allotments, to both sides of the railway line typically very wide with some narrow allotments to Belmore and Russell Terraces. |
| | Architectural styles, detailing and built form features | Generally detached, later symmetrical cottages, Villas, Federation, Queen Anne, occasional Austerity and bungalow styles with some attached housing to suit narrow allotments.<br>Hipped, gable and louvre roofs with verandahs.<br>Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments.<br>Separate verandahs to suit Villa style.<br>Steeper roof pitches to earlier styles and Tudor with shallower pitched bungalow roofing.<br>Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls.<br>Simple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street.<br>Steeply pitched Tudor gables and verandah gables facing the street. |
| | Building height | Single storey with ceiling heights at least 3m. |
| | Materials | Red brick and freestone walls.<br>Galvanised corrugated iron and terracotta roofs.<br>Painted timber window frames, doors, roof trim and cover battens to gable panels.<br>Some ornate painted timber fretwork and posts to verandahs.<br>Brick or rendered masonry chimneys. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Fences and front gardens are strong elements.<br>Medium to large front setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt15 | **Woodville Historic Area Statement (ChSt15)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880s to 1940s. |
| | Allotments, subdivision and built form patterns | Large, deep allotments typically very wide with slightly smaller scale housing south of the railway line.<br>The Stanley Street change in direction results in allotments of lesser depth.<br>Large corner allotments to Woodville Road.<br>Some narrow allotments to Hughes Street North. |
| | Architectural styles, detailing and built form features | Generally large single-storey detached houses, bluestone Victorian villas, large Federation, Queen Anne and elaborate, large bungalow dwellings.<br>Significantly larger mansions to Woodville Road.<br>Smaller symmetrical cottages with some return verandah and smaller, simple bungalows to Russell Terrace.<br>Semi-detached houses designed to look like one dwelling on Hughes Street North.<br>Hipped, gable and louvre roofs.<br>Relatively more complex hipped, gable and louvre roofs with verandahs.<br>Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments.<br>Separate verandahs to suit Villa style.<br>Federation style verandahs continuous with main roof.<br>Steeper roof pitches to earlier styles with shallower pitched bungalow roofing.<br>Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls.<br>Simple, multiple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street. |
| | Building height | Single storey with ceiling heights at least 3m - 3.5m. |
| | Materials | Bluestone, red brick and freestone walls.<br>Galvanised corrugated iron and tiled roofs.<br>Painted timber window frames, doors, roof trim and cover battens to gable panels.<br>Some ornate painted timber fretwork and posts to verandahs. |

| Statement# | Statement | |
|---|---|---|
| | | Brick or rendered masonry chimneys. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Wide, tree-lined streets and large established gardens.<br>Large front setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt16 | **Cheltenham East Historic Area Statement (ChSt16)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880 -1940.<br>Small early cottages, Federation through to Bungalow. |
| | Allotments, subdivision and built form patterns | Small and variable allotment sizes, typically wide.<br>Some substantial corner allotments remain. |
| | Architectural styles, detailing and built form features | Villas and symmetrical cottages, Federation and bungalow styles.<br>Predominantly detached.<br>Simple steeply pitched hipped, gable, louvre roof forms and verandas.<br>Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments.<br>Bungalow roof forms with simple generous roof planes and eaves overhangs.<br>Some verandahs continuous with main roof.<br>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. |
| | Building height | Single storey with ceiling heights at least 3m - 3.5m. |
| | Materials | Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls.<br>Corrugated iron and terracotta tiled roofs.<br>Red brick and rendered finish to chimneys.<br>Painted timber window frames, doors, roof trim and cover battens to gable panels.<br>Generally, less ornate painted timber fretwork and posts to verandahs.<br>Some cast iron lacework to verandahs. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Varied, small to medium front setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| ChSt17 | **Cheltenham West Historic Area Statement (ChSt17)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1910s to 1950s. |
| | Allotments, subdivision and built form patterns | Typically, wide streets, with large allotments typically very wide. |
| | Architectural styles, detailing and built form features | Villas, Post-Edwardian, Federation, Tudor and bungalow and Post War style.<br>West of Stroud Street, occasional Tudor or 1940s dwellings.<br>Housing close to Torrens Road and south of the railway line more 'mixed' in character.<br>Hipped, gable and louvre roof forms and verandas.<br>Simple steeply pitched hipped, gable, louvre roof forms and verandas.<br>Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments.<br>Bungalow roof forms with simple generous roof planes and eaves overhangs.<br>Shallower roof pitches to Post War housing.<br>Some verandahs continuous with main roof.<br>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. |
| | Building height | Single storey with ceiling heights at least 3m - 3.5m. |
| | Materials | Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls.<br>Corrugated iron and terracotta tiled roofs.<br>Red brick and rendered finish to chimneys.<br>Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | Residual shops attached to dwellings and community facilities centred around 'main streets' in Buller Terrace, Stroud Street (north and south) and Railway Terrace. Medium to large front setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| | **Henley Beach Historic Area Statement (ChSt18)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |

| Statement# | Statement | |
|---|---|---|
| ChSt18 | Eras, themes and context | 1880s to 1940s.<br><br>Transitional styles adopting cross era characteristics. |
| | Allotments, subdivision and built form patterns | Regular and consistent rectangular allotments, typically very wide with a high proportion of narrow and medium width allotments.<br><br>Angled allotments to North Street west of Military Road. |
| | Architectural styles, detailing and built form features | Marlborough Street and Crewe Street, south to Clarence Street/Durham Street generally feature smaller but elaborate villas, early Spanish Mission, Federation and bungalows.<br><br>Larger, grand villas, cottages and bungalows predominantly along Marlborough Street and East Terrace.<br><br>South of Atkin Street, bungalows and Tudors.<br><br>Hipped, gable and louvre roof forms and verandas.<br><br>Bungalow roof forms with simple generous roof planes and eaves overhangs.<br><br>Steeply pitched Tudor roof forms with two main symmetrical gables and central smaller gable porch to street.<br><br>Some verandahs continuous with main roof.<br><br>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls. |
| | Building height | Single storey with ceiling heights at least 3m - 3.5m. |
| | Materials | Red brick walls and freestone facades.<br><br>Corrugated and terracotta tile roofs.<br><br>Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow.<br><br>Generally less ornate painted timber fretwork and posts to verandahs.<br><br>Red brick and rendered finish to chimneys. |
| | Fencing | Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing. |
| | Setting, landscaping, streetscape and public realm features | South of the Bowling Club to Atkin Street, small setbacks.<br><br>South of Atkin Street larger allotments and medium setbacks.<br><br>Tree lined streets with a large presence of Norfolk Island pines along North Street and East Terrace.<br><br>Vehicle access has been designed and located to preserve existing street trees.<br><br>Some rear lane access. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Grange Historic Area Statement (ChSt19)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |

| | Eras, themes and context | 1860s - 1930s. |
| | Allotments, subdivision and built form patterns | Uniform small allotments interspersed with larger allotments. |
| | Architectural styles, detailing and built form features | Single storey attached and detached cottages, row dwellings, former fire station, former Christian Chapel, former municipal hall, former brewery, Victorian churches.<br>Steeply pitched gable and hipped roofs facing the street, with various separate verandah form and saw-tooth design (former brewery).<br>Steeple and bell tower.<br>Some parapet walling. |
| | Building height | Typically, single storey with ceiling heights at least 3m. |

| Statement# | Statement | |
|---|---|---|
| | | Industrial and former church buildings with substantial ceiling and wall heights. |
| | Materials | Rendered masonry, red brick, bluestone, limestone and sandstone walls.<br>Decorative brickwork detailing to windows and doors.<br>Corrugated galvanised steel roofing.<br>Painted decorative timber posts and fascia elements. |
| | Fencing | Substantial rendered masonry with brick capping, and cast iron infill fences and gates. |
| | Setting, landscaping, streetscape and public realm features | Small setbacks from the street. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Hindmarsh District Centre Historic Area Statement (ChSt21)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| ChSt21 | | |
|---|---|---|
| | Eras, themes and context | 1840s to 1930s. |
| | Allotments, subdivision and built form patterns | Narrow fronted with deep allotments facing Port Road.<br>Wider allotments to Manton and Milner Street. |
| | Architectural styles, detailing and built form features | Narrow fronted two-storey built form interspersed with some narrow fronted single storey of intimate scale.<br>Generous verandahs over footpaths, balconies and parapets with some decorative elements including pediments.<br>Some detached single and two storey residential buildings to Orsmond Street.<br>Occasional upper level balconies.<br>Vertically proportioned elements with high solid to void ratio, particularly at upper levels.<br>Substantial church buildings.<br>Decorative parapets to street frontages and returns.<br>Steeply pitched hipped roofs visible behind parapets, with separate, wide verandahs across frontage.<br>Some gable forms including simple cottage form to Milner Street. |
| | Building height | Single and two-storey built form with ceiling heights that vary from 3m through to substantial church buildings. |
| | Materials | Limestone, bluestone, sandstone, face red brick walls and rendered walls.<br>Use of brick and rendered quoins.<br>Corrugated galvanised steel roofing.<br>Decorative cast iron posts and balustrades.<br>Painted timber posts and fascia elements. |
| | Fencing | Built form typically to the street with verandahs over public realm.<br>Some rendered masonry fencing with cast iron infill. |
| | Setting, landscaping, streetscape and public realm features | Historic heart of the Hindmarsh Village and the principal area for a range of retail, business, ecclesiastic and office uses. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Henley Square Historic Area Statement (ChSt22)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| ChSt22 | | |
|---|---|---|
| | Eras, themes and context | 1840s to 1920s. |
| | Allotments, subdivision and built form patterns | Traditional patterns of development incorporating verandahs, balconies and parapets clustered around Henley Square. |
| | Architectural styles, detailing and built form features | Substantial two-storey buildings with wide balconies and verandahs, some over footpaths.<br>Traditional single storey buildings with verandahs over footpaths.<br>Modern development including large expansive verandahs on the square.<br>Decorative parapets to the street and Henley Square facades.<br>Steeply pitched hipped and gable roof forms, with attached balconies and verandahs across frontage.<br>Skillion and curved (bull nose) verandah roof forms. |
| | Building height | Single and double storey buildings with ceiling heights at least 4.5m per floor giving an imposing character. |
| | Materials | Bluestone, sandstone, red brick walls and rendered walls.<br>Some corrugated iron walling.<br>Use of brick and rendered quoins, brick banding and other traditional decoration.<br>Imposing masonry pediments and gables with brick banding.<br>Corrugated steel roofing.<br>Decorative cast iron and painted timber verandahs and balconies. |
| | Fencing | Some low masonry walling.<br>Typically, open shop fronts with verandahs over public realm. |
| | Setting, landscaping, streetscape and public realm features | Historic heart of Henley Beach and the principal area for a range of retail, business and entertainment uses. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Eighth Street, Bowden Historic Area Statement (ChSt23)**

| Statement# | Statement | |
|---|---|---|
| COCO10 | Allotments and sub-division patterns | Traditional grid with wide streets. |
| | Architectural styles, detailing and built form features | Miners' cottages. Simple casement windows. Low scale simple gable and hipped roofs. Roof pitches between 25 and 40 degrees. Verandahs overhanging footpath on Owen Terrace. Traditional railway architecture. The former Wallaroo Train station is of particular value. |
| | Building height | Single storey residential and retail buildings.<br>Two storey civic buildings (Wallaroo Town Hall). |
| | Materials | Local stone, limestone, masonry and corrugated iron. |
| | Fencing | Low, open fencing. |
| | Setting, landscaping, streetscape and public realm features | Consistent front setbacks and a strong building line with little interruption.<br>Landscaping forward of buildings. |
| | Representative Buildings | [Not identified] |

**Moonta Town Centre Historic Area Statement (CoCo11)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| COCO11 | Eras, themes and context | 19th century historic main street with a mix of civic, commercial and retail activities. |
| | Allotments, subdivision and built form patterns | Traditional grid. |
| | Architectural styles, detailing and built form features | Two-storey stone buildings exhibiting refined detailing, ornate roof elements and a high-level of craftsmanship are of particular value. Extensive glazing and double-hung doors and windows in street facing frontages of non-residential buildings. Windows emphasised by framing. Symmetrical fronted and vertically proportioned dwellings. Hipped roof forms with pitches between 30-45 degrees. Sloping verandahs overhang footpaths to the street and are connected to shops. |
| | Building height | Predominantly single storey where residential or retail.<br>Two storeys associated with grand, civic or commercial activities (town hall, hotels). |
| | Materials | Local stone, masonry, corrugated iron roofing, stone and timber-framed windows and doors, timber verandah posts and brick chimneys. |
| | Fencing | Timber and stone fences not exceeding 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Wide streets, a prominent central public square framed by significant public buildings and limited landscaping. Buildings square to and on street alignments. Minimal breaks between buildings except where access to the rear of a site is provided. Dwellings are consistently set back further from the street. |
| | Representative Buildings | [Not identified] |

**Historic Areas affecting The Flinders Ranges Council**

**Quorn Historic Area Statement (FlRa1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| FLRA1 | Eras, themes and context | Turn of the 19th century.<br>Civic, commercial and retail.<br>Railway. |
| | Allotments, subdivision and built form patterns | Traditional grid. |
| | Architectural styles, detailing and built form features | Villas and double fronted cottages. Railway buildings and railway architecture. Verandahs provided over footpaths. Heritage-style signage. |
| | Building height | Single storey. Two storeys associated with grand, civic or commercial activities. |
| | Materials | Local stone, masonry and corrugated iron. |
| | Fencing | Open fencing no more than 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Buildings square to and on the street alignment. Buildings not on street alignment surrounded by gardens/landscaping. Minimal breaks between buildings other than where there has been an existing access to the rear of the site. Wide streets and verges, grassed median strips and tree lined streets. |
| | Representative Buildings | [Not identified] |

**Historic Areas affecting Town of Gawler**

**Gawler East Historic Area Statement (Ga1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Ga1 | Eras, themes and context | 1850-1940; residential and local scale retail. |
| | Allotments, subdivision and built form patterns | The Area is divided into two sections by Lyndoch Road. Large allotments with large dwellings and gardens exist along High Street and Duffield Street. Smaller allotments exist along Lyndoch Road. Traditional grid north of Lyndoch Road. Allotments typically are of consistent width and depth, rectangular in shape orthogonal to the street layout apart from some dwellings facing Lyndoch Road on the north side, which have an angled front boundary. The pattern of streets stem from orthogonal junctions with Lyndoch Road and rising ground. |
| | Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century Villas/Mansions. Nineteenth century double fronted symmetrical cottages; parapet end gables a feature. Bungalows with some Inter War. Roof pitches in the order of 27 degrees and 35 degrees. Stone walls and stone outbuildings.<br>Steeply pitched hipped and simple gable roofs of small and large scale. Large roofs typically gambrel in form with additional central gables and villa style projecting gable. Smaller early roof forms with ridge parallel to the street. Separate, generous verandahs to the street of bullnose, straight and concave form. Some return verandahs and some central entrance gable. Some verandahs continuous with main roof. Shallower pitched bungalow roof forms with simple generous roof planes and overhangs. Wide bungalow style verandahs with masonry supports and low plinth walls. |
| | Materials | Sandstone/Limestone with red brick quoins. Ornate render. Corrugated profile roofing. Vertically proportioned painted timber window frames and doors. Painted timber cover battens. Decorative brick, stone or rendered chimneys. Cast iron decoration and painted timber detailing to verandahs. |
| | Building height | Single storey forms generally influenced by site topography.<br>Buildings on low side of streets appear as single storey with double level to rear, particularly in north west of area.<br>Buildings on high side of street appear as double storey or elevated single storey with verandahs occurring on high plinth and central access steps. |
| | Fencing | Low open style fencing which includes masonry pier and plinth fence with decorative open infill. Low masonry walls up to 1.2 metres. Timber picket fences. Hedges. Stone walls on front boundaries are important features. |
| | Setting, landscaping, | Important entrance to Gawler from east with significant north to south connecting streets such as Duffield and East. Unique angled street layout north of Lyndoch Road with Edith and Blanch Street connected by Short Street. North western edge defined by Railway Line. A |

| Statement# | Statement | |
|---|---|---|
| | streetscape and public realm features | portion of the west side faces Pioneer Park; some small scale mixed use to Union Street. North to south streets generally run with contours of land with high and low side. Generous front and side setbacks. Landscaped setting derived from generous gardens with substantial trees and wide tree-lined streets. Surfaces consistent with the footpaths and streets. Views to and from the area. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Ga2 | **Gawler South Historic Area Statement (Ga2)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1860 to 1950 including bungalows and Austerity. |
| | Allotments, subdivision and built form patterns | Generous allotments typically on flat land with some variations in topography towards Dead Man's Pass and river. Grid pattern intersected by Twelfth Street that shifts direction at Adelaide Road. Oblique street intersections and prominent irregular corner allotments as follows: Unique and variable Street pattern defined by Railway line, Adelaide Road, Racecourse, Gawler River and Town Centre. Eighteenth to twenty second street run east to west. First, Second and Fourth Streets run parallel with the northern Adelaide Road and join with Adelaide Road at an angle. Fifth, Seventh, Third and Sixth Streets connect to each side of Adelaide Road. Thirteenth, Fourteenth and Fifteenth Street and Eighth Streets angled to River. Smaller allotments to Ninth and Tenth Streets. Gawler Terrace defined by Dead Man's Pass. |
| | Architectural styles, detailing and built form features | Detached double-fronted villas. Semi-detached and row cottages. Some Federation and Bungalow style dwellings. Some Inter War and Austerity. Verandahs and parapets. Substantial stone or masonry villas surrounded by generous gardens and landscaping.<br><br>Traditional railway structures associated with the Gawler Railway Station including workshops, stores and industrial buildings and small.<br><br>Roof pitches in the order of 27 degrees and 35 degrees. 'M' Roof form and gambrel roof found in 13th and 14th street vicinity. Gambrel roof forms to villas. Simple, small span cottage style roofs generally evident. Parapets to cottages.<br><br>Separate verandahs including but not limited to generous sweeping concave style. Some verandahs continuous with main roof. |
| | Building Height | Single storey with some elevated housing in Eighth Street and Gawler Terrace, featuring substantial setbacks and elevated verandahs. Wall heights in the order of 3.6 metres above floor level. |
| | Materials | Stone and limestone walling with red brick quoins. Some bluestone. Corrugated iron roof sheeting to verandahs and roofs. Red brick or render chimneys. Ornate brick detailing to gables and gable vents. Cast iron lacework to verandahs; typically simple timber details. Painted timber window frames, doors, roof trim and modest decorative treatments such as finials. |
| | Fencing | Low masonry walling. Low open style fencing which includes masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Painted timber picket fencing. Some woven wire fencing with painted timber posts. |
| | Setting, landscaping, streetscape and public realm features | Detached dwellings on generous wide and deep allotments. Generous front and side setbacks. Some early cottages with very substantial setbacks. The strong visual axis to the Railway Station buildings provided by Nineteenth Street. Boulevard style and character of Nineteenth Street derived from buildings positioned close to and square to the road frontage and designed to directly address the street. Corner sites where the grid is interrupted accommodating prominent buildings whose built form and side elevations are of equal importance to the façade. Established gardens with substantial front and side setbacks. Wide tree lined streets particularly Eighteenth Street, which incorporates gravel verges and remnant bluestone/slate kerbing to define bitumen. Night Cart lanes alignment and widths. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Ga3 | **Light Historic Area Statement (Ga3)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Residential, commercial, public and ecclesiastical buildings developed predominantly between 1850 to 1940, with some later Federation and Bungalows (Jerningham Street). |
| | Allotments, subdivision and built form patterns | Allotments, streets, squares and other elements which comprise the original 1839 grid layout of Light, Finniss and Co. Large allotments of original plan, with some limited subdivision generally on the perimeter of the State Heritage Area. |
| | Architectural styles, detailing and built form features | Simple symmetrical double fronted cottages and villas surrounding the Church Hill State Heritage Area. Early small cottages and more substantial dwellings that retain simple symmetrical features, with vertically proportioned window openings and doors. Some parapet walling to early cottages.<br><br>Roof pitches in the order of 27 degrees to 35 degrees. Variety of roof forms including simple small span gable and hipped to early cottages; 'M' roof forms; villa with typical projecting gable; larger span and higher Gambrel roof.<br><br>Separate verandah forms with bullnose, straight pitch and concave verandahs of generous width. Some verandahs continuous with main roof. |
| | Building Height | Single storey facing street with double storey to rear due to escarpment.<br><br>External wall heights to frontage and sides in the order of 3.6 metres. |
| | Materials | Bluestone, sandstone and limestone external walling with typically red brick trim and features including quoins and plinth. Some external front and side walling entirely in red brick. Corrugated iron roofing generally with roof tiling rarely found on older buildings and only on more recent buildings. Prominent chimneys in brick, stone or render finish. Some elaborate brick detailing to gable vents and parapets. |
| | Fencing | Low masonry front walls. Significant stone retaining walls to edge of Church Hill escarpment. Low open style fencing which includes masonry pier and plinth fence with decorative open sections, painted timber picket and woven wire. Stone walls and retaining walls are important features. |
| | Setting, landscaping, streetscape and public realm features | Subdivision retains planning undertaken by Light, Finniss and Co in 1839. Low lying areas that rise from surrounding rivers to Church Hill State Heritage Area. King Street is located on a ridge so dwellings on both sides appear as single story to the street with double storey to rear. Wide streets with slate kerbs and substantial trees. Gardens in scale with the buildings and large allotments. Front setbacks to streets such as King, Queen, Howard and Cameron Streets outside of Church Hill State Heritage Area have lesser front setbacks and generous side setbacks; notable exception is Jerningham Street that exhibits generous setbacks. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Ga4 | **Mixed Use Historic Area Statement (Ga4)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1848 to 1940. Early Victorian through to Bungalow style. Intimate frontage commercial and retail with early to more recent residential in prominent locations. Substantial rear stone outbuildings and stone walling sometimes sharing a central dividing wall. Changing land use from early residential buildings to commercial uses, with minimal alteration to remnant residential character. Some prominent dwellings that retain a substantial land holding and visual prominence in the overall historic streetscape and main street appearance. |
| | Allotments, subdivision and built form patterns | Variable allotment sizes in a main street setting ranging from long and relatively narrow through to large. Area includes the important forked junction of Main North Road and Redbanks Road and the angled allotments that result from the road pattern. Rising ground from the Willaston Bridge northwards. The topography and physical limits of river, bridge and major road junction to the north retain the Willaston Township as a distinct and identifiable size. |
| | Architectural styles, detailing and built form features | Several wide shop and row shop frontages with front verandahs over footpath. Small scale shops with parapet walling above shopfront and separate verandahs, either over footpath or close to street frontage. Large dwellings with small to generous setbacks from street frontage, with separate concave, simple monopitch and bull nose verandahs. Early symmetrical cottages, generally elevated from the street frontage with minimal to generous setbacks, parapet end walls and small span simple gable roof forms with parapet ends. Traditional stone outbuildings and remnant walling at the rear or side of sites. Variety of roof forms ranging from simple small span gable through to longer span hipped gambrel and 'M' Roofs with some villa styles. Separate verandah forms with bull nose, simple pitch and concave. |
| | Building height | Single storey typically apart from the Willaston Hotel. Wall heights generally up to 3.5 to 4m on elevated sites. |
| | Materials | Stone external walls with brick quoins and some ornate render detail. Painted timber supports to verandahs with modest decorated timber treatments. Stone, brick and render chimneys. |
| | Fencing | Low to medium height masonry walling some of which are retaining walls. Some open timber picket or rural style fencing. |
| | Setting, landscaping, streetscape and public realm features | Definition of the main street achieved through stone walling to front boundaries, verandahs close to and over front boundaries, and shop fronts. Buildings and allotments typically orthogonal to main street. Strong sense of arrival in defined separate village from Gawler achieved through rising land, road junctions, river and bridge. |
| | Representative Buildings | Identified - refer to SA planning database. |
| | **Redbanks Road, Willaston Historic Area Statement (Ga5)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. **Maturin Road Historic Area Statement (HoB2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1920s or 30s. |
| Allotments, subdivision and built form patterns | Original subdivision of The Olives and Bromley.<br>Allotments on southwest end were subdivided in 1886 and 1912.<br>Mixed allotment sizes with large frontages.<br>Substantial building setbacks.<br>Large front setbacks.<br>Side setbacks provide visual spacing between dwellings. |
| Architectural styles, detailing and built form features | Typical 1890s to early 20th Century dwellings.<br>Victorian dwellings.<br>Inter-War dwelling styles including Bungalow, Tudor, Art Deco and Mediterranean.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).<br>Short roof spans.<br>Hip and gable roof forms.<br>Deep verandahs and porches.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors.<br>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. |
| Building height | Single storey and two storey (some in-roof or partly in-roof). |
| Materials | Consistent with the materials used in the 1880s to 1930s period.<br>Sandstone, red brick, rendered facades.<br>Corrugated iron and terracotta tiled roofing.<br>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.<br>Timber strapping on Inter-War dwelling gables. |
| Fencing | Fencing associated with the era and style of the building, and providing views to the building.<br>Timber picket, timber dowel, timber paling.<br>Hedging.<br>Low masonry plinth with cast iron or wrought iron in a traditional arrangement.<br>Woven wire or low masonry with or without geometric steel for Inter-war buildings. |
| Setting, landscaping, streetscape and public realm features | Narrow street.<br>Well-established garden settings.<br>Lack of street planting due to the narrow width of Maturin Road.<br>The Olives is a significant State Heritage Place on Olive Street. |
| Representative Buildings | Identified - refer to SA planning database. |

**Da Costa Park Historic Area Statement (HoB3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1923 subdivision.<br>1920s - 1930s dwellings. |
| Allotments, subdivision and built form patterns | Subdivision is indicative of 1920s town planning with angled, diagonal streets centred radially around a central park or reserve.<br>Garden city theory in practice.<br>The pattern of the subdivision and the arrangement and size of individual allotments remains largely unaltered.<br>Large allotments with large frontages.<br>Consistent, large front setbacks.<br>Side setbacks provide visual spacing between dwellings. |
| Architectural styles, detailing and built form features | Inter-War style dwellings including Tudor Revival, Californian bungalow, Art Deco, and some Spanish mission.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 25 to 35 degrees.<br>Short roof spans.<br>Hip and gable roof forms.<br>Deep verandahs and porches.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors. |

| Statement# | | Statement |
|---|---|---|
| | | Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade. |
| | Building height | Single storey. |
| | Materials | Consistent with the materials used in the 1920s to 1930s period.<br>Terracotta tiled and corrugated iron roofing.<br>Brick, sandstone, and stucco and part-rendered finishes.<br>Roofing, facades and fenestration in natural red brick and terracotta colouration.<br>Timber joinery including fascia, barges, window frames, door frames and doors.<br>Timber strapping on Inter-War dwelling gables. |
| | Fencing | Fencing associated with the era and style of the building, and providing views to the building.<br>Woven wire.<br>Low masonry with geometric steel.<br>Low masonry (stepped).<br>Low masonry fencing (often stepped).<br>Low Rock face sandstone.<br>Hedging. |
| | Setting, landscaping, streetscape and public realm features | Centred around Da Costa Park, with its triangular landscaped area and mature trees.<br>Relatively wide streets. |
| | Representative Buildings | Identified - refer to SA planning database. |
| HoB4 | **New Glenelg Historic Area Statement (HoB4)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Subdivided in 1850.<br>Buildings 1860s - 1900s and 1920s - 1930s.<br>Most intense development occurred in 1870s and 1880s.<br>Further development in 1920s - 1930s (Interwar period). |
| | Allotments, subdivision and built form patterns | Varying allotment sizes and street width. Larger allotment sizes in some areas to the west along Broadway, Robert Street and South Esplanade. Smaller allotment sizes are predominant throughout the Bath Street area, and between Hastings and Moseley Streets. Uniform, large allotment sizes and large frontages along Penzance and Partridge Streets. Front setbacks vary from street to street across the area. Front setbacks are however consistent along individual streetscapes. Side setbacks provide visual spacing between dwellings. |
| | Architectural styles, detailing and built form features | All domestic architectural types from the 1870s to 1880s, from the largest of seaside mansions (e.g. South Esplanade) to the humblest of workers cottages (e.g. John Street).<br>Late Victorian to early 20th Century Period architecture.<br>Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing.<br>Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings.<br>Inter-War buildings, mostly Bungalows.<br>Many dwellings without vehicle garaging.<br>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.<br>Rectilinear plan forms.<br>High degree of modulation and articulation.<br>Low scale.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).<br>Short roof spans.<br>Hip and gable roof forms.<br>Concave, bullnose and straight-pitched verandahs.<br>Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>High solid to void ratio.<br>Vertical proportions in windows and doors. |
| | Building height | Predominantly single storey. |
| | Materials | Consistent with the materials used in the 1840s to 1920s period.<br>Sandstone, bluestone and brick. Corrugated iron and tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables. |
| | Fencing | Fencing associated with the era and style of the building, and providing views to the building.<br>Timber picket, timber dowel, timber paling.<br>Hedging.<br>Low masonry plinth with cast iron or wrought iron in a traditional arrangement.<br>Woven wire or low masonry with or without geometric steel for Inter-war buildings. |
| | Setting, landscaping, streetscape and public realm features | Norfolk Island pines throughout.<br>Mature oak street trees along Moseley Street.<br>Vistas over the ocean to the west of the Historic Area. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting Light Regional Council**

Lig1

**Daveyston Historic Area Statement (Lig1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Early development C1850's in support of mining and trade and later development (C1870's) in support of agricultural pursuits. |
| Allotments, subdivision and built form patterns | Large allotments characteristic of their rural setting and focused along the Old Sturt Highway. |
| Architectural styles, detailing and built form features | A mix of both large and smaller homes of typical construction representing a range of periods. |
| Building height | Single storey built scale to the streetscape. |
| Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. |
| Fencing | Low, open fencing reflective of the architectural style of the subject building. |
| Setting, landscaping, streetscape and public realm features | Rural setting with the presence of large mature trees and minimal front boundary setback commensurate to the undulating nature of the township. |
| Representative Buildings | Identified - refer to SA planning database. |

Lig2

**Freeling Historic Area Statement (Lig2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Mixed era and style of development comprising early buildings dating from 1880's - 1920's aligned with early farming settlement and the townships reliance on the railway and later grand villas (C1910). |
| Allotments, subdivision and built form patterns | Conventional land division pattern with a mix of allotment sizes. |
| Architectural styles, detailing and built form features | A mix of building types including stately and modest villas, single and double fronted cottages, interwar bungalows, galvanised iron homes, and symmetrical cottages representing a range of periods.<br><br>Numerous prominent church buildings used for a range of worship and residential purposes. |
| Building height | Single storey built scale to the streetscape. |
| Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. |
| Fencing | Low, open fencing reflective of the architectural style of the subject building. |
| Setting, landscaping, streetscape and public realm features | Wide streets and expansive allotments, generous siting characteristics and substantial gardens and trees.<br><br>Areas of narrow streets and laneways and compact allotment layout. |
| Representative Buildings | Identified - refer to SA planning database. |

Lig3

**Greenock Historic Area Statement (Lig3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Early development dating from C1847 onwards and predominance of masonry residential structures. |
| Allotments, subdivision and built form patterns | Mixed allotment sizes with a dominance of deep allotments. |
| Architectural styles, detailing and built form features | A mix of building types with a predominance of stone residential structures however presence of other types including corrugated iron. |
| Building height | Single storey built scale to the streetscape. |
| Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. |
| Fencing | Low, open fencing reflective of the architectural style of the subject building. |
| Setting, landscaping, streetscape and public realm features | Areas of wide streets and narrow laneways adding to the village feel and focused around the Greenock Creek. |
| Representative Buildings | Identified - refer to SA planning database. |

**Kapunda Historic Area Statement (Lig4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| Statement# | | Statement |
|---|---|---|
| Lig4 | Eras, themes and context | Mixed style commensurate to the formation of Kapunda from the 1840's onwards and reflective of the era of influence.<br><br>Dominance of the Main Street and strong architectural elements. |
| | Allotments, subdivision and built form patterns | Conventional grid land division pattern with a mix of allotment sizes.<br><br>Within the Main Street/town centre, consistent setbacks and strong building line with little interruption. |
| | Architectural styles, detailing and built form features | Main Street<br><br>Distinctive built form with two storey dominance.<br><br>Strong presence of civic buildings on or within proximity of Main Street (Hill Street).<br><br>Strong front boundary building line. Verandahs and parapet walls.<br><br>Residential<br><br>Stately houses with gardens or open space surrounding the buildings to the eastern end of High Street and South Terrace.<br><br>Small modest cottages in proximity of the Historic Mine Site.<br><br>Relatively high-density row cottages in the oldest part of Kapunda (e.g. Mildred Street and Tod Street).<br><br>Other stately civic buildings in the form of the Kapunda Primary School and Kapunda High School. |
| | Building height | Main Street<br><br>Two storey built scale commensurate of the streetscape.<br><br>Residential<br><br>Single storey built scale to the streetscape. |
| | Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. |
| | Fencing | Low, open fencing reflective of the architectural style of the subject building. |
| | Setting, landscaping, streetscape and public realm features | Areas of wide streets and expansive allotments and substantial gardens and trees. Areas of narrow streets and compact allotment layout. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Wasleys Historic Area Statement (Lig5)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Lig5 | Eras, themes and context | 1870's to 1880's dwellings with later development dating from the 1920's and 1930's and the dominance of the railway. |
| | Allotments, subdivision and built form patterns | Large conventional land division pattern with a mix of allotment sizes. |
| | Architectural styles, detailing and built form features | A mix of building types including small villas and cottages representing a range of periods. |
| | Building height | Single storey built scale to the streetscape. |
| | Materials | Consistent with the materials associated with the architectural styles of the subject building and streetscape. |
| | Fencing | Low, open fencing reflective of the architectural style of the subject building. |
| | Setting, landscaping, streetscape and public realm features | Areas of wide streets and expansive allotments with established street trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Echunga Historic Area Statement (MtB4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| MtB4 | | |
|---|---|---|
| | Eras, themes and context | 1849 - 1940.<br>Commercial buildings including single storey shops, ecclesiastical, civic, former post office and hotel.<br>Some rural structures including outbuildings.<br>Some former shops being converted to dwelling.<br>Single storeyed detached and semi-detached dwellings.<br>Small cottages on large allotments. |
| | Allotments, subdivision and built form patterns | Shopfronts close to footpath.<br>Generous setbacks to north-eastern side of Adelaide Road.<br>Consistent, deep allotments. |
| | Architectural styles, detailing and built form features | Verandahs and porches up to and over footpath.<br>Small scale, single storeyed detached and semi-detached built form of early European settlements.<br>Structures reflecting early local production.<br>Parapets to shop fronts.<br>Symmetrical and asymmetric frontages.<br>Separate verandahs.<br>Hipped and gabled roofs.<br>Ridge typically parallel to street for residential dwellings.<br>Parapet ends and gable roof for shops. |
| | Building height | External wall height of 3 to 4 metres for residential dwellings. |
| | Materials | Stone external walls.<br>Brick quoins.<br>Corrugated profile roof sheeting.<br>Painted timber window frames and doors.<br>Painted timber verandah posts.<br>Brick, render or stone chimneys.<br>Fibre cement sheeting to parapets (e.g. Echunga Memorial Institute). |
| | Fencing | Hardwood post and wire mesh or cyclone mesh.<br>Some timber picket fencing.<br>Metal posts with metal rails, wire or mesh infill varieties evident within the area. |
| | Setting, landscaping, streetscape and public realm features | Wide street. Evenly spaced deciduous street trees to north-eastern side. Verandahs and porches to footpath providing shelter for pedestrians. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Exhibition Road, Mount Barker Historic Area Statement (MtB5)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| | Eras, themes and context | From mid-19th and 20th Century.<br>Public open space. |

| Statement# | | Statement |
|---|---|---|
| MtB5 | | Small cottages on large allotments.<br>Small scale, single storeyed, detached built form. |
| | Allotments, subdivision and built form patterns | Variety of allotment sizes and shapes to Exhibition Road.<br>Aligning setbacks from street frontage.<br>Wellington Road dwellings parallel to side boundary providing angled frontage. |
| | Architectural styles, detailing and built form features | Small scale, intact, single storeyed, detached built form.<br>Cottages.<br>Stone dwellings.<br>Symmetrical frontages and separate verandahs.<br>Hipped roof forms.<br>Roof ridge typically parallel to the street.<br>Separate verandahs with bullnose, concave or monopitch form.<br>Some verandahs continuous with main roof or adopting change in pitch.<br>Painted timber roof trim, verandah posts. |
| | Building height | External wall height varies from 3 to 4 metres. |
| | Materials | Stone external walls.<br>Brick quoins.<br>Some rendered walling.<br>Corrugated profile sheet roofing.<br>Painted timber window frames and doors.<br>Painted timber verandah posts with some ornate decoration.<br>Brick, render or stone chimneys. |
| | Fencing | Low masonry. Brush. Metal picket fence. |
| | Setting, landscaping, streetscape and public realm features | Public open space.<br>Open interface between the public space and residential uses. Stands of densely planted eucalypts and mature deciduous trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting City of Mount Gambier**

MtG1

**Bay Road Historic Area Statement (MtG1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Development from period of settlement up to and including the 1920s. |
| Allotments, subdivision and built form patterns | Generous allotment sizes. Extensive street and side boundary set-backs. |
| Architectural styles, detailing and built form features | Large single storey houses with hipped and gabled galvanised iron roofs; and generous verandahs. |
| Building height | Predominantly single storey, with two storey additions within roof space to rear of buildings. |
| Materials | Varied building construction but generally comprising dolomite or limestone walling with quoins. |
| Fencing | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. |
| Setting, landscaping, streetscape and public realm features | Well maintained, mature gardens that contribute to a pleasant, open streetscape. Streetscape improvements within the area have particular emphasis on Bay Road as the entry to the Volcanic Complex State Heritage Area. |
| Representative Buildings | Identified - refer to SA planning database. |

MtG2

**Doughty Street and Wehl Street North Historic Area Statement (MtG2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Development from period of settlement up to and including the 1920s. |
| Allotments, subdivision and built form patterns | Generous allotments dominating the higher slopes, with substantial street and side boundary setbacks.<br>Smaller allotments on the lower slopes. |
| Architectural styles, detailing and built form features | Varied building styles from one street to another.<br>Grand houses dominating the higher slopes.<br>On the lower slopes, workman's cottages.<br>Contemporary housing. |
| Building height | Predominantly single storey, with two storey additions within roof space to rear of buildings. |
| Materials | Varied building construction and materials reflecting traditional period and style.<br>Timber workman's cottages. |
| Fencing | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. |
| Setting, landscaping, streetscape and public realm features | Characterised by steep topography with generous allotments sizes and well-maintained mature gardens. |
| Representative Buildings | Identified - refer to SA planning database. |

MtG3

**Railway Historic Area Statement (MtG3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Transport and associated commercial history of the railyards, industrial.<br>Development from period of settlement up to and including the 1920s. |
| Allotments, subdivision and built form patterns | The railway corridor forms one linear allotment, sited between Bay Road to the east and Wehl Street South to the west. Allotments along Margaret Street vary in size, however are predominantly regular in shape. Street frontages vary, however, are generally one of two large sizes. Allotment depth is consistent across Margaret Street. Large allotments range in size. |
| Architectural styles, detailing and built form features | Commercial/industrial in nature. Several buildings have frontage to Margaret Street and the Railway Lands. Railway station with associated platforms still exists. |
| Building height | Varying heights - single up to 3 to 4 storey high buildings dependant on their historical use. |
| Materials | Buildings are predominantly constructed from corrugated iron, timber or stone. |
| Fencing | Open styles of fencing - for example, timber post and rail; post and wire. |

| Statement# | Statement | |
|---|---|---|
| | | |
| | Setting, landscaping, streetscape and public realm features | Expansive, open nature of the railyards and the remnant buildings and structures associated with its use as a passenger and goods terminal. The commercial and industrial buildings along Margaret Street form a strong industrial streetscape fronting the railway yards.<br><br>Railway track and other elements including ballast, railway iron fences, telegraph poles, platforms and structures.<br><br>Use of old railway carriages. Temporary, demountable or movable structures and plantings. |
| | Reprasentative Buildings | Identified - refer to SA planning database. |
| MtG4 | **St Andrews Historic Area Statement (MtG4)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Institutional and residential.<br><br>Development from period of settlement up to and including the 1920s. |
| | Allotments, subdivision and built form patterns | Generally narrow roads with residential buildings exhibiting minimal street set-backs.<br><br>Large allotments along Elizabeth Street and Penola Road.<br><br>Allotment sizes ranging from large to small. |
| | Architectural styles, detailing and built form features | Significant institutional buildings include the Wesley Church and Hall, both of which are State heritage places, and the St Andrews Church and spire, which is a dominant element of the area. |
| | Building height | Predominantly single storey, with two storey additions within roof space to rear of buildings. |
| | Materials | Construction and materials reflecting traditional period and style. |
| | Fencing | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br><br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. |
| | Setting, landscaping, streetscape and public realm features | Significant Institutional buildings. Many residences are located at the top of the hill, taking advantage of fine views over the city to the south. |
| | Representative Buildings | Identified - refer to SA planning database. |
| MtG5 | **Vansittart Park Historic Area Statement (MtG5)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880s-1920s. |
| | Allotments, subdivision and built form patterns | Adjoining the St Andrews Historic Area, the Vansittart Park area contains uniform residential allotments on a grid pattern. There has been a small number of infill type developments in the area to date. However, the area remains predominantly dwellings on large regular shaped allotments. Generally large, consistent frontages. Predominantly large, consistent allotments. The Vansittart Park provides a sporting ground (with associated amenities) and large open garden areas. |
| | Architectural styles, detailing and built form features | Villa, federation and bungalow style dwellings. |
| | Building height | Predominantly single storey, with two storey additions within roof space to rear of buildings. |
| | Materials | Construction and materials reflecting traditional period and style. |
| | Fencing | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br><br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. |
| | Setting, landscaping, streetscape and public realm features | Well landscaped Vansittart Park and the topography of the area adds interest. Streets are not excessively wide by comparison to other areas of Mount Gambier. |
| | Representative Buildings | Identified - refer to SA planning database. |
| MtG6 | **Wehl Street South Historic Area Statement (MtG6)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1860s- mid 1920s. |
| | Allotments, subdivision and built form patterns | Wide roads with large, deep allotments, although east-west roads are generally narrow with buildings set close to the street.<br><br>Side setbacks are in some cases small. |
| | Architectural styles, detailing and built form features | Diverse dwelling styles.<br><br>Larger residences predominantly along Wehl Street South.<br><br>Smaller stone or timber-clad workman's cottages close to the railway line.<br><br>Wehl Street Public School. |
| | Building height | Predominantly single storey, with two storey additions within roof space to rear of buildings. |
| | Materials | Stone and timber clad.<br><br>Construction and materials reflecting traditional period and style. |
| | Fencing | Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls.<br><br>Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building. |
| | Setting, landscaping, streetscape and public realm features | Street set-backs in this area vary considerably, and combined with clusters of historical housing, produce an interesting streetscape.<br><br>Residential streetscape character, including within commercial areas. Unobtrusive advertising. Front fences and garden landscaping. Car parking located to the rear of buildings. |
| | Representative Buildings | Identified - refer to SA planning database. |
| **Historic Areas affecting Rural City of Murray Bridge** | | |
| | **Adelaide Road Pontoon Historic Area Statement (MuBr1)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. | **Historic Areas affecting City of Norwood, Payneham and St Peters** | |
| | **College Park Historic Area Statement (NPSP1)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. |

| Statement# | Statement | |
|---|---|---|
| NPSP1 | Eras, themes and context | Subdivision during the 1870s with dwellings built between 1870s and 1920s. Detached dwellings. |
| | Allotments, subdivision and built form patterns | Consistent pattern of prestigious single-storey detached dwellings on very large, spacious allotments fronting wide, tree-lined streets. Very low density.<br><br>Side and rear setbacks providing large separation distances between dwellings. |
| | Architectural styles, detailing and built form features | Double fronted, symmetrical and asymmetrical dwellings; East Adelaide Investment Company dwellings; Larger villas and mansions; Victorian villas; Edwardian Queen Anne and Art Nouveau.<br><br>The double fronted, symmetrical and asymmetrical dwellings in the College Park Policy Area are an elegant larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. The external walls are generally constructed of bluestone or dressed and coursed sandstone. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling. |
| | Building height | Single storey, two storey in some locations. |
| | Materials | External walls made of bluestone or dressed and coursed sandstone. Stone, brick and rendered masonry.<br><br>Traditional colours and materials. |
| | Fencing | Low, open front fencing (including secondary streets to the main façade of building) associated with the traditional period and style of the building up to 1.2m (masonry), 1.5m (wrought iron, timber and wire) and 2m (masonry pillars) in height, allowing views to dwelling.<br><br>Timber picket, timber dowelling, masonry and cast iron palisade, or<br><br>corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period; or timber picket, timber paling or woven crimped wire; or corrugated iron or mini orb within timber framing for Edwardian dwellings.<br><br>Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. Side fences along street corners continue the detailing of the front fence to the house alignment, solid fencing beyond this point in traditional materials. |
| | Setting, landscaping, streetscape and public realm features | Dwellings have sizeable setbacks from all boundaries and are typically set in large landscaped grounds with front boundaries defined by fencing of various styles.<br><br>Open landscape character to front garden, which enhances dwelling and streetscape quality.<br><br>Wide streets lined with mature trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Hackney North Historic Area Statement (NPSP2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| NPSP2 | | |
|---|---|---|
| | Eras, themes and context | Predominantly pre 1920s, some pre 1940s dwellings. Detached, semi-detached and row dwellings. |
| | Allotments, subdivision and built form patterns | Small narrow fronted allotments on narrow streets. |
| | Architectural styles, detailing and built form features | Humble, mainly double fronted (with some single fronted) single storey cottages, in detached, semi-detached and row dwelling configurations. |
| | Building height | Single storey. |
| | Materials | Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls. |
| | Fencing | Low, open front fencing (including secondary streets to the main façade of building) reflecting the traditional period and style of the associated building up to 0.9m in height, allowing views to building. Rear and side fencing behind the alignment of the main dwelling face to 1.8m.<br><br>Timber picket, timber dowelling, simple masonry and cast iron palisade.<br><br>Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. |
| | Setting, landscaping, streetscape and public realm features | Consistent pattern of narrow streets with dwellings built close to street with minimal setbacks and separation distances. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Hackney South Historic Area Statement (NPSP3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| NPSP3 | | |
|---|---|---|
| | Eras, themes and context | Detached, semi-detached and row dwellings. |
| | Allotments, subdivision and built form patterns | Closely packed arrangement of buildings built close to the street frontage. Mainly small narrow fronted allotments which generally only allow for dwellings with a single room width, rear service lanes. Some sizeable allotments along parts of Osborne Street.<br><br>Primary dwelling frontages are to streets, not lanes. |
| | Architectural styles, detailing and built form features | Small, mainly single-fronted dwellings, in detached, semi-detached and row dwelling configurations. Some elevated dwellings along eastern side of Westbury Street. Verandahs along the primary frontage of dwellings.<br><br>Dwellings simple in structure and plan. |
| | Building height | Single-storey. |
| | Materials | Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls. |
| | Fencing | Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to building. Original design and materials, such as timber picket, timber dowelling or simple masonry and cast iron palisade. |
| | Setting, landscaping, streetscape and public realm features | Consistent pattern of narrow streets and rear service lanes. Rear lanes used for vehicular access and garages. Streets lined with mature exotic street trees. Landscaped gardens to sizeable allotments. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Joslin / Royston Park Historic Area Statement (NPSP4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| NPSP4 | | |
|---|---|---|
| | Eras, themes and context | 1900s-1930s. Detached dwellings.<br><br>Joslin/Royston Park Historic Area is divided into two separate locations:<br><br>the area around First and Second Avenue, north of Lambert Road, in the suburb of Royston Park, and the area centred around Fourth, Fifth and Sixth Avenues in the suburb of Joslin. |
| | Allotments, subdivision and built form patterns | Regular pattern of large allotments. |
| | Architectural styles, detailing and built form features | Single storey detached dwellings. Bungalows. Edwardian (such as Queen Anne) and Federation dwelling styles. Some Tudor style dwellings with a steeper roof pitch, tiled roof and heavy columns. |
| | Building height | Single-storey, two storeys in some locations. |
| | Materials | Stone dwelling walls and original joinery. |
| | Fencing | Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush or timber and wire) and 2m (masonry pillars), allowing views to dwelling. Original design and materials, such timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other Victorian dwellings.<br><br>Timber picket, timber paling or woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings.<br><br>Timber paling, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for Bungalow and Tudor house styles. |

| Statement# | Statement | |
|---|---|---|
| | | Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry. |
| | Setting, landscaping, streetscape and public realm features | Area characterised by regularity of the wide, tree lined avenues.<br>Landscaped garden setting, particularly in front of dwelling; Streets lined with distinctive street trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

| Statement# | Statement | |
|---|---|---|
| NPSP5 | **Kensington 1 Historic Area Statement (NPSP5)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1838-1860; 1861-1880; 1881-1900; 1901-1915; 1916-1939.<br>Residential urban village characterised by buildings, settings street patterns and natural features. Range of dwelling types. |
| | Allotments, subdivision and built form patterns | Original historic pattern. |
| | Architectural styles, detailing and built form features | Larger Victorian-style brick and stone buildings, Federation era brick and stone buildings and bungalow-styled buildings of the post-1918 period.<br>Significant corner buildings contribute to the character. |
| | Building height | Up to two storeys. |
| | Materials | Pise, stone or brick. |
| | Fencing | Generally low, reflecting the traditional period, style and form of the associated building. |
| | Setting, landscaping, streetscape and public realm features | The unique diagonal street pattern of Kensington is an important part of its character. |
| | Representative Buildings | Identified - refer to SA planning database. |

| Statement# | Statement | |

**Payneham (Henry Street/George Street) Historic Area Statement (NPSP17)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Pre 1890s (Victorian) and 1890s-1910s (Edwardian).<br>Detached and semi-detached dwellings. |
| Allotments, subdivision and built form patterns | Historic settlement sections of George Street and Henry Street, Payneham.<br>Dwellings closely set on small, narrow fronted allotments and built close to the street with minimal setbacks and separation distances.<br>Original verandahs. |
| Architectural styles, detailing and built form features | Small Victorian and Edwardian / federation cottages in detached and semi-detached configurations which are an important relic of early residential development in this section of Payneham.<br>Dwellings simple in structure and plan. |
| Building height | Single storey. |
| Materials | Unpainted sandstone and bluestone, corrugated iron roofing materials and joinery. |
| Fencing | Low, open fencing that reflects the period and style of the dwellings. Front fencing (including Henry Street / George Street corners and any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling.<br>Timber picket, timber dowelling, simple masonry and cast iron palisade, or corrugated iron or mini orb within timber framing.<br>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry. |
| Setting, landscaping, streetscape and public realm features | Distinctive historic streetscape character established through the pattern of narrow streets and distinctive street trees. |
| Representative Buildings | Identified - refer to SA planning database. |

NPSP17

**St Peters Historic Area Statement (NPSP18)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1870 - 1930s. Detached and semi-detached dwellings. |
| Allotments, subdivision and built form patterns | Mix of close-set, single-fronted cottages on narrow allotments and a range of cottages and villas set on larger allotments with more substantial established gardens, in wide streets, often with rear service lanes. Rear lanes used for vehicular access and garages<br>In College Park and along Fifth and Sixth Avenue - small to medium sized allotments.<br>In this section of First Avenue - modest sized allotments. |
| Architectural styles, detailing and built form features | In College Park and along Fifth and Sixth Avenue - mainly single-storey double-fronted villas and detached dwellings of modest proportions with some single-fronted dwellings.<br>In this section of First Avenue - reasonably compact single-fronted, double-fronted, and villa-type dwellings. |
| Building height | Single storey. |
| Materials | Sandstone and bluestone construction. |
| Fencing | Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling.<br>Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber.<br>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry. |
| Setting, landscaping, streetscape and public realm features | In College Park and along Fifth and Sixth Avenue - Reasonably wide streets are characteristic of this area, with significant street planting and fenced front boundaries.<br>Rear vehicle access lanes.<br>Landscaping around dwellings is an important design element.<br>Streets lined with mature exotic street trees. |
| Representative Buildings | Identified - refer to SA planning database. |

NPSP18

**Stepney Historic Area Statement (NPSP19)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1850 - 1890s. Detached, semi-detached and row dwellings. |
| Allotments, subdivision and built form patterns | Intricate pattern of development.<br>Dwellings built on small, narrow-fronted allotments, close to the street frontage with minimal setbacks and separation.<br>Primary dwelling frontages to streets, not lanes. |
| Architectural styles, detailing and built form features | Single and double fronted single storey cottages, in detached, semi-detached and row dwelling configurations, with some modest villas and bungalows.<br>Dwellings simple in structure and plan. |

NPSP19

| Statement# | Statement | |
|---|---|---|
| | | |
| | Building height | Single storey. |
| | Materials | Bluestone and sandstone. |
| | Fencing | Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the fain face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling.<br><br>Timber picket, timber dowelling, masonry and cast iron palisade. |
| | Setting, landscaping, streetscape and public realm features | Street trees feature to a varying degree due to the species selection and age of planting.<br><br>Rear lanes used for vehicular access and garages |

| | Allotments, subdivision and built form patterns | *[Not stated]* |
| | Architectural styles, detailing and built form features | Victorian villas, large two storey mansion buildings, double-fronted houses and groups of two storey row houses.<br><br>Consistent set-backs. Buildings which address Fullarton Road and The Parade have deep set-backs. |
| | Building height | Generally up to two storeys. |
| | Materials | Sandstone or bluestone. |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | Vehicular movement is dominated by The Parade, Fullarton Road, Rundle Street and Little Dew Street, which provides primary access for delivery, service, visitors' and residents' vehicles, in preference to access via the adjoining residential areas.<br><br>Well established garden settings.<br><br>High standard of landscaping incorporating large trees which reinforce the leafy avenue character of these roads. |
| | Representative Buildings | *[Not identified]* |

**Heathpool Historic Area Statement (NPSP26)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

| Statement# | Statement |
|---|---|
| NPSP26 | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. |

| | |
|---|---|
| Eras, themes and context | An area which demonstrates its origin as a locally significant subdivision of land in 1917, following the sale of Heathpool farm. The subdivision by land developers Wilkinson, Sando and Wyles, created 40 allotments, forming a new residential estate known as 'Toorak East'.<br><br>Developed during the Inter-War period (1915-1945) after the main phases of suburban development (on northern side of Kensington Road) were completed. This area was developed at the same time as similar subdivisions in nearby parts of the City of Burnside.<br><br>An intact area displaying historic construction styles built from 1920 featuring large houses and gardens in Stannington Avenue, dominated by wide-fronted bungalow style dwellings. Later construction of mainly middle-class housing in Rothbury Avenue, dominated by Old English style dwellings.<br><br>The southern extent of the Historic Area along Rothbury Avenue abuts and shares the built form character, patterns and housing styles of the Tusmore Historic Area (in the City of Burnside). |
| Allotments, subdivision and built form patterns | Largely intact original subdivision pattern, comprising grid pattern of original allotment sizes, providing regularity and consistency laid out along the east-west streets.<br><br>Large single storey detached dwellings with bespoke decorative and ornate detailing on large allotments, especially along Stannington Avenue, including double allotments bought and retained as single holdings and other sites with extensive landscaped open space.<br><br>Allotments are generally between 1000m² and 1400m². Sites comprised of double allotments in the order of 1700m² to 2500m².<br><br>Frontages are generally between 21 and 33 metres. Sites comprised of double allotments with total frontage width in the order of 42 to 53 metres.<br>Front setbacks are generous and range from 9 metres to 21 metres.<br><br>Spaciousness around dwellings with site coverage in the order of 30 to 45 per cent on original allotments.<br><br>Side setbacks are a feature of the locality providing large separation distances between dwellings of between 1 to 5 metres, with limited original development built on the side boundary. Setback patterns are generally asymmetrical, with varied space on either side of dwellings.<br><br>Street facing dwellings enhanced by their landscaped settings. |
| Architectural styles, detailing and built form features | Notable dwellings include large and finely crafted 1920s Inter-War Bungalow dwellings with form, scale and detailing reflective of 1920s-era homes of the wealthy, lining both sides of Stannington Avenue.<br><br>Along the northern side of Rothbury Avenue are highly intact examples of middle-class Inter-War Old English dwellings and Inter-War Bungalow dwellings of varying designs, repeated on southern side of Rothbury Avenue in City of Burnside – Tusmore Historic Area to form a consistent streetscape.<br><br>Porches and verandahs in keeping with the scale and style of associated dwellings, either projecting or as a continuation of the main roof structure.<br><br>Hip and gable roof forms with roof pitches of 20 to 30 degrees on Bungalows and up to approximately 45 degrees on Inter-War Old English dwellings. Visible chimneys are a feature of the distinctive roofing detail in this area.<br><br>Where a second building level exists, it is setback from side boundaries and incorporated within the roof-pitch.<br><br>Single-width open style carport alongside and sometimes incorporated into the roof form with matching masonry pillars, or generously recessed is a feature of Inter-war dwellings in the area.<br><br>Free-standing or enclosed ancillary buildings are sited to the rear of the associated dwelling. |
| Building height | Dwelling height to the roof ridge in the order of 5 to 8 metres.<br><br>Predominantly single storey, except for original lofts, dormer windows or other upper storey elements in some taller dwellings where the second level is incorporated with minimal interruption to the pitched roof-form. |
| Materials | Feature front walls materials consistent with era of original construction including freestone, sandstone and brickwork.<br><br>Verandah balustrades of red brick, freestone or rendered brick, often with feature pillars supporting the verandah roof. Bungalow styles featuring a front timber pergola adjoining the verandah.<br><br>Pitched roofs in galvanised iron sheet or terracotta tiles, including double steep gables.<br><br>Original materials and finishes and unpainted masonry.<br><br>Detailing around doors, windows, wall edges and gables. Timber framed sash or casement style window openings and use of projecting bay windows.<br><br>Natural and muted colour palette (including the use of red brick and terracotta) with colour highlights in the detailing such as quoins. |
| Fencing | Front fences are generally open style and low in height (to 1.2 metres high) permitting good views of the dwelling and its curtilage.<br><br>Fencing materials commonly associated with Inter-War Bungalow and Inter-War Old English dwelling styles, was typically woven wire or chain mesh with timber or galvanised tube framing and/or hedge, or a low masonry plinth wall.<br><br> |
| Setting, landscaping, streetscape and public realm features | Spacious front and side gardens with extensive landscaping are features of this locality and are important in the setting of historic building forms.<br>Tree lined streets creating a leafy public realm.<br><br>Trees and tennis courts on larger sites, adding to the sense of buildings integrated into landscaped settings.<br><br>Narrow access points which maximise the extent of unbroken street frontage and front landscaping with single width driveways. |
| Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting City of Onkaparinga**

**Clarendon Historic Area Statement (Onka1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1840s - 1890s.<br><br>Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport, Water Catchment and Supply, Social Services, Religion, Education, Law and Order, Local Government. |
| Allotments, subdivision and built form patterns | Township allotments set out from the main road (Grants Gully Road) which winds its way along the floor of a valley and Turners Gully Road.<br><br>Relatively large allotments, typical of a country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment.<br><br>Substantial space between buildings.<br><br>Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character.<br><br>Building frontages are parallel to streets becoming more random out from the centre of the township.<br><br>Dwellings with frontage to Turners Gully Road and/or Clarendon Road sited on the lower slopes of hillsides or within the valley floor. |
| Architectural styles, detailing and built form features | Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences.<br><br>Agriculture and viticulture related structures such as winery buildings, farmhouses and barns.<br><br>Public buildings such as police station, courthouse, school, former institute building (hall) with Victorian Gothic and similar styles of the Victorian era. Churches and cemeteries. Hotel, general store and shops. Transport related structures such as bridges.<br><br>War memorial.<br><br>Roof types: M - shaped, gable, hipped, concave or straight-pitched veranda, steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods<br><br>short roof spans<br><br>Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills |
| Building height | Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings.<br><br>Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. |

Onka1

| Statement# | | Statement |
|---|---|---|
| | | Tall single-storey churches and institutional and public buildings that are generally exceptions and landmarks that punctuate the streetscape and stand out because of their difference in scale. |
| | Materials | Masonry - random rubble, roughly-coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work<br>Roof - slate or corrugated iron<br>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts<br>Consistent with the materials used in the 1840s-1890s buildings within the township.<br>Unobtrusive, natural colours. |
| | Fencing | Picket fence. Woven wire. Timber post-and-rail or post-and-wire<br>Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height. |
| | Setting, landscaping, streetscape and public realm features | Lineal township laid out along a narrow valley floor.<br>Township located within a steeply-sided valley and a hillside, rural setting.<br>Narrow streets.<br>The reservoir and the Onkaparinga River.<br>Mature landscape environment where well-established trees and vegetation reinforce the country township character and emphasise the space between buildings.<br>Village or rural township character.<br>Vistas and views into and out of the township are important. |

| | Eras, themes and context | 1850s - 1930s.<br>Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Road Transport, Water Transport/Shipping, Social Services, Leisure Pursuits/Holidaymaking. |
| | Allotments, subdivision and built form patterns | Radiating layout from north-easterly point where Mindarie Street meets the original termination of William Street.<br>Traditional grid pattern elsewhere.<br>Based on gridiron pattern.<br>Views of the hills to east down public streets. |
| | Architectural styles, detailing and built form features | Mid-to-late 1800s stone buildings. Informal inter-war holiday and fishing shacks. Post-war holiday houses. Recent dwellings that draw on the traditional form and scale.<br>Informality in the appearance of many buildings arising from additions over time and variety in use of materials. Rectilinear plan form. Low-scale. Typically two or more pavilions rather than a single mass. High solid-to-void ratio. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills.<br>Roof types: gable. Hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans. |
| | Building height | Predominantly single-storey, some two-storey (but well-modulated). Single-storey has typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger former hotel is a landmark. |
| | Materials | Masonry - limestone, sandstone, weatherboard, some rendered masonry - random rubble.<br>Quoins - rendered, brick.<br>Roof - corrugated iron, slate, dark grey.<br>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts. |
| | Fencing | Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height. |
| | Setting, landscaping, streetscape and public realm features | Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas. Informal streetscapes often lined with established trees and shrubs. |
| | Representative Buildings | *[Not identified]* |
| | **Aldinga Historic Area Statement (Onka6)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. **Willunga Historic Area Statement (Onka7)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Onka7 | Eras, themes and context | Predominantly 1840s - 1900. Early settlement; Agriculture, Slate Quarrying. |
| | Allotments, subdivision and built form patterns | Original subdivision in the late 1830s. Second subdivision of southern part of the township in 1857.<br><br>Laid out around High Street, the main thoroughfare through the town, which cuts diagonally through the original subdivision.<br><br>Allotments perpendicular to High Street in centre of township.<br><br>Grid pattern with allotments perpendicular to streets in southern section of township.<br><br>Original allotments of around half an acre.<br><br>Subsequent land division has occurred, but allotments remain relatively large.<br><br>Early buildings line High street and the road out of Willunga to Aldinga and McLaren Vale.<br><br>Rectilinear.<br><br>Buildings aligned parallel to boundaries. |
| | Architectural styles, detailing and built form features | Simple, vernacular cottages. Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas and asymmetrical cottages with Victorian stylistic influences. Shops and shop/dwellings with Victorian stylistic influences. Churches and cemeteries. Public buildings such as police station, courthouse, school, former post and telegraph office, post office, former Institute building (hall). Three hotels. Transport-related structures such as bridges.<br><br>Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills.<br><br>Roof types: hipped. Gable. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans. |
| | Building height | Variation in the size and sophistication of buildings, from humble cottages to two-storey dwellings and institutional or public buildings. Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres.<br><br>Smaller vernacular cottages. Hotels, former post and telegraph office, former police station and courthouse and former Institute (hall) are landmarks. |
| | Materials | Masonry - local sandstone, pug-with-lime render, some local brick - random rubble, squared.<br><br>Quoins - stone, rendered, brick.<br><br>Roof - corrugated iron, Willunga slate.<br><br>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.<br><br>Consistent with the materials used in the 1840s-1900s buildings within the township. |
| | Fencing | Picket. Post-and-rail. Post-and-wire. Slate post-and-wire. Hedges. Randomly-laid stone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height. |
| | Setting, landscaping, streetscape and public realm features | Commercial and residential buildings indicative of the town's early settlement phase in the mid-1800s. Landmark two-storey buildings in High Street. Range of buildings and uses reflecting the composition of the town's community and enterprise. Town's foothill topography features creek lines. Substantial remnant gum trees. High degree of mature landscaping. |

| PET1 | **Peterborough Historic Area Statement (Pet1)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Turn of 20th century.<br>Civic, commercial and retail.<br>Railways. |
| | Allotments, subdivision and built form patterns | Traditional grid arranged around Main Street and the railway line. |
| | Architectural styles, detailing and built form features | Along Main Street and within the town centre, commercial buildings with traditional shopfronts, parapets and verandahs. Small, humble workers' accommodation, including single- and double- fronted cottages and row cottages. Villas. Traditional railway architecture including workshops and industrial buildings. Roof pitches between 30-45 degrees. |
| | Building height | Single storey with the exception of civic and hotel buildings and the Capitol Theatre . |
| | Materials | Local stone, masonry and corrugated iron. |
| | Fencing | Open fencing of a rural style not exceeding 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Along Main Street and within the town centre, consistent setbacks and a strong building line with little interruption. Buildings square to the street. Visibility of the railway line. Dominance of the railways housing and administrative buildings within the railway reserve east of Hurlstone Street. Dominance of railway workshops and industrial buildings at the western end of the railway reserve. Dominance of religious buildings associated with three churches along Kitchener Street. Symmetry given to Main Street by trees where there is no built form. Definition and articulation of four corners created by hotel buildings. Wide streets with stone kerbing. Slate footpaths. |
| | Representative Buildings | Identified – refer to SA planning database. |
| PET2 | **Yongala Township Historic Area Statement (Pet2)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Late 19th and early 20th century. |
| | Allotments, subdivision and built form patterns | Traditional grid land division pattern arranged around Main Street. |
| | Architectural styles, detailing and built form features | Along Main Street, traditional shopfronts with verandahs. |
| | Building height | Single storey with the exception of the Globe Hotel. |
| | Materials | Local stone, masonry and corrugated iron. |
| | Fencing | Open fencing of a rural style no more than 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Silos and the Globe Hotel are landmark features. Consistent building setbacks from street frontages and the central unifying element of the grassed area on Main Street give the area cohesion. |
| | Representative Buildings | [Not identified] |
| **Historic Areas affecting City of Playford** | | |
| Play1 | **One Tree Hill Historic Area Statement (Play1)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. | | Eras, themes and context | 1860s - Uniting Church & Cemetery, Cottages.<br>1900s - Institute & War Memorial. |
| | Allotments, subdivision and built form patterns | Orderly allotment configuration fronting Black Top Road.<br>Varying front setbacks. Generous side setbacks. |
| | Architectural styles, detailing and built form features | Early symmetrical cottages of low scale and simple form.<br>Institutional/community period buildings featuring simple gable form.<br>Rectilinear plan forms. Moderate degree of modulation and articulation.<br>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on domestic buildings. Short roof spans. Hip roof forms on domestic buildings. Gable roof form on institutional/community buildings. Short straight pitched verandahs on domestic buildings. Vertical proportions in windows and doors. |

| Statement# | Statement | |
|---|---|---|
| | Building heights | Low scale single storey domestic buildings.<br>Single storey institutional/community buildings. |
| | Materials | Consistent with the materials used in the 1860s to 1900s period.<br>Institutional/community buildings featuring local stone face, walls unpainted.<br>Private buildings featuring rendered and painted walls.<br>Corrugated iron roofing.<br>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. |
| | Fencing | Fencing associated with the era and style of the building.<br>Low open style fencing.<br>Low stone fence and iron gate to Uniting Church. |
| | Setting, landscaping, streetscape and public realm features | Well established streetscape character, with notable landscaping. |
| | Representative Buildings | *[Not identified]* |

**Historic Areas affecting City of Port Adelaide Enfield**

**Alberton / Rosewater Historic Area Statement (PAdE1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| PAdE1 | | |
|---|---|---|
| | Eras, themes and context | 1860 - 1950 built development. |
| | Allotments, subdivision and built form patterns | Squares linked by wide streets. Modified grid pattern. Reasonably consistent allotment depths. Varied front setbacks. |
| | Architectural styles, detailing and built form features | Wide range of housing styles including villas, bungalows, cottages, terrace and rows. |
| | Materials | Materials consistent with the style of building and era of its original construction. |
| | Building height | Single storey. |
| | Fencing | Low and/or open consistent with the style and era of construction of the building it is associated with.<br>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with 1920s including capped timber palings, post and wire or woven wire fences. |
| | Setting, landscaping, streetscape and public realm features | Pockets of important early houses in Queen Street and King Street, dating from the 1860s. Substantial Victorian stone and brick houses grouped around two squares, Company Square and St Patricks Square, with good examples of substantial corner villas. The Alberton station complex is an important feature in the area and contains the earliest railway station in South Australia and shops of a consistent design. The double line of trees along the railway line that divides the area and the established street trees, particularly, Plane trees, Ash trees, Jacarandas, White Cedars and some mature Canary Island Date Palms make an important contribution to the character of the area. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Exeter Historic Area Statement (PAdE2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| PAdE2 | | |
|---|---|---|
| | Eras, themes and context | 1860's - 1940's built development. |
| | Allotments, subdivision and built form patterns | Grid pattern with narrow north-south running streets with the long axes of allotments running east -west. Allotments fronting Harris St, Exmouth Road and Semaphore Road configured with their long axes running north- south so that buildings address those roads. Generally built close to street with small front setbacks. |
| | Architectural styles, detailing and built form features | Housing styles consisting of cottages, villas, bungalows, terraces and rows. |
| | Materials | Materials consistent with the style of building and era of its original construction. |
| | Building height | Predominately single storey but some scattered two storey. |
| | Fencing | Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated Victorian and Edwardian houses include pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with the 1920s including capped timber palings, post and wire or woven wire fences. |
| | Setting, landscaping, streetscape and public realm features | The early cottages and neighbourhood shops with verandahs extending over the footpath and the Cooperative Building Society in Denman Street provide a reminder of the local village character of this area, catering for the needs of residents whose main means of transport was walking. A collection of intact early buildings characterised by stone and brick residences, early timber houses and later corrugated iron houses all retaining original detailing. A second small residential pocket on the south side of Semaphore Road which also has a local village character with single storey brick and stone cottages and a two storey hotel and paired terrace. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Semaphore / Largs Historic Area Statement (PAdE3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| PAdE3 | | |
|---|---|---|
| | Eras, themes and context | 1860's - 1940's built development. |
| | Allotments, subdivision and built form patterns | Grid pattern with predominately east-west running streets with the long axes of allotments running north-south. Allotments fronting the Esplanade and Military Road configured with their long axes running east-west so that buildings address these roads. Consistent front setbacks for each street but setbacks varying between streets. Varied allotment sizes. |
| | Architectural styles, detailing and built form features | Wide range of housing styles from all periods of development of Semaphore and Largs including villas, bungalows, workers row cottages, terraces, rows, mansions and Tudors. Early timber and masonry houses. |
| | Building height | Predominately single storey but scattered two storey and a small amount of three storey along parts of the Esplanade frontage. |
| | Materials | Materials consistent with the style of building and era of its original construction. Timber and masonry housing. |
| | Fencing | Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences. |
| | Setting, landscaping, streetscape and public realm features | A continuous run of high quality residential buildings set among mature Norfolk Island Pines along the Esplanade. The low scale of the Esplanade set against the open view of the sea opposite contains individual houses of historical and architectural importance built as seaside residences. An important sub-precinct along Military Road running from Fort Glanville through to Largs containing high quality public and private buildings. A concentration of early houses around Newman Street and Blackler Street associated with the development of Semaphore during the 1860s. Pockets of mature street planting providing important settings for these early houses, particularly along the Esplanade, Union Street, Clare Street, Hall Street and others. |

| Statement# | Statement | |
|---|---|---|
| | Representative Buildings | Identified - refer to SA planning database. |
| PAdE4 | **Mainstreet Historic Area Statement (PAdE4)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1850's - 1940's built development. |
| | Allotments, subdivision and built form patterns | Focused around Commercial Road, St Vincent Street, Dale Street and Church Place. Allotments configured with their long axes running perpendicular to these roads. Allotments sizes vary to accommodate retail and commercial uses. Commercial buildings generally built to road frontages. |
| | Architectural styles, detailing and built form features | Commercial buildings featuring a fine grain fabric of small scale tenancies with narrow frontages. The extensive use of balconies and verandahs over footpaths. |
| | Building height | Predominately single and two storey with a small number three and four storey buildings to the east of Commercial Road. |
| | Materials | Materials consistent with the style of building and era of its original construction. |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | The area is a commercial and retail focus. It acts as a buffer and an approach area to the Port Adelaide State Heritage Area noting that the boundary around the Port Adelaide State Heritage Area is relatively arbitrary and the Main street Policy Area contains some buildings that are of equal significance to buildings within the Port Adelaide State Heritage Area. It features a large number of early buildings, many of which have housed the same continuous functions since the time of their construction. The State Heritage listed St Paul's Church is a prominent building in the area and provides a land mark along a major view corridor from the Nelson St Bridge. Similarly, the State Heritage listed Uniting Church off Commercial Road is an important landmark and southern gateway to this area. The area contains a number of State Heritage places and many Local Heritage places. |
| | Representative Buildings | Identified - refer to SA planning database. |
| PAdE5 | **Woolstores Historic Area Statement (PAdE5)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880's - 1940's built development. |
| | Allotments, subdivision and built form patterns | Modified grid pattern with St Vincent Street and Bedford Street providing the main access roads into and out of this area. The southern and western boundaries of the grid are radiused by Brock Street and Barlow Street. The northern boundary is defined by Santo Parade, the northern side of which was previously an extension of Dock 1 and provided the woolstores with convenient access to cargo vessels. Woolstores and commercial buildings generally built to road frontages. Cottages close to and facing the road frontage. Medium to large allotment sizes. |
| | Architectural styles, detailing and built form features | Large purpose designed woolstores and warehouses featuring strong and robust built forms with parapet walls and saw tooth roofs. Simple, single storey workers cottages. |
| | Building height | Large masonry woolstores buildings ranging from single to four storeys. Single storey former workers cottages. |
| | Materials | Masonry and corrugated iron feature strongly and are key defining materials. Materials consistent with the style of building and era of its original construction. |
| | Fencing | *[Not stated]* |
| | Setting, landscaping, streetscape and public realm features | A key characteristic of this area is the compact group of large, well detailed warehouses associated with the wool export trade and located close to the dockside. The woolstores buildings are highly visible and prominent from eastern approaches into the Port Adelaide Regional Centre, particularly from Perkins Drive. The unimpeded visibility and prominence of these buildings is important. The area also contains a collection of primarily corrugated iron houses, mainly located between Aberdeen and Crozier Streets south of Brock Street. Some are identified as Local Heritage Places, dating from 1900 to 1920, which served as worker's housing for the nearby woolstores. These surviving houses are a remnant of a more consistent low scale residential area which contrasted visually with the adjacent imposing woolstores. |
| | Representative Buildings | Identified - refer to SA planning database. |
| PAdE6 | **Semaphore Road Historic Area Statement (PAdE6)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1870's - 1920's built development. Semaphore Road developed as a substantial commercial centre after the establishment of a railway line from Port Adelaide to Semaphore Jetty in 1878 and a subsequent increase in residential population in the area requiring goods and services. |
| | Allotments, subdivision and built form patterns | Semaphore Road is a wide east west road that in this area runs from Causeway Road to the Esplanade.<br><br>Allotments are orientated so that buildings address Semaphore Road. Allotment sizes vary to accommodate a range of retail and commercial uses.<br><br>Retail and commercial buildings built to and addressing the Semaphore Road frontage. |
| | Architectural styles, detailing and built form features | A variety of Government, institutional and commercial buildings including simple single storey shops with verandahs and parapet walls. Many of these shops retain post-supported verandahs over the footpath. There are pockets of well-preserved historic residential development featuring mansions, villas and cottages. |
| | Building height | Predominately single storey and two storey. |
| | Materials | Materials consistent with the style of building and era of its original construction. |
| | Fencing | None for retail and commercial buildings.<br><br>Low and/or open consistent with the style and era of construction of the building it is associated with.<br><br>Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. |
| | Setting, landscaping, streetscape and public realm features | A popular main street that links Semaphore and Port Adelaide and provides a pleasant environment for both seaside holiday makers and residents.<br><br>The seaward end of Semaphore Road retains strong evidence of Semaphore's original function as a transport and communications station for the early South Australian colony from 1850 onwards. The Time Ball Tower, Customs Boarding Station and the early Post Office building remain as an indication of these early services. The development of the Semaphore Town Hall, now the Library, and the RSL Hall continued the provision of community facilities, and these developed in association with the commercial areas of Semaphore road further to the east. This area is an important reminder of Semaphore's early prominence in the development of Port Adelaide and the State.<br><br>A generous public foreshore provides a popular recreation area and the backdrop and view to the western end of Semaphore Road.<br><br>The road is wide and features pedestrian areas, paving, upper canopy trees and low lying shrubs located in the median and verge, seating and public art. It is a well-established retail and commercial area that provides cafes, restaurants, shops, hotels, churches, a cinema and a range of other facilities.<br><br>Many well maintained commercial and residential buildings from the 1880s to the 1920s remain in the area. There are many Local Heritage listed places along the length of the road and a number of State Heritage listed places in the western portion of the area. |
| | Representative Buildings | Identified - refer to SA planning database. |
| | **Jetty Road Historic Area Statement (PAdE7)** | |
| | The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. | |
| | These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. | |
| | The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and | 1870's - 1920's built development. |

| Statement# | | Statement |
|---|---|---|
| PAdE7 | context | The first subdivision of Largs was in 1873. The Largs Bay Land and Investment Company formed in 1881, constructed the jetty and built the Largs Pier Hotel by December of 1882. |
| | Allotments, subdivision and built form patterns | Allotments are orientated so that buildings have frontages to and address Jetty Road and the Esplanade. Generous rectangular allotments with wide frontages.<br>Retail and commercial buildings built to and addressing road frontages. |
| | Building height | Single storey and two storey except at the Jetty Road / Esplanade intersection where development is three storey. |
| | Architectural styles, detailing and built form features | A mix of architectural styles including simple, single storey shops with over footpath verandahs and parapet walls and a double storey terrace with residential development over ground floor shops. |
| | Materials | Materials consistent with the style of building and era of its original construction. |
| | Fencing | None for retail and commercial buildings. |
| | Setting, landscaping, streetscape and public realm features | Located at the seaward end of Jetty Road, this area has strong links to the foreshore and beach and is a popular area for local residents and visitors.<br>The State Heritage listed Largs Pier Hotel of Victorian (Italianate) architecture is a landmark building. Defining the corner of the Esplanade and Jetty Road, the Hotel, with its arcaded facades presents a prominent entry to this area.<br>The area also contains other early commercial and residential buildings including a former Post Office, two storey shops, and early housing. The latter includes a row of double storey terraces with small scale residential development located above shops. |

**Historic Areas affecting Port Pirie Regional Council**

PtPi1

**Port Pirie Historic Area Statement (PtPi1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Integral part of the Port Pirie Regional Centre. 19th and early 20th century. |
| Allotments, subdivision and built form patterns | Buildings on Ellen Street and Alexander Street built to the allotment boundary.<br>Traditional allotment pattern, frontages and widths. |
| Architectural styles, detailing and built form features | Traditional designs, roof forms and building features such as verandas, awnings and balconies. |
| Building height | One and two storeys. |
| Materials | Original or otherwise complementary materials, colours and finishes. |
| Fencing | Front fences and gates associated with traditional period, style and form of the building, up to 1.2 m in height. |
| Setting, landscaping, streetscape and public realm features | The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area. |
| Representative Buildings | Identified - refer to SA planning database. |

PtPi2

**Crystal Brook Historic Area Statement (PtPi2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Integral part of Crystal Brook Town Centre. |
| Allotments, subdivision and built form patterns | Traditional allotment pattern, frontages and widths. |
| Architectural styles, detailing and built form features | Traditional designs, roof forms and building features such as verandas, awnings and balconies. |
| Building height | Predominantly single storey with two storey structures in suitable locations. |
| Materials | Original or otherwise complementary materials, colours and finishes. |
| Fencing | Front fences and gates associated with traditional period, style and form of the building, up to1.2 m in height. |
| Setting, landscaping, streetscape and public realm features | The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area. |
| Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting City of Prospect**

Pr1

**Fitzroy Terrace Historic Area Statement (Pr1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | Late 19th and Early 20th century mansion style housing. |
| Allotments, subdivision and built form patterns | Very large spacious allotments with wide frontages.<br>Sizable setbacks from all boundaries with sizable spaces between buildings. The established pattern of buildings sited away from allotment boundaries makes a significant contribution to the character. |
| Architectural styles, detailing and built form features | Very large mansion style dwellings. Additions to the rear or side of dwellings.<br>Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs and building placement on allotments. |
| Building height | Up to 2 storeys. |
| Materials | Variety of materials and colour finishes with additional detailing around windows, doors and edges of walls. |
| Fencing | Low open style to 1.2 metres high.<br>Fencing that associated with the period and style of the dwelling. |
| Setting, landscaping, streetscape and public realm features | Substantial well landscaped gardens with front yards that complement the style of the dwelling. Landscaping around dwellings. The spacious streetscape character of Fitzroy Terrace is created by the large allotments on which have been built a range of equally large residences. Garages and carports are designed and sited to be subordinate to the main dwelling. |

| | | |
| | Representative Buildings | Identified - refer to SA planning database. |
| Pr2 | **Clifton Street Historic Area Statement (Pr2)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Late 1870s, late 19th speculative housing by local builder James Trevail for middle class home buyers. |
| | Allotments, subdivision and built form patterns | Original subdivisions of 1881, 1882 and larger allotments of 1894-95 at western end of street (known as Prospect View at the time of sale). Consistent, large front setbacks.<br><br>Large and small asymmetrical side setbacks to dwellings. The set-back and pattern of coverage creates a notable streetscape with vistas and views towards the west. |
| | Architectural styles, detailing and built form features | Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 1880s-1890s residential designs along Clifton Street reflecting speculative subdivision. Double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography to the west. |
| | Building height | Single storey, moderate residential scale. Essentially single storey residences which take advantage of the sloping topography to the west. |
| | Materials | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. |
| | Fencing | Low open style to 1.2 metres high with mainly masonry and iron materials. |
| | Setting, landscaping, streetscape and public realm features | Homogenous streetscape of houses and associated buildings.<br><br>Substantial well landscaped gardens with front yards that complement the style of the dwelling.<br><br>Narrow verge with mature street trees.<br><br>Garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Pr3 | **Little Adelaide Historic Area Statement (Pr3)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Little Adelaide Village formed in late 1839. The section was bought by John Bradford an agent for Adelaide Mechanics Land Company. Most of the current homes are dated from the 1870s to 1890s. |
| | Allotments, subdivision and built form patterns | Is centred on a triangle created by Main North Road, Carter Street, Highbury Street and Argyle Street.<br><br>Narrow allotments of varying widths and narrow streets.<br><br>Small setbacks from all boundaries with compact spaces between buildings. |
| | Architectural styles, detailing and built form features | Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs.<br><br>Single fronted and attached cottages are predominant, mainly from 1870-1890s. The village retains a church, corner shops (former) and other buildings typical of early village settlement. |
| | Building height | Single storey.<br><br>Compact small single fronted and attached cottages. |
| | Materials | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs. |
| | Fencing | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling. |
| | Setting, landscaping, streetscape and public realm features | Small front yards and limited space between buildings. Public realm characterised by narrow street and verge with limited room for landscaping. Village atmosphere. Where present, garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Pr4 | **Whinham Street Historic Area Statement (Pr4)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. | Statement# | Statement | |
|---|---|---|
| Pr5 | Eras, themes and context | Late 19th and early 20th centuries residential. Focus of commemoration of war service, civic activities and important sporting events. |
| | Allotments, subdivision and built form patterns | Regular subdivision pattern. Three separate land divisions between 1892 and 1923 - part of the Oxford subdivision of 1892 on south side of the Terrace with, part of St John's Wood South subdivision in 1909 on north side with larger allotments of and part of a 1923 division of the eastern end to the Memorial Gardens.<br>Consistent setbacks.<br>Large and small asymmetrical side setbacks to dwellings. |
| | Architectural styles, detailing and built form features | Range of designs with range homogeneity derived from decorative front facades (detailing around windows, doors verandahs & gables), pitched roofs, brick chimneys & front verandahs.<br>Houses display style, form and detail of the relevant periods of historic development - 1892 to the 1920s. |
| | Building height | Single storey and large residential scale. |
| | Materials | Face stone and brick walls and corrugated iron or terra cotta roofs. |
| | Fencing | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling. |
| | Setting, landscaping, streetscape and public realm features | Substantial front gardens.<br>Very leafy streetscape.<br>Civic and residential character.<br>Strong visual axis between the Town Hall and the Memorial Gates to Prospect Oval.<br>Garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Pr6 | **Martin Avenue Historic Area Statement (Pr6)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Inter-War residential. |
| | Allotments, subdivision and built form patterns | Large allotments.<br>Regular generous front setbacks.<br>Large and small asymmetrical side setbacks to dwellings. |
| | Architectural styles, detailing and built form features | Mix of bungalows, 'gentleman's residence' and Tudor homes.<br>Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs. Additions to the side and rear of dwellings. |
| | Building height | Single to two storey and large residential scale. Two storey additions are within the roof space or to rear of buildings. |
| | Materials | Face stone and brick walls and terracotta tiled roofs, original finishes. |
| | Fencing | Low open style to 1.2 metres high. Fences comprising low masonry plinth with regularly spaced columns and iron above to a medium height. |
| | Setting, landscaping, streetscape and public realm features | Large, well landscaped front yards as an extension of a green and leafy streetscape with mature canopy over grassed verges.<br>Street trees and wide grassed verges combine with the generous setbacks to contribute to the spacious appearance of the public realm.<br>Garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Pr7 | **North Ovingham Historic Area Statement (Pr7)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Late 19th Century housing. 1877 - 1879. |
| | Allotments, subdivision and built form patterns | Small allotments subdivided in 1877 - 1879. Double fronted, narrow, deep allotments between Toronto Street and Cotton Street. Small setbacks from all boundaries with compact spaces between buildings. |
| | Architectural styles, detailing and built form features | Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs. Primarily double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography on individual allotments from east to west. Small symmetrically fronted or attached stone houses remain in Toronto Street and larger examples of similar style fronting Churchill Road. |
| | Building height | Single storey and small residential scale. |
| | Materials | Stone walls and steps facing stone and brick houses and attached cottages with verandahs, corrugated iron roofs. |
| | Fencing | Low open style to 1.2 metres high associated with the design of the dwelling and allows gardens to spill onto the street. |
| | Setting, landscaping, streetscape and public realm features | Small front yards and limited space between buildings. Public realm characterised by narrow street and verge and moderate canopy cover from semi-mature street trees. Mature gardens which spill onto the street, pleasant green streetscape. Intimate, small residential pocket.<br>Where present, garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | *Identified - refer to SA planning database* |
| Pr8 | **Prospect Lanes Historic Area Statement (Pr8)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Reflects substantial areas of Prospect that were developed during the turn of the century (1880s to early 1900s) and constructing cottages and villa homes on higher areas overlooking Churchill Road and beyond. |
| | Allotments, subdivision and built form patterns | Regular subdivision pattern with consistent large frontages and site areas. The series of laneways that link the allotments are distinctive features within the sub division. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings. |
| | Architectural styles, detailing and built form features | Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Cottages and villa homes on higher areas overlooking Churchill Road and beyond. Housing in the area displays a consistency of character reflecting the styles of domestic architecture at the turn of the century. Houses incorporate concave or bull-nosed verandahs and other typical detail and generally comprise face stone front walls, with brick or rendered quoins, and window and door dressings. |
| | Building height | Single storey. |
| | Materials | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs. |
| | Fencing | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling. |

| Statement# | | Statement |
|---|---|---|
| | Setting, landscaping, streetscape and public realm features | Consistent moderate street setbacks.<br><br>Large and small asymmetrical side setbacks to dwellings.<br><br>Rear lane access, with primary streets having no access or access which has been designed and located to be subordinate to the main dwelling. |
| | Representative Buildings | *Identified - refer to SA planning database* |
| Pr9 | **Highbury Historic Area Statement (Pr9)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Subdivided in 1878 by Henry Ball. Turn of century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century. |
| | Allotments, subdivision and built form patterns | Original subdivision with modest allotments with large frontages. Consistent moderate street setbacks.<br><br>Large and small asymmetrical side setbacks to dwellings. |
| | Architectural styles, detailing and built form features | Primarily detached housing reflecting styles of domestic architecture at the turn of the century.<br><br>Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. |
| | Building height | Single storey and moderate residential scale. |
| | Materials | Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs. |
| | Fencing | Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling. |
| | Setting, landscaping, streetscape and public realm features | Limited landscaping and dominant built form from small front yards and narrow road verges. Gloucester Street has greener front yards and public realm.<br><br>St Cuthbert's Anglican Church and its adjacent manse are prominent landmarks.<br><br>Garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | *Identified - refer to SA planning database* |
| Pr11 | **Medindie Gardens Historic Area Statement (Pr11)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Inter-War period housing. The area is predominated by bungalows to the east of Corbin Road and Tudor-style houses to the west. The majority of the original dwellings constructed prior to 1930 remain intact, with additions occurring over time either within the roof space or to the rear and side. |
| | Allotments, subdivision and built form patterns | Regular subdivision pattern of generously sized allotments and wide frontages. Consistent large front and side setbacks. The area retains its original subdivision pattern, with regular sized allotments supporting residential development at a low density. |
| | Architectural styles, detailing and built form features | Predominantly bungalows to the east of Corbin Road and Tudor-style houses to the west.<br><br>Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. |
| | Building height | Single storey and large residential scale. Two storey additions are within the roof space or to rear of buildings. |
| | Materials | Stone and brick walls and limited external colour palette with detailing (including glazed bricks) around windows, doors and edges of walls and corrugated iron or terra cotta roofs.<br><br>Consistent use of materials including rock faced stone and masonry, face red brick, terracotta roof tiles or corrugated iron, glazed bricks for trim and other details and materials typical of the housing of the Inter-War Period. |
| | Fencing | Low open style (to 1.2 metres high). Fencing associated with the period and style of the dwelling. |
| | Setting, landscaping, streetscape and public realm features | Large well landscaped front yards and tree lined streets above grassed verges. Minimal driveway and hard-surfaced areas. Consistent pattern of prestigious single storey detached dwellings on generous allotments fronting tree-lined street. Spacious and open feel. Garages and carports are designed and sited to be subordinate to the main dwelling. |
| | Representative Buildings | *Identified - refer to SA planning database* |
| **Historic Areas affecting Robe** | | |
| | **Robe Historic Area Statement (Ro1)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |

| Statement# | | Statement |
|---|---|---|
| RO1 | Eras, themes and context | 19th century and early decades of 20th century.<br><br>Shipping port, communication and administration township servicing pastoral development of the South East. |
| | Allotments, subdivision and built form patterns | Topography shapes the setting of Robe and land division pattern. Royal Circus is a low knoll. It is a commemorative landmarks and a distinct road feature. There is a legible connection between Royal Circus, the sea wall / jetty abutment, the Customs House and the Post and Telegraph Office. Main Road, Victoria Street and Mundy Street form the main line of road to the port and the main street. The traditional street grid pattern extends either side of Victoria Street, to the coastal fore-dune and across the ridge to the south which overlooks and forms the backdrop to the township.<br><br>Most of the original large square allotments have been subdivided but the pattern of historic buildings remains legible. |
| | Architectural styles, detailing and built form features | Traditional stone commercial buildings with shopfronts, parapets and verandahs within the town centre. The variety rather than the consistency of traditional building forms is a distinct characteristic of Robe. Small workers' cottages on large allotments, often with low walls, hipped roofs spanning one or two rooms, casement windows and lime-washed or natural stone walls. Heritage listed community buildings (the primary school, churches and the Institute) are on prominent sites and remain as strong landmarks. Heritage-listed government buildings (the Post and Telegraph Office, Customs House and Court House) dominate Royal Circus. Massive stone chimneys are a characteristic feature of the historic buildings. Stone outbuildings are visible from public streets. Roof pitches between 25-35 degrees. Roofs with a high degree of articulation, steep pitches and small spans, provide a unique roofscape across Robe to Guichen Bay. Older buildings have casement windows. Later buildings have double-hung timber sash windows. |
| | Building height | Two storey buildings along small section of Smillie Street, and hotels. Their built form combines double and single storey elements and verandahs, articulating their bulk and scale. Adjacent buildings differ in style, creating a varied rather than a consistent skyline. Other historic buildings generally single storey, with small span hipped roofs. Building floor levels are close to, step with or are built into, the slope of the land. |
| | Materials | Local stone, limestone, rendered and bagged masonry with painted or lime wash finish. Painted timber weatherboard, painted timber joinery, trims, verandahs, barges and fascias. Galvanised and painted corrugated iron roofing. Some examples of slate and traditional flat metal roof tiles. Driveway materials are neutral in colour and pattern with natural finishes. |
| | Fencing | Local stone, hardwood palings and pickets, hardwood and woven wire, brush with round hardwood posts and hedges not exceeding 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Views and vistas of the entrance to the town centre along Main Road past Lake Fellmongery and Lake Charra. Views of the foreshore area adjacent Town Beach and streetscapes of historic buildings of Smillie Street and Mundy Terrace. Views across the area illustrate the importance of native vegetation and the distinct character of the roof designs of historic buildings. Historic buildings square to and often close to street alignments, particularly on Smillie Street. Minimal breaks between buildings except where access to the rear of a site is provided. Streets, verges and reserves in the public realm characterised by Lakestone kerbing, limestone cuttings, landmark trees (Norfolk Island Pines in particular) and native vegetation. Important public open space reserves that frame the township at Lannum Reserve, the Institute / Town Beach Foreshore, Royal Circus and the southern edge of Lake Butler. Each has a distinct landscape structure, planting character and historic quality. |

**Historic Areas affecting Tatiara**

**Bordertown Historic Area Statement (Tat1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| TAT1 | Eras, themes and context | 1910-1930. |
| | Allotments, subdivision and built form patterns | Traditional grid.<br><br>Large allotments. |
| | Architectural styles, detailing and built form features | Federation-style houses with asymmetrical plans and multiple decorative gables. California bungalows with veranda pylons and gables extending to the veranda perimeter. Low-pitched roofs. |
| | Building height | Single storey. |
| | Materials | Rock-faced sandstone walls and terracotta tiled roofs. |
| | Fencing | No fencing or open front fencing no more than 1.2m. |
| | Setting, landscaping, streetscape and public realm features | Rural setting. Landscaping surrounding dwellings. |
| | Representative Buildings | Identified – refer to SA planning database. |

**Historic Areas affecting City of Tea Tree Gully**

**Tea Tree Gully Township Historic Area Statement (TTG1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| TTG1 | Eras, themes and context | The village core of Tea Tree Gully. Mid to late 19th Century to early 20th Century. |
| | Allotments, subdivision and built form patterns | Traditional subdivision layout focussed on North East Road as the major approach route to the township in both directions. Allotments are varied in size and shape. Regular moderate front setbacks and small setbacks from side boundaries. Generally consistent siting and space between buildings. Sites address North East Road. |
| | Architectural styles, detailing and built form features | Colonial style flat facades articulated with post-supported verandas. Symmetrical designs with simple footprints. Roof forms are generally hipped or gable roofs with pitches between 30-40 degrees. A mix of buildings including detached dwellings, churches, row shops, a war memorial, former police station, institute building, hotel, former bakehouses, flour mill and winery. Tea Tree Gully museum and former council chambers building as State Heritage Places. Historic homestead relics and a stone retaining wall in Pine Park. |
| | Building Height | Single storey, with the exception of the Old Flour Mill and Tea Tree Gully Museum. |
| | Materials | A combination of sandstone and bluestone construction with corners and window and door reveals formed with quoin work. Generally, all dwellings include corrugated roofs in galvanised or light to mid-tone greys, green or red. Unpainted stone / brick. Modern dwellings are consistent with the above materials, but also include a combination of raw brick, painted brick and rendered brick in natural, earthy colours. Timber windows. |
| | Fencing | Low, open fencing forward of the building line to height of 900mm. Associated with the traditional period, style and form of building. Hedges, timber picket, post and rail with woven wire, pailing or railing, stone, rendered brick or block. |
| | Setting, landscaping, streetscape and public realm features | Undulating and natural setting with minimal cut and fill, and extensive planting and landscaping.<br><br>The Township provides for a visual transition between the rural landscape of the hills to the east and the suburban plains to the west.<br><br>Angove's tower and cellar are recognised as landmark buildings and are important elements of the western gateway, including vistas of the tower.<br><br>The North East Road entrance to Anstey Hill Recreation Park is also an important gateway and features historic building relics that line the entrance walk inside the park.<br><br>The communal focal point is Haines Memorial Park, which features a European landscape theme surrounded by native street tree planting which illustrates the history of European settlement. Views to and from Haines Memorial park.<br><br>Strong landscape setting dominated by undulating topography. Significant stands of native trees and intensively landscaped watercourse of Tea Tree Creek<br><br>Discreet, low scale advertising comprising typefaces, colours, sizes and forms associated with the clear and simple styles used on the 19th and early 20th centuries, generally not illuminated. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting City of Unley**

**Centres Conservation - Goodwood, King William and Fullarton Roads Historic Area Statement (Un1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| | Eras, themes and context | 1880 to 1940's built development. |

| Statement# | | Statement |
|---|---|---|
| Un1 | Allotments, subdivision and built form patterns | Goodwood Road - prominent original imposing buildings, homogeneous historic nature and intrinsic features formed by the close-knit development to the street alignment, open balconies and verandahs extending over the footpath.<br><br>King William Road - early era buildings and quaint unique close-knit character formed by the parade of buildings of narrow fronted shops to the street alignment, with simple continuous series of ornate parapet facades and verandahs over the footpath and some open balconies above.<br><br>Fullarton Road - significant and early era residential forms of buildings with appropriate setbacks, low-key commercial uses adaptation and substantial landscaped frontages north of Cheltenham Street and small scale simple straight facade shopfronts to south.<br><br>Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks and spacing between buildings and garden landscape setting. |
| | Architectural styles, detailing and built form features | Victorian. Turn-of-Century. Inter-War. Complementary main street shopfronts, parapet walls and verandahs over footpaths and residential forms. |
| | Building height | Maximum two storey street presentation. |
| | Fencing | Fencing forward of the front façade of the building on Fullarton Road, of a form associated with the building and generally of low masonry pier and plinth, cast iron, brush, timber or similar nature. |
| | Setting, landscaping, streetscape and public realm features | Limited street trees, except Fullarton Road with dominant, well-established street trees.<br><br>Goodwood Road - early commercial centre from the late nineteenth century comprising large imposing buildings, including landmark two-storey State Heritage Place, two-storey Local Heritage Place and Church buildings, and smaller narrow fronted premises.<br><br>King William Road - early commercial centre from the late nineteenth century comprising some larger buildings and primarily small narrow fronted premises.<br><br>Fullarton Road - residential buildings, some converted to community and commercial uses, and low-key, well landscaped gardens and State Heritage significant mansion 'Hughes Estate'. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Un2 | **Residential Compact Goodwood Estate Historic Area Statement (Un2)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1870 to 1900 built development. |
| | Allotments, subdivision and built form patterns | Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular modest allotments and wide site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| | Architectural styles, detailing and built form features | Victorian double fronted, symmetrical and asymmetrical cottages. Complementary Victorian corner shops that are landmarks and features of the area. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height. |
| | Materials | Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated Iron roof cladding. |
| | Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); Hedges, with or without fencing. |
| | Setting, landscaping, streetscape and public realm features | Compact streetscape character, simple grid of short and narrow streets, narrow verges, modest street trees. Goodwood Estate of 1875 a rectangular section of 30 acres (12.1 hectares) with regular layout of standard modest properties, some local corner shops, adjacent to facilities and services along Goodwood Road and the notable bisection in north by tramway corridor. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Un3 | **Residential Compact Parkside St Ann's Estate Historic Area Statement (Un3)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1860 to 1940 built development. |
| | Allotments, subdivision and built form patterns | Village initial layout and development in 1854. Tightly angled pattern of short and narrow streets. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing and garden landscape setting. Varied allotment sizes and site frontages reflective of the architectural era of the building. |
| | Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century double fronted cottages and villas, single-fronted, attached and row cottages. Later complementary Inter-War styles, together with corner shop variations and institutional buildings, including school and church buildings. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Wall Height in the order of 3.3 to 3.5 metres, total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height. |
| | Materials | Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Rendered masonry. Corrugated Iron roof cladding. |
| | Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| | Setting, landscaping, streetscape and public realm features | Early village township of 1854 on edge of Adelaide Parklands with an angular layout following alignment of arterial roads. Compact streetscape character. Tightly angled pattern of short and narrow streets. Narrow verges. Modest street trees. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Un4 | **Residential Compact Forestville (North) Historic Area Statement (Un4)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. Un8

**Residential Compact Forrestville and Fullarton Historic Area Statement (Un8)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1880 to 1940 built development. |
| Allotments, subdivision and built form patterns | Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| Architectural styles, detailing and built form features | Victorian. Turn-of-Century. Inter-War. Hipped and gable roof forms, roof louvres, chimneys, open verandahs, feature ornamentation, (plasterwork, ironwork and timberwork), latticework and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| Building height | Consistent scale and proportions of buildings including wall heights and roof designs to the streetscape. |
| Materials | Sandstone. Bluestone. Brick, including glazed brick. Rendered masonry.<br><br>Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on some post 1900s buildings. |
| Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| Setting, landscaping, streetscape and public realm features | Compact streetscape character, narrow verges, and modest street trees. |

Un9

**Residential Grand Unley Park Heywood Estate Historic Area Statement (Un9)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1860 to 1940's built development. |
| Allotments, subdivision and built form patterns | Regular, very generous allotments and site frontages. Prevailing rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and grand garden landscape setting. |
| Architectural styles, detailing and built form features | Victorian Villas and Mansions. Turn-of-the-Century Villas and Mansions. Inter-War period Bungalows, particularly Gentleman's Bungalows. Tudor, particularly Gentleman's Tudors. Old English, Georgian Revival and other International Styles. Individualised by original architectural inspirations. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| Building height | Grand built scale and form of existing historic buildings. |
| Materials | Consistent with the materials typically associated with the style and era of the dwelling. For example (but not limited to): stone with brick or rendered embellishments, iron roof and timber joinery for Victorian and Turn-of-the-Century; stone with brick embellishments, tiled roof and timber joinery for Bungalows; brick with rendered embellishments, tiled roof and timber joinery and gable details for Tudors, brick or render with restrained detailing, flat roof forms and timber, steel and/or concrete features for International Styles. |
| Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| Setting, landscaping, streetscape and public realm features | Wide streets and verges. Avenues of substantial street trees. Expansive allotments, street frontages with substantial well landscaped gardens including trees. Heywood Park a key feature at junction of key axis of King William Road and Northgate Street. |
| Representative Buildings | *[Not identified]* |

Un10

**Residential Grand Myrtle Bank Historic Area Statement (Un10)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and context | 1880 to 1940 built development. |
| Allotments, subdivision and built form patterns | Generous, wide, long street. Regular, very generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century grand villas. Inter-War era, primarily Bungalow but also Tudor, Art Deco, Mediterranean and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| Building height | Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles. |
| Materials | Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings. |
| Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| Setting, landscaping, streetscape and public realm features | Grand streetscape character. Generous wide street. Wide verges. Large street trees. |
| Representative Buildings | *[Not identified]* |

**Residential Spacious Millswood Page Estate Historic Area Statement (Un11)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | |
|---|---|
| Eras, themes and | 1900 to 1930's built development. |

| Statement# | Statement | |
|---|---|---|
| Un11 | context | |
| | Allotments, subdivision and built form patterns | Basic grid street layout around the central recreation feature of Goodwood Oval, but with long curvilinear and some truncated streets around the bisecting train lines previously laid in the 1870's. Spacious streetscape character of long, short and curved, wide, tree-lined streets.<br><br>Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| | Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century villa styles. Primarily distinctive Inter-War period bungalows, art deco, Tudor and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees.-Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension. |
| | Materials | Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings. |
| | Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| | Setting, landscaping, streetscape and public realm features | Spacious streetscape character. Simple grid of long, short and curved, wide, tree-lined streets. Large front gardens. Wide verges. Large street trees. |
| | Representative Buildings | *[Not identified]* |
| Un12 | **Residential Spacious Millswood Wooldridge Estate Historic Area Statement (Un12)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1920 to 1940's built development. |
| | Allotments, subdivision and built form patterns | Short grid street layout of short, wide tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| | Architectural styles, detailing and built form features | Central to this estate is the notable original homestead "Bella Vista" c1862. Late Inter-War period (between 1934 and 1940) in particular of bungalow, Tudor, art deco and complementary latter English domestic styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees.<br><br>Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension. |

| Un13 | **Residential Spacious Unley and Malvern Trimmer Estate Historic Area Statement (Un13)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1880 to 1920 built development. |
| | Allotments, subdivision and built form patterns | Spacious streetscape character of regular grid layout (with axial views focussed on the central oval feature) of wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting. |
| | Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century villas (asymmetrical and symmetrical), double-fronted cottages and limited complementary, Inter-war era, styles. More affluent, original owners developed some larger, amalgamated allotments in the southern areas of Malvern establishing grander residences and gardens. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension. |
| | Materials | Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings. |
| | Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. | | Architectural styles, detailing and built form features | Victorian and Turn-of-the-Century cottages, double-fronted and narrow-fronted styles, and villas. Inter-War era housing, primarily bungalow but also complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape. |
| | Building height | Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles. |
| | Materials | Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings. |
| | Fencing | Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing. |
| | Setting, landscaping, streetscape and public realm features | Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees. |

| **Historic Areas affecting City of Victor Harbor** | | |
| ViH1 | **Victor Harbor Town Centre Historic Area Statement (ViH1)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | 1870s to 1890s era, a period of early development in Victor Harbor.<br><br>1920s to 1930s when Victor Harbor experienced a boom period as a holiday destination. |
| | Allotments, subdivision and built form patterns | Mostly grid pattern.<br><br>The intersections of Ocean Street and Coral Street, Coral Street and Flinders Parade and the termination of the Railway Terrace at Warland Reserve are key elements of urban space within the area. No or minimal front and side setbacks. |
| | Architectural styles, detailing and built form features | Commercial premises in Ocean Street, institutional buildings in Coral Street and those supporting facilities associated with the terminus of the railway line along Railway Terrace.<br><br>Late 1800s era shops (some with Inter-war additions), dwellings, shop/dwellings, town hall, institute/library, hotels, former banks, railway buildings and associated infrastructure. Victorian stylistic influences.<br><br>Inter-War commercial and public buildings, some with Art-Deco and some with Stripped Classical stylistic influences.<br><br>Low scale and simple form.<br><br>Rectilinear plan form with steeply-pitched roof forms (typically 35 to 40 degrees) on 1800s and early 1900s era buildings, also comprising low-pitched roofs behind parapets on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce building bulk and scale and add visual interest. Lean-to forms are also common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. |
| | Building height | Prevailing one to two storeys. One or two three storey buildings on Coral Street and Flinders Parade. |
| | Materials | Limestone walls, some rendered masonry. Red brick or rendered quoin work and detail. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials which assists in breaking down bulk and scale, adding visual interest. |
| | Fencing | Some timber picket fencing and corrugated iron fencing. |
| | Setting, landscaping, streetscape and public realm features | Commercial properties provide the main built form and are characteristically single or two-storey buildings aligning with the street boundary. Typically buildings are symmetrical in design with parapets, verandas and balconies over the footpath to further define the pedestrian nature of the area. The railway corridor with its associated buildings and infrastructure is a prominent landscape element. |

**Historic Areas affecting Town of Walkerville**

**Church Terrace Locality Historic Area Statement (Walk1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Walk1 | Eras, themes and context | Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s. |
| | Allotments, subdivision and built form patterns | Very-low density and low-density residential development, with predominantly detached dwellings on wide allotments. Detached dwellings on hammerhead allotments or group dwellings with shared access at the rear with wide street frontage. Very large allotments fronting Church Terrace and St Andrews Street, slightly smaller allotments within the remaining parts of the area. |
| | Architectural styles, detailing and built form features | Built form is varied, covering a range of architectural periods including early stone villas and brick cottages such as those in the Lansdowne Terrace, together with Victorian and Edwardian architecture and later bungalows and Tudor houses. This historic character has been partially eroded through the development of semi-detached dwellings and other dwellings of uncomplimentary design and siting, reducing the areas available for landscaping to along the front and side of dwellings. |
| | Building height | Generally single storey. Two storey additions to the rear of buildings or within the roof space and on larger sites with setbacks. |
| | Materials | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. |
| | Fencing | Examples of original fencing with bluestone plinths and cast iron fence railings above remains. Low front fencing which provides some visibility to the historic built form, although brush fencing or solid pillars and plinths with open style inserts and gates appears in some locations. |
| | Setting, landscaping, streetscape and public realm features | Vegetation in private yards contributes positively to the overall visual amenity and street tree planting which includes Jacarandas, Golden Rain and Ash trees, particularly in Church Terrace and Devonshire Street also contributes positively to residential amenity. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Medindie Historic Area Statement (Walk2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Walk2 | Eras, themes and context | Very-low and low density residential. 19th Century and early 20th Century. |
| | Allotments, subdivision and built form patterns | Predominantly detached dwellings on large, wide allotments. Allotment sizes and building setbacks vary throughout the policy area, although there are patterns established in individual streets. |
| | Architectural styles, detailing and built form features | Range of architectural styles and dwelling types from the late 19th Century and early 20th Century periods including early Victorian, high Victorian, Edwardian, Classic Revival and large bungalows, all set within large landscaped garden settings that enhance the presentation of the dwellings. |
| | Building height | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space with single storey appearance at the street. Two storey dwellings found on Robe Terrace and on larger sites with setbacks. |
| | Materials | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Consistent early stone and brick dwellings on large sites with wide frontages to public roads. |
| | Fencing | There is a distinctive lack of high, solid fencing and/or the use of open design of large gates to access long driveways has enabled the principal elevation of the historic homes and landscaped grounds to be visible from the public roads. |
| | Setting, landscaping, streetscape and public realm features | Reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Low-density residential development, with predominantly detached dwellings on allotments that are generous in width. Regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Formal avenues and regular spacing of street trees along road verges also make a positive contribution to the amenity of the area. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Walkerville Terrace Historic Area Statement (Walk3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| Walk3 | Eras, themes and context | Low-density residential development with predominantly detached dwellings. 19th Century and early 20th Century. |
| | Allotments, subdivision and built form patterns | Closely sited pattern of development, small allotments with narrow-to-medium frontages and intact historic character throughout the majority of the streets.<br><br>Large frontages to Church Terrace (northern side) and Stephen Terrace, slightly smaller frontages elsewhere. |
| | Architectural styles, detailing and built form features | Range of architectural styles and dwelling types from the late 19th Century and early 20th Century. Existing dwellings are typically double or single fronted cottages, with simple detailing and modest sized rooms. |
| | Building height | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space. |
| | Materials | Residences within this area vary in material application. Residences were constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. The locality exhibits consistent early stone and brick dwellings on large |

| Statement# | Statement | |
|---|---|---|
| | | sites with wide frontages to public roads. |
| | Fencing | Low front fencing, such as picket fencing, or no front fencing at all. High solid fencing up to 2 metres in height on Stephen Terrace. |
| | Setting, landscaping, streetscape and public realm features | The locality exhibits regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Walk4 | **Gilberton North Historic Area Statement (Walk4)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s. Proximity to Walkerville Terrace generally dictates more modest dwellings while grander architecturally designed residences exist on Walkerville Hill, capitalising on views to the Adelaide Hills. |
| | Allotments, subdivision and built form patterns | Predominantly low density detached dwellings on wide allotments of a range of sizes. |
| | Architectural styles, detailing and built form features | Mixture of architectural styles from turn of the century to early 1900s. Established character of large detached dwellings on spacious allotments, well setback from all allotment boundaries. Pitched roofs and articulated roof forms are an important characteristic of the area. |
| | Building height | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space. |
| | Materials | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. |
| | Fencing | Front boundary fencing is open in design (including gates) with solid components limited to the base and pillars so as to provide views of the principle dwelling facade. Traditional materials, heights and designs. |
| | Setting, landscaping, streetscape and public realm features | There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches.<br>Large street trees and generous garden settings visible from the primary street frontage. |
| | Representative Buildings | Identified - refer to SA planning database. |
| Walk5 | **Gilberton South Historic Area Statement (Walk5)**<br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Turn of the century to early 1900s. Modest, single storey cottages. |
| | Allotments, subdivision and built form patterns | Predominantly low density detached dwellings on wide allotments. Range of allotment sizes. Cottages on small allotments with narrow frontages adjacent the narrow residential streets. |
| | Architectural styles, detailing and built form features | Mixture of architectural styles from turn of the century to early 1900s. Larger Victorian-era villas, bungalows and Tudor dwellings on the more spacious allotments with frontage to Walkerville Terrace, Park Terrace and Stephen Terrace. |
| | Building height | Predominantly single storey. Two storey additions to the rear of buildings or within the roof space. |
| | Materials | Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. |
| | Fencing | Low fences allowing view to houses, except on Walkerville and Stephen Terraces where there are higher fences. |
| | Setting, landscaping, streetscape and public realm features | There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Large street trees and generous garden settings visible from the primary street frontage. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Historic Areas affecting City of West Torrens**

**Elston Street Historic Area Statement (WeTo1)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| WeTo1 | Eras, themes and context | 1890s - 1920s. |
| | Allotments, subdivision and built form patterns | Low to very low density site areas. Wide frontages. Detached dwellings on substantial allotments. |
| | Architectural styles, detailing and built form features | Predominantly Federation villa style homes with examples of Bungalows and Art Deco dwellings.<br>Bay windows. Hip, gable and Dutch gable roofs. Integrated and complementary verandahs / porticos. Simple façade detailing.<br>Additions are generally located to the rear of the dwelling. |
| | Building height | Generally single storey. Second storey within the roof space. |
| | Materials | Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys. |
| | Fencing | Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket. |
| | Setting, landscaping, streetscape and public realm features | Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Regularly spaced trees.<br>Vehicle access has been design and located to preserve existing street trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Mile End Historic Area Statement (WeTo2)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| WeTo2 | Eras, themes and context | 1860s - 1920s. |
| | Allotments, subdivision and built form patterns | Strong uniformity of allotment pattern. Low to very low density site areas. Wide frontages. Detached and semi-detached to allotments. |
| | Architectural styles, detailing and built form features | Predominantly detached Victorian villas with examples of Victorian semi-detached row dwellings; Victorian single fronted cottages Bungalows; Inter-war Art Deco dwellings; and Parapeted shopfronts.<br>Bay windows. Gable and Dutch gable roofs. Steeply pitched hip roofs. Integrated and complementary verandahs / porticos.<br>Additions are generally located to the rear of the dwelling. |
| | Building height | Generally single storey. Second storey within the roof space. |
| | Materials | Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Iron and timber filigree. Red brick chimneys. |
| | Fencing | Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket. |
| | Setting, landscaping, streetscape and public realm features | Strong uniformity of layout and buildings. Generous side and rear setbacks, maintaining large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been design and located to preserve existing street trees. Vehicle access is via rear lanes where available. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Richmond Historic Area Statement (WeTo3)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

| | | |
|---|---|---|
| WeTo3 | Eras, themes and context | 1900s - 1920s. |
| | Allotments, subdivision and built form patterns | Strong uniformity of allotment pattern. Medium to low density. Rectangular shaped allotments with direct street frontage. Predominantly Row and semi-detached dwellings. |
| | Architectural styles, detailing and built form features | Predominantly Inter-war dwellings with examples of State Bank Bungalows and Art Deco dwellings.<br>Half-hipped (hipped gable roofs). Hip roofs. Integrated and complementary verandahs/porticos.<br>Additions are generally located to the rear of the dwelling. |
| | Building height | Up to 2 storeys. |
| | Materials | Consistent material palette. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys. |
| | Fencing | No fencing or low fencing facilitating views of the dwelling. |
| | Setting, landscaping, streetscape and public realm features | Strong uniformity of layout and buildings. Consistent side and rear setbacks. Carports and garages are behind the main face of dwellings. Street trees. Vehicle access has been design and located to preserve existing street trees. |
| | Representative Buildings | Identified - refer to SA planning database. |

**Rose Street Historic Area Statement (WeTo4)**

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. <tr><td>Ya1</td><td>
Rapid Bay Historic Area Statement (Ya1)<br><br>
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.
<table>
<tr><td>Eras, themes and context</td><td>Rapid Bay is historically significant because of its connection with the first mainland landing by Colonel Light and his survey team in 1836 and has very strong connections and cultural significance for Aboriginal descendants being a popular fishing and summer occupation site, burial ground and Tjilbruke Dreaming site.<br><br>1948-1949 (School added in 1950). Encompasses housing established by BHP as part of mining/quarrying operations to the west as well as historic buildings and items at the southern end of the town.<br><br>Rapid Bay's built character and landscape setting reflects the influence of BHP's extractive industry, which was established during the 1940s with the establishment of a limestone quarry, crushers and loading jetty. Houses were built for employees. At the peak of construction homes were built for BHP by Fricker Bros using local stone and Wattle Flat bricks. A further 16 houses were built during 1949/50 on the eastern side of the township and the primary school officially opened in 1950. BHP stopped operations in June, 1962, and sold houses on the eastern side of Rapid Bay for private ownership. Adelaide Brighton Cement recommenced quarry operations in 1982, providing local jobs and stone products for the Highways Department, local councils and private contractors amounting to 12,000 tonnes annually. The operations have resulted in moving the shore line westward, as 30% of screenings were deposited in the area. Consequently the setting of the township with company housing divided by the Yattogolinga Creek and school oval, has a unique landscape setting and character.</td></tr>
<tr><td>Allotments, subdivision and built form patterns</td><td>Rapid Bay has two residential enclaves which are divided by Yattogolinga River and the town oval. The western section of the town is laid out around the main entrance road and comprises eighteen houses, a former general store and meeting hall. These are without individual subdivision allotments.<br><br>The eastern section includes fifteen houses either side of Cygnet Place and the primary school. They are constructed on allotments of approximately the same size and are set back the same distance from the road. Allotment sizes provide narrower frontages at the end of the cul-de-sac.</td></tr>
<tr><td>Architectural styles,</td><td>Semi bungalow in design with painted hipped corrugated roofs, simple and return verandahs, windows surrounds comprising painted concrete lintels and window sills. The 15 houses in Cygnet Place were designed using one of six house plans prepared by BHP Limited.</td></tr>
</table>
</td></tr>
</table>

| Statement# | Statement | |
|---|---|---|
| | detailing and built form features | They are either five or six room dwellings and some have sleep-outs attached.<br><br>On the western side, company dwellings range from simple detached, hipped or gable roof designs to a row of larger stone and brick houses with expansive verandahs facing the sea and overlooking the coastal area. |
| | Building height | All buildings in the township are of single storey, low scale character on generous allotments. |
| | Materials | Materials used in housing construction include varying combinations of red brick, concrete brick and stone or limestone. |
| | Fencing | There is a row of low rendered walls along the front of one group of allotments in Cygnet Place which overlook the sea, but all other allotments have wire mesh front fences and corrugated iron side and rear fences. |
| | Setting, landscaping, streetscape and public realm features | The streets are well treed, and although Norfolk Island pines are not the only species, they are the most dominant. The extension of the main entrance road which leads through the western residential area and then branches off towards the quarry is divided by a wide median strip in which Norfolk Island pines and pyramid trees have been planted alternately. About a third of the way along this street a road branches off towards the beach to provide access to the jetty, the foreshore caravan park and camping area and the eastern residential area. Trees have been planted along all these routes and the embankments along the roads have been planted with shrubs, flowers and ground cover.<br><br>The mouth of the Yattagolina River, which is located near the junction of these three routes, is shallow and filled with reeds. The jetty and the quarry works dominate the western end of the beach. |
| | Representative Buildings | *[Not identified]* |
| Ya2 | **Randalsea Historic Area Statement (Ya2)**<br><br>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.<br><br>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.<br><br>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table. | |
| | Eras, themes and context | Established during the first phase of settlement (1836-1861). A sharp distinction is evident between the unformed groupings of buildings set within the township proper, and the bare hillsides surrounding the town.<br><br>Randalsea comprises a small rural village founded in the 1836-1861 settlement period of SA around two industries- a steam mill and sawmilling. The historic significance of the village lies in the integrity, age and condition of the original buildings and landscape setting. The settlement's corner setting in Second Valley has been described as 'aesthetically one of the most pleasing heritage environments in South Australia'. |
| | Allotments, subdivision and built form patterns | Historic division pattern is maintained around the intersection of Main South Road and Finniss Vale Drive. A range of allotments of various configurations and sizes east and west of Main South Road. |
| | Architectural styles, detailing and built form features | A compact group of small scale, single storey cottages and buildings with randomly aligned frontages to the original road (Gamlen Place), with Randall's cottage and Palm House a former boarding house located west at a distance from the group. The Institute building, school house, school, and Florence's Guest House are higher set on the southern side of Finnis Vale Road. Leonard's Mill, with ancillary buildings is a visually dominant building on the eastern side of Main South Road. The former Mill is State Heritage listed. |
| | Building height | Predominantly single storey heights, in small scale buildings. The State Heritage listed Leonard's Mill provides a dominant element on the south-eastern side of Main South Road opposite Gamlen Place. Palm House presents a single storey appearance to Finnis Vale Drive but is two storey given the building is cut into the side of the slope that falls away from the road to the creek like north of the road. |
| | Materials | Dominant materials include stone walling, timber fenestration and entrances, slate flooring and corrugated iron roofing. More recent materials include colorbond roofing, mini-orb iron sheeting, brick and rendered surfaces. Evidence of early gum slab construction noted in outbuilding. |
| | Fencing | Minimal fencing retaining an open feel to the shared spatial arrangements of buildings and gardens. A section of existing stone walling on the southern side of the road intersection and some post and wire fencing maintains the informal and open spatial character of the village. |
| | Setting, landscaping, streetscape and public realm features | Randalsea is nestled at the bottom of the Parananacooka River at its junction with a smaller tributary. A scattered collection of buildings are located along the valley floor, with trees and grazing land rising steeply behind to the ridge lines which form a contrasting rural backdrop. The public realm includes a creek side reserve and higher level park with walkway in the vicinity of a fenced War Memorial set higher than the Finniss Vale Road. |
| | Representative Buildings | *[Not identified]* |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

## Infrastructure Coordination Overlay

### Assessment Provisions (AP)

Desired outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development is consistent with and will not compromise efficient delivery of infrastructure provided for under an infrastructure delivery scheme. |
| DO 2 | Coordination of infrastructure and the strategic use of land with necessary services and infrastructure. |

Performance Outcomes (PO)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| | Infrastructure Delivery Scheme |
| PO 1.1<br>Development is consistent with the location and form of infrastructure provided for under an infrastructure delivery scheme established under Part 13 of the *Planning, Development and Infrastructure Act 2016*. | DTS/DPF 1.1<br>Development satisfies one of the following:<br>(a) does not comprise the division of land<br>(b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use<br>(c) does not result in more than 1 dwelling on an existing allotment<br>(d) development which will occur in accordance with an agreement under section 123 of the *Planning, Development and Infrastructure Act 2016*. |
| PO 1.2<br>The delivery of infrastructure occurs in accordance with the relevant Concept Plan. | DTS/DPF 1.2<br>Infrastructure is delivered in accordance with the infrastructure type and location shown on any relevant Concept Plan. The following concept plans are relevant:<br>**Description**<br>Concept Plan 160 - Concordia Growth Area: Basic Infrastructure<br>Concept Plan 164 - Sellicks Beach: Basic Infrastructure |
| PO 1.3<br>Development does not conflict with or compromise planned infrastructure. | DTS/DPF 1.3<br>Development satisfies one of the following:<br>(a) does not comprise the division of land<br>(b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use<br>(c) does not result in more than 1 dwelling on an existing allotment<br>(d) development is located wholly outside of land which has been identified for the provision of infrastructure shown on any relevant concept plans. The following concept plans are relevant:<br>**Description**<br>Concept Plan 160 - Concordia Growth Area: Basic Infrastructure<br>Concept Plan 164 - Sellicks Beach: Basic Infrastructure |
| PO 1.4<br>Development is consistent with the capacity of existing or planned infrastructure and servicing networks, or can demonstrate that infrastructure and servicing requirements can be accommodated without compromising the delivery, timing, or cost of infrastructure identified in an infrastructure delivery scheme. | DTS/DPF 1.4<br>Development satisfies one of the following:<br>(a) is located within an area where infrastructure capacity has been confirmed by the relevant Scheme Coordinator<br>(b) is supported by a servicing report or infrastructure assessment demonstrating that:<br>(i) infrastructure capacity is sufficient to accommodate the proposed development<br>or<br>(ii) infrastructure upgrades required to support the development are feasible, sequenced appropriately, and consistent with the relevant infrastructure delivery scheme. |
| | Social Infrastructure |
| PO 2.1<br>Social infrastructure, including health, education, community facilities, police, justice or emergency services facilities, is delivered in accordance with the relevant Concept Plan. | DTS/DPF 2.1<br>Social infrastructure is delivered in accordance with the size and location of social infrastructure shown and nominated on any relevant Concept Plan. The following concept plans are relevant:<br>**Description**<br>Concept Plan 161 - Concordia Growth Area: Land Use |
| PO 2.2<br>Development does not compromise or conflict with planned social infrastructure. | DTS/DPF 2.2<br>Development satisfies one of the following:<br>(a) does not comprise the division of land<br>(b) does not involve building work comprising a non-residential use, except for where such a use would represent a continuation of an existing or rural land use<br>(c) does not result in more than 1 dwelling on an existing allotment<br>(d) is located wholly outside of land which has been identified for the provision of social infrastructure shown on any relevant concept plans. The following concept plans are relevant:<br>**Description**<br>Concept Plan 161 - Concordia Growth Area: Land Use |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| A class of development in an area where an infrastructure delivery scheme has been established under Part 13 of the *Planning, Development and Infrastructure Act 2016* and that does not satisfy Infrastructure Coordination Overlay DTS/DPF 1.1, except where:<br>(a) the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral<br>or<br>(b) the development has been granted outline consent. | Scheme Coordinator established under section 165 of the *Planning, Development and Infrastructure Act 2016* in relation to an infrastructure delivery scheme in operation in the area affected by this overlay | To provide direction to the relevant authority in relation to:<br>(a) whether development is consistent with the provision of infrastructure associated with the relevant infrastructure delivery scheme<br>(b) whether development compromises or conflicts with the provision of infrastructure provided for under an infrastructure delivery scheme<br>(c) infrastructure capacity and servicing associated with a development within the scheme area<br>(d) whether contributions or other conditions are required in accordance with the relevant infrastructure delivery scheme. | Development of a class to which Schedule 9 clause 3 item 8A of the *Planning, Development and Infrastructure (General) Regulations 2017* applies. |

## Interface Management Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development of sensitive receivers in a manner that mitigates potential adverse environmental and amenity impacts generated by the lawful operation of neighbouring and proximate land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Sensitive receivers are carefully sited and designed to mitigate adverse impacts of hazards, noise, dust, odour, light spill or other emissions from existing legally operating land uses through design techniques such as:<br>(a) locating residential accommodation the greatest distance practicable from the source of the impacts<br>(b) locating buildings containing non-sensitive receivers between the source of the impacts and sensitive receivers<br>(c) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the source of the impacts<br>(d) providing private or common open space adjacent a building elevation that shields the space from the source of the impacts. | DTS/DPF 1.1<br>None are applicable. |

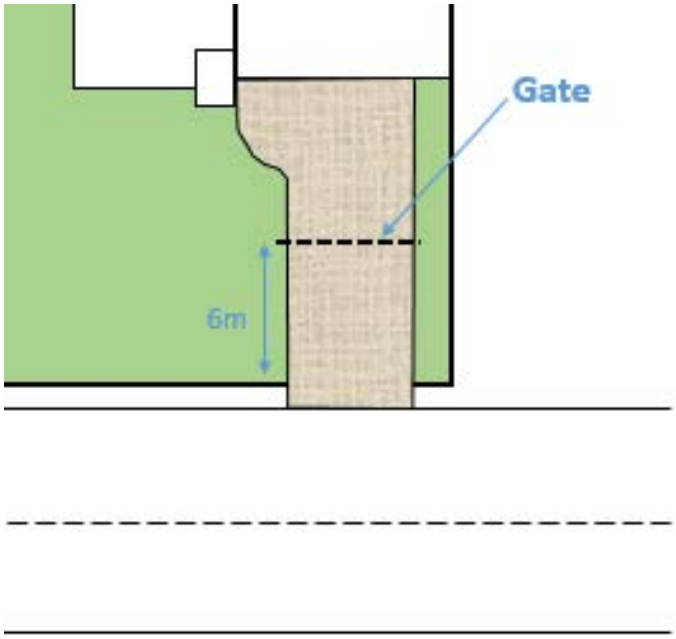
**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Key Outback and Rural Routes Overlay



**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe and efficient movement of vehicle and freight traffic on Key Outback and Rural Routes. |
| DO 2 | Provision of safe and efficient vehicular access to and from Key Outback and Rural Routes. |

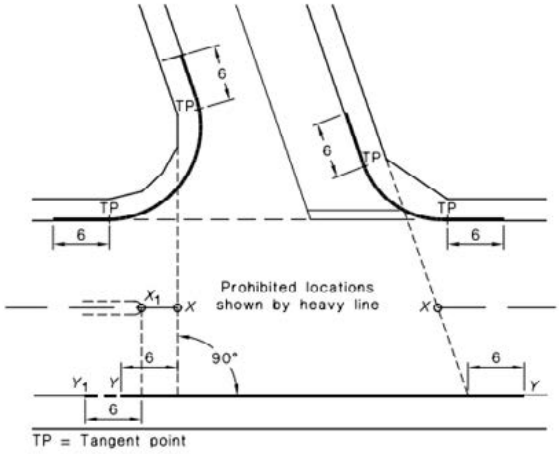
Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Access - Safe Entry and Exit (Traffic Flow) | |
| PO 1.1<br>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads. | DTS/DPF 1.1<br>An access point satisfies (a), (b) or (c):<br>(a) where servicing a single dwelling / residential allotment all of the following are satisfied:<br>(i) it will not result in more than one access point<br>(ii) vehicles can enter and exit the site in a forward direction<br>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(v) it will have a width of between 3m and 4m (measured at the site boundary).<br>(b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) vehicles can enter and exit the site in a forward direction<br>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site).<br>(c) where the development will result in 7 or more dwellings, or is a non-residential land use all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) where on a road with a speed limit of 80 km/h or greater vehicles can enter and exit the site using left turn only movements<br>(iii) vehicles can enter and exit the site in a forward direction<br>(iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less<br>(vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m<br>(vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m<br>(viii) it provides for simultaneous two-way vehicle movements at the access:<br>A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road<br>and<br>B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road. |
| Access - On-Site Queuing | |
| PO 2.1<br>Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site to minimise interruption of the functional performance of the road and maintain safe vehicle movements. | DTS/DPF 2.1<br>An access point satisfies (a), (b) or (c):<br>(a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram: |

(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length no greater than 6.4m
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).

(c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
- (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - Location (Spacing) - Existing Access Points



| PO 3.1 | DTS/DPF 3.1 |
|---|---|
| Existing access points designed to accommodate the type and volume of traffic likely to be generated by development. | An existing access point satisfies (a), (b) or (c):<br>(a) it will not service, or is not intended to service, more than 6 dwellings<br>(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access<br>(c) it is not located on a Controlled Access Road and development constitutes one or more of the following:<br>(i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa<br>(ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment<br>(iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area<br>(iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area<br>(v) an office or consulting room with a gross leasable floor area <500m²<br>(vi) a change of use from residential dwelling to a shop or office or consulting room or personal or domestic services establishment with <250m² gross leasable floor area. |

Access - Location (Spacing) - New Access Points

| PO 4.1 | DTS/DPF 4.1 |
|---|---|
| New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and | A new access point satisfies (a), (b) or (c): |

efficient operating conditions on the road.

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked $X_1$ and $X$ are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension $Y$-$Y$ extends to Point $Y_1$.

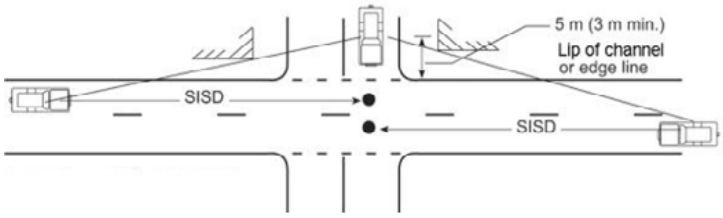
(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:
- (i) is not located on a Controlled Access Road
- (ii) is not located on a section of road affected by double barrier lines
- (iii) will be on a road with a speed environment of 70km/h or less
- (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
- (v) is located a minimum of 6m from a median opening or pedestrian crossing.

(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit | Separation between access points | Separation from public road junctions and merging/terminating lanes |
|---|---|---|
| 50 km/h or less | No spacing requirement | 97m |
| 60 km/h | 5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases | 123m |
| 70 km/h | 55m | 151m |
| 80 km/h | 70m | 181m |
| 90 km/h | 90m | 226m |
| 100 km/h | 110m | 262m |
| 110 km/h | 135m | 300m |

Access - Location (Sight Lines)

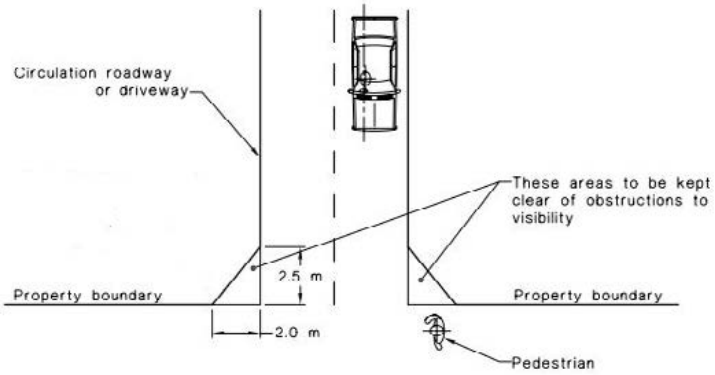
PO 5.1



Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):



(a) the development site serves or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or
(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit | Access Point serving 1-6 dwellings | Access point serving all other development |
|---|---|---|
| 40 km/h or less | 47m | 73m |
| 50 km/h | 63m | 97m |
| 60 km/h | 81m | 123m |
| 70 km/h | 100m | 151m |
| 80 km/h | 121m | 181m |
| 90 km/h | 144m | 226m |
| 100 km/h | 169m | 262m |
| 110km/h | 195m | 300m |

and

(c) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris

PO 6.1

DTS/DPF 6.1

| | |
|---|---|
| Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions. | Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of the seal on the road for a minimum of 10m or to the property boundary (whichever is closer). |
| Access - Stormwater | |
| PO 7.1<br>Access points are designed to minimise negative impact on roadside drainage of water. | DTS/DPF 7.1<br>Development does not result in any of the following:<br>(a) decrease the capacity of an existing drainage point<br>(b) restrict or prevent the flow of stormwater to an existing drainage point system<br>(c) result in access points becoming stormwater flow paths directly onto the road. |
| Building on Road Reserve | |
| PO 8.1<br>Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users. | DTS/DPF 8.1<br>No encroachment of buildings or structures onto, above or below the road reserve. |
| Public Road Junctions | |
| PO 9.1<br>New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road opening conditions are maintained on the State Maintained Road. | DTS/DPF 9.1<br>Development does not comprise any of the following:<br>(a) creating a new junction with a public road<br>(b) opening an unmade public road junction<br>(c) modifying an existing public road junction. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:<br>(a) creation of a new access or junction<br>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)<br>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Key Railway Crossings Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe, efficient and uninterrupted operation of key railway crossings. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Access, Design and Function | |
| PO 1.1<br>Site access does not interfere or impact on the safe operation of a railway crossing. | DTS/DPF 1.1<br>Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing:<br>(a) 110 km/h road - 190m<br>(b) 100 km/h road - 165m<br>(c) 90 km/h road - 140m<br>(d) 80 km/h road - 110m<br>(e) 70 km/h road - 90m<br>(f) 60 km/h road - 70m<br>(g) 50km/h or less road - 50m |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Limited Dwelling Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Establishment of additional dwellings in primary production areas is limited to avoid undermining primary production. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Development does not result in the establishment of a dwelling. | DTS/DPF 1.1<br>A new dwelling replaces an existing dwelling within the same allotment. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory |
|---|---|---|---|

| | | | Reference |
|---|---|---|---|
| None | None | None | None |

### Limited Land Division Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | The long term use of land for primary production is maintained by minimising fragmentation through division of land. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General | |
| PO 1.1<br>Land division does not result in the creation of an additional allotment. | DTS/DPF 1.1<br>No additional allotments are created. |
| PO 1.2<br>Land division involving boundary realignments occurs only where the number of resulting allotments with a site area less than that specified in the relevant Zone is not greater than the number that existed prior to the realignment. | DTS/DPF 1.2<br>None are applicable. |

#### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

### Local Heritage Place Overlay

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Built Form | |
| PO 1.1<br>The form of new buildings and structures maintains the heritage values of the Local Heritage Place. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Massing, scale and siting of development maintains the heritage values of the Local Heritage Place. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the Local Heritage Place. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Development is consistent with boundary setbacks and setting. | DTS/DPF 1.4<br>None are applicable. |
| PO 1.5<br>Materials and colours are either consistent with or complement the heritage values of the Local Heritage Place. | DTS/DPF 1.5<br>None are applicable. |
| PO 1.6<br>New buildings and structures are not placed or erected between the primary or secondary street boundaries and the façade of a Local Heritage Place. | DTS/DPF 1.6<br>None are applicable. |
| PO 1.7<br>Development of a Local Heritage Place retains features contributing to its heritage value. | DTS/DPF 1.7<br>None are applicable. |
| Alterations and Additions | |
| PO 2.1<br>Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Local Heritage Place or its setting. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Adaptive reuse and revitalisation of Local Heritage Places to support their retention in a manner that respects and references the original use of the Local Heritage Place. | DTS/DPF 2.2<br>None are applicable. |
| Ancillary Development | |
| PO 3.1<br>Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Local Heritage Place. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line and does not dominate the Local Heritage Place or its setting. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Advertising and advertising hoardings are designed to complement the Local Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the Local Heritage Place. | DTS/DPF 3.4<br>None are applicable. |
| Land Division | |
| PO 4.1<br>Land division creates allotments that:<br>(a) maintain the heritage values of the Local Heritage Place, including setting<br>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place. | DTS/DPF 4.1<br>None are applicable. |
| Landscape Context and Streetscape Amenity | |

| | |
|---|---|
| PO 5.1<br>Individually heritage listed trees, parks, historic gardens and memorial avenues are retained unless:<br>(a) trees / plantings are, or have the potential to be, a danger to life or property<br>or<br>(b) trees / plantings are significantly diseased and their life expectancy is short. | DTS/DPF 5.1<br>None are applicable. |
| Demolition | |
| PO 6.1<br>Local Heritage Places are not demolished, destroyed or removed in total or in part unless:<br>(a) the portion of the Local Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value<br>or<br>(b) the structural condition of the Local Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair. | DTS/DPF 6.1<br>None are applicable. |
| PO 6.2<br>The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Local Heritage Place. | DTS/DPF 6.2<br>None are applicable. |
| Conservation Works | |
| PO 7.1<br>Conservation works to the exterior of a Local Heritage Place (and other features identified in the extent of listing) match original materials to be repaired and utilise traditional work methods. | DTS/DPF 7.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |

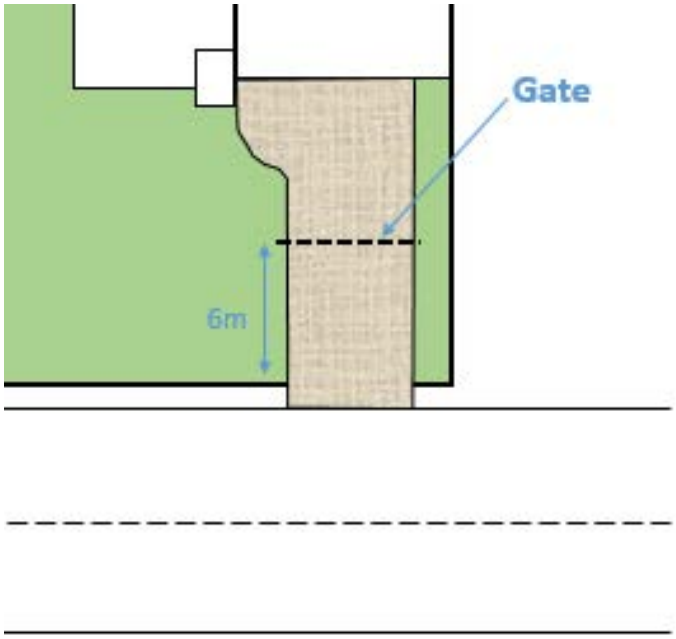
| None | None | None | None |

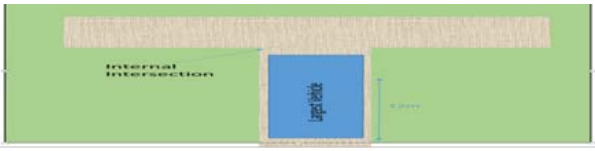
## Major Urban Transport Routes Overlay



**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe and efficient operation of Major Urban Transport Routes for all road users. |
| DO 2 | Provision of safe and efficient access to and from Major Urban Transport Routes. |



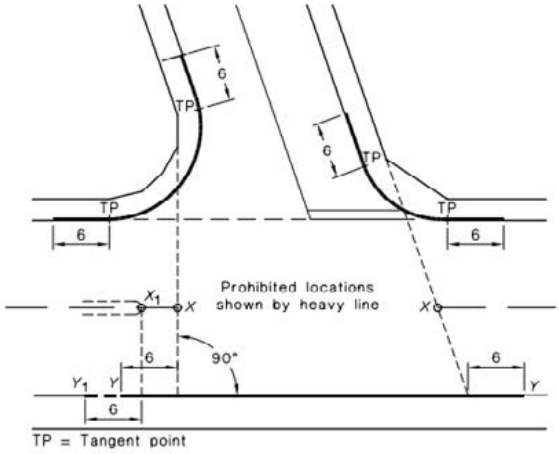
Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Access - Safe Entry and Exit (Traffic Flow) | |
| PO 1.1<br>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State Maintained Roads. | DTS/DPF 1.1<br>An access point satisfies (a), (b) or (c):<br>(a) where servicing a single (1) residential dwelling / residential allotment all of the following are satisfied:<br>(i) it will not result in more than one access point<br>(ii) vehicles can enter and exit the site in a forward direction<br>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(v) have a width of between 3m and 4m (measured at the site boundary).<br>(b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) entry and exit movements are left turn only<br>(iii) vehicles can enter and exit the site in a forward direction<br>(iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees;<br>(v) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(vi) have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site).<br>(c) where the development will result in over 7 dwellings, or is a non-residential land use all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) vehicles can enter and exit the site using left turn only movements<br>(iii) vehicles can enter and exit the site in a forward direction<br>(iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(v) have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less<br>(vi) have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m<br>(vii) have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m<br>(viii) provides for simultaneous two-way vehicle movements at the access;<br>A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road<br>and<br>B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road. |
| Access - On-Site Queuing | |
| PO 2.1<br>Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption of the functional performance of the road and maintain safe vehicle movements. | DTS/DPF 2.1<br>An access point satisfies (a), (b) or (c):<br>(a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram: |

(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length no greater than 6.4m
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site).

(c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and all of the following are satisfied:
- (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
- (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (iii) any termination of, or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
- (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access – Location (Spacing) - Existing Access Points



| PO 3.1 | DTS/DPF 3.1 |
|---|---|
| Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development. | An existing access point satisfies (a), (b) or (c):<br>(a) it will not service, or is not intended to service, more than 6 dwellings<br>(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access<br>(c) it is not located on a Controlled Access Road and development constitutes one or more of the following:<br>(i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa<br>(ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment<br>(iii) a change of use from a consulting room or office <250m² gross leasable floor area to shop <250m² gross leasable floor area<br>(iv) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area<br>(v) an office or consulting room with a gross leasable floor area <500m²<br>(vi) a change of use from residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m² gross leasable floor area. |

Access – Location (Spacing) – New Access Points

| PO 4.1 | DTS/DPF 4.1 |
|---|---|
| New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and | A new access point satisfies (a), (b) or (c): |

efficient operating conditions on the road.

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked $X_1$ and $X$ are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension $Y$-$Y$ extends to Point $Y_1$.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:
- (i) is not located on a Controlled Access Road
- (ii) is not located on a section of road affected by double barrier lines
- (iii) will be on a road with a speed environment of 70km/h or less
- (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
- (v) located minimum of 6m from a median opening or pedestrian crossing.

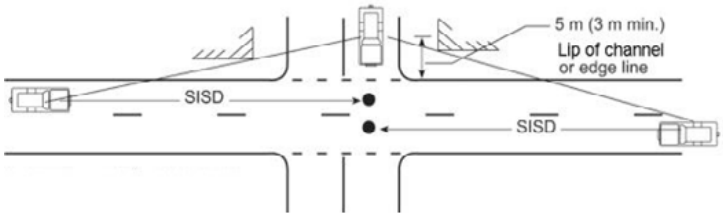
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit | Separation between access points | Separation from public road junctions and merging/terminating lanes |
|---|---|---|
| 50 km/h or less | No spacing requirement | 20m |
| 60 km/h | 5m (for development intended to serve between 1 and 6 dwellings) and 20m for all other cases | 123m |
| 70 km/h | 55m | 151m |
| 80 km/h | 70m | 181m |
| 90 km/h | 90m | 214m |
| 100 km/h | 110m | 248m |
| 110 km/h | 135m | 285m |

Access - Location (Sight Lines)

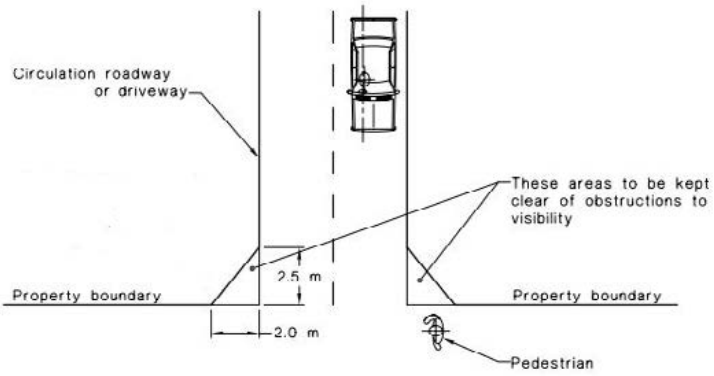
PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



DTS/DPF 5.1

An access point satisfies (a) and (c) or (b) and (c):

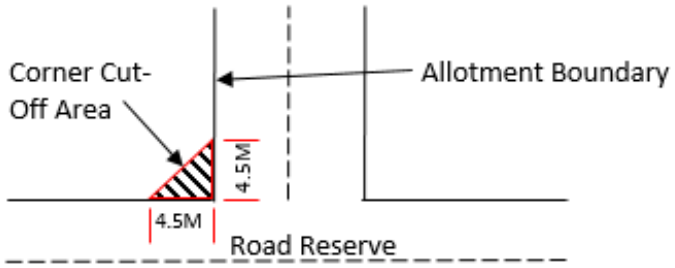


(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit | Access Point serving 1-6 dwellings | Access point serving all other development |
|---|---|---|
| 40 km/h or less | 47m | 73m |
| 50 km/h | 63m | 97m |
| 60 km/h | 81m | 123m |
| 70 km/h | 100m | 151m |
| 80 km/h | 121m | 181m |
| 90 km/h | 144m | 226m |
| 100 km/h | 169m | 262m |
| 110km/h | 195m | 300m |

(c) pedestrian sightlines in accordance with the following diagram:



Access - Mud and Debris

PO 6.1

Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1

Where the road has an unsealed shoulder and the road is not kerbed the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer)

| | |
|---|---|
| Access - Stormwater | |
| PO 7.1<br>Access points designed to minimise negative impact on roadside drainage of water. | DTS/DPF 7.1<br>Development does not result in any of the following:<br>(a) decrease the capacity of an existing drainage point<br>(b) restrict or prevent the flow of stormwater to an existing drainage point and system<br>(c) results in access points becoming stormwater flow paths directly onto the road. |
| Building on Road Reserve | |
| PO 8.1<br>Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users. | DTS/DPF 8.1<br>No encroachment of buildings or structures onto, above or below the road reserve. |
| Public Road Junctions | |
| PO 9.1<br>New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions are maintained on the State Maintained Road. | DTS/DPF 9.1<br>Development does not comprise any of the following:<br>(a) creating a new junction with a public road<br>(b) opening an unmade public road junction<br>(c) modifying an existing public road junction. |
| Corner Cut-Offs | |
| PO 10.1<br>Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety. | DTS/DPF 10.1<br>Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:<br> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:<br>(a) creation of a new access or junction<br>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)<br>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Marine Parks (Managed Use) Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Marine habitats and biodiversity are protected through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use | |
| PO 1.1<br>Development avoids or minimises harm to marine habitats, biodiversity or the functioning of ecosystems. | DTS/DPF 1.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|

## Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safeguard Greater Adelaide's public water supply by ensuring development has no adverse impact on the quality of water harvested from primary reservoirs or diversion weir catchments from the Mount Lofty Ranges. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Water Quality | |
| PO 1.1<br>The quality of water draining from the site of development has no adverse impact on the role of the catchment as a water supply. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs. | DTS/DPF 1.2<br>Development does not involve any one or combination of the following:<br>(a) aquaculture involving husbandry or supplementary feeding in a water flow through system<br>(b) dairy except if a replacement dairy<br>(c) organic waste processing facility<br>(d) fuel depot<br>(e) horticulture involving only market gardening or commercial turf growing<br>(f) intensive animal husbandry<br>(g) landfill<br>(h) retail fuel outlet<br>(i) special industry<br>(j) stock sales yard<br>(k) stock slaughter works<br>(l) timber preservation works<br>(m) waste recycling, storage or treatment facility<br>(n) wrecking yard. |
| Wastewater | |
| PO 2.1<br>Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs. | DTS/DPF 2.1<br>Development that generates trade or industrial wastewater is connected to a:<br>(a) sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow,<br>or<br>(b) wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal. |
| PO 2.2<br>Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within primary reservoir and weir catchment areas. | DTS/DPF 2.2<br>Development, including alterations and additions, in combination with existing built form and activities within an allotment:<br>(a) does not generate a combined total of more than 900 litres of wastewater per day,<br>and<br>(b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards<br>or is otherwise connected to a sewerage or community wastewater management system. |
| PO 2.3<br>Wastewater management systems have no adverse impact on the quality of water draining from the site. | DTS/DPF 2.3<br>Development results in:<br>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards<br>or<br>(a) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards. |
| PO 2.4<br>Surface and groundwater protected from wastewater discharge pollution. | DTS/DPF 2.4<br>All components of an effluent disposal area are:<br>(a) set back 50 metres or more from a watercourse<br>(b) set back 100 metres or more from a public water supply reservoir<br>(c) located on land with a slope no greater than 1-in-5 (20%)<br>(d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table<br>(e) above the 10% AEP flood level. |
| Stormwater | |
| PO 3.1<br>Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Polluted stormwater is treated prior to discharge from the site. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality. | DTS/DPF 3.4<br>Development includes:<br>(a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or<br>(b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m$^2$. |
| PO 3.5<br>Stormwater from dwelling additions captured to protect water quality. | DTS/DPF 3.5<br>Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L |

| | |
|---|---|
| Stormwater from dwelling additions captured to protect water quality. | Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L. |
| PO 3.6<br>Stormwater from shops and tourist accommodation is managed to protect water quality. | DTS/DPF 3.6<br>Shops and tourist accommodation satisfy all the following:<br>(a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) are located 100m or more from public water supply reservoirs and diversion weirs<br>(c) are located on land with a slope not exceeding 20%<br>(d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L<br>(e) includes swales that divert clean stormwater away from areas where it could be polluted. |
| PO 3.7<br>Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality. | DTS/DPF 3.7<br>Horse keeping and low intensity animal husbandry satisfy all the following:<br>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) is located on land with a slope not exceeding 10%<br>(c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L<br>(d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted. |
| PO 3.8<br>Stormwater from horticulture is managed to protect water quality. | DTS/DPF 3.8<br>Horticulture satisfies all the following :<br>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) is located 100m or more from public water supply reservoirs and diversion weirs<br>(c) is located on land with a slope not exceeding 10%<br>(d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted. |
| PO 3.9<br>Stormwater from excavated and filled areas is managed to protect water quality. | DTS/DPF 3.9<br>Excavation and/or filling satisfy all the following:<br>(a) is located 50m or more from watercourses<br>(b) is located 100m or more from public water supply reservoirs and diversion weirs<br>(c) does not involve excavation exceeding a vertical height of 0.75m<br>(d) does not involve filling exceeding a vertical height of 0.75m<br>(e) does not involve a total combined excavation and filling vertical height of 1.5m. |
| Landscapes and Natural Features | |
| PO 4.1<br>Development minimises the need to modify landscapes and natural features. | DTS/DPF 4.1<br>None are applicable. |
| Land Division | |
| PO 5.1<br>Land division does not result in an increased risk of pollution to surface or underground water. | DTS/DPF 5.1<br>Land division does not create additional allotments and satisfies (a) and/or (b):<br>(a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures<br>(b) is for realignment of allotment boundaries to improve management of the land for primary production and/or conservation of natural features. |
| PO 5.2<br>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists. | DTS/DPF 5.2<br>None are applicable. |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:<br>(a) function venue with more than 75 seats for customer dining purposes<br>(b) restaurant with more than 40 seats for customer dining purposes<br>(c) restaurant with more than 30 seats for customer dining purposes in association with a cellar door<br>(d) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(e) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(f) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(g) any other development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons (or more than 6,000 litres/day). | Environment Protection Authority. | To provide expert technical assessment and direction to the relevant authority on whether a proposed development would have an adverse impact on water quality. | Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safeguard Greater Adelaide's public water supply by ensuring development has no adverse impact on the quality of water harvested from secondary reservoirs or diversion weir catchments from the Mount Lofty Ranges. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Water Quality | |
| PO 1.1<br>The quality of water draining from the site of development has no adverse impact on the role of the catchment as a water supply. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs. | DTS/DPF 1.2<br>Development does not involve any one or combination of the following:<br>(a) landfill<br>(b) special industry. |

| | |
|---|---|
| Wastewater | |
| PO 2.1<br>Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within secondary reservoir and weir catchment areas. | DTS/DPF 2.1<br>Development including alterations and additions, in combination with existing built form and activities within an allotment:<br>(a) do not generate a combined total of more than 1500 litres of wastewater per day<br>and<br>(b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards<br>or is otherwise connected to a sewer or community wastewater management system. |
| PO 2.2<br>Dairy development is of a scale and design that will avoid adverse water quality impacts. | DTS/DPF 2.2<br>Dairy development satisfies all of the following:<br>(a) is located at least 100 metres from any watercourse, dam, bore or well<br>(b) is connected to a wastewater management system that is located 200 metres from any watercourse, dam, bore or well and is designed and constructed to avoid leakage to groundwater or overflow under extreme rainfall conditions<br>(c) treated wastewater irrigation areas:<br>(i) have a slope of less than 1-in-5 (20 percent)<br>(ii) are greater than 100 metres from any watercourse, dam, bore or well<br>are suitable to provide for seasonal wastewater irrigation without causing pollution of surface or groundwater. |
| PO 2.3<br>Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs. | DTS/DPF 2.3<br>Development that generates trade or industrial wastewater is connected to:<br>(a) a sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow<br>or<br>(b) an on-site wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal. |
| PO 2.4<br>Wastewater management systems have no adverse impact on the quality of water draining from the site. | DTS/DPF 2.4<br>Development results in:<br>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards<br>or<br>(b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards. |
| PO 2.5<br>Surface and groundwater protected from wastewater discharge pollution. | DTS/DPF 2.5<br>All components of an effluent disposal area are:<br>(a) setback 50 metres or more from a watercourse<br>(b) setback 100 metres or more from a public water supply reservoir<br>(c) located on land with a slope no greater than 1-in-5 (20%)<br>(d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table<br>(e) above the 10% AEP flood level. |
| Stormwater | |
| PO 3.1<br>Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Polluted stormwater is treated prior to discharge from the site. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality. | DTS/DPF 3.4<br>Development includes:<br>(a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings<br>or<br>(b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m$^2$. |
| PO 3.5<br>Stormwater from dwelling additions captured to protect water quality. | DTS/DPF 3.5<br>Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L. |
| PO 3.6<br>Stormwater from shops and tourist accommodation is managed to protect water quality. | DTS/DPF 3.6<br>Shops and tourist accommodation satisfy all the following:<br>(a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) are located 100m or more from public water supply reservoirs and diversion weirs<br>(c) are located on land with a slope not exceeding 20%<br>(d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L<br>(e) includes swales that divert clean stormwater away from areas where it could be polluted. |
| PO 3.7<br>Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality. | DTS/DPF 3.7<br>Horse keeping and low intensity animal husbandry satisfy all the following:<br>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) is located on land with a slope not exceeding 10%<br>(c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L<br>(d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted. |
| PO 3.8<br>Stormwater from horticulture is managed to protect water quality. | DTS/DPF 3.8<br>Horticulture satisfies all the following:<br>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores<br>(b) is located 100m or more from public water supply reservoirs and diversion weirs<br>(c) is located on land with a slope not exceeding 10%<br>(d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted. |
| PO 3.9<br>Stormwater from excavated and filled areas is managed to protect water quality. | DTS/DPF 3.9<br>Excavation and/or filling satisfy all the following:<br>(a) is located 50m or more from watercourses<br>(b) is located 100m or more from public water supply reservoirs and diversion weirs<br>(c) does not involve excavation exceeding a vertical height of 0.75m<br>(d) does not involve filling exceeding a vertical height of 0.75m<br>(e) does not involve a total combined excavation and filling vertical height of 1.5m. |
| Landscapes and Natural Features | |
| PO 4.1<br>Development minimises the need to modify landscapes and natural features. | DTS/DPF 4.1<br>None are applicable. |
| Land Division | |
| PO 5.1<br>Land division does not result in an increased risk of pollution to surface or underground water. | DTS/DPF 5.1<br>Land division does not create additional allotments and satisfies (a) and/or (b):<br>(a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures<br>or<br>(b) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features. |

| | |
|---|---|
| PO 5.2<br>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists. | DTS/DPF 5.2<br>None are applicable. |

**Procedural Matters (PM)**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:<br>(a) function venue with more than 75 seats for customer dining purposes<br>(b) restaurant with more than 40 seats for customer dining purposes<br>(c) restaurant with more than 30 seats for customer dining purposes in association with a cellar door<br>(d) dwelling where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(e) tourist accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(f) workers' accommodation where a habitable dwelling or tourist accommodation or workers' accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation or workers' accommodation on the same allotment), except where the existing habitable dwelling or tourist accommodation or workers' accommodation on the same allotment is proposed to be demolished and the existing on-site wastewater system is proposed to be decommissioned<br>(g) any other development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons (or more than 6,000 litres/day) | Environment Protection Authority. | To provide expert technical assessment and direction to the relevant authority on whether a proposed development would have an adverse impact on water quality. | Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Murray-Darling Basin Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Sustainable water use in the Murray-Darling Basin area. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>All development, but in particular development involving:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) horse keeping<br>(g) commercial forestry<br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in the Murray-Darling Basin. | DTS/DPF 1.1<br>Development satisfies either of the following:<br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use<br>or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Any of the following classes of development that require, or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) horse keeping<br>(g) commercial forestry. | Minister responsible for the administration of the *River Murray Act 2003*. | To provide expert technical assessment and direction to the relevant authority on matters regarding the taking of water, to ensure development is undertaken sustainably in the Murray-Darling Basin. | Development of a class to which Schedule 9 clause 3 item 10 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Native Vegetation Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Areas of native vegetation are protected, retained and restored in order to sustain biodiversity, threatened species and vegetation communities, fauna habitat, ecosystem services, carbon storage and amenity values. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Environmental Protection | |
| PO 1.1<br>Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance. | DTS/DPF 1.1<br>An application is accompanied by:<br>(a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the Native Vegetation Act 1991, including any clearance that may occur: |

| | |
|---|---|
| | (i) in connection with a relevant access point and / or driveway<br>(ii) within 10m of a building (other than a residential building or tourist accommodation)<br>(iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control<br>(iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area<br>or<br>(b) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the clearance is categorised as 'Level 1 clearance'. |
| PO 1.2<br>Native vegetation clearance in association with development avoids the following:<br>(a) significant wildlife habitat and movement corridors<br>(b) rare, vulnerable or endangered plants species<br>(c) native vegetation that is significant because it is located in an area which has been extensively cleared<br>(d) native vegetation that is growing in, or in association with, a wetland environment. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Intensive animal husbandry, commercial forestry and agricultural activities are sited, set back and designed to minimise impacts on native vegetation, including impacts on native vegetation in an adjacent State Significant Native Vegetation Area, from:<br>(a) in the case of commercial forestry, the spread of fires from a plantation<br>(b) the spread of pest plants and phytophthora<br>(c) the spread of non-indigenous plants species<br>(d) excessive nutrient loading of the soil or loading arising from surface water runoff<br>(e) soil compaction<br>(f) chemical spray drift. | DTS/DPF 1.3<br>Development within 500 metres of a boundary of a State Significant Native Vegetation Area does not involve any of the following:<br>(a) horticulture<br>(b) intensive animal husbandry<br>(c) dairy<br>(d) commercial forestry<br>(e) aquaculture. |
| PO 1.4<br>Development restores and enhances biodiversity and habitat values through revegetation using locally indigenous plant species. | DTS/DPF 1.4<br>None are applicable. |
| Land division | |
| PO 2.1<br>Land division does not result in the fragmentation of land containing native vegetation, or necessitate the clearance of native vegetation, unless such clearance is considered minor, taking into account the location of allotment boundaries, access ways, fire breaks, boundary fencing and potential building siting or the like. | DTS/DPF 2.1<br>Land division where:<br>(a) an application is accompanied by one of the following:<br>(i) a declaration stating that none of the allotments in the proposed plan of division contain native vegetation under the *Native Vegetation Act 1991*<br>(ii) a declaration stating that no native vegetation clearance under the *Native Vegetation Act 1991* will be required as a result of the division of land<br>(iii) a report prepared in accordance with Regulation 18(2)(a) of the Native Vegetation Regulations 2017 that establishes that the vegetation to be cleared is categorised as 'Level 1 clearance'<br>or<br>(b) an application for land division which is being considered concurrently with a proposal to develop each allotment which will satisfy, or would satisfy, the requirements of DTS/DPF 1.1, including any clearance that may occur<br>or<br>(c) the division is to support a Heritage Agreement under the Native Vegetation Act 1991 or the *Heritage Places Act 1993*. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Development that is the subject of a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that categorises the clearance, or potential clearance, as 'Level 3 clearance' or 'Level 4 clearance'. | Native Vegetation Council | To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation. | Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Noise and Air Emissions Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Community health and amenity is protected from adverse impacts of noise and air emissions. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting and Design | |
| PO 1.1<br>Sensitive receivers adjoining high noise and/or air pollution sources are designed and sited to shield sensitive receivers from the emission source using measures such as:<br>(a) placing buildings containing non-sensitive receivers (such as retail and commercial) between the emission source and sensitive receivers<br>(b) within individual buildings, placing rooms more sensitive to air quality and noise impacts (such as living rooms and bedrooms) further away from the emission source<br>(c) providing appropriate separation or erecting noise attenuation barriers, provided the requirements for safety, urban design and access can be met<br>(d) the use of building design elements such as podiums and jutting, deep or enclosed balconies (including with solid balustrades). | DTS/DPF 1.1<br>Sensitive receivers satisfy all of the following:<br>(a) do not adjoin a:<br>(i) Designated Road: Type A<br>(ii) Designated Road Corridor: Type B<br>(iii) Designated Road: Type R<br>(iv) Train Corridor<br>(v) Tram Corridor<br>(b) adjoining development incorporating music includes noise attenuation measures to achieve a noise level in any bedroom exposed to music noise (L10) less than:<br>(i) 8 dB above the level of background noise (L90,15 min) in any octave band of the sound spectrum; and<br>(ii) 5 dB(A) above the level of background noise (LA90,15 min) for the overall (sum of all octave bands) A-weighted levels. |
| PO 1.2<br>Development incorporating a sensitive receiver adjoining high air pollution sources use building design elements such as varying building heights, widths, articulation, setbacks and shapes to increase wind turbulence and the dispersion of air pollutants. | DTS/DPF 1.2<br>Sensitive receivers do not adjoin any of the following:<br>(a) Designated Road: Type A<br>(b) Designated Road: Type B<br>(c) Designated Road: Type R<br>(d) Train Corridor<br>(e) Tram Corridor. |
| PO 1.3<br>Development incorporating a sensitive receiver adjoining high noise and/or air pollution sources locates private open space (including ground level courtyards and balconies), common open space and outdoor play areas within educational facilities and child care facilities away from the emission source. | DTS/DPF 1.3<br>Open space associated with a sensitive receiver is not adjoining any of the following:<br>(a) Designated Road: Type A<br>(b) Designated Road: Type B |

| | |
|---|---|
| | (c) Designated Road: Type R<br>(d) Train Corridor<br>(e) Tram Corridor<br>(f) Development incorporating music. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Non-Stop Corridors Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe and efficient operation of non-stop corridors, where free-flowing traffic movement is prioritised. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Non-Stop Corridor Overlay | |
| PO 1.1<br>The safety, efficiency and functional performance of non-stop corridors is maintained. | DTS/DPF 1.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a Non-Stop Corridor Road or within 25 metres of an intersection with any such road:<br>(a) creation of a new access or junction<br>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)<br>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Except where all of the relevant deemed-to-satisfy criteria are met, an advertisement or advertising hoarding that is on a Non-Stop Corridor Road or is on land abutting a Non-Stop Corridor Road and:<br>(a) is within 100m of an on or off ramp to a Non-Stop Corridor Road as shown in the Non-Stop Corridors Overlay and<br>(b) will:<br>(i) be internally illuminated or<br>(ii) incorporate a moving or changing display or message or<br>(iii) incorporate a flashing light. | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Prescribed Surface Water Areas Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Sustainable water use in prescribed surface water areas that maintains the health and natural flow paths of surface water. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>All development, but in particular development involving any of the following:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry<br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas. | DTS/DPF 1.2<br>Development satisfies either of the following:<br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|

| | | | |
|---|---|---|---|
| Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land. | Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry. | The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*. | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources. | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*. | | | |

## Prescribed Watercourses Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Prescribed watercourses are protected by ensuring the taking of water from such watercourses is avoided or is undertaken in a sustainable manner that maintains the health and natural flow paths of the watercourses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>All development, but in particular development involving any of the following:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry<br>has a lawful, sustainable and reliable water supply that does not place undue strain on prescribed watercourses. | DTS/DPF 1.1<br>Development satisfies either of the following:<br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |
| PO 1.2<br>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing in a prescribed watercourse is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users. | DTS/DPF 1.2<br>None are applicable. |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a prescribed watercourse. | Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:<br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry. | The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*. | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably. | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*. | | | |

## Prescribed Water Resources Area Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Sustainable water use in prescribed water resources areas maintains the health and natural flow paths of surface water, watercourses and wells. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>All development, but in particular development involving any of the following: | DTS/DPF 1.1<br>Development satisfies either of the following: |

| | |
|---|---|
| (a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry<br><br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas. | (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |
| PO 1.2<br><br>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users. | DTS/DPF 1.2<br><br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land. | Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:<br><br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry | The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*. | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources. | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*. | | | |

## Prescribed Wells Area Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Sustainable water use in prescribed wells areas. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br><br>All development, but in particular involving any of the following:<br><br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commercial forestry<br><br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed wells areas. | DTS/DPF 1.1<br><br>Development satisfies either of the following:<br><br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where located within the Murray-Darling Basin Overlay, any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the *Landscape South Australia Act 2019*:<br><br>(a) horticulture<br>(b) activities requiring irrigation<br>(c) aquaculture<br>(d) industry<br>(e) intensive animal husbandry<br>(f) commerical forestry. | The Chief Executive of the Department of the Minister responsible for the administration of the *Landscape South Australia Act 2019*. | To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably. | Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial forestry that requires a forest water licence under Part 8 Division 6 of the *Landscape South Australia Act 2019*. | | | |

## Ramsar Wetlands Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Protection and restoration of Ramsar wetlands. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General | |
| PO 1.1<br>Development provides for the restoration and/or sustainable management of wetlands habitat. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development does not lead to significant negative impacts on Ramsar wetland habitat and its carbon capture and storage potential. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Development adjacent to Ramsar wetlands maintains or establishes landform and vegetated corridor links between Ramsar areas where possible. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Development is not detrimental to the hydrological regime of Ramsar wetlands taking into account the effects of climate change on rainfall and air temperature, including:<br>(a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland<br>(b) a change in the level of salinity, pollutants, nutrients or water temperature. | DTS/DPF 1.4<br>None are applicable. |
| PO 1.5<br>Development is designed to minimise the cumulative impacts on Ramsar wetlands from jetties, vegetation clearance and dredging. | DTS/DPF 1.5<br>None are applicable. |
| PO 1.6<br>Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species. | DTS/DPF 1.6<br>None are applicable. |
| Land Division | |
| PO 2.1<br>Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a Ramsar wetland. | DTS/DPF 2.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Regulated and Significant Tree Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Conservation of regulated and significant trees to provide aesthetic and environmental benefits and mitigate tree loss. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Tree Retention and Health | |
| PO 1.1<br>Regulated trees are retained where they:<br>(a) make an important visual contribution to local character and amenity<br>(b) are indigenous to the local area and listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species and / or<br>(c) provide an important habitat for native fauna. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Significant trees are retained where they:<br>(a) make an important contribution to the character or amenity of the local area<br>(b) are indigenous to the local area and are listed under the *National Parks and Wildlife Act 1972* as a rare or endangered native species<br>(c) represent an important habitat for native fauna<br>(d) are part of a wildlife corridor of a remnant area of native vegetation<br>(e) are important to the maintenance of biodiversity in the local environment and / or<br>(f) form a notable visual element to the landscape of the local area. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>A tree damaging activity not in connection with other development satisfies (a) and (b):<br>(a) tree damaging activity is only undertaken to:<br>(i) remove a diseased tree where its life expectancy is short<br>(ii) mitigate an unacceptable risk to public or private safety due to limb drop or the like<br>(iii) rectify or prevent extensive damage to a building of value as comprising any of the following:<br>A. a Local Heritage Place<br>B. a State Heritage Place<br>C. a substantial building of value<br>and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity<br>(iv) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire<br>(v) treat disease or otherwise in the general interests of the health of the tree and / or<br>(vi) maintain the aesthetic appearance and structural integrity of the tree<br>(b) in relation to a significant tree, tree-damaging activity is avoided unless all reasonable remedial treatments and measures have been determined to be ineffective. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>A tree-damaging activity in connection with other development satisfies all the following:<br>(a) it accommodates the reasonable development of land in accordance with the relevant zone or subzone where such development might not otherwise be possible<br>(b) in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring. | DTS/DPF 1.4<br>None are applicable. |
| Ground work affecting trees | |
| PO 2.1<br>Regulated and significant trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health. | DTS/DPF 2.1<br>None are applicable. |
| Land Division | |
| PO 3.1<br>Land division results in an allotment configuration that enables its subsequent development and the retention of regulated and significant trees as far as is reasonably practicable. | DTS/DPF 3.1<br>Land division where:<br>(a) there are no regulated or significant trees located within or adjacent to the plan of division |

| | |
|---|---|
| | (b) or the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Resource Extraction Protection Area Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Protection of Strategic Resources | |
| PO 1.1<br><br>Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is:<br><br>(a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities<br>or<br>(b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as:<br>(i) locating residential accommodation the greatest distance practicable from the resource extraction activity<br>(ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers<br>(iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity<br>(iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity. | DTS/DPF 1.1<br><br>Development does not incorporate:<br><br>(a) a sensitive receiver<br>or<br>(b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more<br>or<br>(c) land division for the purposes of accommodating a sensitive receiver. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Where located within the area of the Resource Extraction Zone, all forms of development except:<br><br>(a) where the development is deemed-to-satisfy<br>or<br>(b) where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral<br>or<br>(c) any of the following classes of development<br>(i) agricultural building<br>(ii) land division for the purpose of a boundary realignment where no additional allotments are created<br>(iii) farming<br>(iv) fence<br>(v) horse keeping<br>(vi) horticulture<br>(vii) mushroom production<br>(viii) protective tree netting structure. | Minister responsible for administering the Mining Acts. | To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations. | Development of a class to which Schedule 9 clause 3 item 14 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):<br><br>(a) dwelling<br>(b) residential flat building<br>(c) tourist accommodation<br>(d) boarding home<br>(e) dormitory style accommodation<br>(f) workers' accommodation<br>(g) student accommodation<br>(h) child care facility<br>(i) educational facility<br>(j) retirement facility<br>(k) supported accommodation<br>(l) residential park<br>(m) hospital. | | | |

## River Murray Flood Plain Protection Area Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Conservation and protection of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk, and recognition of the riverine environment as an important ecological, tourist and recreational resource. |
| DO 2 | Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate). |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use | |
| PO 1.1<br><br>All development, but in particular development involving any of the following:<br><br>(a) activities requiring irrigation<br>(b) aquaculture<br>(c) commercial forestry<br>(d) horse keeping | DTS/DPF 1.1<br><br>Development satisfies either of the following:<br><br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use<br>or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |

| | |
|---|---|
| (e) horticulture<br>(f) industry<br>(g) intensive animal husbandry<br><br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas. | |
| Wastewater | |
| PO 2.1<br><br>Wastewater management systems have no adverse impact on the quality of water draining from the site. | DTS/DPF 2.1<br><br>Development results in:<br><br>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards<br>or<br>(b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer, community wastewater management system or wastewater holding tank that complies with relevant South Australian standards. |
| Dredging | |
| PO 3.1<br><br>Development is designed and sited in a manner that limits the need for dredging. | DTS/DPF 3.1<br><br>None are applicable. |
| Land Division | |
| PO 4.1<br><br>Land division does not lead to intensification of development. | DTS/DPF 4.1<br><br>Land division is:<br><br>(a) limited to the creation of a public road or a public reserve<br>or<br>(b) for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment. |
| PO 4.2<br><br>Boundary realignment for residential purposes preserves the integrity of public waterfront reserves. | DTS/DPF 4.2<br><br>Boundary realignment for residential purposes:<br><br>(a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve) and<br>(b) provides a reserve 50m or more in width above pool level along the water frontage. |
| Built Form and Character | |
| PO 5.1<br><br>In the context of any measures required to mitigate against flood risk, buildings are sited and designed to be unobtrusive, particularly when viewed from the River Murray and nearby public roads. | DTS/DPF 5.1<br><br>Buildings satisfy all of the following:<br><br>(a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood)<br>(b) in accordance with Figure 5:<br>(i) have no floor level elevated 3m or more above natural ground level other than where the Finished Ground and Floor Levels Technical and Numeric Variation layer applies and would require the minimum finished floor level of the building to exceed 3m above natural ground level, in which case this is acceptable as outlined in DTS/DPF 6.1(a)<br>and<br>(ii) have an overall roof height that does not exceed 5m above the elevated floor level described in DTS 5.1(b)(i)<br>(c) are not closer than 50m to the waterfront<br>(d) have associated electricity and telecommunications lines installed underground<br>(e) in relation to outbuildings and agricultural buildings clad in sheet metal - are pre-colour treated or painted in a non-reflective colour. |
| PO 5.2<br><br>Outbuildings and agricultural buildings designed and sited to minimise their visibility from the waterfront and not dominate the appearance of public places. | DTS/DPF 5.2<br><br>Outbuildings and agricultural buildings:<br><br>(a) clad in sheet metal are pre-colour treated or painted in a non-reflective colour<br>(b) in the case of a site with a waterfront (including where there is an intervening public reserve), are not sited between the waterfront and the existing or proposed dwelling as demonstrated in Figure 7. |
| PO 5.3<br><br>Development setback from the River Murray and canals to establish a consistent character along a river front. | DTS/DPF 5.3<br><br>None are applicable. |
| PO 5.4<br><br>Limited use of retaining walls in the 1956 River Murray Flood Plain and in highly visible locations that can be viewed from public roads or the main channel of the River Murray to maintain the natural amenity and character along the river. | DTS/DPF 5.4<br><br>A retaining wall for one or more of the following purposes:<br><br>(a) for the repair or replacement of a lawful retaining wall<br>(b) to provide safe public access to the waterfront on public land<br>(c) to protect structures and buildings of historic significance<br>(d) to protect waterfront vegetation<br>(e) is ancillary to a dwelling and will provide safe access to the waterfront from that dwelling<br>(f) to protect a dwelling from material risk presented by erosion. |
| Flood Resilience | |
| PO 6.1<br><br>Habitable and other valuable buildings that may be adversely affected by floodwaters and fluctuating pool levels are elevated (or relocatable in the case of caravan and tourist parks) to protect property from damage. | DTS/DPF 6.1<br><br>Development incorporates finished ground and floor levels not less than the following, except where:<br><br>(a) it would require a finished floor level greater than 4m above natural ground level in which case 4m is an acceptable finished floor level<br>or<br>(b) it relates to habitable buildings within a caravan or tourist park which will be relocatable in the event of a flood: |

| PO 6.2<br><br>Development avoids the need for coast and river protection works through measures such as setbacks to protect development from coastal erosion, sea, river or stormwater flooding, sand drift or other coastal or riverine processes. | DTS/DPF 6.2<br><br>None are applicable. |
| PO 6.3<br><br>Dwellings and dwelling additions or alterations:<br><br>(a) do not impede floodwaters and fluctuating pool levels<br>(b) are designed and sited to mitigate against damage in the event of a flood. | DTS/DPF 6.3<br><br>Dwellings and additions or alterations to dwellings satisfy (a) or (b) and (c):<br><br>(a) are located outside the 1956 River Murray Flood Plain as shown in the Planning Reference layer in the South Australian Property and Planning Atlas<br>(b) are elevated and the undercroft area:<br>(i) is wholly open (there are no enclosures)<br>or<br>(ii) where enclosed areas are proposed, such areas are in accordance with all of the following, as depicted in Figures 5 and 6:<br>A. there are no habitable rooms<br>B. each enclosed space does not include internal linings (excluding a wet area or lift facility) and is fitted with roller door(s) or similar (that are not glass) on each side of a width not less than 2.4m so the space can be easily opened during times of flood<br>C. does not include more than one wet area and that wet area does not exceed 15m$^2$<br>D. the combined enclosed area (inclusive of a wet area but excluding a lift facility) does not exceed a total floor area of 60m$^2$<br>E. at least one third of the undercroft area remains open (not enclosed) from the principal waterfront elevation through to its opposite elevation.<br>(c) in the case of an existing dwelling with a habitable floor level at ground level, alterations and additions do not:<br>(i) increase the total floor area of the dwelling to greater than 90 square metres, excluding:<br>A. wet areas of up to 15 square metres, and<br>B. any verandah, balcony or deck<br>(ii) comprise the addition of a second building level. |
| PO 6.4<br><br>Outbuildings and agricultural buildings do not impede floodwaters and fluctuating pool levels. | DTS/DPF 6.4<br><br>Outbuildings and agricultural buildings are:<br><br>(a) fitted with roller doors, or similar (that are not glass) on two opposite ends or sides (whichever elevations face the direction of the river flow)<br>(b) constructed at natural ground level. |
| PO 6.5<br><br>Fencing does not impede floodwaters and fluctuating pool levels. | DTS/DPF 6.5<br><br>Fencing is of an open design such as post and wire strand construction. |
| Environmental Protection | |
| PO 7.1<br><br>Adverse impacts on the natural features and stability of the waterfront are minimised. | DTS/DPF 7.1<br><br>None are applicable. |
| PO 7.2<br><br>Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation. | DTS/DPF 7.2<br><br>None are applicable. |
| PO 7.3<br><br>Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront. | DTS/DPF 7.3<br><br>None are applicable. |
| PO 7.4<br><br>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are sited and designed to prevent environmental harm. | DTS/DPF 7.4<br><br>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located:<br><br>(a) outside the 1956 River Murray Flood Plain<br>and<br>(b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank. |
| PO 7.5<br><br>Facilities for the collection of effluent from moored vessels are sited and designed to prevent environmental harm. | DTS/DPF 7.5<br><br>None are applicable. |
| Access | |
| PO 8.1<br><br>Waterfront reserve areas between buildings and the water are maximised to preserve the amenity of view corridors along the riverine environment. | DTS/DPF 8.1<br><br>None are applicable. |
| PO 8.2<br><br>Public access routes to waterfront reserves are provided and maintained. | DTS/DPF 8.2<br><br>None are applicable. |
| PO 8.3<br><br>Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling. | DTS/DPF 8.3<br><br>No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area. |
| River Structures | |
| PO 9.1<br><br>River structures are located where they do not cause a hazard to safe navigation. | DTS/DPF 9.1<br><br>River structures are located to satisfy all of the following:<br><br>(a) wholly outside navigation channels as defined by navigational signs<br>(b) 100m or more from either side of a ferry crossing<br>(c) 150m or more from a lock. |
| PO 9.2<br><br>River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming. | DTS/DPF 9.2<br><br>River structures are located wholly outside designated recreation areas for water skiing and swimming. |
| PO 9.3<br><br>Proliferation of water pumps is avoided to limit impact on the riverine environment. | DTS/DPF 9.3<br><br>None are applicable. |
| PO 9.4<br><br>Water pumping infrastructure is designed and constructed to limit impact on the riverine environment. | DTS/DPF 9.4<br><br>Water pumping infrastructure is designed and constructed in accordance with Figure 1. |
| PO 9.5<br><br>Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment. | DTS/DPF 9.5<br><br>Jetties and floating pontoons are:<br><br>(a) ancillary to a dwelling<br>(b) limited to one jetty or floating pontoon per dwelling<br>(c) located on the same allotment as the associated dwelling<br>or<br>(d) are separated from the allotment (or lease site) accommodating the associated dwelling by a public reserve or a public road (but not both)<br>or<br>(e) are for the repair, maintenance or replacement of an existing licensed river structure. |
| PO 9.6 | DTS/DPF 9.6 |

| | |
|---|---|
| Jetties and floating pontoons are designed and constructed to limit impact on the riverine environment. | Jetties and floating pontoons satisfy all of the following:<br>(a) extend not more than 8m into the river measured from the riverbank at normal pool level<br>(b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon)<br>(c) in the case of floating pontoons, do not exceed the dimensions 3m by 6m<br>(d) maintain a minimum of 3m between river structures including other jetties and pontoons. |
| PO 9.7<br>A proliferation of boat ramps is avoided to minimise impact on the riverine environment. | DTS/DPF 9.7<br>The repair, maintenance or replacement of an existing licensed boat ramp. |
| PO 9.8<br>On-river mooring facilities are developed only where:<br>(a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment<br>(b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling<br>(c) the width of the river is greater than 100m at normal pool level. | DTS/DPF 9.8<br>None are applicable. |
| PO 9.9<br>Moorings for vessels are located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station. | DTS/DPF 9.9<br>Moorings for vessels not located within:<br>(a) 100m of either side of a ferry crossing<br>(b) 150m of a lock<br>(c) 400m of a major pumping station. |
| PO 9.10<br>Development of structures designed for the mooring of more than one vessel are located off-channel in a marina. | DTS/DPF 9.10<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral:<br>(a) development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land<br>(b) development that is within the ambit of clause 7 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*<br>(c) the construction of a building, or the undertaking of an act or activity specified in clause 3 of Schedule 3 of the *Planning, Development and Infrastructure (General) Regulations 2017*, other than where the development:<br>(i) is the construction of a fence not exceeding 2m in height<br>or<br>(ii) is the construction of a carport, verandah, balcony, porch or other similar structure<br>or<br>(iii) is the construction of an enclosed shed, garage or similar outbuilding:<br>A. that is ancillary to an existing building; and<br>B. where the enclosed shed, garage or similar outbuilding will not have a total floor area of more than 150m²; and<br>C. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and<br>D. that will not be located closer to the River Murray than the building to which it is ancillary, or is not closer than 100m to the River Murray<br>or<br>(iv) is the construction of an agricultural building:<br>A. that is located outside the 1956 River Murray Flood Plain or will be fitted with roller doors, or similar on two opposite ends or sides so as not to impede flood waters; and<br>B. that is not closer than 200m to the River Murray; and<br>C. that will not have a total floor area of more than:<br>(A) 350m² within the Productive Rural Landscape Zone<br>(B) 500m² within the Rural Zone or Rural Intensive Enterprise Zone<br>(C) 250m² within any other zone<br>or<br>(v) is the construction of:<br>A. an aboveground or inflatable swimming pool, or a spa pool<br>or<br>B. an in-ground swimming pool located outside the 1956 River Murray Flood Plain<br>or<br>(vi) comprises:<br>A. the construction of a dwelling (or the alteration or extension of an existing dwelling) that is located outside the 1956 River Murray Flood Plain and not closer than 100m to the River Murray<br>or<br>B. an alteration or extension of an existing dwelling that in the opinion of the relevant authority is minor and where any extension of the dwelling will not result in a part of the dwelling being closer to the River Murray<br>or<br>(vii) is the construction of an elevated dwelling (including any incidental excavation or filling or any retaining wall which retains a difference in ground levels not exceeding 1m) that is located within the Rural Shack Settlement Zone and has an open undercroft area or an undercroft area:<br>A. that when enclosed, is enclosed on two opposite ends or sides using roller doors, or other material (that is not glass) that can be easily opened or removed during times of flood<br>B. that is not a habitable room<br>C. that will have enclosed areas for a toilet, shower or laundry facilities not exceeding a combined maximum floor area of 15m² (excluding any stairwell and/or lift shaft area)<br>or<br>(viii) is the construction of a transportable dwelling or cabin, or a removable annexe, within an existing caravan and tourist park<br>(d) land division classified as restricted by the Planning and Design Code<br>(e) land division that results in:<br>(i) 4 or more additional allotments<br>(ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment)<br>or<br>(iii) a mix of 4 or more additional allotments and separate grants of occupancy<br>(f) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system<br>(g) alteration of the boundaries of an allotment so as to result in:<br>(i) the allotment having a frontage to a part of the River Murray system<br>or | Minister responsible for administration of the *River Murray Act 2003*. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality, and cultural heritage. | Development of a class to which Schedule 9 clause 3 item 15 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

| | | | |
|---|---|---|---|
| (ii) the allotment having an increase in its frontage to a part of the River Murray system. | | | |
| Development that generates human wastewater from a peak loading capacity of more than 40 equivalent persons or more than 6000 litres/day and is not connected to a community wastewater management system or sewerage infrastructure. | Environment Protection Authority | To provide expert assessment and direction to the relevant authority on potential impacts to water quality in the River Murray system from pollutants discharged into any waters or onto land in a place that is reasonably likely to impact the quality of drinking water. | Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Any pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 5 or more vessels at any 1 time | | | |
| Vessel refuelling facility | | | |
| Vessel sewage pump-out facility. | | | |

**River Murray Tributaries Protection Area Overlay**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Sustainable water use and conservation of riverine environments within the River Murray Tributaries area. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use | |
| PO 1.1<br>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users. | DTS/DPF 1.1<br>Development involving the construction of a retaining wall that will not materially result in the collection or diversion of surface water flowing over land or water flowing in a watercourse. |
| PO 1.2<br>All development, but in particular development involving any of the following:<br>(a) activities requiring irrigation<br>(b) aquaculture<br>(c) commercial forestry<br>(d) horticulture<br>(e) industry<br>(f) intensive animal husbandry<br>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed water resource areas. | DTS/DPF 1.2<br>Development satisfies either of the following:<br>(a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use<br>or<br>(b) the proposal does not involve the taking of water for which a licence would be required under the *Landscape South Australia Act 2019*. |
| Land Division | |
| PO 2.1<br>Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Land division, including boundary realignment, preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system. | DTS/DPF 2.2<br>Land division does not result in any of the following:<br>(a) an increase in allotments having a frontage to a part of the River Murray system<br>(b) an increase in the frontage of an allotment or allotments to a part of the River Murray system. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral:<br>(a) development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land<br>(b) land division classified as *restricted* by the Planning and Design Code<br>(c) land division that results in:<br>(i) 4 or more additional allotments<br>or<br>(ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment)<br>or<br>(iii) a mix of 4 or more additional allotments and separate grants of occupancy<br>(d) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system<br>(e) alteration of the boundaries of an existing allotment so as to result in:<br>(i) the allotment having a frontage to a part of the River Murray system<br>or<br>(ii) the allotment having an increase in its frontage to a part of the River Murray system. | Minister responsible for the administration of the *River Murray Act 2003*. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality and cultural heritage. | Development of a class to which Schedule 9 clause 3 item 16 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Scenic Quality Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development complements natural and rural character, and areas of scenic value. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Land uses that complement and enhance the natural and rural character. | DTS/DPF 1.1<br>None are applicable. |
| Built Form and Character | |
| PO 2.1<br>Development is carefully sited and designed to:<br>(a) complement rural or natural character<br>(b) minimise disruption to natural landform<br>(c) integrate existing natural environmental features<br>(d) minimise impacts on scenic features<br>(e) be low-scale<br>(f) be visually unobtrusive and blend in with the surrounding area | DTS/DPF 2.1<br>None are applicable. |
| Landscaping | |
| PO 3.1<br>Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration. | DTS/DPF 3.1<br>Landscaping plantings exclusively constitute locally indigenous plant species. |
| Earthworks | |
| PO 4.1<br>Excavation and filling of land is limited to that required to reduce the visual prominence of buildings and make provision for water storage facilities to maintain natural landforms and landscapes. | DTS/DPF 4.1<br>Excavation and/or filling is associated with a building or water storage facility and satisfies all of the following:<br>(a) does not involve excavation exceeding a vertical height of 750mm<br>(b) does not involve filling exceeding a vertical height of 750mm<br>(c) does not involve a total combined excavation and filling vertical height of 1.5m<br>(d) any scree slope is covered in topsoil and landscaped. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Significant Interface Management Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | The prevention of the establishment of new, and intensification of sensitive receivers to mitigate community exposure to potential adverse hazards and environmental and amenity impacts generated by the lawful operation of proximate significant activities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Intensification of sensitive uses and / or sensitive receivers, inclusive of land division for either purpose, is not undertaken to avoid increasing resident or community exposure to potential adverse hazards or emissions unless:<br>(a) each source of adverse hazard or emission has ceased operation<br>or<br>(b) it can be demonstrated that the site of the proposed development is not unreasonably impacted by the hazard or emissions from a relevant source, including as a result of environmental or operational improvements that have been or will be made to reduce the hazard or emissions from each source to an acceptable level. | DTS/DPF 1.1<br>Development does not comprise a sensitive use, sensitive receiver and / or land division for a sensitive use or sensitive receiver purpose unless:<br>(a) it is a replacement dwelling where the total floor area is no greater than the existing or previous dwelling<br>or<br>(b) each source of hazard and /or emissions has ceased to operate or has been superseded by another use such that it cannot be revived. |
| PO 1.2<br>Alterations and additions to sensitive receivers support ongoing activity without leading to an increase in resident or community exposure to unacceptable levels of hazard, noise, dust, odour or other emissions. | DTS/DPF 1.2<br>Alterations and additions where:<br>(a) associated with a dwelling, do not increase the total floor area by more than 10% taking into account any previous alteration or addition<br>or<br>(b) associated with any other sensitive receivers, do not increase the on-site capacity of the service or facility. |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Significant Landscape Protection Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Land use intensity is restrained to conserve and enhance natural and rural character. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development inconsistent with conserving significant natural and rural landscapes is not undertaken. | DTS/DPF 1.2<br>Development does not include any of the following (or any combination of any of the following):<br>(a) renewable energy facility (other than roof mounted solar photovoltaic panels)<br>(b) large-scale industry, storage, distribution, warehousing<br>(c) intensive animal husbandry. |
| Built Form and Character | |
| PO 2.1<br>Development is carefully sited and designed to:<br>(a) complement rural or natural character<br>(b) minimise disruption to natural landform<br>(c) integrate existing natural environmental features, including native vegetation<br>(d) minimise impacts on wildlife habitat<br>(e) be low-scale<br>(f) be visually unobtrusive and blend in with the surrounding area<br>(g) be located below ridge lines. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Buildings and structures are limited to those that:<br>(a) are ancillary, adjacent to, and of the same or lesser scale as existing buildings<br>(b) support desired outcomes of the relevant zone or subzone<br>(c) are used for the ancillary sale of produce associated with a pastoral or rural activity<br>(d) are in the form of high-quality, nature-based tourist accommodation<br>(e) are for rainwater storage<br>(f) are for research or education purposes<br>(g) support conservation or the interpretation of the environment or cultural features. | DTS/DPF 2.2<br>None are applicable. |
| Landscaping | |
| PO 3.1<br>Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration. | DTS/DPF 3.1<br>Landscaping plantings exclusively constitute locally indigenous plant species. |
| Earthworks | |
| PO 4.1<br>Excavation and filling of land is limited to that associated with: | DTS/DPF 4.1<br>Excavation and/or filling satisfies all of the following: |

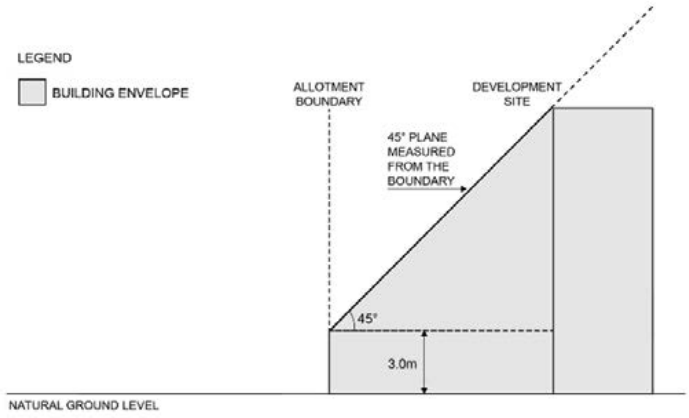
| | |
|---|---|
| (a) minimising the visual impact of buildings<br>(b) construction of water storage facilities. | (a) it is in connection with a building or water storage facility<br>(b) does not involve excavation exceeding a vertical height of 0.75m<br>(c) does not involve filling exceeding a vertical height of 0.75m<br>(d) does not involve a total combined excavation and filling vertical height of 1.5m<br>(e) any scree slope is covered in topsoil and landscaped with locally indigenous plant species. |

**Procedural Matters (PM) - Referrals**

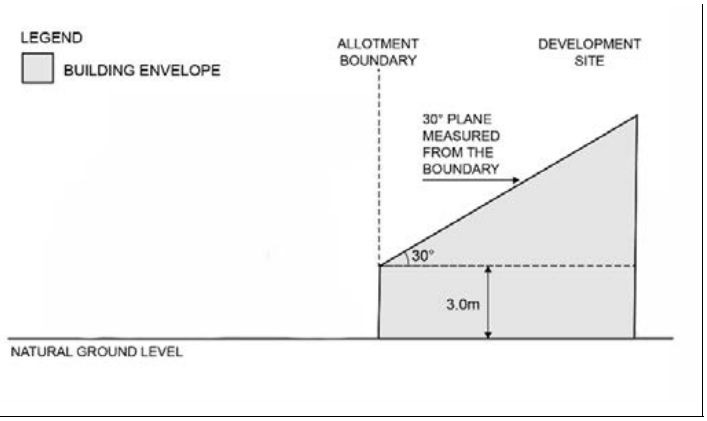
The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |



## Significant Retirement Facility and Supported Accommodation Sites Overlay



**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development of supported accommodation and/or retirement facilities on significant retirement facility and supported accommodation sites to provide accommodation for the communities' ageing residents. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Non-residential activities are subordinate to, and in association with, retirement facilities and/or supported accommodation to support occupant care and wellbeing and the local community. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Shops, offices and consulting rooms are subordinate to, and associated with a retirement facility and/or supported accommodation on a significant retirement facility and supported accommodation site, and:<br>(a) support the facility's residents, workers, visitors and the local community<br>and<br>(b) are of a scale to maintain residential amenity. | DTS/DPF 1.2<br>A shop, consulting room or office associated with supported accommodation and/or a retirement facility located on a significant retirement facility and supported accommodation site does not exceed:<br>(a) either of the following:<br>(i) 450m2 gross leasable floor area per tenancy<br>or<br>(ii) the relevant zone's maximum gross leasable floor area<br>whichever is greater<br>and<br>(b) when combined with any other existing or proposed shop office or consulting room, 10% of the total gross leasable floor area of all buildings on the site. |
| Built form and Character | |
| PO 2.1<br>Buildings for, or associated with, supported accommodation and/or retirement facilities on a significant retirement facility and supported accommodation site are consistent with the form expressed in DTS/DPF 2.1 or positively responds to the local context, provided that off-site impacts can be managed. | DTS/DPF 2.1<br>Buildings for, or associated with, supported accommodation and/or a retirement facility on a significant retirement facility and supported accommodation site do not exceed:<br>(a) 4 levels and 15m in height on sites between 6,500m2 up to 10,000m2 in area<br>or<br>(b) 6 levels and 22m in height on sites over 10,000m2 in area.<br>In instances where the zone's maximum building height exceeds the height specified in part DTS/DPF 2.1 (a) or (b) (whichever is relevant), then the zone's maximum building height will apply. |
| PO 2.2<br>Development on a significant retirement facility and/or supported accommodation site designed to minimise impacts on local streetscapes and adjacent residential uses with regard to overshadowing, massing and building proportions. | DTS/DPF 2.2<br>Parts of a building associated with, a retirement facility and/or supported accommodation on a significant retirement facility and supported accommodation site that exceed the zone's maximum building height are constructed within a building envelope provided by a:<br>(a) 45 degree plane measured from a height of 3m above natural ground level at the site boundary as shown in the following diagram (except where this boundary is a southern boundary or a State maintained road):<br><br><br>(b) 30 degree plane measured from a height of 3m above natural ground level at the southern site boundary as shown in the following diagram (except where this boundary is a State maintained road): |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## State Heritage Area Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993. |
| Note | Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993 can be found here |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Built Form | |
| PO 1.1<br>The form of new buildings and structures that are visible from the public realm are consistent with the heritage values and characteristics of the State Heritage Area. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development is consistent with the prevailing building and ceiling heights in the State Heritage Area. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Design and architectural detailing of street facing buildings is consistent with the prevailing characteristics expressed in the State Heritage Area. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area. | DTS/DPF 1.4<br>None are applicable. |
| PO 1.5<br>Materials are consistent with or complement those within the State Heritage Area. | DTS/DPF 1.5<br>None are applicable. |
| Alterations and Additions | |
| PO 2.1<br>Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary façade or streetscape and employ a contextual design approach. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Adaptive reuse and revitalisation of heritage buildings and places to support their retention in a manner that respects and references the heritage values of the State Heritage Area. | DTS/DPF 2.2<br>None are applicable. |
| Ancillary Development | |
| PO 3.1<br>Ancillary development, including carports, outbuildings and garages, complements the heritage values of the State Heritage Area. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s). | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the State Heritage Area. | DTS/DPF 3.3<br>None are applicable |
| PO 3.4<br>Fencing and gates are consistent with the heritage values of the State Heritage Area. | DTS/DPF 3.4<br>None are applicable. |
| Land Division | |
| PO 4.1<br>Land division creates allotments that:<br>(a) are compatible with the surrounding pattern of subdivision of the State Heritage Area<br>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area. | DTS/DPF 4.1<br>None are applicable. |
| Landscape Context and Streetscape Amenity | |
| PO 5.1<br>Street trees, kerbing, footpaths and other features that contribute to the historic value of the State Heritage Area are maintained unless:<br>(a) trees / plantings are, or have the potential to be, a danger to life or property<br>or<br>(b) trees / plantings are significantly diseased and their life expectancy is short. | DTS/DPF 5.1<br>None are applicable. |
| Demolition | |
| PO 6.1<br>Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless: | DTS/DPF 6.1<br>None are applicable. |

| | |
|---|---|
| (a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area or<br>(b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair. | |
| Conservation Works | |
| PO 7.1<br>Conservation works to the exterior of buildings and other features of identified heritage value match original materials to be repaired and utilise traditional work methods. | DTS/DPF 7.1<br>Conservation works involving:<br>(a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing or<br>(b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/ repointing to match original. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where:<br>(a) the development is to be undertaken in accordance with a Heritage Agreement under the Heritage Places Act 1993 or<br>(b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral<br>any of the following classes of development:<br>(a) demolition of external building fabric and other features of identified heritage value within the State Heritage Area<br>(b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare within the State Heritage Area<br>(c) alterations or additions to buildings and other features of identified heritage value that:<br>(i) are visible from a public street, road or thoroughfare within the State Heritage Area or<br>(ii) are visually dominant within the State Heritage Area or<br>(iii) involve substantive physical impact to the fabric of significant buildings<br>(d) new buildings that:<br>(i) are visible from a public street, road or thoroughfare within the State Heritage Area or<br>(ii) are visually dominant within the State Heritage Area<br>(e) conservation repair works that are not representative of 'like for like' maintenance<br>(f) solar panels that are visible from a public street, road or thoroughfare within the State Heritage Area<br>(g) land division<br>(h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare within the State Heritage Area<br>(i) the removal of an individual tree or a tree within a garden or park of identified heritage significance within the State Heritage Area. | Minister responsible for the administration of the *Heritage Places Act 1993*. | To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Areas. | Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## State Heritage Place Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the *Heritage Places Act 1993*. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Built Form | |
| PO 1.1<br>The form of new buildings and structures maintains the heritage values of the State Heritage Place. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Massing, scale and siting of development maintains the heritage values of the State Heritage Place. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the State Heritage Place. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Development is consistent with boundary setbacks and setting. | DTS/DPF 1.4<br>None are applicable. |
| PO 1.5<br>Materials and colours are either consistent with or complement the heritage values of the State Heritage Place. | DTS/DPF 1.5<br>None are applicable. |
| PO 1.6<br>New buildings and structures are not placed or erected between the primary and secondary street boundaries and the façade of a State Heritage Place. | DTS/DPF 1.6<br>None are applicable. |
| PO 1.7<br>Development of a State Heritage Place retains elements contributing to its heritage value. | DTS/DPF 1.7<br>None are applicable. |
| Alterations and Additions | |
| PO 2.1<br>Alterations and additions complement the State Heritage Place and are sited to be unobtrusive, not conceal or obstruct heritage features and detailing, or dominate the State Heritage Place or its setting. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Adaptive reuse and revitalisation of State Heritage Places to support their retention in a manner that respects and references the original use of the State Heritage Place. | DTS/DPF 2.2<br>None are applicable. |
| Ancillary Development | |
| PO 3.1<br>Ancillary development, including carports, outbuildings and garages, complement the heritage values of the State Heritage Place. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Ancillary development, including carports, outbuildings and garages, is located behind the building line of the State Heritage Place. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4 | DTS/DPF 3.4 |

| | |
|---|---|
| Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the State Heritage Place. | None are applicable. |
| Land Division | |
| PO 4.1<br>Land division creates allotments that:<br>(a) maintain the heritage values of the State Heritage Place, including setting<br>(b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place. | DTS/DPF 4.1<br>None are applicable. |
| Landscape Context and Streetscape Amenity | |
| PO 5.1<br>Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless:<br>(a) trees / plantings are, or have the potential to be, a danger to life or property<br>or<br>(b) trees / plantings are significantly diseased and their life expectancy is short. | DTS/DPF 5.1<br>None are applicable. |
| Demolition | |
| PO 6.1<br>State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply:<br>(a) the portion of the State Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value<br>or<br>(b) the structural condition of the State Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair. | DTS/DPF 6.1<br>None are applicable. |
| Conservation Works | |
| PO 7.1<br>Conservation works to the exterior and interior of a State Heritage Place and other features of identified heritage value match original materials to be repaired and utilise traditional work methods. | DTS/DPF 7.1<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where:<br>(a) the development is to be undertaken in accordance with a Heritage Agreement under the *Heritage Places Act 1993*<br>or<br>(b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral<br>any of the following classes of development:<br>(a) demolition of internal or external significant building fabric<br>(b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare that abuts the State Heritage Place<br>(c) alterations or additions to buildings that:<br>(i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place<br>or<br>(ii) may materially affect the context of a State Heritage Place<br>or<br>(iii) involve substantive physical impact to the fabric of significant buildings;<br>(d) new buildings that:<br>(i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place<br>or<br>(ii) may materially affect the context of the State Heritage Place<br>(e) conservation repair works that are not representative of 'like for like' maintenance<br>(f) solar panels that are visible from a public street, road or thoroughfare that abuts the State Heritage Place<br>(g) land division<br>(h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare that abuts the State Heritage Place<br>(i) the removal of an individual tree or a tree within a garden or park of identified heritage significance. | Minister responsible for the administration of the *Heritage Places Act 1993*. | To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Places. | Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## State Significant Native Vegetation Areas Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Protect, retain and restore significant areas of native vegetation. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Environmental Protection | |
| PO 1.1<br>Development enhances biodiversity and habitat values through revegetation and avoiding native vegetation clearance except to promote an appreciation and awareness of wildlife areas, including visitor parking and amenities, or for the administration and management of a reserve or park established for the protection and conservation of wildlife. | DTS/DPF 1.1<br>An application is accompanied by either (a) or (b):<br>(a) a declaration stating that the proposal will not , or would not, involve clearance of native vegetation under the *Native Vegetation Act 1991*, including any clearance that may occur:<br>(i) in connection with a relevant access point and / or driveway<br>(ii) within 10m of a building (other than a residential building or tourist accommodation)<br>(iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control<br>(iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area<br>(b) a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that confirms that the clearance is categorised as 'Level 1 clearance'. |
| Land division | |
| PO 2.1<br>Land division that contributes to the conservation, protection and enhancement of native vegetation. | DTS/DPF 2.1<br>Land division satisfies one of the following:<br>(a) to create a public road or a public reserve where the application is accompanied by a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in which the extent of native vegetation clearance proposed to be undertaken in connection with the division is categorised as 'Level 1 clearance'<br>(b) to realign allotment boundaries to incorporate land into a park or reserve established under the *National Parks and Wildlife Act 1972*. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|

| | | | |
|---|---|---|---|
| The following classes of development:<br><br>(a) land division where a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in connection with a development application categorises the clearance, or potential clearance, as 'Level 2 clearance', 'Level 3 clearance' or 'Level 4 clearance'<br>(b) all other classes of development other than where DTS/DPF 1.1(a) or DTS/DPF 1.1(b) is achieved. | Native Vegetation Council | To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation. | Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Stormwater Management Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development incorporates water sensitive urban design techniques to capture and re-use stormwater. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br><br>Residential development is designed to capture and re-use stormwater to:<br><br>(a) maximise conservation of water resources<br>(b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded<br>(c) manage stormwater runoff quality. | DTS/DPF 1.1<br><br>Residential development comprising detached, semi-detached or row dwellings, or less than 5 group dwellings, co-located housing or dwellings within a residential flat building satisfies all of the following:<br><br>(a) includes rainwater tank storage:<br>(i) connected to at least:<br>A. in relation to a detached dwelling (not in a battle-axe arrangement), semi-detached dwelling or row dwelling, 60% of the roof area<br>B. in all other cases, 80% of the roof area<br>(ii) connected to either a toilet or laundry cold water outlets for sites less than 200m$^2$<br>(iii) connected to one toilet and the laundry cold water outlets for sites of 200m$^2$ or greater<br>(iv) with a minimum total capacity in accordance with Table 1<br>(v) where detention is required, includes a 20-25 mm diameter slow release orifice at the bottom of the detention component of the tank<br>(b) incorporates dwelling roof area comprising at least 80% of the site's impervious area<br><br>Table 1: Rainwater Tank<br><br>**Site size (m$^2$)** / **Minimum retention volume (Litres)** / **Minimum detention volume (Litres)**<br><br><200 / 1000 / 1000<br><br>200-400 / 2000 / Site perviousness <30%: 1000<br>Site perviousness ≥30%: N/A<br><br>>401 / 4000 / Site perviousness <35%: 1000<br>Site perviousness ≥35%: N/A |

### Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Traffic Generating Development Overlay

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe and efficient operation of Urban Transport Routes and Major Urban Transport Routes for all road users. |
| DO 2 | Provision of safe and efficient access to and from urban transport routes and major urban transport routes. |

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Traffic Generating Development | |
| PO 1.1<br><br>Development designed to minimise its potential impact on the safety, efficiency and functional performance of the State Maintained Road network. | DTS/DPF 1.1<br><br>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:<br><br>(a) building, or buildings, containing in excess of 50 dwellings<br>(b) land division creating 50 or more additional allotments<br>(c) commercial development with a gross floor area of 10,000m2 or more<br>(d) retail development with a gross floor area of 2,000m2 or more<br>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more<br>(f) industry with a gross floor area of 20,000m2 or more<br>(g) educational facilities with a capacity of 250 students or more<br>(h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site. |
| PO 1.2<br><br>Access points sited and designed to accommodate the type and volume of traffic likely to be generated by development. | DTS/DPF 1.2<br><br>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:<br><br>(a) building, or buildings, containing in excess of 50 dwellings<br>(b) land division creating 50 or more additional allotments<br>(c) commercial development with a gross floor area of 10,000m2 or more |

| | |
|---|---|
| | (d) retail development with a gross floor area of 2,000m2 or more<br>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more<br>(f) industry with a gross floor area of 20,000m2 or more<br>(g) educational facilities with a capacity of 250 students or more<br>(h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site. |
| PO 1.3<br><br>Sufficient accessible on-site queuing provided to meet the needs of the development so that queues do not impact on the State Maintained Road network. | DTS/DPF 1.3<br><br>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:<br><br>(a) building, or buildings, containing in excess of 50 dwellings<br>(b) land division creating 50 or more additional allotments<br>(c) commercial development with a gross floor area of 10,000m2 or more<br>(d) retail development with a gross floor area of 2,000m2 or more<br>(e) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more<br>(f) industry with a gross floor area of 20,000m2 or more<br>(g) educational facilities with a capacity of 250 students or more<br>(h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, any of the following classes of development that are proposed within 250m of a State Maintained Road:<br><br>(a) except where a proposed development has previously been referred under clause (b) - a building, or buildings, containing in excess of 50 dwellings<br>(b) except where a proposed development has previously been referred under clause (a) - land division creating 50 or more additional allotments<br>(c) commercial development with a gross floor area of 10,000$m^2$ or more<br>(d) retail development with a gross floor area of 2,000$m^2$ or more<br>(e) a warehouse or transport depot with a gross leasable floor area of 8,000$m^2$ or more<br>(f) industry with a gross floor area of 20,000$m^2$ or more<br>(g) educational facilities with a capacity of 250 students or more<br>(h) supported accommodation and/or a retirement facility containing in excess of 50 residences, on a significant retirement facility and supported accommodation site. | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Tunnel Protection Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO1 | Development which preserves the integrity and operation of underground tunnel corridors and associated infrastructure. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

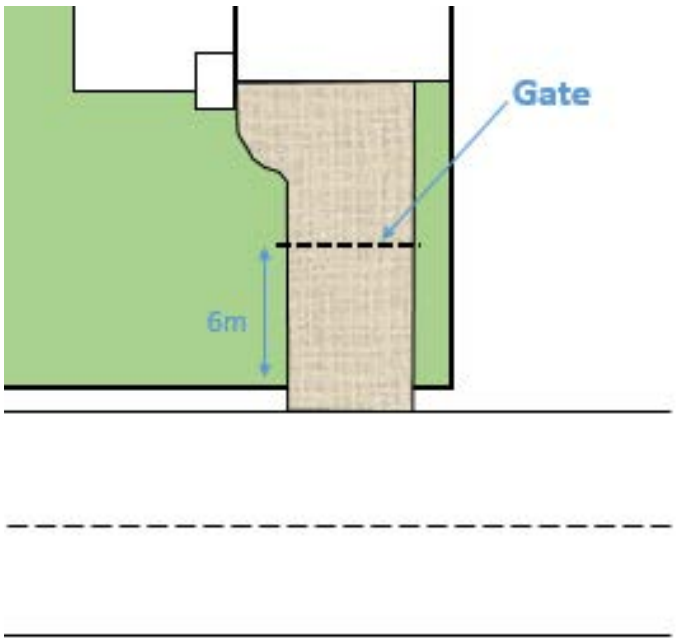
| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br><br>Development does not unsatisfactorily increase loading on underground tunnel corridors or infrastructure. | DTS/DPF 1.1<br><br>Development satisfies (a) and (b):<br><br>(a) comprises one or more of the following, and does not exceed 3 building levels above the regulated surface level:<br>(i) ancillary accommodation<br>(ii) carport<br>(iii) child care facility<br>(iv) community facility<br>(v) consulting room<br>(vi) dwelling<br>(vii) educational facility<br>(viii) hotel<br>(ix) office<br>(x) outbuilding<br>(xi) retirement facility<br>(xii) shop (other than a bulky goods outlet)<br>(xiii) student accommodation<br>(xiv) supported accommodation<br>(xv) tourist accommodation<br>(xvi) verandah<br>(xvii) development which is, in the opinion of the relevant authority, minor in nature or would not warrant a referral when considering the purpose of the referral.<br>(b) does not include any of the following:<br>(i) filling of land more than 1m above the regulated surface level<br>(ii) storage of materials, equipment or vehicles (whether temporary or permanent) over an area exceeding 100 square metres<br>(iii) temporary stockpiling of soil, gravel, rock or other natural material over an area exceeding 100 square metres. |
| Excavation and Ground Intruding Activity | |
| PO 2.1<br><br>Development does not unsatisfactorily interact with or reduce the loading on an underground tunnel corridors or infrastructure. | DTS/DPF 2.1<br><br>Development does not include excavation or ground intruding activity at a depth greater than 2.5 metres below the regulated surface level. |

**Procedural Matters (PM) - Referrals**

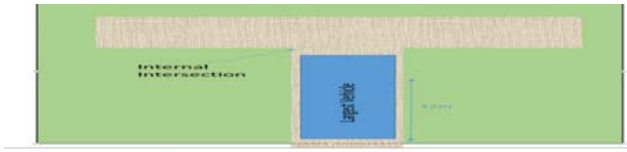
The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, development that is within the Tunnel Protection Overlay. | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority in relation to the potential for development to adversely impact upon the safety and structural integrity of tunnels and associated underground infrastructure proposed by or under the care, control and management of the Commissioner of Highways. | Development of a class to which Schedule 9 clause 3 item 8 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |



## Urban Transport Routes Overlay



**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safe and efficient operation of Urban Transport Routes for all road users. |
| DO 2 | Provision of safe and efficient access to and from Urban Transport Routes. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Access - Safe Entry and Exit (Traffic Flow) | |
| PO 1.1<br><br>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads. | DTS/DPF 1.1<br><br>An access point satisfies (a), (b) or (c):<br><br>(a) where servicing a single (1) dwelling / residential allotment all of the following are satisfied:<br>(i) it will not result in more than one access point<br>(ii) vehicles can enter and exit the site in a forward direction<br>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(v) it will have a width of between 3m and 4m (measured at the site boundary)<br>(b) where the development will result in 2 and up to 6 dwellings all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) vehicles can enter and exit the site in a forward direction<br>(iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road<br>(v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site)<br>(c) where the development will result in 7 or more dwellings, or is a non-residential land use all of the following are satisfied:<br>(i) it will not result in more than one access point servicing the development site<br>(ii) vehicles can enter and exit the site using left turn only movements<br>(iii) vehicles can enter and exit the site in a forward direction<br>(iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees<br>(v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less<br>(vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m<br>(vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m<br>(viii) provides for simultaneous two-way vehicle movements at the access:<br>A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road<br><br>and<br><br>B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road. |
| Access - On-Site Queuing | |
| PO 2.1<br><br>Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and maintain safe vehicle movements. | DTS/DPF 2.1<br><br>An access point satisfies (a), (b) or (c):<br><br>(a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:<br><br><br><br><br>(b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied:<br>(i) is expected to be serviced by vehicles with a length no greater than 6.4m<br>(ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)<br>(c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and all of the following are satisfied:<br>(i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle<br>(ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)<br>(iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop<br>(iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the longest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram: |

Access - (Location Spacing) - Existing Access Point

PO 3.1

Existing access points are designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1

An existing access point satisfies (a), (b) or (c):

(a) it will not service, or is not intended to service, more than 6 dwellings

(b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access

(c) is not located on a Controlled Access Road and development constitutes one or more of the following:

(i) a change of use between an office <500m$^2$ gross leasable floor area and a consulting room <500m$^2$ gross leasable floor area or vice versa

(ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment

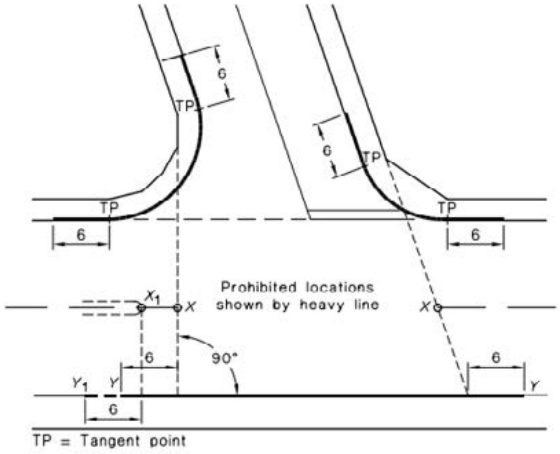
(iii) a change of use from a consulting room or office <250m$^2$ gross leasable floor area to shop <250m$^2$ gross leasable floor area

(iv) a change of use from a shop <500m$^2$ gross leasable floor area to a warehouse <500m$^2$ gross leasable floor area

(v) an office or consulting room with a <500m$^2$ gross leasable floor area

(vi) a change of use from a residential dwelling to a shop, office, consulting room or personal or domestic services establishment with <250m$^2$ gross leasable floor area.

Access – Location (Spacing) – New Access Points



PO 4.1

New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1

A new access point satisfies (a), (b) or (c):

(a) where a development site is intended to serve between 1 and 6 dwellings, access to the site is from the local road network (not being a Controlled Access Road) and is located outside of the bold lines shown in the following diagram:

NOTE:

The points marked $X_1$ and $X$ are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension $Y$-$Y$ extends to Point $Y_1$.

(b) where the development site is intended to serve between 1 and 6 dwellings, the new access satisfies all of the following:

(i) is not located on a Controlled Access Road

(ii) is not located on a section of road affected by double barrier lines

(iii) will be on a road with a speed environment of 70km/h or less

(iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)

(v) is located a minimum of 6m from a median opening or pedestrian crossing

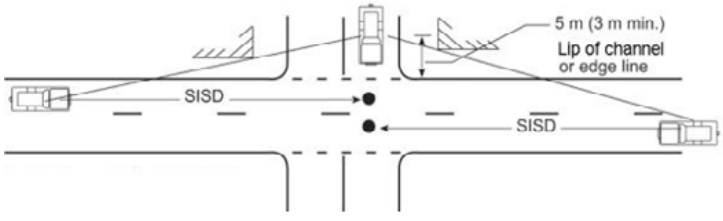
(c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

| Speed Limit | Separation between access points | Separation from public road junctions and merging/terminating lanes |
|---|---|---|
| 50 km/h or less | No spacing requirement | 20m |
| 60 km/h | 5m (for development intended to serve between 1 and 6 dwellings) and 10m for all other cases | 73m |
| 70 km/h | 40m | 92m |
| 80 km/h | 50m | 114m |
| 90 km/h | 65m | 139m |
| 100 km/h | 80m | 165m |
| 110 km/h | 100m | 193m |

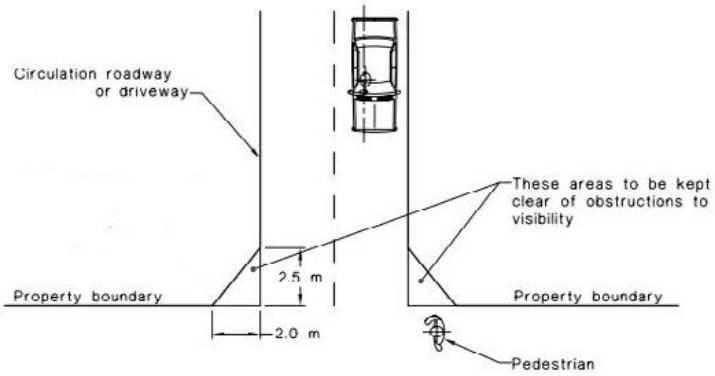
Access - Location (Sight Lines)

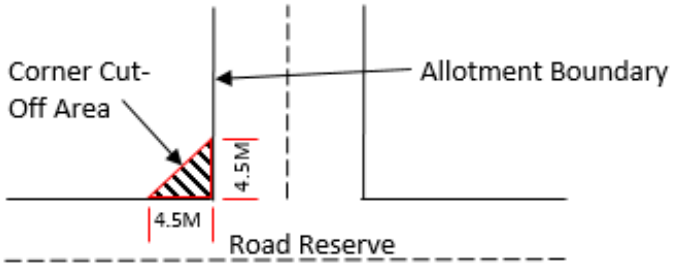
PO 5.1

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.



DTS/DPF 5.1





An access point satisfies (a) and (c) or (b) and (c):

(a) the development site does or is intended to serve between 1 and 6 dwellings and utilises an existing access point
or

(b) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

| Speed Limit | Access point serving 1-6 dwellings | Access point serving all other development |
|---|---|---|
| 40 km/h or less | 47m | 73m |
| 50 km/h | 63m | 97m |
| 60 km/h | 81m | 123m |
| 70 km/h | 100m | 151m |
| 80 km/h | 121m | 181m |
| 90 km/h | 144m | 226m |
| 100 km/h | 169m | 262m |
| 110km/h | 195m | 300m |

| | |
|---|---|
| | and<br>(c) pedestrian sightlines in accordance with the following diagram:<br><br> |
| Access – Mud and Debris | |
| PO 6.1<br>Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions. | DTS/DPF 6.1<br>Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer). |
| Access - Stormwater | |
| PO 7.1<br>Access points are designed to minimise negative impact on roadside drainage of water. | DTS/DPF 7.1<br>Development does not result in any of the following:<br>(a) decrease the capacity of an existing drainage point<br>(b) restrict or prevent the flow of stormwater through an existing drainage point and system<br>(c) result in access points becoming stormwater flow paths directly onto the road. |
| Building on Road Reserve | |
| PO 8.1<br>Buildings or structures that encroach onto, above or below road reserves are designed and sited to minimise impact on safe movements by all road users. | DTS/DPF 8.1<br>Buildings or structures are not located on, above or below the road reserve. |
| Public Road Junctions | |
| PO 9.1<br>New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road. | DTS/DPF 9.1<br>Development does not comprise any of the following:<br>(a) creating a new junction with a public road<br>(b) opening an unmade public road junction<br>(c) modifying an existing public road junction. |
| Corner Cut-Offs | |
| PO 10.1<br>Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety. | DTS/DPF 10.1<br>Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:<br><br> |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land, but not an excluded land division) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:<br>(a) creation of a new access or junction<br>(b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)<br>(c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). | Commissioner of Highways. | To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code. | Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Urban Tree Canopy Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Residential development preserves and enhances urban tree canopy through the planting of new trees and retention of existing mature trees where practicable. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Trees are planted or retained to contribute to an urban tree canopy. | DTS/DPF 1.1<br>Tree planting is provided in accordance with the following:<br><br>Site size per dwelling ($m^2$) \| Tree size* and number required per dwelling<br><450 \| 1 small tree<br>450-800 \| 1 medium tree or 2 small trees<br>>800 \| 1 large tree or 2 medium trees or 4 small trees<br><br>*refer Table 1 Tree Size<br><br>Table 1 Tree Size<br>Tree size \| Mature height (minimum) \| Mature spread (minimum) \| Soil area around tree within development site (minimum)<br>Small \| 4 m \| 2m \| $10m^2$ and min. dimension of 1.5m<br>Medium \| 6 m \| 4 m \| $30m^2$ and min. dimension of 2m<br>Large \| 12 m \| 8m \| $60m^2$ and min. dimension of 4m<br><br>The discount in Column D of Table 2 discounts the number of trees required to be planted in DTS/DPF 1.1 where existing tree(s) are retained on the subject land that meet the criteria in Columns A, B and C of Table 2, and are not a species identified in Regulation 3F(4)(b) of the Planning Development and Infrastructure (General) Regulations 2017.<br><br>Table 2 Tree Discounts<br>Retained tree height (Column A) \| Retained tree spread (Column B) \| Retained soil area around tree within development site (Column C) \| Discount applied (Column D)<br>4-6m \| 2-4m \| $10m^2$ and min. dimension of 1.5m \| 2 small trees (or 1 medium tree)<br>6-12m \| 4-8m \| $30m^2$ and min. dimension of 3m \| 2 medium trees (or 4 small trees)<br>>12m \| >8m \| $60m^2$ and min. dimension of 6m \| 2 large trees (or 4 medium trees, or 8 small trees)<br><br>Note: In order to satisfy DTS/DPF 1.1, payment may be made in accordance with a relevant off-set scheme established by the Minister under section 197 of the Planning, Development and Infrastructure Act 2016, provided the provisions and requirements of that scheme are satisfied. For the purposes of section 102(4) of the Planning, Development and Infrastructure Act 2016, an applicant may elect for any of the matters in DTS/DPF 1.1 to be reserved. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Water Protection Area Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Safeguard South Australia's public water supplies and ecologically significant areas by protecting regionally and locally significant surface and underground water resources in Water Protection Areas from pollution. This includes considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use | |
| PO 1.1<br>Development with potential to expose the water supply role of the Water Protection Area to significant adverse water quality risk is avoided to maintain the long term function of the Water Protection Area. | DTS/DPF 1.1<br>Development does not involve any one or combination of the following:<br><br>(a) fuel depot<br>(b) intensive animal husbandry<br>(c) special industry<br>(d) stock slaughter works<br>(e) timber preservation works. |
| Groundwater | |
| PO 2.1<br>Groundwater resources are protected from pollution by ensuring development does not:<br><br>(a) generate or dispose of waste in a manner that would pollute water resources<br>(b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a risk to water supplies. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Groundwater catchment and recharge characteristics are safeguarded by ensuring development:<br><br>(a) retains and protects areas of native vegetation<br>(b) does not inhibit the potential of an aquifer to recharge. | DTS/DPF 2.2<br>None are applicable. |
| Farming and Horticulture | |
| PO 3.1<br>Farming or horticulture operations occur only where:<br><br>(a) the activity will not result in any increase in the salinity levels of groundwater<br>(b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised<br>(c) the depth to the water table is greater than 2 metres from the ground. | DTS/DPF 3.1<br>None are applicable. |
| Irrigation | |

| | |
|---|---|
| PO 4.1<br>Irrigated areas are sited to ensure they:<br>(a) avoid any land prone to waterlogging or subject to flooding through irrigation<br>(b) avoid the risk of the water table falling or rising significantly as a result of irrigation practices<br>(c) do not increase the salinity levels of groundwater<br>(d) minimise the risk of polluting surface and groundwater resources where wastewater is used to irrigate the land. | DTS/DPF 4.1<br>None are applicable. |
| Wastewater | |
| PO 5.1<br>Wastewater-generating development utilises existing communal wastewater management infrastructure to avoid on-site disposal. | DTS/DPF 5.1<br>Development (including land division) that generates wastewater is connected to sewerage or community wastewater management systems with sufficient hydraulic capacity to accept the inflow. |
| PO 5.2<br>Development that generates wastewater which cannot be disposed of via sewerage or community wastewater management systems, is designed and of a scale that will enable on-site wastewater treatment and disposal in accordance with relevant health and environmental requirements. | DTS/DPF 5.2<br>On-site wastewater treatment systems comply with:<br>(a) the 'On-site Wastewater Systems Code'<br>or<br>(b) AS/NZS 1547: On-site domestic wastewater management and the South Australian amendments to AS/NSZ 1547 as outlined in section 9.2 of the 'On-site Wastewater Systems Code'. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| None | None | None | None |

## Water Resources Overlay

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Protection of the quality of surface waters considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change. |
| DO 2 | Maintain the conveyance function and natural flow paths of watercourses to assist in the management of flood waters and stormwater runoff. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Water Catchment | |
| PO 1.1<br>Watercourses and their beds, banks, wetlands and floodplains (1% AEP flood extent) are not damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development avoids interfering with the existing hydrology or water regime of swamps and wetlands other than to improve the existing conditions to enhance environmental values. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Watercourses, areas of remnant native vegetation, or areas prone to erosion that are capable of natural regeneration are fenced off to limit stock access. | DTS/DPF 1.4<br>None are applicable. |
| PO 1.5<br>Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff to:<br>(a) reduce the impacts on native aquatic ecosystems<br>(b) minimise soil loss eroding into the watercourse. | DTS/DPF 1.5<br>A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation. |
| PO 1.6<br>Development resulting in the depositing or placing of an object or solid material in a watercourse or lake occurs only where it involves any of the following:<br>(a) the construction of an erosion control structure<br>(b) devices or structures used to extract or regulate water flowing in a watercourse<br>(c) devices used for scientific purposes<br>(d) the rehabilitation of watercourses. | DTS/DPF 1.6<br>None are applicable. |
| PO 1.7<br>Watercourses, floodplains (1% AEP flood extent) and wetlands protected and enhanced by retaining and protecting existing native vegetation. | DTS/DPF 1.7<br>None are applicable. |
| PO 1.8<br>Watercourses, floodplains (1% AEP flood extent) and wetlands are protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse. | DTS/DPF 1.8<br>None are applicable. |
| PO 1.9<br>Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs. | DTS/DPF 1.9<br>None are applicable. |

**Procedural Matters (PM) - Referrals**

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Note: Additional referrals are also found in Part 9 - Referrals of the Planning and Design Code.

| Class of Development / Activity | Referral Body | Purpose of Referral | Statutory Reference |

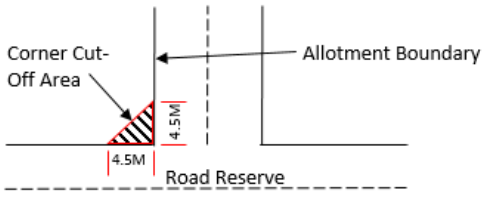
| None | None | None | None |

# Part 4 - General Development Policies



## Advertisements

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Advertisements and advertising hoardings are appropriate to context, efficient and effective in communicating with the public, limited in number to avoid clutter, and do not create hazard. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Appearance | |
| PO 1.1<br>Advertisements are compatible and integrated with the design of the building and/or land they are located on. | DTS/DPF 1.1<br>Advertisements attached to a building satisfy all of the following:<br>(a) are not located in a Neighbourhood-type zone<br>(b) where they are flush with a wall:<br>(i) if located at canopy level, are in the form of a fascia sign<br>(ii) if located above canopy level:<br>A. do not have any part rising above parapet height<br>or<br>B. are not attached to the roof of the building<br>(c) where they are not flush with a wall:<br>(i) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure<br>(ii) if attached to a two-storey building all of the following are satisfied:<br>A. has no part located above the finished floor level of the second storey of the building<br>B. does not protrude beyond the outer limits of any verandah structure below<br>C. does not have a sign face that exceeds 1m2 per side.<br>(d) if located below canopy level, are flush with a wall<br>(e) if located at canopy level, are in the form of a fascia sign<br>(f) if located above a canopy all of the following are satisfied:<br>(i) are flush with a wall<br>(ii) do not have any part rising above parapet height<br>(iii) are not attached to the roof of the building.<br>(g) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure<br>(h) if attached to a two-storey building, have no part located above the finished floor level of the second storey of the building<br>(i) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached. |
| PO 1.2<br>Advertising hoardings do not disfigure the appearance of the land upon which they are situated or the character of the locality. | DTS/DPF 1.2<br>Where development comprises an advertising hoarding, the supporting structure is:<br>(a) concealed by the associated advertisement and decorative detailing<br>or<br>(b) not visible from an adjacent public street or thoroughfare, other than a support structure in the form of a single or dual post design. |
| PO 1.3<br>Advertising does not encroach on public land or the land of an adjacent allotment. | DTS/DPF 1.3<br>Advertisements and/or advertising hoardings are contained within the boundaries of the site. |
| PO 1.4<br>Where possible, advertisements on public land are integrated with existing structures and infrastructure. | DTS/DPF 1.4<br>Advertisements on public land that meet at least one of the following:<br>(a) achieves Advertisements DTS/DPF 1.1<br>(b) are integrated with a bus shelter. |
| PO 1.5<br>Advertisements and/or advertising hoardings are of a scale and size appropriate to the character of the locality. | DTS/DPF 1.5<br>None are applicable. |
| Proliferation of Advertisements | |
| PO 2.1<br>Proliferation of advertisements is minimised to avoid visual clutter and untidiness. | DTS/DPF 2.1<br>No more than one freestanding advertisement is displayed per occupancy. |
| PO 2.2<br>Multiple business or activity advertisements are co-located and coordinated to avoid visual clutter and untidiness. | DTS/DPF 2.2<br>Advertising of a multiple business or activity complex is located on a single advertisement fixture or structure. |
| PO 2.3<br>Proliferation of advertisements attached to buildings is minimised to avoid visual clutter and untidiness. | DTS/DPF 2.3<br>Advertisements satisfy all of the following:<br>(a) are attached to a building<br>(b) other than in a Neighbourhood-type zone, where they are flush with a wall, cover no more than 15% of the building facade to which they are attached<br>(c) do not result in more than one sign per occupancy that is not flush with a wall. |
| Advertising Content | |
| PO 3.1<br>Advertisements are limited to information relating to the lawful use of land they are located on to assist in the ready identification of the activity or activities on the land and avoid unrelated content that contributes to visual clutter and untidiness. | DTS/DPF 3.1<br>Advertisements contain information limited to a lawful existing or proposed activity or activities on the same site as the advertisement. |
| Amenity Impacts | |
| PO 4.1<br>Light spill from advertisement illumination does not unreasonably compromise the amenity of sensitive receivers. | DTS/DPF 4.1<br>Advertisements do not incorporate any illumination. |
| Safety | |
| PO 5.1<br>Advertisements and/or advertising hoardings erected on a verandah or projecting from a building wall are designed and located to allow for safe and convenient pedestrian access. | DTS/DPF 5.1<br>Advertisements have a minimum clearance of 2.5m between the top of the footpath and base of the underside of the sign. |
| PO 5.2<br>Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination. | DTS/DPF 5.2<br>No advertisement illumination is proposed. |
| PO 5.3<br>Advertisements and/or advertising hoardings do not create a hazard to drivers by:<br>(a) being liable to interpretation by drivers as an official traffic sign or signal<br>(b) obscuring or impairing drivers' view of official traffic signs or signals<br>(c) obscuring or impairing drivers' view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings. | DTS/DPF 5.3<br>Advertisements satisfy all of the following:<br>(a) are not located in a public road or rail reserve<br>(b) are located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram<br> |
| PO 5.4<br>Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high. | DTS/DPF 5.4<br>Advertisements and/or advertising hoardings are not located along or adjacent to a road having a speed limit of 80km/h or more. |

| | |
|---|---|
| PO 5.5<br>Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users. | DTS/DPF 5.5<br>Where the advertisement or advertising hoarding is:<br>(a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb<br>(b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal<br>(c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal:<br>(a) 110 km/h road - 14m<br>(b) 100 km/h road - 13m<br>(c) 90 km/h road - 10m<br>(d) 70 or 80 km/h road - 8.5m. |
| PO 5.6<br>Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages. | DTS/DPF 5.6<br>Advertising satisfies all of the following:<br>(a) is not illuminated<br>(b) does not incorporate a moving or changing display or message<br>(c) does not incorporate a flashing light(s). |

## Animal Keeping and Horse Keeping

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Animals are kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises their adverse effects on the environment, local amenity and surrounding development. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting and Design | |
| PO 1.1<br>Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Animal keeping and horse keeping is located and managed to minimise the potential transmission of disease to other operations where animals are kept. | DTS/DPF 1.2<br>None are applicable. |
| Horse Keeping | |
| PO 2.1<br>Water from stable wash-down areas is directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Stables, horse shelters or associated yards are sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour. | DTS/DPF 2.2<br>Stables, horse shelters and associated yards are sited in accordance with all of the following:<br>(a) 30m or more from any sensitive receivers (existing or approved) on land in other ownership<br>(b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment. |
| PO 2.3<br>All areas accessible to horses are separated from septic tank effluent disposal areas to protect the integrity of that system. Stable flooring is constructed with an impervious material to facilitate regular cleaning. | DTS/DPF 2.3<br>Septic tank effluent disposal areas are enclosed with a horse-proof barrier such as a fence to exclude horses from this area. |
| PO 2.4<br>To minimise environmental harm and adverse impacts on water resources, stables, horse shelters and associated yards are appropriately set back from a watercourse. | DTS/DPF 2.4<br>Stables, horse shelters and associated yards are set back 50m or more from a watercourse. |
| PO 2.5<br>Stables, horse shelters and associated yards are located on slopes that are stable to minimise the risk of soil erosion and water runoff. | DTS/DPF 2.5<br>Stables, horse shelters and associated yards are not located on land with a slope greater than 10% (1-in-10). |
| Kennels | |
| PO 3.1<br>Kennel flooring is constructed with an impervious material to facilitate regular cleaning. | DTS/DPF 3.1<br>The floors of kennels satisfy all of the following:<br>(a) are constructed of impervious concrete<br>(b) are designed to be self-draining when washed down. |
| PO 3.2<br>Kennels and exercise yards are designed and sited to minimise noise nuisance to neighbours through measures such as:<br>(a) adopting appropriate separation distances<br>(b) orientating openings away from sensitive receivers. | DTS/DPF 3.2<br>Kennels are sited 500m or more from the nearest sensitive receiver on land in other ownership. |
| PO 3.3<br>Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour. | DTS/DPF 3.3<br>Kennels are sited in association with a permanent dwelling on the land. |
| Wastes | |
| PO 4.1<br>Storage of manure, used litter and other wastes (other than wastewater lagoons) is designed, constructed and managed to minimise attracting and harbouring vermin. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Facilities for the storage of manure, used litter and other wastes (other than wastewater lagoons) are located to minimise the potential for polluting water resources. | DTS/DPF 4.2<br>Waste storage facilities (other than wastewater lagoons) are located outside the 1% AEP flood event areas. |

## Aquaculture

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Aquaculture facilities are developed in an ecologically, economically and socially sustainable manner to support an equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land-based Aquaculture | |
| PO 1.1<br>Land-based aquaculture and associated components are sited and designed to mitigate adverse impacts on nearby sensitive receivers. | DTS/DPF 1.1<br>Land-based aquaculture and associated components are located to satisfy all of the following:<br>(a) 200m or more from a sensitive receiver in other ownership<br>(b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers |

| | |
|---|---|
| | or<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 1.2<br>Land-based aquaculture and associated components are sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Land-based aquaculture and associated components are sited and designed to prevent pond leakage that would pollute groundwater. | DTS/DPF 1.3<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 1.4<br>Land-based aquaculture and associated components are sited and designed to prevent farmed species escaping and entering into any waters. | DTS/DPF 1.4<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 1.5<br>Land-based aquaculture and associated components, including intake and discharge pipes, are designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment. | DTS/DPF 1.5<br>None are applicable. |
| PO 1.6<br>Pipe inlets and outlets associated with land-based aquaculture are sited and designed to minimise the risk of disease transmission. | DTS/DPF 1.6<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 1.7<br>Storage areas associated with aquaculture activity are integrated with the use of the land and sited and designed to minimise their visual impact on the surrounding environment. | DTS/DPF 1.7<br>None are applicable. |
| Marine Based Aquaculture | |
| PO 2.1<br>Marine aquaculture is sited and designed to minimise its adverse impacts on sensitive ecological areas including:<br>(a) creeks and estuaries<br>(b) wetlands<br>(c) significant seagrass and mangrove communities<br>(d) marine habitats and ecosystems. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Marine aquaculture is sited in areas with adequate water current to disperse sediments and dissolve particulate wastes to prevent the build-up of waste that may cause environmental harm. | DTS/DPF 2.2<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 2.3<br>Marine aquaculture is designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters. | DTS/DPF 2.3<br>The development does not include toilet facilities located over water. |
| PO 2.4<br>Marine aquaculture (other than inter-tidal aquaculture) is located an appropriate distance seaward of the high water mark. | DTS/DPF 2.4<br>Marine aquaculture development is located 100m or more seaward of the high water mark<br>or<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 2.5<br>Marine aquaculture is sited and designed to not obstruct or interfere with:<br>(a) areas of high public use<br>(b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports<br>(c) areas of outstanding visual or environmental value<br>(d) areas of high tourism value<br>(e) areas of important regional or state economic activity, including commercial ports, wharfs and jetties<br>(f) the operation of infrastructure facilities including inlet and outlet pipes associated with the desalination of sea water. | DTS/DPF 2.5<br>None are applicable. |
| PO 2.6<br>Marine aquaculture is sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment. | DTS/DPF 2.6<br>None are applicable. |
| PO 2.7<br>Marine aquaculture is designed to be as unobtrusive as practicable by incorporating measures such as:<br>(a) using feed hoppers painted in subdued colours and suspending them as close as possible to the surface of the water<br>(b) positioning structures to protrude the minimum distance practicable above the surface of the water<br>(c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons<br>(d) positioning racks, floats and other farm structures in unobtrusive locations landward from the shoreline. | DTS/DPF 2.7<br>None are applicable. |
| PO 2.8<br>Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible to minimise environmental and amenity impacts. | DTS/DPF 2.8<br>The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea. |
| PO 2.9<br>Access, launching and maintenance facilities are developed as common user facilities and are co-located where practicable to mitigate adverse impacts on coastal areas. | DTS/DPF 2.9<br>The development utilises existing established roads, tracks, ramps and/or paths (as applicable) to access the sea. |
| PO 2.10<br>Marine aquaculture is sited to minimise potential impacts on, and to protect the integrity of, reserves under the *National Parks and Wildlife Act 1972*. | DTS/DPF 2.10<br>Marine aquaculture is located 1000m or more seaward of the boundary of any reserve under the *National Parks and Wildlife Act 1972*. |
| PO 2.11<br>Onshore storage, cooling and processing facilities do not impair the coastline and its visual amenity by:<br>(a) being sited, designed, landscaped and of a scale to reduce the overall bulk and appearance of buildings and complement the coastal landscape<br>(b) making provision for appropriately sited and designed vehicular access arrangements, including using existing vehicular access arrangements as far as practicable<br>(c) incorporating appropriate waste treatment and disposal. | DTS/DPF 2.11<br>The development does not include any onshore facilities in conjunction with a proposal for marine aquaculture. |
| Navigation and Safety | |
| PO 3.1<br>Marine aquaculture sites are suitably marked to maintain navigational safety. | DTS/DPF 3.1<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| PO 3.2<br>Marine aquaculture is sited to provide adequate separation between farms for safe navigation. | DTS/DPF 3.2<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |
| Environmental Management | |
| PO 4.1<br>Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Marine aquaculture is designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows. | DTS/DPF 4.2<br>None are applicable. |
| PO 4.3<br>Marine aquaculture provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning. | DTS/DPF 4.3<br>None are applicable. |
| PO 4.4<br>Aquaculture operations incorporate measures for the removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste to prevent pollution of waters, wetlands, or the nearby coastline. | DTS/DPF 4.4<br>The development is the subject of an aquaculture lease and/or licence (as applicable) granted under the *Aquaculture Act 2001*. |

**Beverage Production in Rural Areas**

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Odour and Noise | |
| PO 1.1<br>Beverage production activities are designed and sited to minimise odour impacts on rural amenity. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings to improve the visual appearance within a locality and manage noise associated with these activities. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Breweries are designed to minimise odours emitted during boiling and fermentation stages of production. | DTS/DPF 1.4<br>Brew kettles are fitted with a vapour condenser. |
| PO 1.5<br>Beverage production solid wastes are stored in a manner that minimises odour impacts on sensitive receivers in other ownership. | DTS/DPF 1.5<br>Solid waste from beverage production is collected and stored in sealed containers and removed from the site within 48 hours. |
| Water Quality | |
| PO 2.1<br>Beverage production wastewater management systems (including wastewater irrigation) are set back from watercourses to minimise adverse impacts on water resources. | DTS/DPF 2.1<br>Wastewater management systems are set back 50m or more from the banks of watercourses and bores. |
| PO 2.2<br>The storage or disposal of chemicals or hazardous substances is undertaken in a manner to prevent pollution of water resources. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Stormwater runoff from areas that may cause contamination due to beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system to manage potential environmental impacts. | DTS/DPF 2.3<br>None are applicable. |
| PO 2.4<br>Stormwater runoff from areas unlikely to cause contamination by beverage production and associated activities (such as roof catchments and clean hard-paved surfaces) is diverted away from beverage production areas and wastewater management systems. | DTS/DPF 2.4<br>None are applicable. |
| Wastewater Irrigation | |
| PO 3.1<br>Beverage production wastewater irrigation systems are designed and located to not contaminate soil and surface and ground water resources or damage crops. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Beverage production wastewater irrigation systems are designed and located to minimise impact on amenity and avoid spray drift onto adjoining land. | DTS/DPF 3.2<br>Beverage production wastewater is not irrigated within 50m of any dwelling in other ownership. |
| PO 3.3<br>Beverage production wastewater is not irrigated onto areas that pose an undue risk to the environment or amenity such as:<br>(a) waterlogged areas<br>(b) land within 50m of a creek, swamp or domestic or stock water bore<br>(c) land subject to flooding<br>(d) steeply sloping land<br>(e) rocky or highly permeable soil overlaying an unconfined aquifer. | DTS/DPF 3.3<br>None are applicable. |

## Bulk Handling and Storage Facilities

**Assessment Provisions (AP)**

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities are designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting and Design | |
| PO 1.1<br>Bulk handling and storage facilities are sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers. | DTS/DPF 1.1<br>Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing) meet the following minimum separation distances from sensitive receivers:<br>(a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals), where the handling of these materials into or from vessels does not exceed 100 tonnes per day: 300m or more from residential premises not associated with the facility<br>(b) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility: 300m or more from residential premises not associated with the facility<br>(c) bulk petroleum storage involving individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1,000 cubic metres: 500m or more<br>(d) coal handling with:<br>a. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more<br>b. capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes: 1000m or more. |
| Buffers and Landscaping | |
| PO 2.1<br>Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages to enhance the appearance of land and buildings from public thoroughfares. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration. | DTS/DPF 2.2<br>None are applicable. |
| Access and Parking | |
| PO 3.1<br>Roadways and vehicle parking areas associated with bulk handling and storage facilities are designed and surfaced to control dust emissions and prevent drag out of material from the site. | DTS/DPF 3.1<br>Roadways and vehicle parking areas are sealed with an all-weather surface. |
| Slipways, Wharves and Pontoons | |
| PO 4.1 | DTS/DPF 4.1 |

| | |
|---|---|
| Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters. | None are applicable. |

## Clearance from Overhead Powerlines

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

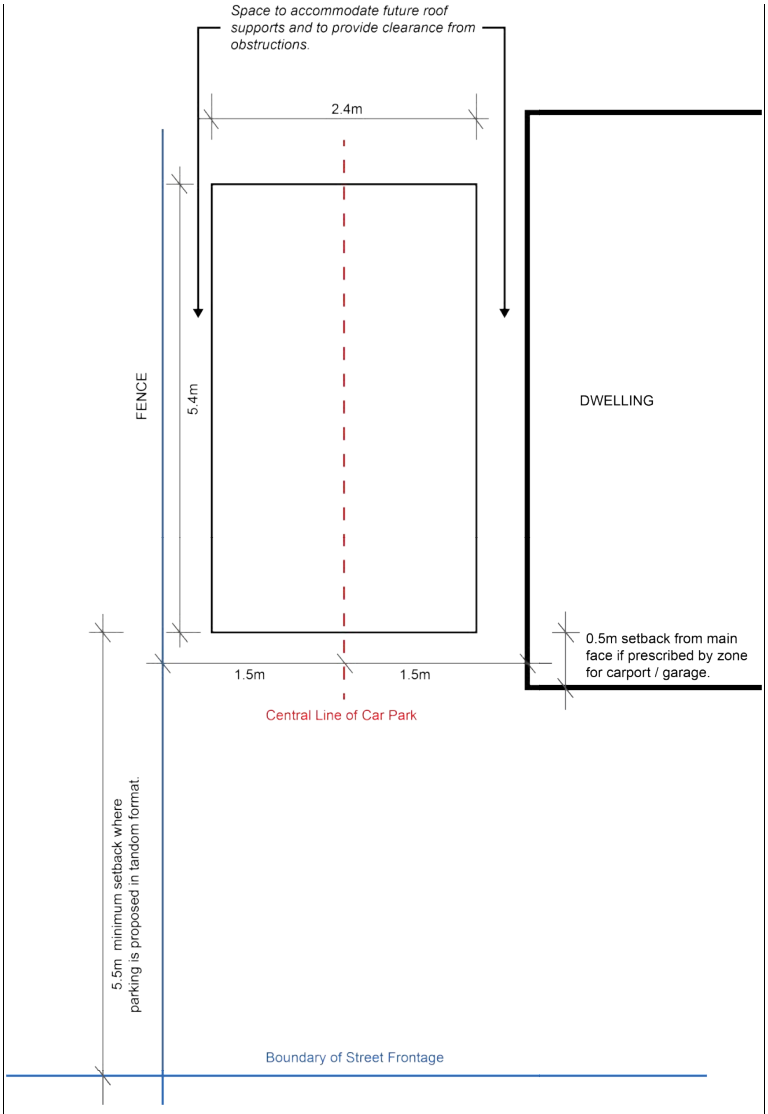
| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property. | DTS/DPF 1.1<br>One of the following is satisfied:<br>(a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*<br>(b) there are no aboveground powerlines adjoining the site that are the subject of the proposed development. |

## Design

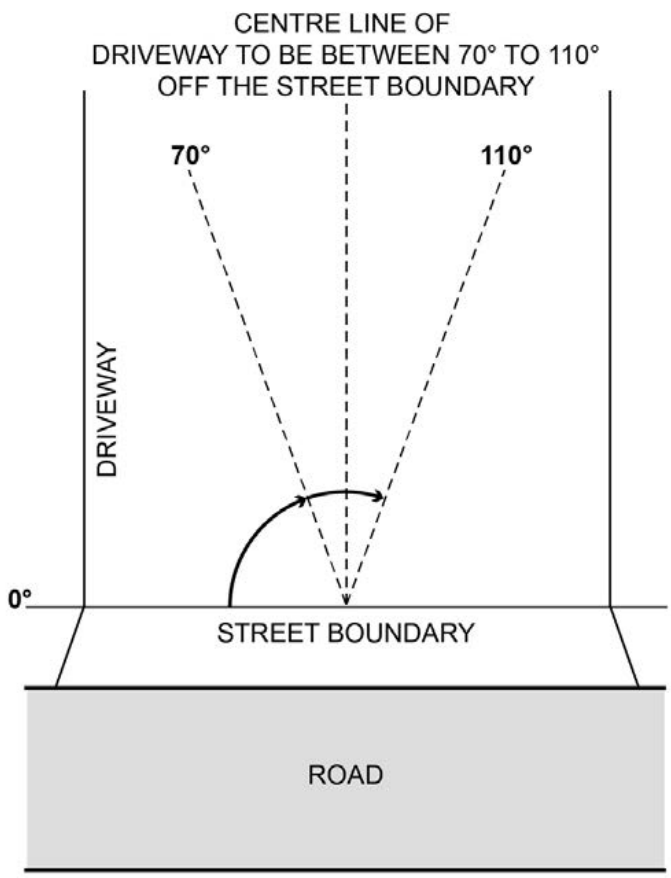
### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development is:<br>(a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributes to the character of the immediate area<br>(b) durable - fit for purpose, adaptable and long lasting<br>(c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors<br>(d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption. |



Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)



| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| All development | |
| External Appearance | |
| PO 1.1<br>Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope). | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Plant, exhaust and intake vents and other technical equipment is integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:<br>(a) positioning plant and equipment in unobtrusive locations viewed from public roads and spaces<br>(b) screening rooftop plant and equipment from view<br>(c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses. | DTS/DPF 1.4<br>Development does not incorporate any structures that protrude beyond the roofline. |
| PO 1.5<br>The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone. | DTS/DPF 1.5<br>None are applicable. |
| Safety | |
| PO 2.1<br>Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Development is designed to differentiate public, communal and private areas. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas. | DTS/DPF 2.3<br>None are applicable. |
| PO 2.4<br>Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm. | DTS/DPF 2.4<br>None are applicable. |
| PO 2.5<br>Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night. | DTS/DPF 2.5<br>None are applicable. |
| Landscaping | |
| PO 3.1<br>Soft landscaping and tree planting is incorporated to:<br>(a) minimise heat absorption and reflection<br>(b) maximise shade and shelter<br>(c) maximise stormwater infiltration<br>(d) enhance the appearance of land and streetscapes<br>(e) contribute to biodiversity. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Soft landscaping and tree planting maximises the use of locally indigenous plant species, incorporates plant species best suited to current and future climate conditions and avoids pest plant and weed species. | DTS/DPF 3.2<br>None are applicable. |
| Environmental Performance | |
| PO 4.1<br>Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2 | DTS/DPF 4.2 |

| | |
|---|---|
| Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling. | None are applicable. |
| PO 4.3<br>Buildings incorporate climate-responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells. | DTS/DPF 4.3<br>None are applicable. |
| **Water Sensitive Design** | |
| PO 5.1<br>Development is sited and designed to maintain natural hydrological systems without negatively impacting:<br>(a) the quantity and quality of surface water and groundwater<br>(b) the depth and directional flow of surface water and groundwater<br>(c) the quality and function of natural springs. | DTS/DPF 5.1<br>None are applicable. |
| **On-site Waste Treatment Systems** | |
| PO 6.1<br>Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking. | DTS/DPF 6.1<br>Effluent disposal drainage areas do not result in any of the following:<br>(a) encroach within an area used as private open space or result in less private open space than that specified in Design Table 1 - Private Open Space<br>(b) use an area also used as a driveway<br>(c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |
| **Carparking Appearance** | |
| PO 7.1<br>Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on the streetscapes through techniques such as:<br>(a) limiting protrusion above finished ground level<br>(b) screening through appropriate planting, fencing and mounding<br>(c) limiting the width of openings and integrating them into the building structure. | DTS/DPF 7.1<br>None are applicable. |
| PO 7.2<br>Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like. | DTS/DPF 7.2<br>None are applicable. |
| PO 7.3<br>Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development. | DTS/DPF 7.3<br>None are applicable. |
| PO 7.4<br>Street level vehicle parking areas incorporate tree planting to provide shade and reduce solar heat absorption and reflection. | DTS/DPF 7.4<br>None are applicable. |
| PO 7.5<br>Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places. | DTS/DPF 7.5<br>None are applicable. |
| PO 7.6<br>Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity. | DTS/DPF 7.6<br>None are applicable. |
| PO 7.7<br>Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping. | DTS/DPF 7.7<br>None are applicable. |
| **Earthworks and sloping land** | |
| PO 8.1<br>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography. | DTS/DPF 8.1<br>Development does not involve any of the following:<br>(a) excavation exceeding a vertical height of 1m<br>(b) filling exceeding a vertical height of 1m<br>(c) a total combined excavation and filling vertical height of 2m or more. |
| PO 8.2<br>Driveways and access tracks are designed and constructed to allow safe and convenient access on sloping land (with a gradient exceeding 1 in 8). | DTS/DPF 8.2<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b):<br>(a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway<br>(b) are constructed with an all-weather trafficable surface. |
| PO 8.3<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8):<br>(a) do not contribute to the instability of embankments and cuttings<br>(b) provide level transition areas for the safe movement of people and goods to and from the development<br>(c) are designed to integrate with the natural topography of the land. | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on-site drainage systems to minimise erosion. | DTS/DPF 8.4<br>None are applicable. |
| PO 8.5<br>Development does not occur on land at risk of landslip nor increases the potential for landslip or land surface instability. | DTS/DPF 8.5<br>None are applicable. |
| **Fences and Walls** | |
| PO 9.1<br>Fences, walls and retaining walls are of sufficient height to maintain privacy and security without unreasonably impacting the visual amenity and adjoining land's access to sunlight or the amenity of public places. | DTS/DPF 9.1<br>None are applicable. |
| PO 9.2<br>Landscaping incorporated on the low side of retaining walls is visible from public roads and public open space to minimise visual impacts. | DTS/DPF 9.2<br>A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall. |
| **Overlooking / Visual Privacy (in building 3 storeys or less)** | |
| PO 10.1<br>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses. | DTS/DPF 10.1<br>Upper level windows facing side or rear boundaries shared with a residential allotment/site satisfy one of the following:<br>(a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm<br>(b) have sill heights greater than or equal to 1.5m above finished floor level<br>(c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level. |
| PO 10.2<br>Development mitigates direct overlooking from balconies, terraces and decks to habitable rooms and private open space of adjoining residential uses. | DTS/DPF 10.2<br>One of the following is satisfied:<br>(a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve (or combination of) that is at least 15m wide in all places faced by the balcony or terrace<br>or<br>(b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:<br>(i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br>or<br>(ii) 1.7m above finished floor level in all other cases |
| **All residential development and non-residential development** | |

| Front elevations and passive surveillance | |
|---|---|
| PO 11.1<br>Dwellings and co-living incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape. | DTS/DPF 11.1<br>Each dwelling or co-living residence with a frontage to a public street:<br>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m and<br>(b) has an aggregate window area of at least $2m^2$ facing the primary street. |
| PO 11.2<br>Dwellings and co-living incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors. | DTS/DPF 11.2<br>Dwellings or co-living with a frontage to a public street have an entry door visible from the primary street boundary. |
| **Outlook and amenity** | |
| PO 12.1<br>Living rooms have an external outlook to provide a high standard of amenity for occupants. | DTS/DPF 12.1<br>A living room of a dwelling or co-living residence incorporates a window with an outlook towards the street frontage or private open space, public open space, or waterfront areas. |
| PO 12.2<br>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion. | DTS/DPF 12.2<br>None are applicable. |
| **Ancillary Development** | |
| PO 13.1<br>Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties. | DTS/DPF 13.1<br>Ancillary buildings (excluding ancillary accommodation) satisfy (a) to (k), inclusive:<br>(a) are ancillary to a dwelling erected on the same site<br>(b) have a floor area not exceeding 60m2<br>(c) are not constructed, added to or altered so that any part is situated:<br>(i) in front of any part of the building line of the dwelling to which it is ancillary<br>or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) in the case of a garage or carport, the garage or carport:<br>(i) is set back at least 5.5m from the boundary of the primary street<br>(ii) when facing a primary street or secondary street, has a total door / opening not exceeding:<br>A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser<br>B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width<br>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>and<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure<br>(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)<br>(i) have a roof height where no part of the roof is more than 5m above the natural ground level<br>(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour<br>(k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:<br>(i) a total area as determined by the following table:<br>**Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) ($m^2$)** / **Minimum percentage of site**<br><150 / 10%<br>150-200 / 15%<br>201-450 / 20%<br>>450 / 25%<br>(ii) the amount of existing soft landscaping prior to the development occurring. |
| PO 13.2<br>Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision or car parking requirements and do not result in over-development of the site. | DTS/DPF 13.2<br>Ancillary buildings and structures do not result in:<br>(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space<br>(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |
| PO 13.3<br>Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties. | DTS/DPF 13.3<br>Non-residential ancillary buildings and structures satisfy (a) to (j), inclusive:<br>(a) are ancillary and subordinate to an existing non-residential use on the same site<br>(b) have a floor area not exceeding the following:<br>Allotment size / Floor area<br>≤500$m^2$ / 60$m^2$<br>>500$m^2$ / 80$m^2$<br>(c) are not constructed, added to or altered so that any part is situated:<br>(i) in front of any part of the building line of the main building to which it is ancillary<br>or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) in the case of a garage or carport, the garage or carport:<br>(i) is set back at least 5.5m from the boundary of the primary street<br>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure<br>(h) have a wall height (or post height) not exceeding 3m (and not including a gable end)<br>(i) have a roof height where no part of the roof is more than 5m above the natural ground level<br>(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour. |
| PO 13.4<br>Ancillary accommodation:<br>(a) is sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties<br>(b) is integrated within the site of the dwelling to which it is ancillary and incorporates shared utilities and shared open space. | DTS/DPF 13.4<br>Ancillary accommodation satisfies (a) to (m), inclusive:<br>(a) is ancillary to a dwelling erected on the same site<br>(b) has a floor area not exceeding 70$m^2$<br>(c) is not constructed, added to, or altered so that any part is situated:<br>(i) in front of any part of the building line of the dwelling to which it is ancillary<br>or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) if situated on a boundary (not being a boundary with a primary street or secondary street), does not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>and<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure<br>(g) has a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)<br>(h) has a roof height where no part of the roof is more than 5m above the natural ground level<br>(i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour<br>(j) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:<br>(i) a total area as determined by the following table:<br>**Dwelling site area (or in the case of residential flat building or group dwelling(s),** / **Minimum percentage of site** |

| | |
|---|---|
| | average site area) ($m^2$) \| <br><150 \| 10%<br>150-200 \| 15%<br>201-450 \| 20%<br>>450 \| 25%<br>(ii) the amount of existing soft landscaping prior to the development occurring.<br>(k) does not have separate connection to utilities and services (such as electricity, gas, water, telecommunications, sewerage system, wastewater system or waste control system) to those servicing the existing dwelling<br>(l) has unrestricted access to the private open space associated with the existing dwelling to which it is ancillary<br>(m) in the case of the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling. |
| **Garage appearance** | |
| PO 14.1<br>Garaging is designed to not detract from the streetscape or appearance of a dwelling or co-living. | DTS/DPF 14.1<br>Garages and carports facing a street satisfy all of the following:<br>(a) are situated so that no part of the garage or carport is in front of any part of the building line of the dwelling or co-living<br>(b) are set back at least 5.5m from the boundary of the primary street<br>(c) have a garage door / opening not exceeding 7m in width<br>(d) have a garage door /opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street. |
| **Massing** | |
| PO 15.1<br>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets. | DTS/DPF 15.1<br>None are applicable |
| **Dwelling additions** | |
| PO 16.1<br>Dwelling additions are sited and designed to not detract from the streetscape or amenity of adjoining properties and do not impede on-site functional requirements. | DTS / DPF 16.1<br>Dwelling additions:<br>(a) are not constructed, added to or altered so that any part is situated closer to a public street and<br>(b) do not result in any of the following:<br>(i) excavation exceeding a vertical height of 1m<br>(ii) filling exceeding a vertical height of 1m<br>(iii) a total combined excavation and filling vertical height of 2m or more<br>(iv) less Private Open Space than specified in Design Table 1 - Private Open Space<br>(v) less on-site parking than specified in Transport Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas<br>(vi) upper level windows facing side or rear boundaries unless:<br>A. they are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm or<br>B. have sill heights greater than or equal to 1.5m above finished floor level or<br>C. incorporate screening to a height of 1.5m above finished floor level<br>(vii) balconies or terraces on upper building levels unless they are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:<br>A. 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br>B. 1.7m above finished floor level in all other cases. |
| **Private Open Space** | |
| PO 17.1<br>Dwellings and co-living are provided with suitable sized areas of usable private open space or communal open space to meet the needs of occupants. | DTS/DPF 17.1<br>Private open space or communal open space is provided in accordance with Design Table 1 - Private Open Space or Design Table 2 - Communal Open Space. |
| **Water Sensitive Design** | |
| PO 18.1<br>Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies. | DTS/DPF 18.1<br>Residential development creating a common driveway / access that services 5 or more dwellings achieves all of the following stormwater runoff outcomes:<br>(a) 80 per cent reduction in average annual total suspended solids<br>(b) 60 per cent reduction in average annual total phosphorus<br>(c) 45 per cent reduction in average annual total nitrogen. |
| PO 18.2<br>Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems. | DTS/DPF 18.2<br>Development creating a common driveway / access that services 5 or more dwellings:<br>(a) maintains the pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 18.1% AEP 30-minute storm and the stormwater runoff time to peak is not increased or captures and retains the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for an 18.1% AEP 30-minute storm; and<br>(b) manages site generated stormwater runoff up to and including the 1% AEP flood event to avoid flooding of buildings. |
| **Car parking, access and manoeuvrability** | |
| PO 19.1<br>Enclosed parking spaces are of a size and dimensions to be functional, accessible and convenient. | DTS/DPF 19.1<br>Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area):<br>(a) single width car parking spaces:<br>(i) a minimum length of 5.4m per space<br>(ii) a minimum width of 3.0m<br>(iii) a minimum garage door width of 2.4m<br>(b) double width car parking spaces (side by side):<br>(i) a minimum length of 5.4m<br>(ii) a minimum width of 5.4m<br>(iii) minimum garage door width of 2.4m per space. |
| PO 19.2<br>Uncovered car parking spaces have the necessary dimensions to be functional, accessible and convenient and, where appropriate, make allowances for the space to be covered in the future in a manner that will not dominate the appearance of an associated dwelling when viewed from the street. | DTS/DPF 19.2<br>Uncovered car parking spaces satisfy all of the following:<br>(a) are a minimum of 5.4m in length<br>(b) are a minimum of 2.4m in width<br>(c) a minimum of 1.5m in width is provided between the centre line of the space and any fence, wall or other obstruction<br>(d) in circumstances where the applicable car parking rate requires one car park and no covered space is provided:<br>(i) no part of the uncovered car parking space is located in front of the main face of the dwelling and<br>(ii) if the applicable zone assessment provisions prescribed a minimum setback of 0.5m behind the main face of the dwelling for a carport or garage, the uncovered car parking space is also located at least 0.5m behind the main face of the dwelling<br>(e) in circumstances where the applicable car parking rate requires two car parks and no covered space is provided:<br>(i) at least one of the uncovered car parking spaces satisfies DTS/DPF 19.2(d) and<br>(ii) if the car parks are proposed in a tandem arrangement, the parking space required in DTS/DPF 19.2(e)(i) is setback at least 5.5m from the boundary of the street frontage<br>Example diagram: |

| | |
|---|---|
| |  |
| PO 19.3<br>Driveways and access points are located and designed to facilitate safe access and egress while maximising land available for street tree planting, pedestrian movement, domestic waste collection, landscaped street frontages and on-street parking. | DTS/DPF 19.3<br>Driveways and access points on sites with a frontage to a public road of 10m or less have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site. |
| PO 19.4<br>Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees. | DTS/DPF 19.4<br>Vehicle access to designated car parking spaces satisfy (a) or (b):<br>(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land<br>(b) where newly proposed, satisfies all of the following:<br>(i) is set back 6m or more from the tangent point of an intersection of 2 or more roads<br>(ii) is set back outside of the marked lines or infrastructure dedicating a pedestrian crossing<br>(iii) does not involve the removal, relocation or damage to of mature street trees, street furniture or utility infrastructure services. |
| PO 19.5<br>Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces. | DTS/DPF 19.5<br>Driveways are designed and sited so that:<br>(a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping<br>(b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram: |

(c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site

| | |
|---|---|
| PO 19.6<br>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking. | DTS/DPF 19.6<br>Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:<br>(a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| **Waste storage** | |
| PO 20.1<br>Provision is made for the adequate and convenient storage of waste bins in a location screened from public view. | DTS/DPF 20.1<br>None are applicable. |
| **Design of Transportable Dwellings** | |
| PO 21.1<br>The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure. | DTS/DPF 21.1<br>Buildings satisfy (a) or (b):<br>(a) are not transportable<br>or<br>(b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building. |
| Group dwelling, residential flat buildings, co-living and battle-axe development | |
| **Amenity** | |
| PO 22.1<br>Dwelling and co-living layouts provide a reasonable level of occupant amenity, are functional, and provide for efficient use by occupants. | DTS/DPF 22.1<br>None are applicable. |
| PO 22.2<br>The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours. | DTS/DPF 22.2<br>None are applicable. |
| PO 22.3<br>Development maximises the number of dwellings and co-living residences that face public open space and public streets and limits dwellings or co-living residences oriented towards adjoining properties. | DTS/DPF 22.3<br>None are applicable. |
| PO 22.4<br>Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context. | DTS/DPF 22.4<br>Dwelling or co-living sites/allotments are not in the form of a battle-axe arrangement. |
| PO 22.5<br>Habitable room dimensions ensure functional living spaces with reasonable occupant amenity, and accommodate household furniture and fixing needs. | DTS/DPF 22.5<br>Habitable rooms have minimum dimensions (excluding any fixed storage, cupboards or kitchen facilities) in accordance with the following table: |

| Accommodation type | Habitable room type | Minimum internal dimension |
|---|---|---|
| Dwelling | Main Bedroom | 3m |
| | Secondary bedroom | 3m x 2.5m |
| | Living room - studio and 1 bedroom dwelling | 3.3m |
| | Living room - 2+ bedroom dwelling | 3.6m |
| Co-living | Living area / studio format | 3m |
| | Separate bedroom | 2.5m |

| | |
|---|---|
| PO 22.6<br>Co-living is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of occupant life and promote social interaction. | DTS/DPF 22.6<br>None are applicable. |
| PO 22.7<br>Co-living provides a range of living options to meet a variety of accommodation needs, such as studio, one-bedroom, two-bedroom and disability access units, and may be located in the same building/site as self-contained dwellings to enhance housing choice. | DTS/DPF 22.7<br>None are applicable. |
| PO 22.8<br>Co-living provides common or shared facilities to enable a more efficient use of space, in a way that promotes social interaction and enhances resident amenity. | DTS/DPF 22.8<br>None are applicable. |

| | |
|---|---|
| PO 22.9<br>Co-living provides communal indoor recreation space(s) which:<br>(a) are of a size and layout to cater for co-living occupants, as well as any dwellings on the same site<br>(b) are conveniently accessed by residences<br>(c) are located adjacent to communal open space, where practicable<br>(d) are designed to maximise solar access to windows in winter months. | DTS/DPF 22.9<br>None are applicable. |
| PO 22.10<br>Co-living provides a shared kitchen (or kitchens) and associated dining space, a shared bathroom (or bathrooms) and a shared laundry (or laundries) which:<br>(a) are of a size, layout and number to cater for co-living occupants who do not otherwise have those facilities in their residence<br>(b) are conveniently accessed by the residences they service<br>(c) are sized to accommodate appropriate fixings and furnishings for convenient use of the facility. | DTS/DPF 22.10<br>None are applicable. |
| Communal Open Space | |
| PO 23.1<br>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents. | DTS/DPF 23.1<br>None are applicable. |
| PO 23.2<br>Communal open space is of sufficient size and dimensions to cater for group recreation. | DTS/DPF 23.2<br>Communal open space incorporates a minimum dimension of 5 metres. |
| PO 23.3<br>Communal open space is designed and sited to:<br>(a) be conveniently accessed by the dwellings or residences which it services<br>(b) have regard to acoustic, safety, security and wind effects. | DTS/DPF 23.3<br>None are applicable. |
| PO 23.4<br>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use. | DTS/DPF 23.4<br>None are applicable. |
| PO 23.5<br>Communal open space is designed and sited to:<br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings or residences<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance. | DTS/DPF 23.5<br>None are applicable. |
| PO 23.6<br>Communal open space is designed and sited to maximise solar access to enhance amenity and support landscaping. | DTS/DPF 23.6<br>At least 50% of the primary communal open space receives direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June. |
| PO 23.7<br>Irrigated deep soil zones and/or planter boxes are provided in communal open space to support healthy plant and tree growth. | DTS/DPF 23.7<br>None are applicable. |
| PO 23.8<br>Facilities and features are provided within communal open space to allow for pleasant and functional use by likely occupants including the provision of fixed seating, lighting, shelter from prevailing winds and shading devices to minimise summer sun exposure. | DTS/DPF 23.8<br>None are applicable. |
| Carparking, access and manoeuvrability | |
| PO 24.1<br>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking. | DTS/DPF 24.1<br>Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:<br>(a) minimum 0.33 on-street car parks per proposed dwellings (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| PO 24.2<br>The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability. | DTS/DPF 24.2<br>Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway. |
| PO 24.3<br>Residential driveways that service more than one dwelling are designed to allow safe and convenient movement. | DTS/DPF 24.3<br>Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:<br>(a) have a minimum width of 3m<br>(b) for driveways servicing more than 3 dwellings:<br>(i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street and<br>(ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m. |
| PO 24.4<br>Residential driveways in a battle-axe configuration are designed to allow safe and convenient movement. | DTS/DPF 24.4<br>Where in a battle-axe configuration, a driveway servicing one dwelling has a minimum width of 3m. |
| PO 24.5<br>Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner. | DTS/DPF 24.5<br>Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre. |
| PO 24.6<br>Dwellings are adequately separated from common driveways and manoeuvring areas. | DTS/DPF 24.6<br>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles. |
| Soft Landscaping | |
| PO 25.1<br>Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas. | DTS/DPF 25.1<br>Other than where located directly in front of a garage or a building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway. |
| PO 25.2<br>Soft landscaping is provided that improves the appearance of common driveways. | DTS/DPF 25.2<br>Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point). |
| Site Facilities / Waste Storage | |
| PO 26.1<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants. | DTS/DPF 26.1<br>None are applicable. |
| PO 26.2<br>Provision is made for suitable external clothes drying facilities. | DTS/DPF 26.2<br>None are applicable. |
| PO 26.3<br>Provision is made for suitable household waste and recyclable material storage facilities which are:<br>(a) located away, or screened, from public view, and<br>(b) conveniently located in proximity to dwellings, co-living residences, and co-living common recreation areas and shared facilities, and the waste collection point. | DTS/DPF 26.3<br>None are applicable. |
| PO 26.4<br>Waste and recyclable material storage areas are located away from dwellings, co-living residences, and co-living common recreation areas and shared facilities. | DTS/DPF 26.4<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window. |
| PO 26.5<br>Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe | DTS/DPF 26.5<br>None are applicable. |

| | |
|---|---|
| and convenient access, egress and movement of waste collection vehicles. | |
| PO 26.6<br>Services including gas and water meters are conveniently located and screened from public view. | DTS/DPF 26.6<br>None are applicable. |
| Supported accommodation and retirement facilities | |
| **Siting and Configuration** | |
| PO 27.1<br>Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land. | DTS/DPF 27.1<br>None are applicable. |
| **Movement and Access** | |
| PO 28.1<br>Development is designed to support safe and convenient access and movement for residents by providing:<br>(a) ground-level access or lifted access to all units<br>(b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places<br>(c) car parks with gradients no steeper than 1-in-40 and of sufficient area to provide for wheelchair manoeuvrability<br>(d) kerb ramps at pedestrian crossing points. | DTS/DPF 28.1<br>None are applicable. |
| **Communal Open Space** | |
| PO 29.1<br>Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors. | DTS/DPF 29.1<br>None are applicable. |
| PO 29.2<br>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents. | DTS/DPF 29.2<br>None are applicable. |
| PO 29.3<br>Communal open space is of sufficient size and dimensions to cater for group recreation. | DTS/DPF 29.3<br>Communal open space incorporates a minimum dimension of 5 metres. |
| PO 29.4<br>Communal open space is designed and sited to:<br>(a) be conveniently accessed by the dwellings which it services<br>(b) have regard to acoustic, safety, security and wind effects. | DTS/DPF 29.4<br>None are applicable. |
| PO 29.5<br>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use. | DTS/DPF 29.5<br>None are applicable. |
| PO 29.6<br>Communal open space is designed and sited to:<br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance. | DTS/DPF 29.6<br>None are applicable. |
| **Site Facilities / Waste Storage** | |
| PO 30.1<br>Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles. | DTS/DPF 30.1<br>None are applicable. |
| PO 30.2<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants. | DTS/DPF 30.2<br>None are applicable. |
| PO 30.3<br>Provision is made for suitable external clothes drying facilities. | DTS/DPF 30.3<br>None are applicable. |
| PO 30.4<br>Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view. | DTS/DPF 30.4<br>None are applicable. |
| PO 30.5<br>Waste and recyclable material storage areas are located away from dwellings. | DTS/DPF 30.5<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window. |
| PO 30.6<br>Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time. | DTS/DPF 30.6<br>None are applicable. |
| PO 30.7<br>Services including gas and water meters are conveniently located and screened from public view. | DTS/DPF 30.7<br>None are applicable. |
| All non-residential development | |
| **Water Sensitive Design** | |
| PO 31.1<br>Development likely to result in significant risk of export of litter, oil or grease includes stormwater management systems designed to minimise pollutants entering stormwater. | DTS/DPF 31.1<br>None are applicable. |
| PO 31.2<br>Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state. | DTS/DPF 31.2<br>None are applicable. |
| **Wash-down and Waste Loading and Unloading** | |
| PO 32.1<br>Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, vessels, plant or equipment are:<br>(a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off<br>(b) paved with an impervious material to facilitate wastewater collection<br>(c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area<br>(d) designed to drain wastewater to either:<br>(i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme<br>or<br>(ii) a holding tank and its subsequent removal off-site on a regular basis. | DTS/DPF 32.1<br>None are applicable. |
| Decks | |
| **Design and Siting** | |
| PO 33.1<br>Decks are designed and sited to:<br>(a) complement the associated building form<br>(b) minimise impacts on the streetscape through siting behind the building line of the principal building (unless on a significant allotment or open space)<br>(c) minimise cut and fill and overall massing when viewed from adjacent land. | DTS/DPF 33.1<br>Decks satisfy (a) and (c), or (b) and (c):<br>(a) where ancillary to a dwelling, satisfy all of the following:<br>(i) are not constructed, added to or altered so that any part is situated:<br>A. in front of any part of the building line of the dwelling to which it is ancillary<br>or<br>B. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(ii) are set back at least 900mm from side or rear allotment boundaries<br>(iii) when attached to the dwelling, has a finished floor level consistent with the finished ground floor level of the dwelling<br>(iv) where associated with a residential use, retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (A) or (B), whichever is less:<br>A. a total area is determined by the following table:<br>**Site area (or in the case of residential flat building or group dwelling(s), average** **Minimum percentage of site** |

| | |
|---|---|
| | site area) ($m^2$) \| <br><150 \| 10%<br>150-200 \| 15%<br>>200-450 \| 20%<br>>450 \| 25%<br>B. the amount of existing soft landscaping prior to the development occurring.<br>(b) where in association with a non-residential use, satisfy all of the following:<br>(i) are set back at least 2 metres from the boundary of an allotment used for residential purposes.<br>(ii) are set back at least 2 metres from a public road.<br>(iii) have a floor area not exceeding 25$m^2$<br>(c) in all cases, has a finished floor level not exceeding 1 metre above natural ground level at any point. |
| PO 33.2<br>Decks are designed and sited to minimise direct overlooking of habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones through suitable floor levels, screening and siting taking into account the slope of the subject land, existing vegetation on the subject land, and fencing. | DTS/DPF 33.2<br>Decks with a finished floor level/s 500mm or more above natural ground level facing side or rear boundaries shared with a residential use in a neighbourhood-type zone incorporate screening with a maximum of 25% transparency/openings, permanently fixed to the outer edge of the deck not less than 1.5 m above the finished floor level/s. |
| PO 33.3<br>Decks used for outdoor dining, entertainment or other commercial uses provide carparking in accordance with the primary use of the deck. | DTS/DPF 33.3<br>Decks used for commercial purposes do not result in less on-site car parking for the primary use of the subject land than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |

**Table 1 - Private Open Space**

| Dwelling / Accommodation Type | Minimum Rate |
|---|---|
| Dwelling (at ground level) | Total private open space area:<br>(a) Site area <301$m^2$: 24$m^2$ located behind the building line.<br>(b) Site area ≥ 301$m^2$: 60$m^2$ located behind the building line.<br>Minimum directly accessible from a living room: 16$m^2$ / with a minimum dimension 3m. |
| Dwelling (above ground level) | Studio (no separate bedroom): 4$m^2$ with a minimum dimension 1.8m<br>One bedroom: 8$m^2$ with a minimum dimension 2.1m<br>Two bedroom dwelling: 11$m^2$ with a minimum dimension 2.4m<br>Three + bedroom dwelling: 15$m^2$ with a minimum dimension 2.6m |
| Cabin or caravan (permanently fixed to the ground) in a residential park or a caravan and tourist park | Total area: 16$m^2$, which may be used as second car parking space, provided on each site intended for residential occupation. |
| Co-living | 2.5$m^2$ per bedroom |

**Table 2 - Communal Open Space**

| Dwelling / Accommodation Type | Minimum Rate |
|---|---|
| Dwellings above ground level | The equivalent private open space rate specified in Table 1 – Private Open Space for the 5 dwellings with the most bedrooms, plus 4m2 for each additional dwelling above 5, until a total area of 250m2 is reached. |
| Co-living | 25m2 total for the first 10 residences, plus 2.5m2 for each additional residence. |

## Design in Urban Areas

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development is:<br>(a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributing to the character of the locality<br>(b) durable - fit for purpose, adaptable and long lasting<br>(c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors<br>(d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| All Development | |
| External Appearance | |
| PO 1.1<br>Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope). | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Plant, exhaust and intake vents and other technical equipment are integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:<br>(a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces<br>(b) screening rooftop plant and equipment from view<br>(c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses. | DTS/DPF 1.4<br>Development does not incorporate any structures that protrude beyond the roofline. |
| PO 1.5<br>The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form), taking into account the form of development contemplated in the relevant zone. | DTS/DPF 1.5<br>None are applicable. |
| Safety | |
| PO 2.1<br>Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2 | DTS/DPF 2.2 |

| | |
|---|---|
| Development is designed to differentiate public, communal and private areas. | None are applicable. |
| PO 2.3<br>Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas. | DTS/DPF 2.3<br>None are applicable. |
| PO 2.4<br>Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm. | DTS/DPF 2.4<br>None are applicable. |
| PO 2.5<br>Common areas and entry points of buildings (such as the foyer areas of residential buildings) and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night. | DTS/DPF 2.5<br>None are applicable. |
| **Landscaping** | |
| PO 3.1<br>Soft landscaping and tree planting are incorporated to:<br>(a) minimise heat absorption and reflection<br>(b) maximise shade and shelter<br>(c) maximise stormwater infiltration<br>(d) enhance the appearance of land and streetscapes. | DTS/DPF 3.1<br>None are applicable. |
| **Environmental Performance** | |
| PO 4.1<br>Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling. | DTS/DPF 4.2<br>None are applicable. |
| PO 4.3<br>Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells. | DTS/DPF 4.3<br>None are applicable. |
| **Water Sensitive Design** | |
| PO 5.1<br>Development is sited and designed to maintain natural hydrological systems without negatively impacting:<br>(a) the quantity and quality of surface water and groundwater<br>(b) the depth and directional flow of surface water and groundwater<br>(c) the quality and function of natural springs. | DTS/DPF 5.1<br>None are applicable. |
| **On-site Waste Treatment Systems** | |
| PO 6.1<br>Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking. | DTS/DPF 6.1<br>Effluent disposal drainage areas do not result in any of the following:<br>(a) encroach within an area used as private open space or result in less private open space than that specified in Design in Urban Areas Table 1 - Private Open Space<br>(b) use an area also used as a driveway<br>(c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |
| **Car parking appearance** | |
| PO 7.1<br>Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on streetscapes through techniques such as:<br>(a) limiting protrusion above finished ground level<br>(b) screening through appropriate planting, fencing and mounding<br>(c) limiting the width of openings and integrating them into the building structure. | DTS/DPF 7.1<br>None are applicable. |
| PO 7.2<br>Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like. | DTS/DPF 7.2<br>None are applicable. |
| PO 7.3<br>Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development. | DTS/DPF 7.3<br>None are applicable. |
| PO 7.4<br>Street-level vehicle parking areas incorporate tree planting to provide shade, reduce solar heat absorption and reflection. | DTS/DPF 7.4<br>Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m. |
| PO 7.5<br>Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places. | DTS/DPF 7.5<br>Vehicle parking areas comprising 10 or more car parking spaces include soft landscaping with a minimum dimension of:<br>(a) 1m along all public road frontages and allotment boundaries<br>and<br>(b) 1m between double rows of car parking spaces. |
| PO 7.6<br>Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity. | DTS/DPF 7.6<br>None are applicable. |
| PO 7.7<br>Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping. | DTS/DPF 7.7<br>None are applicable. |
| **Earthworks and sloping land** | |
| PO 8.1<br>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography. | DTS/DPF 8.1<br>Development does not involve any of the following:<br>(a) excavation exceeding a vertical height of 1m<br>(b) filling exceeding a vertical height of 1m<br>(c) a total combined excavation and filling vertical height of 2m or more. |
| PO 8.2<br>Driveways and access tracks designed and constructed to allow safe and convenient access on sloping land. | DTS/DPF 8.2<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b):<br>(a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway<br>(b) are constructed with an all-weather trafficable surface. |
| PO 8.3<br>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8):<br>(a) do not contribute to the instability of embankments and cuttings<br>(b) provide level transition areas for the safe movement of people and goods to and from the development<br>(c) are designed to integrate with the natural topography of the land. | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on site drainage systems to minimise erosion. | DTS/DPF 8.4<br>None are applicable. |
| PO 8.5<br>Development does not occur on land at risk of landslip or increase the potential for landslip or land surface instability. | DTS/DPF 8.5<br>None are applicable. |
| **Fences and walls** | |

| | |
|---|---|
| PO 9.1<br>Fences, walls and retaining walls of sufficient height maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight or the amenity of public places. | DTS/DPF 9.1<br>None are applicable. |
| PO 9.2<br>Landscaping is incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts. | DTS/DPF 9.2<br>A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall. |
| **Overlooking / Visual Privacy (low rise buildings)** | |
| PO 10.1<br>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones. | DTS/DPF 10.1<br>Upper level windows facing side or rear boundaries shared with a residential use in a neighbourhood-type zone satisfy at least one of the following:<br>(a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 125mm<br>(b) have sill heights greater than or equal to 1.5m above finished floor level<br>(c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level. |
| PO 10.2<br>Development mitigates direct overlooking from balconies to habitable rooms and private open space of adjoining residential uses in neighbourhood type zones. | DTS/DPF 10.2<br>One of the following is satisfied:<br>(a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve (or combination of) that is at least 15m wide in all places faced by the balcony or terrace<br>or<br>(b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:<br>(i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br>or<br>(ii) 1.7m above finished floor level in all other cases |
| **Site Facilities / Waste Storage (excluding low rise residential development)** | |
| PO 11.1<br>Development provides a dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection. | DTS/DPF 11.1<br>None are applicable. |
| PO 11.2<br>Communal waste storage and collection areas are located, enclosed and designed to be screened from view from the public domain, open space and dwellings. | DTS/DPF 11.2<br>None are applicable. |
| PO 11.3<br>Communal waste storage and collection areas are designed to be well ventilated and located away from habitable rooms. | DTS/DPF 11.3<br>None are applicable. |
| PO 11.4<br>Communal waste storage and collection areas are designed to allow waste and recycling collection vehicles to enter and leave the site without reversing. | DTS/DPF 11.4<br>None are applicable. |
| PO 11.5<br>For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate. | DTS/DPF 11.5<br>None are applicable. |
| **All Development - Medium and High Rise** | |
| **External Appearance** | |
| PO 12.1<br>Buildings positively contribute to the character of the local area by responding to local context. | DTS/DPF 12.1<br>None are applicable. |
| PO 12.2<br>Architectural detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale. | DTS/DPF 12.2<br>None are applicable. |
| PO 12.3<br>Buildings are designed to reduce visual mass by breaking up building elevations into distinct elements. | DTS/DPF 12.3<br>None are applicable. |
| PO 12.4<br>Boundary walls visible from public land include visually interesting treatments to break up large blank elevations. | DTS/DPF 12.4<br>None are applicable. |
| PO 12.5<br>External materials and finishes are durable and age well to minimise ongoing maintenance requirements. | DTS/DPF 12.5<br>Buildings utilise a combination of the following external materials and finishes:<br>(a) masonry<br>(b) natural stone<br>(c) pre-finished materials that minimise staining, discolouring or deterioration. |
| PO 12.6<br>Street-facing building elevations are designed to provide attractive, high quality and pedestrian-friendly street frontages. | DTS/DPF 12.6<br>Building street frontages incorporate:<br>(a) active uses such as shops or offices<br>(b) prominent entry areas for multi-storey buildings (where it is a common entry)<br>(c) habitable rooms of dwellings<br>(d) areas of communal public realm with public art or the like, where consistent with the zone and/or subzone provisions. |
| PO 12.7<br>Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character. | DTS/DPF 12.7<br>Entrances to multi-storey buildings satisfy all of the following:<br>(a) are oriented towards the street<br>(b) are clearly visible and easily identifiable from the street and vehicle parking areas<br>(c) are designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses<br>(d) are designed to provide shelter, a sense of personal address and transitional space around the entry<br>(e) are located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors<br>(f) are designed to avoid the creation of potential areas of entrapment. |
| PO 12.8<br>Building services, plant and mechanical equipment are screened from the public realm. | DTS/DPF 12.8<br>None are applicable. |
| **Landscaping** | |
| PO 13.1<br>Development facing a street provides a well landscaped area that contains a deep soil space to accommodate a tree of a species and size adequate to provide shade, contribute to tree canopy targets and soften the appearance of buildings. | DTS/DPF 13.1<br>Buildings provide a 4m by 4m deep soil space in front of the building that accommodates a medium to large tree, except where no building setback from front property boundaries is desired. |
| PO 13.2<br>Deep soil zones are provided to retain existing vegetation or provide areas that can accommodate new deep root vegetation, including tall trees with large canopies to provide shade and soften the appearance of multi-storey buildings. | DTS/DPF 13.2<br>Multi-storey development provides deep soil zones and incorporates trees at not less than the following rates, except in a location or zone where full site coverage is desired. |

| Site area | Minimum deep soil area | Minimum dimension | Tree / deep soil zones |
|---|---|---|---|
| <300 $m^2$ | 10 $m^2$ | 1.5m | 1 small tree / 10 $m^2$ |
| 300-1500 $m^2$ | 7% site area | 3m | 1 medium tree / 30 $m^2$ |
| >1500 $m^2$ | 7% site area | 6m | 1 large or medium tree / 60 $m^2$ |
| **Tree size and site area definitions** | | | |
| Small tree | 4-6m mature height and 2-4m canopy spread | | |
| Medium tree | 6-12m mature height and 4-8m canopy spread | | |
| Large tree | 12m mature height and >8m canopy spread | | |
| Site area | The total area for development site, not average area per dwelling | | |

| | |
|---|---|
| PO 13.3 | DTS/DPF 13.3 |

| | |
|---|---|
| Deep soil zones with access to natural light are provided to assist in maintaining vegetation health. | None are applicable. |
| PO 13.4<br>Unless separated by a public road or reserve, development sites adjacent to any zone that has a primary purpose of accommodating low-rise residential development incorporate a deep soil zone along the common boundary to enable medium to large trees to be retained or established to assist in screening new buildings of 3 or more building levels in height. | DTS/DPF 13.4<br>Building elements of 3 or more building levels in height are set back at least 6m from a zone boundary in which a deep soil zone area is incorporated. |
| **Environmental** | |
| PO 14.1<br>Development minimises detrimental micro-climatic impacts on adjacent land and buildings. | DTS/DPF 14.1<br>None are applicable. |
| PO 14.2<br>Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting and use, green walls and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells. | DTS/DPF 14.2<br>None are applicable. |
| PO 14.3<br>Development of 5 or more building levels, or 21m or more in height (as measured from natural ground level and excluding roof-mounted mechanical plant and equipment) is designed to minimise the impacts of wind through measures such as:<br>(a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street<br>(b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas<br>(c) the placement of buildings and use of setbacks to deflect the wind at ground level<br>(d) avoiding tall shear elevations that create windy conditions at street level. | DTS/DPF 14.3<br>None are applicable. |
| **Car Parking** | |
| PO 15.1<br>Multi-level vehicle parking structures are designed to contribute to active street frontages and complement neighbouring buildings. | DTS/DPF 15.1<br>Multi-level vehicle parking structures within buildings:<br>(a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages and<br>(b) incorporate facade treatments in building elevations facing along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings. |
| PO 15.2<br>Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale. | DTS/DPF 15.2<br>None are applicable. |
| **Overlooking/Visual Privacy** | |
| PO 16.1<br>Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent residential uses in neighbourhood-type zones through measures such as:<br>(a) appropriate site layout and building orientation<br>(b) off-setting the location of balconies and windows of habitable rooms or areas with those of other buildings so that views are oblique rather than direct to avoid direct line of sight<br>(c) building setbacks from boundaries (including building boundary to boundary where appropriate) that interrupt views or that provide a spatial separation between balconies or windows of habitable rooms<br>(d) screening devices that are integrated into the building design and have minimal negative effect on residents' or neighbours' amenity. | DTS/DPF 16.1<br>None are applicable. |
| All residential development and non-residential development | |
| **Front elevations and passive surveillance** | |
| PO 17.1<br>Dwellings and co-living incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape. | DTS/DPF 17.1<br>Each dwelling or co-living residence with a frontage to a public street:<br>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m and<br>(b) has an aggregate window area of at least $2m^2$ facing the primary street. |
| PO 17.2<br>Dwellings and co-living incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors. | DTS/DPF 17.2<br>Dwellings or co-living with a frontage to a public street have an entry door visible from the primary street boundary. |
| **Outlook and Amenity** | |
| PO 18.1<br>Living rooms have an external outlook to provide a high standard of amenity for occupants. | DTS/DPF 18.1<br>A living room of a dwelling incorporates a window with an external outlook of the street frontage, private open space, public open space, or waterfront areas. |
| PO 18.2<br>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion. | DTS/DPF 18.2<br>None are applicable. |
| **Ancillary Development** | |
| PO 19.1<br>Residential ancillary buildings are sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties. | DTS/DPF 19.1<br>Ancillary buildings (excluding ancillary accommodation) satisfy (a) to (k), inclusive:<br>(a) are ancillary to a dwelling erected on the same site<br>(b) have a floor area not exceeding $60m^2$<br>(c) are not constructed, added to or altered so that any part is situated:<br>(i) in front of any part of the building line of the dwelling to which it is ancillary or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) in the case of a garage or carport, the garage or carport:<br>(i) is set back at least 5.5m from the boundary of the primary street<br>(ii) when facing a primary street or secondary street, has a total door / opening not exceeding:<br>A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser<br>B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width<br>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure<br>(h) have a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)<br>(i) have a roof height where no part of the roof is more than 5m above the natural ground level<br>(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour<br>(k) retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (i) or (ii), whichever is less:<br>(i) a total area as determined by the following table: |

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) ($m^2$) | Minimum percentage of site |
|---|---|
| <150 | 10% |
| 150-200 | 15% |
| >200-450 | 20% |
| >450 | 25% |

(ii) the amount of existing soft landscaping prior to the development occurring.

| | |
|---|---|
| PO 19.2<br>Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result | DTS/DPF 19.2<br>Ancillary buildings and structures do not result in: |

| | |
|---|---|
| in over-development of the site. | (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space<br>(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |
| PO 19.3<br>Buildings and structures that are ancillary to an existing non-residential use do not detract from the streetscape character, appearance of buildings on the site of the development, or the amenity of neighbouring properties. | DTS/DPF 19.3<br>Non-residential ancillary buildings and structures satisfy (a) to (j), inclusive:<br>(a) are ancillary and subordinate to an existing non-residential use on the same site<br>(b) have a floor area not exceeding the following:<br>Allotment size: ≤500m² — Floor area: 60m²; >500m² — 80m²<br>(c) are not constructed, added to or altered so that any part is situated:<br>(i) in front of any part of the building line of the main building to which it is ancillary<br>or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) in the case of a garage or carport, the garage or carport:<br>(i) is set back at least 5.5m from the boundary of the primary street<br>(e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure<br>(h) have a wall height (or post height) not exceeding 3m (and not including a gable end)<br>(i) have a roof height where no part of the roof is more than 5m above the natural ground level<br>(j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour. |
| PO 19.4<br>Ancillary accommodation:<br>(a) is sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties<br>(b) is integrated within the site of the dwelling to which it is ancillary and incorporates shared utilities and shared open space. | DTS/DPF 19.4<br>Ancillary accommodation satisfies (a) to (m), inclusive:<br>(a) is ancillary to a dwelling erected on the same site<br>(b) has a floor area not exceeding 70m²<br>(c) is not constructed, added to, or altered so that any part is situated:<br>(i) in front of any part of the building line of the dwelling to which it is ancillary<br>or<br>(ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(d) if situated on a boundary (not being a boundary with a primary street or secondary street), does not exceed a length of 11.5m unless:<br>(i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary<br>and<br>(ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent<br>(e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary<br>(f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure<br>(g) has a wall height or post height not exceeding 3m above natural ground level (and not including a gable end)<br>(h) has a roof height where no part of the roof is more than 5m above the natural ground level<br>(i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour<br>(j) retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (i) or (ii), whichever is less:<br>(i) a total area as determined by the following table: |

| Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m²) | Minimum percentage of site |
|---|---|
| <150 | 10% |
| 150-200 | 15% |
| >200-450 | 20% |
| >450 | 25% |

(ii) the amount of existing soft landscaping prior to the development occurring.

(k) does not have separate connection to utilities and services (such as electricity, gas, water, telecommunications, sewerage system, wastewater system or waste control system) to those servicing the existing dwelling
(l) has unrestricted access to the private open space associated with the existing dwelling to which it is ancillary
(m) in the case of the Rural Zone, Productive Rural Landscape Zone, or Rural Horticulture Zone, is located within 20m of an existing dwelling.

Residential Development - Low Rise

**External appearance**

| | |
|---|---|
| PO 20.1<br>Garaging is designed to not detract from the streetscape or appearance of a dwelling. | DTS/DPF 20.1<br>Garages and carports facing a street satisfy all of the following:<br>(a) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling<br>(b) are set back at least 5.5m from the boundary of the primary street<br>(c) have a garage door / opening width not exceeding 7m<br>(d) have a garage door / opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street. |
| PO 20.2<br>Dwelling and co-living elevations facing public streets and common driveways make a positive contribution to the streetscape and the appearance of common driveway areas. | DTS/DPF 20.2<br>Each dwelling or co-living residence includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway:<br>(a) a minimum of 30% of the building wall is set back an additional 300mm from the building line<br>(b) a porch or portico projects at least 1m from the building wall<br>(c) a balcony projects from the building wall<br>(d) a verandah projects at least 1m from the building wall<br>(e) eaves of a minimum 400mm width extend along the width of the front elevation<br>(f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm<br>(g) a minimum of two different materials or finishes are incorporated on the walls of the front building elevation, with a maximum of 80% of the building elevation in a single material or finish. |
| PO 20.3<br>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets. | DTS/DPF 20.3<br>None are applicable |

**Private Open Space**

| | |
|---|---|
| PO 21.1<br>Dwellings and co-living are provided with suitable sized areas of usable private open space or communal open space to meet the needs of occupants. | DTS/DPF 21.1<br>Private open space or communal open space is provided in accordance with Design in Urban Areas Table 1 - Private Open Space or Design in Urban Areas Table 2 - Communal Open Space. |
| PO 21.2<br>Private open space is positioned to provide convenient access from internal living areas. | DTS/DPF 21.2<br>Private open space is directly accessible from a habitable room. |

**Landscaping**

| | |
|---|---|
| PO 22.1<br>Soft landscaping is incorporated into development to:<br>(a) minimise heat absorption and reflection<br>(b) contribute shade and shelter<br>(c) provide for stormwater infiltration and biodiversity<br>(d) enhance the appearance of land and streetscapes. | DTS/DPF 22.1<br>Residential development incorporates soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b):<br>(a) a total area for the entire development site, including any common property, as determined by the following table: |

| Site area (or in the case of residential flat building, co-located housing or group dwelling(s), average site area) (m²) | Minimum percentage of site |
|---|---|
| <150 | 10% |
| 150-200 | 15% |

| | |
|---|---|
| >200-450 | 20% |
| >450 | 25% |

(b) at least 30% of any land between the primary street boundary and the primary building line.

**Car parking, access and manoeuvrability**

PO 23.1

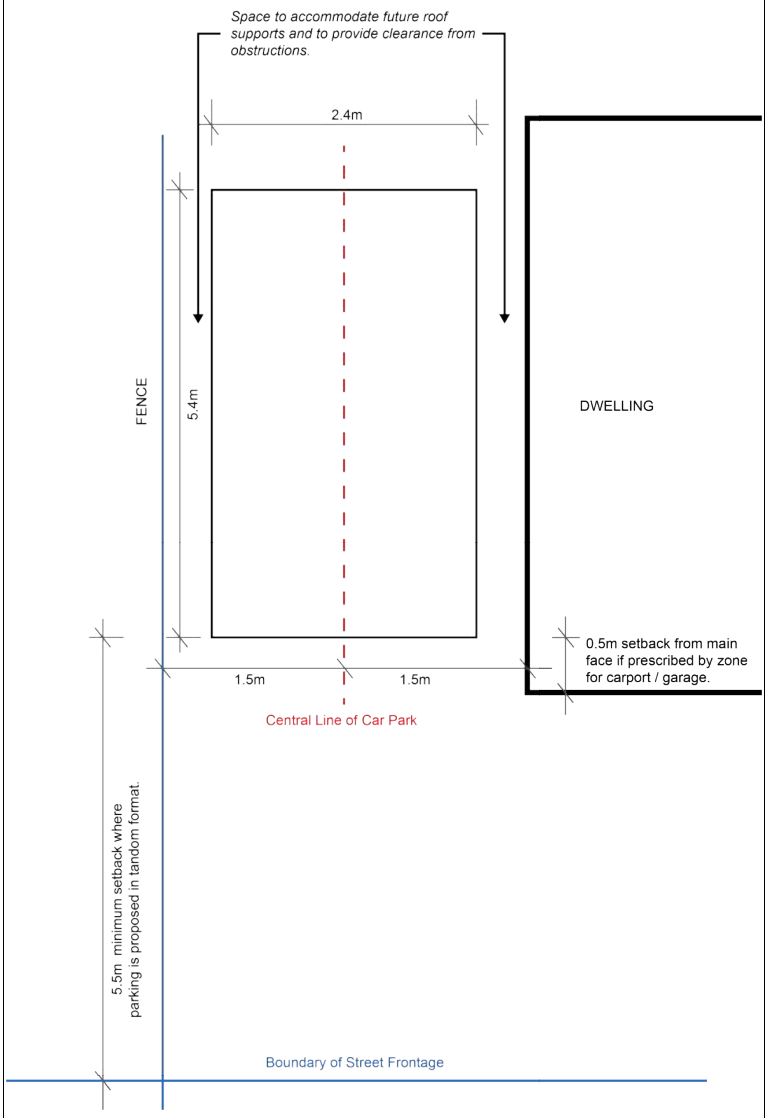
Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.

DTS/DPF 23.1

Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area):

(a) single width car parking spaces:
  (i) a minimum length of 5.4m per space
  (ii) a minimum width of 3.0m
  (iii) a minimum garage door width of 2.4m
(b) double width car parking spaces (side by side):
  (i) a minimum length of 5.4m
  (ii) a minimum width of 5.4m
  (iii) minimum garage door width of 2.4m per space.

PO 23.2



Uncovered car parking space have the necessary dimensions to be functional, accessible and convenient and, where appropriate, make allowances for the space to be covered in the future in a manner that will not dominate the appearance of an associated dwelling when viewed from the street.

DTS/DPF 23.2

Uncovered car parking spaces satisfy all of the following:

(a) are a minimum of 5.4m in length
(b) are a minimum of 2.4m in width
(c) a minimum of 1.5m in width is provided between the centre line of the space and any fence, wall or other obstruction
(d) in circumstances where the applicable car parking rate requires one car park and no covered space is provided:
  (i) no part of the uncovered car parking space is located in front of the main face of the dwelling
  and
  (ii) if the applicable zone assessment provisions prescribed a minimum setback of 0.5m behind the main face of the dwelling for a carport or garage, the uncovered car parking space is also located at least 0.5m behind the main face of the dwelling
(e) in circumstances where the applicable car parking rate requires two car parks and no covered space is provided
  (i) at least one of the uncovered car parking spaces satisfies DTS/DPF 23.2(d)
  and
  (ii) if the car parks are proposed in a tandem arrangement, the parking space required in DTS/DPF 23.2(e)(i) is setback at least 5.5m from the boundary of the street frontage.

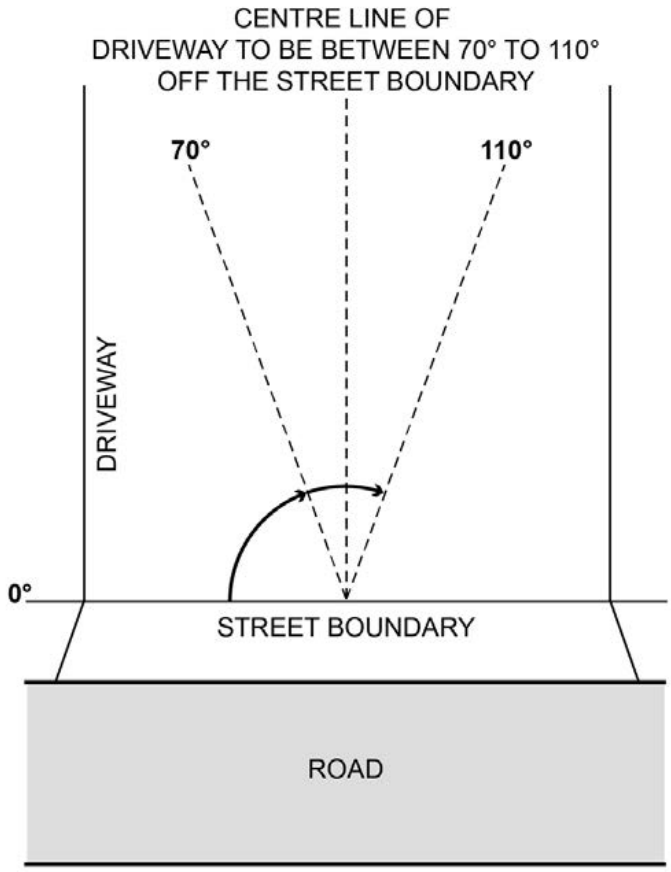
Example diagram:

PO 23.3

Driveways and access points are located and designed to facilitate safe access and egress while maximising land available for street tree planting, pedestrian movement, domestic waste collection, landscaped street frontages and on-street parking.

DTS/DPF 23.3

Driveways and access points satisfy (a) or (b):



(a) sites with a frontage to a public road of 10m or less, have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site
(b) sites with a frontage to a public road greater than 10m:
  (i) have a maximum width of 5m measured at the property boundary and are the only access point provided on the site
  and
  (ii) have a width between 3.0 metres and 3.2 metres measured at the property boundary and no more than two access points are provided on site, separated by no less than 1m.

PO 23.4

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street

DTS/DPF 23.4

Vehicle access to designated car parking spaces satisfy (a) or (b):

| | |
|---|---|
| trees. | (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land<br>(b) where newly proposed, is set back in accordance with all of the following:<br>(i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner<br>(ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance<br>(iii) 6m or more from the tangent point of an intersection of 2 or more roads<br>(iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing. |
| PO 23.5<br>Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces. | DTS/DPF 23.5<br>Driveways are designed and sited to satisfy all of the following:<br>(a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping<br>(b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram:<br><br><br>(c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site. |
| PO 23.6<br>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking. | DTS/DPF 23.6<br>Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:<br>(a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| Waste storage | |
| PO 24.1<br>Provision is made for the convenient storage of waste bins in a location screened from public view. | DTS/DPF 24.1<br>Where dwellings or co-living abut both side boundaries a waste bin storage area is provided behind the building line of each dwelling that:<br>(a) has a minimum area of $2m^2$ with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space); and<br>(b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street. |
| Design of Transportable Buildings | |
| PO 25.1<br>The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure. | DTS/DPF 25.1<br>Buildings satisfy (a) or (b):<br>(a) are not transportable<br>(b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building. |
| Residential Development - Medium and High Rise (including serviced apartments) | |
| Outlook and Visual Privacy | |
| PO 26.1<br>Ground level dwellings and co-living residences have a satisfactory short range visual outlook to public, communal or private open space. | DTS/DPF 26.1<br>Buildings:<br>(a) provide a habitable room at ground or first level with a window facing toward the street<br>and<br>(b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage. |
| PO 26.2<br>The visual privacy of ground level dwellings and co-living residences within multi-level buildings is protected. | DTS/DPF 26.2<br>The finished floor level of ground level dwellings or co-living residences in multi-storey developments is raised by up to 1.2m. |
| Private Open Space | |
| PO 27.1<br>Dwellings and co-living are provided with suitable sized areas of usable private open space or communal open space to meet the needs of occupants. | DTS/DPF 27.1<br>Private open space or communal open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space or Design in Urban Areas Table 2 - Communal Open Space. |
| PO 27.2<br>Where possible, dwellings and co-living residences are designed to provide outlook from main living areas to private open space or communal open space. | DTS/DPF 27.2<br>None are applicable. |

| Residential amenity in multi-level buildings | |
|---|---|
| PO 28.1<br>Residential accommodation within multi-level buildings have habitable rooms, windows and balconies designed and positioned to be separated from those of other dwellings and accommodation to provide visual and acoustic privacy and allow for natural ventilation and the infiltration of daylight into interior and outdoor spaces. | DTS/DPF 28.1<br>Habitable rooms and balconies of independent dwellings and accommodation are separated by at least 6m from one another where there is a direct line of sight between them and 3m or more from a side or rear property boundary. |
| PO 28.2<br>Balconies are designed, positioned and integrated into the overall architectural form and detail of the development to:<br>(a) respond to daylight, wind, and acoustic conditions to maximise comfort and provide visual privacy<br>(b) allow views and casual surveillance of the street while providing for safety and visual privacy of nearby living spaces and private outdoor areas. | DTS/DPF 28.2<br>Balconies utilise one or a combination of the following design elements:<br>(a) sun screens<br>(b) pergolas<br>(c) louvres<br>(d) green facades<br>(e) openable walls. |
| PO 28.3<br>Balconies are of sufficient size and depth to accommodate outdoor seating and promote indoor / outdoor living. | DTS/DPF 28.3<br>Balconies open directly from a habitable room and incorporate a minimum dimension of 2m. |
| PO 28.4<br>Dwellings and co-living residences are provided with sufficient space for storage to meet likely occupant needs. | DTS/DPF 28.4<br>Dwellings or co-living residences (not including student accommodation or serviced apartments) are provided with storage at the following rates with at least 50% or more of the storage volume to be provided within the dwelling:<br>(a) co-living residence: 4.3$m^3$ per bedroom<br>(b) studio: not less than 6$m^3$<br>(c) 1 bedroom dwelling / apartment: not less than 8$m^3$<br>(d) 2 bedroom dwelling / apartment: not less than 10$m^3$<br>(e) 3+ bedroom dwelling / apartment: not less than 12$m^3$. |
| PO 28.5<br>Dwellings and co-living residences that use light wells for access to daylight, outlook and ventilation for habitable rooms, are designed to ensure a reasonable living amenity is provided. | DTS/DPF 28.5<br>Light wells satisfy all of the following:<br>(a) are not used as the primary source of outlook for living rooms<br>(b) up to 18m in height have a minimum horizontal dimension of 3m, or 6m if overlooked by bedrooms<br>(c) above 18m in height have a minimum horizontal dimension of 6m, or 9m if overlooked by bedrooms. |
| PO 28.6<br>Attached or abutting dwellings and co-living residences are designed to minimise the transmission of sound between dwellings and, in particular, to protect bedrooms from possible noise intrusions. | DTS/DPF 28.6<br>None are applicable. |
| PO 28.7<br>Dwellings and co-living are designed so that internal structural columns correspond with the position of internal walls to ensure that the space within the dwelling/apartment is useable. | DTS/DPF 28.7<br>None are applicable. |
| Dwelling Configuration | |
| PO 29.1<br>Buildings containing in excess of 10 dwellings provide a variety of dwelling sizes and a range in the number of bedrooms per dwelling to contribute to housing diversity. | DTS/DPF 29.1<br>Buildings containing in excess of 10 dwellings provide at least one of each of the following:<br>(a) studio (where there is no separate bedroom)<br>(b) 1 bedroom dwelling<br>(c) 2 bedroom dwelling<br>(d) 3+ bedroom dwelling. |
| PO 29.2<br>Dwellings and co-living located on the ground floor of multi-level buildings with 3 or more bedrooms have the windows of their habitable rooms overlooking internal courtyard space or other public space, where possible. | DTS/DPF 29.2<br>None are applicable. |
| Common Areas | |
| PO 30.1<br>The size of lifts, lobbies and corridors is sufficient to accommodate movement of bicycles, strollers, mobility aids and visitor waiting areas. | DTS/DPF 30.1<br>Common corridor or circulation areas satisfy all of the following:<br>(a) have a minimum ceiling height of 2.7m<br>(b) provide access to no more than 8 dwellings<br>(c) incorporate a wider section at apartment entries where the corridors exceed 12m in length from a core. |
| Co-located Housing, Group Dwellings, Residential Flat Buildings, Co-living and Battle axe Development | |
| Amenity | |
| PO 31.1<br>Dwelling and co-living layouts provide a reasonable level of occupant amenity, are functional, and provide for efficient use by occupants. | DTS/DPF 31.1<br>None are applicable. |
| PO 31.2<br>The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours. | DTS/DPF 31.2<br>None are applicable. |
| PO 31.3<br>Development maximises the number of dwellings and co-living residences that face public open space and public streets and limits dwellings or co-living residences oriented towards adjoining properties. | DTS/DPF 31.3<br>None are applicable. |
| PO 31.4<br>Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context. | DTS/DPF 31.4<br>Dwelling or co-living sites/allotments are not in the form of a battle-axe arrangement. |
| PO 31.5<br>Habitable room dimensions ensure functional living spaces with reasonable occupant amenity and accommodate household furniture and fixing needs. | DTS/DPF 31.5<br>Habitable rooms have minimum dimensions (excluding any kitchen/dining space, fixed storage, or cupboards) in accordance with the following table: |
| PO 31.6<br>Co-living is designed to provide safe, secure, attractive, convenient and comfortable living conditions for occupants, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of resident life and promote social interaction. | DTS/DPF 31.6<br>None are applicable. |
| PO 31.7<br>Co-living provides a range of living options to meet a variety of accommodation needs, such as studio, one-bedroom, two-bedroom and disability access units, and may be located in the same building/site as self-contained dwellings to enhance housing choice. | DTS/DPF 31.7<br>None are applicable. |
| PO 31.8<br>Co-living provides common or shared facilities to enable a more efficient use of space, in a way that promotes social interaction and enhances occupant amenity. | DTS/DPF 31.8<br>None are applicable. |
| PO 31.9<br>Co-living provides communal indoor recreation space(s) which:<br>(a) are of a size and layout to cater for co-living occupants, as well as any dwellings on the same site<br>(b) are conveniently accessed by residences<br>(c) are located adjacent to communal open space, where practicable<br>(d) are designed to maximise solar access to windows in winter months. | DTS/DPF 31.9<br>None are applicable. |
| PO 31.10<br>Co-living provides a shared kitchen (or kitchens) and associated dining space (or spaces), a shared bathroom (or bathrooms) and a shared laundry (or laundries) which:<br>(a) are of a size, layout and number to cater for co-living residents who do not otherwise have those facilities in their residence | DTS/DPF 31.10<br>None are applicable. |

| Accommodation type | Habitable room type | Minimum internal dimension |
|---|---|---|
| Dwelling | Main Bedroom | 3m |
| | Secondary bedroom | 3m x 2.5m |
| | Living room - studio and 1 bedroom dwelling | 3.3m |
| | Living room - 2+ bedroom dwelling | 3.6m |
| Co-living | Living area / studio format | 3m |
| | Separate bedroom | 2.5m |

| | |
|---|---|
| (b) are conveniently accessed by the residences they service are sized to accommodate appropriate fixings and furnishings for convenient use of the facility. | |
| **Communal Open Space** | |
| PO 32.1<br>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents. | DTS/DPF 32.1<br>None are applicable. |
| PO 32.2<br>Communal open space is of sufficient size and dimensions to cater for group recreation. | DTS/DPF 32.2<br>Communal open space incorporates a minimum dimension of 5 metres. |
| PO 32.3<br>Communal open space is designed and sited to:<br>(a) be conveniently accessed by the dwellings or residences which it services<br>(b) have regard to acoustic, safety, security and wind effects. | DTS/DPF 32.3<br>None are applicable. |
| PO 32.4<br>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use. | DTS/DPF 32.4<br>None are applicable. |
| PO 32.5<br>Communal open space is designed and sited to:<br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings or residences<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance. | DTS/DPF 32.5<br>None are applicable. |
| PO 32.6<br>Communal open space is designed and sited to maximise solar access to enhance amenity and support landscaping. | DTS/DPF 32.6<br>At least 50% of the primary communal open space receives direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June. |
| PO 32.7<br>Irrigated deep soil zones and/or planter boxes are provided in communal open space to support healthy plant and tree growth. | DTS/DPF 32.7<br>None are applicable. |
| PO 32.8<br>Facilities and features are provided within communal open space to allow for pleasant and functional use by likely occupants including the provision of fixed seating, lighting, shelter from prevailing winds and shading devices to minimise summer sun exposure. | DTS/DPF 32.8<br>None are applicable. |
| **Car parking, access and manoeuvrability** | |
| PO 33.1<br>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking. | DTS/DPF 33.1<br>Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:<br>(a) minimum 0.33 on-street car parks per proposed dwelling or co-living residence (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| PO 33.2<br>The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability. | DTS/DPF 33.2<br>Access to group dwellings or dwellings within a residential flat building, or co-living is provided via a single common driveway. |
| PO 33.3<br>Residential driveways that service more than one dwelling or co-living are designed to allow safe and convenient movement. | DTS/DPF 33.3<br>Driveways that service more than 1 dwelling or co-living, or a dwelling or co-living on a battle-axe site:<br>(a) have a minimum width of 3m<br>(b) for driveways servicing more than 3 dwellings:<br>(i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street<br>(ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m. |
| PO 33.4<br>Residential driveways that service more than one dwelling or co-living, or a dwelling or co-living on a battle-axe site are designed to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner. | DTS/DPF 33.4<br>Driveways providing access to more than one dwelling or co-living, or a dwelling or co-living on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre. |
| PO 33.5<br>Dwellings and co-living are adequately separated from common driveways and manoeuvring areas. | DTS/DPF 33.5<br>Dwelling and co-living walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles. |
| **Soft landscaping** | |
| PO 34.1<br>Soft landscaping is provided between dwellings and co-living and common driveways to improve the outlook for occupants and appearance of common areas. | DTS/DPF 34.1<br>Other than where located directly in front of a garage or building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and co-living and common driveway. |
| PO 34.2<br>Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management. | DTS/DPF 34.2<br>Battle-axe or common driveways satisfy (a) and (b):<br>(a) are constructed of a minimum of 50% permeable or porous material<br>(b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point). |
| **Site Facilities / Waste Storage** | |
| PO 35.1<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants. | DTS/DPF 35.1<br>None are applicable. |
| PO 35.2<br>Provision is made for suitable external clothes drying facilities. | DTS/DPF 35.2<br>None are applicable. |
| PO 35.3<br>Provision is made for suitable household waste and recyclable material storage facilities which are:<br>(a) located away, or screened, from public view, and<br>(b) conveniently located in proximity to dwellings co-living residences, and co-living common recreation areas and shared facilities, and the waste collection point. | DTS/DPF 35.3<br>None are applicable. |
| PO 35.4<br>Waste and recyclable material storage areas are located away from dwellings, co-living residences, and co-living common recreation areas and shared facilities. | DTS/DPF 35.4<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window. |
| PO 35.5<br>Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles. | DTS/DPF 35.5<br>None are applicable. |
| PO 35.6<br>Services including gas and water meters are conveniently located and screened from public view. | DTS/DPF 35.6<br>None are applicable. |
| **Water sensitive urban design** | |
| PO 36.1<br>Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies. | DTS/DPF 36.1<br>None are applicable. |
| PO 36.2<br>Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems. | DTS/DPF 36.2<br>None are applicable. |
| **Supported Accommodation and retirement facilities** | |
| **Siting, Configuration and Design** | |

| | |
|---|---|
| PO 37.1<br>Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land. | DTS/DPF 37.1<br>None are applicable. |
| PO 37.2<br>Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place. | DTS/DPF 37.2<br>None are applicable. |
| Movement and Access | |
| PO 38.1<br>Development is designed to support safe and convenient access and movement for residents by providing:<br>(a) ground-level access or lifted access to all units<br>(b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places<br>(c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability<br>(d) kerb ramps at pedestrian crossing points. | DTS/DPF 38.1<br>None are applicable. |
| Communal Open Space | |
| PO 39.1<br>Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors. | DTS/DPF 39.1<br>None are applicable. |
| PO 39.2<br>Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents. | DTS/DPF 39.2<br>None are applicable. |
| PO 39.3<br>Communal open space is of sufficient size and dimensions to cater for group recreation. | DTS/DPF 39.3<br>Communal open space incorporates a minimum dimension of 5 metres. |
| PO 39.4<br>Communal open space is designed and sited to:<br>(a) be conveniently accessed by the dwellings which it services<br>(b) have regard to acoustic, safety, security and wind effects. | DTS/DPF 39.4<br>None are applicable. |
| PO 39.5<br>Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use. | DTS/DPF 39.5<br>None are applicable. |
| PO 39.6<br>Communal open space is designed and sited to:<br>(a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings<br>(b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance. | DTS/DPF 39.6<br>None are applicable. |
| Site Facilities / Waste Storage | |
| PO 40.1<br>Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric-powered vehicles. | DTS/DPF 40.1<br>None are applicable. |
| PO 40.2<br>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants. | DTS/DPF 40.2<br>None are applicable. |
| PO 40.3<br>Provision is made for suitable external clothes drying facilities. | DTS/DPF 40.3<br>None are applicable. |
| PO 40.4<br>Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view. | DTS/DPF 40.4<br>None are applicable. |
| PO 40.5<br>Waste and recyclable material storage areas are located away from dwellings. | DTS/DPF 40.5<br>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window. |
| PO 40.6<br>Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time. | DTS/DPF 40.6<br>None are applicable. |
| PO 40.7<br>Services, including gas and water meters, are conveniently located and screened from public view. | DTS/DPF 40.7<br>None are applicable. |
| Student Accommodation | |
| PO 41.1<br>Student accommodation is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of student life and promote social interaction. | DTS/DPF 41.1<br>Student accommodation provides all of the following:<br>(a) a range of living options to meet a variety of accommodation needs, such as one-bedroom, two-bedroom and disability access units<br>(b) common or shared facilities to enable a more efficient use of space, including all of the following:<br>(i) shared cooking, laundry and external drying facilities<br>(ii) internal and external communal and private open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space<br>(iii) common storage facilities at the rate of $8m^3$ for every 2 dwellings or students<br>(iv) common on-site parking in accordance with Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas<br>(v) bicycle parking at the rate of one space for every 2 students. |
| PO 41.2<br>Student accommodation is designed to provide easy adaptation of the building to accommodate an alternative use of the building in the event it is no longer required for student housing. | DTS/DPF 41.2<br>None are applicable. |
| PO 41.3<br>Student accommodation provides communal indoor recreation space(s) which:<br>(a) are of a size and layout to cater for student residents and visitors<br>(b) are conveniently accessed by residences<br>(c) are located adjacent to communal open space, where practicable<br>(d) are designed to maximise solar access to windows in winter months. | DTS/DPF 41.3<br>None are applicable. |
| PO 41.4<br>Student accommodation provides shared kitchens and associated dining space, shared bathrooms and shared laundries which:<br>(a) are of a size, layout and number to cater for student residents who do not otherwise have those facilities in their private residence<br>(b) are conveniently accessed by the residences they service<br>(c) are sized to accommodate appropriate fixings and furnishings for convenient use of the facility. | DTS/DPF 41.4<br>None are applicable. |
| PO 41.5<br>Student accommodation provided with suitable sized areas of usable shared space to meet the needs of occupants, having regard to factors that may support a reduced on site rate such as the availability of nearby public accessible open space, university grounds or the like. | DTS/DPF 41.5<br>Student accommodation provides shared space at a rate of 2m2 per residence, minus the floor area of any communal indoor recreation spaces or shared kitchen facilities provided. |
| All non-residential development | |
| Water Sensitive Design | |
| PO 42.1<br>Development likely to result in risk of export of sediment, suspended solids, organic matter, nutrients, oil and grease include stormwater management systems designed to minimise pollutants entering stormwater. | DTS/DPF 42.1<br>None are applicable. |
| PO 42.2<br>Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state. | DTS/DPF 42.2<br>None are applicable. |
| PO 42.3 | DTS/DPF 42.3 |

| | |
|---|---|
| Development includes stormwater management systems to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that development does not increase peak flows in downstream systems. | None are applicable. |
| Wash-down and Waste Loading and Unloading | |
| PO 43.1<br>Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment are:<br>(a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off<br>(b) paved with an impervious material to facilitate wastewater collection<br>(c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area<br>(d) are designed to drain wastewater to either:<br>(i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme<br>or<br>(ii) a holding tank and its subsequent removal off-site on a regular basis. | DTS/DPF 43.1<br>None are applicable. |
| Laneway Development | |
| Infrastructure and Access | |
| PO 44.1<br>Development with a primary street comprising a laneway, alley, lane, right of way or similar minor thoroughfare only occurs where:<br>(a) existing utility infrastructure and services are capable of accommodating the development<br>(b) the primary street can support access by emergency and regular service vehicles (such as waste collection)<br>(c) it does not require the provision or upgrading of infrastructure on public land (such as footpaths and stormwater management systems)<br>(d) safety of pedestrians or vehicle movement is maintained<br>(e) any necessary grade transition is accommodated within the site of the development to support an appropriate development intensity and orderly development of land fronting minor thoroughfares. | DTS/DPF 44.1<br>Development with a primary street frontage that is not an alley, lane, right of way or similar public thoroughfare. |
| Decks | |
| Design and Siting | |
| PO 45.1<br>Decks are designed and sited to:<br>(a) complement the associated building form<br>(b) minimise impacts on the streetscape through siting behind the building line of the principal building (unless on a significant allotment or open space)<br>(c) minimise cut and fill and overall massing when viewed from adjacent land. | DTS/DPF 45.1<br>Decks satisfy (a) and (c), or (b) and (c):<br>(a) where ancillary to a dwelling, satisfy all of the following:<br>(i) are not constructed, added to or altered so that any part is situated:<br>A. in front of any part of the building line of the dwelling to which it is ancillary<br>or<br>B. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)<br>(ii) are set back at least 900mm from side or rear allotment boundaries<br>(iii) when attached to the dwelling, has a finished floor level consistent with the finished ground floor level of the dwelling<br>(iv) where associated with a residential use, retains a total area of soft landscaping for the entire development site, including any common property, with a minimum dimension of 700mm in accordance with (A) or (B), whichever is less:<br>A. a total area is determined by the following table: |

| Site area (or in the case of residential flat building or group dwelling(s), average site area) ($m^2$) | Minimum percentage of site |
|---|---|
| <150 | 10% |
| 150-200 | 15% |
| >200-450 | 20% |
| >450 | 25% |

B. the amount of existing soft landscaping prior to the development occurring.

(b) where in association with a non-residential use, satisfy all of the following:
(i) are set back at least 2 metres from the boundary of an allotment used for residential purposes.
(ii) are set back at least 2 metres from a public road.
(iii) have a floor area not exceeding 25$m^2$

(c) in all cases, has a finished floor level not exceeding 1 metre above natural ground level at any point.

| | |
|---|---|
| PO 45.2<br>Decks are designed and sited to minimise direct overlooking of habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones through suitable floor levels, screening and siting taking into account the slope of the subject land, existing vegetation on the subject land, and fencing. | DTS/DPF 45.2<br>Decks with a finished floor level/s 500mm or more above natural ground level facing side or rear boundaries shared with a residential use in a neighbourhood-type zone incorporate screening with a maximum of 25% transparency/openings, permanently fixed to the outer edge of the deck not less than 1.5 m above the finished floor level/s. |
| PO 45.3<br>Decks used for outdoor dining, entertainment or other commercial uses provide carparking in accordance with the primary use of the deck. | DTS/DPF 45.3<br>Decks used for commercial purposes do not result in less on-site car parking for the primary use of the subject land than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas. |

**Table 1 - Private Open Space**

| Dwelling /Accommodation Type | Dwelling / Accommodation Type / Site Configuration | Minimum Rate |
|---|---|---|
| Dwelling (at ground level, other than a residential flat building that includes above ground dwellings) | | Total private open space area:<br>(a) Site area <301$m^2$: 24$m^2$ located behind the building line.<br>(b) Site area ≥ 301$m^2$: 60$m^2$ located behind the building line.<br>Minimum directly accessible from a living room: 16$m^2$ / with a minimum dimension 3m. |
| Cabin or caravan (permanently fixed to the ground) in a residential park or caravan and tourist park | | Total area: 16$m^2$, which may be uses as second car parking space, provided on each site intended for residential occupation. |
| Dwelling in a residential flat building or mixed use building which incorporate above ground level dwellings | Dwellings at ground level: | 15$m^2$ / minimum dimension 3m |
| | Dwellings above ground level: | |
| | Studio (no separate bedroom) | 4$m^2$ / minimum dimension 1.8m |
| | One bedroom dwelling | 8$m^2$ / minimum dimension 2.1m |
| | Two bedroom dwelling | 11$m^2$ / minimum dimension 2.4m |
| | Three + bedroom dwelling | 15 $m^2$ / minimum dimension 2.6m |
| Co-living | | 2.5$m^2$ per bedroom |

**Table 2 - Communal Open Space**

| Dwelling / Accommodation Type | Minimum Rate |
|---|---|
| Dwelling in a residential flat building, or mixed use building which incorporate above ground level dwellings | The equivalent private open space rate specified in Table 1 – Private Open Space for the 5 dwellings with the most bedrooms, plus 4m2 for each additional dwelling above 5, until a total area of 250m2 is reached. |
| Co-living | 25m2 total for the first 10 residences, plus 2.5m2 for each additional residence. |

## Forestry

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Commercial forestry is designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting | |
| PO 1.1<br>Commercial forestry plantations are established where there is no detrimental effect on the physical environment or scenic quality of the rural landscape. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Commercial forestry plantations are established on slopes that are stable to minimise the risk of soil erosion. | DTS/DPF 1.2<br>Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5). |
| PO 1.3<br>Commercial forestry plantations and operations associated with their establishment, management and harvesting are appropriately set back from any sensitive receiver to minimise fire risk and noise disturbance. | DTS/DPF 1.3<br>Commercial forestry plantations and operations associated with their establishment, management and harvesting are set back 50m or more from any sensitive receiver. |
| Water Protection | |
| PO 2.1<br>Commercial forestry plantations incorporate artificial drainage lines (i.e. culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water flows onto or from plantation areas. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Appropriate siting, layout and design measures are adopted to minimise the impact of commercial forestry plantations on surface water resources. | DTS/DPF 2.2<br>Commercial forestry plantations:<br>(a) do not involve cultivation (excluding spot cultivation) in drainage lines<br>(b) are set back 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland or sinkhole (with direct connection to an aquifer)<br>(c) are set back 10m or more from the banks of any first or second order watercourse or sinkhole ( with no direct connection to an aquifer). |
| Fire Management | |
| PO 3.1<br>Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements. | DTS/DPF 3.1<br>Commercial forestry plantations provide:<br>(a) 7m or more wide external boundary firebreaks for plantations of 40ha or less<br>(b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha<br>(c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater.<br>Note: Firebreaks prescribed above (as well as access tracks) may be included within the setback buffer distances prescribed by other policies of the Code. |
| PO 3.2<br>Commercial forestry plantations incorporate appropriate fire management access tracks. | DTS/DPF 3.2<br>Commercial forestry plantation fire management access tracks:<br>(a) are incorporated within all firebreaks<br>(b) are 7m or more wide with a vertical clearance of 4m or more<br>(c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles<br>(d) partition the plantation into units of 40ha or less in area. |
| Power-line Clearances | |
| PO 4.1<br>Commercial forestry plantations achieve and maintain appropriate clearances from aboveground powerlines. | DTS/DPF 4.1<br>Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table: |

| Voltage of transmission line | Tower or Pole | Minimum horizontal clearance distance between plantings and transmission lines |
|---|---|---|
| 500 kV | Tower | 38m |
| 275 kV | Tower | 25m |
| 132 kV | Tower | 30m |
| 132 kV | Pole | 20m |
| 66 kV | Pole | 20m |
| Less than 66 kV | Pole | 20m |

## Housing Renewal

### Assessment Provisions (AP)

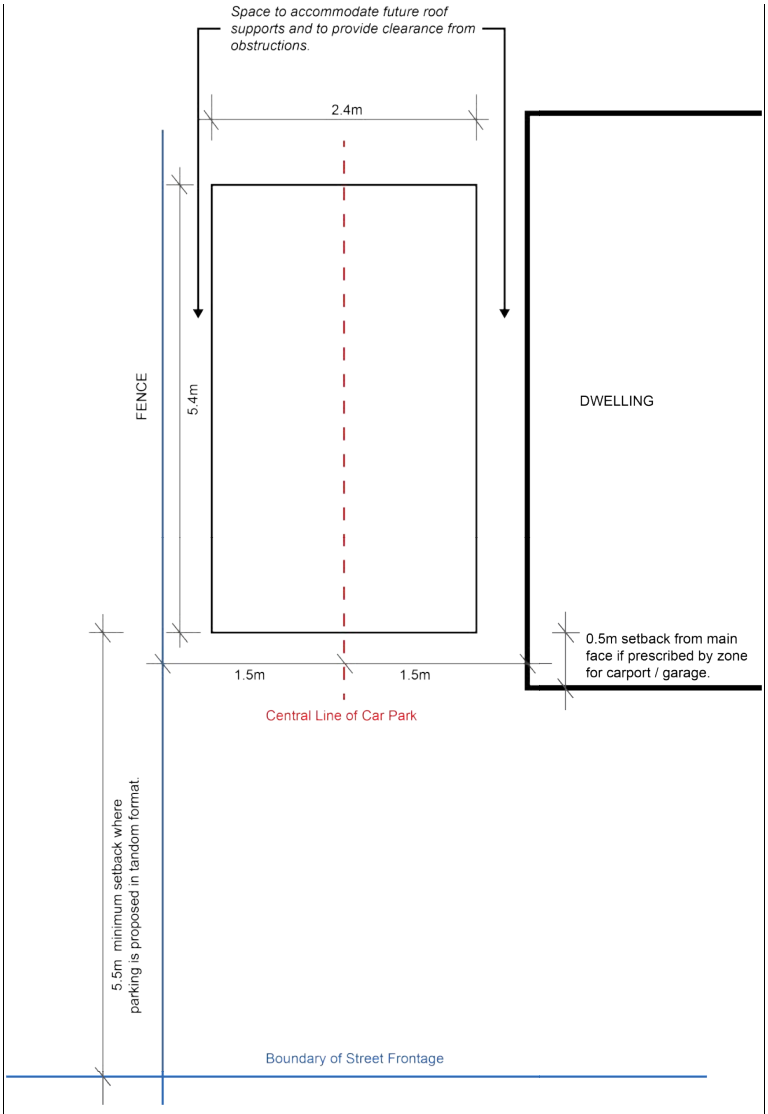
The Housing Renewal General Development Policies are only applicable to dwellings or residential flat building undertaken by:

(a) the South Australian Housing Trust either individually or jointly with other persons or bodies
or
(b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust.

Desired Outcome (DO)

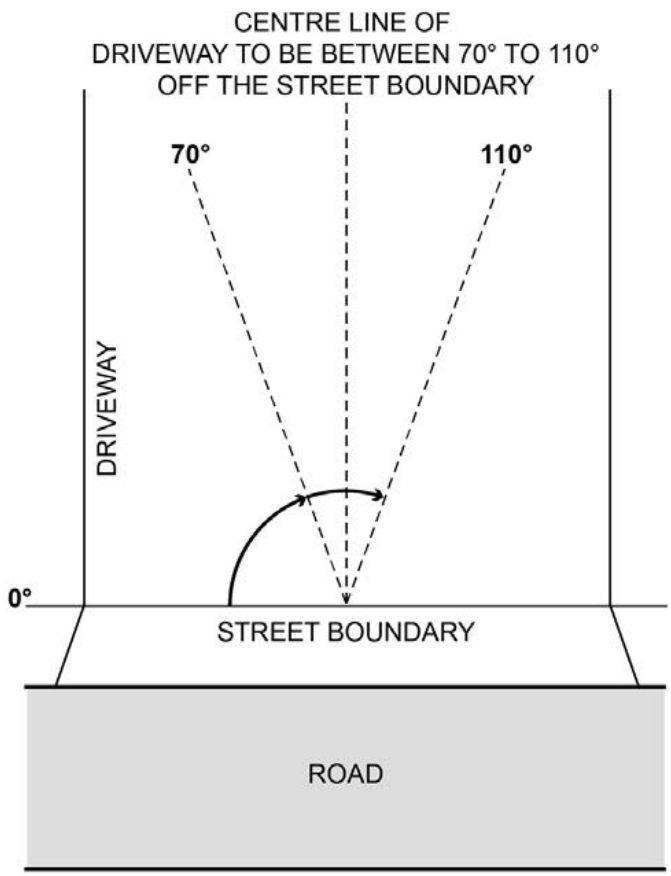
| Desired Outcome | |
|---|---|
| DO 1 | Renewed residential environments replace older social housing and provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)



| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Residential development provides a range of housing choices. | DTS/DPF 1.1<br>Development comprises one or more of the following:<br>(a) detached dwellings<br>(b) semi-detached dwellings<br>(c) row dwellings<br>(d) group dwellings<br>(e) residential flat buildings. |

| | |
|---|---|
| PO 1.2<br>Medium-density housing options or higher are located in close proximity to public transit, open space and/or activity centres. | DTS/DPF 1.2<br>None are applicable. |
| Building Height | |
| PO 2.1<br>Buildings generally do not exceed 3 building levels unless in locations close to public transport, centres and/or open space. | DTS/DPF 2.1<br>Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m (not including a gable end). |
| PO 2.2<br>Medium or high rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 building levels transition down in scale and height towards the boundary of that zone, other than where it is a street boundary. | DTS/DPF 2.2<br>None are applicable. |
| Primary Street Setback | |
| PO 3.1<br>Buildings are set back from the primary street boundary to contribute to an attractive streetscape character. | DTS/DPF 3.1<br>Buildings are no closer to the primary street (excluding any balcony, verandah, porch, awning or similar structure) than 3m. |
| Secondary Street Setback | |
| PO 4.1<br>Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character. | DTS/DPF 4.1<br>Buildings are set back at least 900mm from the boundary of the allotment with a secondary street frontage. |
| Boundary Walls | |
| PO 5.1<br>Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation. | DTS/DPF 5.1<br>Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and satisfy (a) or (b):<br>(a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height<br>(b) do not:<br>(i) exceed 3.2m in height from the lower of the natural or finished ground level<br>(ii) exceed 11.5m in length<br>(iii) when combined with other walls on the boundary of the subject development site, a maximum 45% of the length of the boundary<br>(iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land. |
| PO 5.2<br>Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character. | DTS/DPF 5.2<br>Dwellings in a semi-detached or row arrangement are set back 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage. |
| Side Boundary Setback | |
| PO 6.1<br>Buildings are set back from side boundaries to provide:<br>(a) separation between dwellings in a way that contributes to a suburban character<br>(b) access to natural light and ventilation for neighbours. | DTS/DPF 6.1<br>Other than walls located on a side boundary, buildings are set back from side boundaries in accordance with the following:<br>(a) where the wall height does not exceed 3m - at least 900mm<br>(b) for a wall that is not south facing and the wall height exceeds 3m - at least 900mm from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings<br>(c) for a wall that is south facing and the wall height exceeds 3m - at least 1.9m from the boundary of the site plus a distance of 1/3 of the extent to which the height of the wall exceeds 3m from the top of the footings. |
| Rear Boundary Setback | |
| PO 7.1<br>Buildings are set back from rear boundaries to provide:<br>(a) separation between dwellings in a way that contributes to a suburban character<br>(b) access to natural light and ventilation for neighbours<br>(c) private open space<br>(d) space for landscaping and vegetation. | DTS/DPF 7.1<br>Dwellings are set back from the rear boundary:<br>(a) 3m or more for the first building level<br>(b) 5m or more for any subsequent building level. |
| Buildings elevation design | |
| PO 8.1<br>Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and common driveway areas. | DTS/DPF 8.1<br>Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway:<br>(a) a minimum of 30% of the building elevation is set back an additional 300mm from the building line<br>(b) a porch or portico projects at least 1m from the building elevation<br>(c) a balcony projects from the building elevation<br>(d) a verandah projects at least 1m from the building elevation<br>(e) eaves of a minimum 400mm width extend along the width of the front elevation<br>(f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm.<br>(g) a minimum of two different materials or finishes are incorporated on the walls of the building elevation, with a maximum of 80% of the building elevation in a single material or finish. |
| PO 8.2<br>Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape. | DTS/DPF 8.2<br>Each dwelling with a frontage to a public street:<br>(a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m<br>(b) has an aggregate window area of at least $2m^2$ facing the primary street |
| PO 8.3<br>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets. | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression. | DTS/DPF 8.4<br>None are applicable. |
| PO 8.5<br>Entrances to multi-storey buildings are:<br>(a) oriented towards the street<br>(b) visible and easily identifiable from the street<br>(c) designed to include a common mail box structure. | DTS/DPF 8.5<br>None are applicable. |
| Outlook and amenity | |
| PO 9.1<br>Living rooms have an external outlook to provide a high standard of amenity for occupants. | DTS/DPF 9.1<br>A living room of a dwelling incorporates a window with an external outlook towards the street frontage or private open space. |
| PO 9.2<br>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion. | DTS/DPF 9.2<br>None are applicable. |
| Private Open Space | |
| PO 10.1<br>Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants. | DTS/DPF 10.1<br>Private open space is provided in accordance with the following table: |



| Dwelling Type | Dwelling / Site Configuration | Minimum Rate |
|---|---|---|
| Dwelling (at ground level) | | Total area: $24m^2$ located behind the building line<br>Minimum adjacent to a living room: $16m^2$ with a minimum dimension 3m |
| Dwelling (above ground level) | Studio | $4m^2$ / minimum dimension 1.8m |
| | One bedroom dwelling | $8m^2$ / minimum dimension 2.1m |

| | |
|---|---|
| Two bedroom dwelling | 11m$^2$ / minimum dimension 2.4m |
| Three + bedroom dwelling | 15 m$^2$ / minimum dimension 2.6m |

| | |
|---|---|
| PO 10.2<br>Private open space positioned to provide convenient access from internal living areas. | DTS/DPF 10.2<br>At least 50% of the required area of private open space is accessible from a habitable room. |
| PO 10.3<br>Private open space is positioned and designed to:<br>(a) provide useable outdoor space that suits the needs of occupants;<br>(b) take advantage of desirable orientation and vistas; and<br>(c) adequately define public and private space. | DTS/DPF 10.3<br>None are applicable. |
| Visual privacy | |
| PO 11.1<br>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses. | DTS/DPF 11.1<br>Upper level windows facing side or rear boundaries shared with another residential allotment/site satisfy one of the following:<br>(a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm<br>(b) have sill heights greater than or equal to 1.5m above finished floor level<br>(c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5m above the finished floor. |
| PO 11.2<br>Development mitigates direct overlooking from upper level balconies and terraces to habitable rooms and private open space of adjoining residential uses. | DTS/DPF 11.2<br>One of the following is satisfied:<br>(a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve (or combination of) that is at least 15m wide in all places faced by the balcony or terrace<br>or<br>(b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:<br>(i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land<br>or<br>(ii) 1.7m above finished floor level in all other cases |
| Landscaping | |
| PO 12.1<br>Soft landscaping is incorporated into development to:<br>(a) minimise heat absorption and reflection<br>(b) maximise shade and shelter<br>(c) maximise stormwater infiltration and biodiversity<br>(d) enhance the appearance of land and streetscapes. | DTS/DPF 12.1<br>Residential development incorporates pervious areas for soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b):<br>(a) a total area as determined by the following table:<br>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m$^2$) — Minimum percentage of site<br><150 — 10%<br><200 — 15%<br>200-450 — 20%<br>>450 — 25%<br>(b) at least 30% of land between the road boundary and the building line. |
| Water Sensitive Design | |
| PO 13.1<br>Residential development is designed to capture and use stormwater to:<br>(a) maximise efficient use of water resources<br>(b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded<br>(c) manage runoff quality to maintain, as close as practical, pre-development conditions. | DTS/DPF 13.1<br>None are applicable. |
| Car Parking | |
| PO 14.1<br>On-site car parking is provided to meet the anticipated demand of residents, with less on-site parking in areas in close proximity to public transport. | DTS/DPF 14.1<br>On-site car parking is provided at the following rates per dwelling:<br>(a) 2 or fewer bedrooms - 1 car parking space<br>(b) 3 or more bedrooms - 2 car parking spaces. |
| PO 14.2<br>Enclosed car parking spaces are of dimensions to be functional, accessible and convenient. | DTS/DPF 14.2<br>Residential parking spaces enclosed by fencing, walls or other obstructions with the following internal dimensions (separate from any waste storage area):<br>(a) single parking spaces:<br>(i) a minimum length of 5.4m<br>(ii) a minimum width of 3.0m<br>(iii) a minimum garage door width of 2.4m<br>(b) double parking spaces (side by side):<br>(i) a minimum length of 5.4m<br>(ii) a minimum width of 5.5m<br>(iii) minimum garage door width of 2.4m per space. |
| PO 14.3<br>Uncovered car parking spaces have the necessary dimensions to be functional, accessible and convenient and, where appropriate, make allowances for the space to be covered in the future in a manner that will not dominate the appearance of an associated dwelling when viewed from the street. | DTS/DPF 14.3<br>Uncovered car parking spaces satisfy all of the following:<br>(a) are a minimum of 5.4m in length<br>(b) are a minimum of 2.4m in width<br>(c) a minimum of 1.5m in width is provided between the centre line of the space and any fence, wall or other obstruction<br>(d) in circumstances where the applicable car parking rate requires one car park and no covered space is provided:<br>(i) no part of the uncovered car parking space is located in front of the main face of the dwelling<br>and<br>(ii) if the applicable zone assessment provisions prescribed a setback of 0.5m behind the main face of the dwelling for a carport or garage, the uncovered car parking space is also located 0.5m behind the main face of the dwelling<br>(e) in circumstances where the applicable car parking rate requires two car parks and no covered space is provided:<br>(i) at least one of the uncovered car parking spaces satisfies DTS/DPF 14.3(d)<br>and<br>(ii) if the car parks are proposed in a tandem arrangement, the parking space required in DTS/DPF 14.3(e)(i) is setback at least 5.5m from the boundary of the street frontage.<br><br>Example diagram: |

| | |
|---|---|
| PO 14.4<br>Residential flat buildings and group dwelling developments provide sufficient on-site visitor car parking to cater for anticipated demand. | DTS/DPF 14.4<br>Visitor car parking for group and residential flat buildings incorporating 4 or more dwellings is provided on-site at a minimum ratio of 0.25 car parking spaces per dwelling. |
| PO 14.5<br>Residential flat buildings provide dedicated areas for bicycle parking. | DTS/DPF 14.5<br>Residential flat buildings provide one bicycle parking space per dwelling. |
| Overshadowing | |
| PO 15.1<br>Development minimises overshadowing of the private open spaces of adjoining land by ensuring that ground level open space associated with residential buildings receive direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June. | DTS/DPF 15.1<br>None are applicable. |
| Waste | |
| PO 16.1<br>Provision is made for the convenient storage of waste bins in a location screened from public view. | DTS/DPF 16.1<br>A waste bin storage area is provided behind the primary building line that:<br>(a) has a minimum area of $2m^2$ with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space).; and<br>(b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street. |
| PO 16.2<br>Residential flat buildings provide a dedicated area for the on-site storage of waste which is:<br>(a) easily and safely accessible for residents and for collection vehicles<br>(b) screened from adjoining land and public roads<br>(c) of sufficient dimensions to be able to accommodate the waste storage needs of the development considering the intensity and nature of the development and the frequency of collection. | DTS/DPF 16.2<br>None are applicable. |
| Vehicle Access | |
| PO 17.1<br>Driveways are located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking. | DTS/DPF 17.1<br>None are applicable. |
| PO 17.2<br>Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees. | DTS/DPF 17.2<br>Vehicle access to designated car parking spaces satisfy (a) or (b):<br>(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land<br>(b) where newly proposed, is set back:<br>(i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner<br>(ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance<br>(iii) 6m or more from the tangent point of an intersection of 2 or more roads<br>(iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing. |
| PO 17.3<br>Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces. | DTS/DPF 17.3<br>Driveways are designed and sited so that:<br>(a) the gradient of the driveway does not exceed a grade of 1 in 4 and includes transitions to ensure a maximum grade change of 12.5% (1 in 8) for summit changes, and 15% (1 in 6.7) for sag changes, in accordance with AS 2890.1:2004 to prevent vehicles bottoming or scraping<br>(b) the centreline of the driveway has an angle of no less than 70 degrees and no more than 110 degrees from the street boundary to which it takes its access as shown in the following diagram: |

| | |
|---|---|
| | <br>(c) if located to provide access from an alley, lane or right of way - the alley, land or right or way is at least 6.2m wide along the boundary of the allotment / site. |
| PO 17.4<br>Driveways and access points are designed and distributed to optimise the provision of on-street parking. | DTS/DPF 17.4<br>Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:<br>(a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)<br>(b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly<br>(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented. |
| PO 17.5<br>Residential driveways that service more than one dwelling of a dimension to allow safe and convenient movement. | DTS/DPF 17.5<br>Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:<br>(a) have a minimum width of 3m<br>(b) for driveways servicing more than 3 dwellings:<br>(i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street<br>(ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m. |
| PO 17.6<br>Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner. | DTS/DPF 17.6<br>Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre |
| PO 17.7<br>Dwellings are adequately separated from common driveways and manoeuvring areas. | DTS/DPF 17.7<br>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles. |
| Storage | |
| PO 18.1<br>Dwellings are provided with sufficient and accessible space for storage to meet likely occupant needs. | DTS/DPF 18.1<br>Dwellings are provided with storage at the following rates and 50% or more of the storage volume is provided within the dwelling:<br>(a) studio: not less than $6m^3$<br>(b) 1 bedroom dwelling / apartment: not less than $8m^3$<br>(c) 2 bedroom dwelling / apartment: not less than $10m^3$<br>(d) 3+ bedroom dwelling / apartment: not less than $12m^3$. |
| Earthworks | |
| PO 19.1<br>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography. | DTS/DPF 19.1<br>The development does not involve:<br>(a) excavation exceeding a vertical height of 1m<br>or<br>(b) filling exceeding a vertical height of 1m<br>or<br>(c) a total combined excavation and filling vertical height exceeding 2m. |
| Service connections and infrastructure | |
| PO 20.1<br>Dwellings are provided with appropriate service connections and infrastructure. | DTS/DPF 20.1<br>The site and building:<br>(a) have the ability to be connected to a permanent potable water supply<br>(b) have the ability to be connected to a sewerage system, or a wastewater system approved under the *South Australian Public Health Act 2011*<br>(c) have the ability to be connected to electricity supply<br>(d) have the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes<br>(e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the *Electricity Act 1996*. |
| Site contamination | |
| PO 21.1<br>Land that is suitable for sensitive land uses to provide a safe environment. | DTS/DPF 21.1<br>Development satisfies (a), (b), (c) or (d):<br>(a) does not involve a change in the use of land<br>(b) involves a change in the use of land that does not constitute a change to a more sensitive use |

| | |
|---|---|
| | (c) involves a change in the use of land to a more sensitive use on land at which site contamination does not exist (as demonstrated in a site contamination declaration form)<br>(d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following:<br>(i) a site contamination audit report has been prepared under Part 10A of the *Environment Protection Act 1993* in relation to the land within the previous 5 years which states that<br>A. site contamination does not exist (or no longer exists) at the land<br>or<br>B. the land is suitable for the proposed use or range of uses (without the need for any further remediation)<br>or<br>C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)<br>and<br>(ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form). |

## Infrastructure and Renewable Energy Facilities

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and manages adverse visual impacts on natural and rural landscapes and residential amenity. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General | |
| PO 1.1<br>Development is located and designed to minimise hazard or nuisance to adjacent development and land uses. | DTS/DPF 1.1<br>None are applicable. |
| Visual Amenity | |
| PO 2.1<br>The visual impact of above-ground infrastructure networks and services (excluding high voltage transmission lines), renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development is minimised from townships, scenic routes and public roads by:<br>(a) utilising features of the natural landscape to obscure views where practicable<br>(b) siting development below ridgelines where practicable<br>(c) avoiding visually sensitive and significant landscapes<br>(d) using materials and finishes with low-reflectivity and colours that complement the surroundings<br>(e) using existing vegetation to screen buildings<br>(f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating or zoned to primarily accommodate sensitive receivers. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Surfaces exposed by earthworks associated with the installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land. | DTS/DPF 2.3<br>None are applicable. |
| Rehabilitation | |
| PO 3.1<br>Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors. | DTS/DPF 3.1<br>None are applicable. |
| Hazard Management | |
| PO 4.1<br>Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Facilities for energy generation, power storage and transmission are separated as far as practicable from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction. | DTS/DPF 4.2<br>None are applicable. |
| PO 4.3<br>Bushfire hazard risk is minimised for renewable energy facilities by providing appropriate access tracks, safety equipment and water tanks and establishing cleared areas around substations, battery storage and operations compounds. | DTS/DPF 4.3<br>None are applicable. |
| Electricity Infrastructure and Battery Storage Facilities | |
| PO 5.1<br>Electricity infrastructure is located to minimise visual impacts through techniques including:<br>(a) siting utilities and services:<br>(i) on areas already cleared of native vegetation<br>(ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity<br>(b) grouping utility buildings and structures with non-residential development, where practicable. | DTS/DPF 5.1<br>None are applicable. |
| PO 5.2<br>Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to 33kV. | DTS/DPF 5.2<br>None are applicable. |
| PO 5.3<br>Battery storage facilities are co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts. | DTS/DPF 5.3<br>None are applicable. |
| Telecommunication Facilities | |
| PO 6.1<br>The proliferation of telecommunications facilities in the form of towers/monopoles in any one locality is managed, where technically feasible, by co-locating a facility with other communications facilities to mitigate impacts from clutter on visual amenity. | DTS/DPF 6.1<br>None are applicable. |
| PO 6.2<br>Telecommunications antennae are located as close as practicable to support structures to manage overall bulk and mitigate impacts on visual amenity. | DTS/DPF 6.2<br>None are applicable. |
| PO 6.3<br>Telecommunications facilities, particularly towers/monopoles, are located and sized to mitigate visual impacts by the following methods:<br>(a) where technically feasible, incorporating the facility within an existing structure that may serve another purpose<br>or all of the following:<br>(b) using existing buildings and landscape features to obscure or interrupt views of a facility from nearby public roads, residential areas and places of high public amenity to the extent practical without unduly hindering the effective provision of telecommunications services<br>(c) using materials and finishes that complement the environment<br>(d) screening using landscaping and vegetation, particularly for equipment shelters and huts. | DTS/DPF 6.3<br>None are applicable. |
| Renewable Energy Facilities | |

| | |
|---|---|
| PO 7.1<br>Renewable energy facilities are located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure. | DTS/DPF 7.1<br>None are applicable. |
| Renewable Energy Facilities (Wind Farm) | |
| PO 8.1<br>Visual impact of wind turbine generators on the amenity of residential and tourist development is reduced through appropriate separation. | DTS/DPF 8.1<br>Wind turbine generators are:<br>(a) set back at least 2000m from the base of a turbine to any of the following zones:<br>(i) Rural Settlement Zone<br>(ii) Township Zone<br>(iii) Rural Living Zone<br>(iv) Rural Neighbourhood Zone<br>with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine) and<br>(b) set back at least 1500m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation |
| PO 8.2<br>The visual impact of wind turbine generators on natural landscapes is managed by:<br>(a) designing wind turbine generators to be uniform in colour, size and shape<br>(b) coordinating blade rotation and direction<br>(c) mounting wind turbine generators on tubular towers as opposed to lattice towers. | DTS/DPF 8.2<br>None are applicable. |
| PO 8.3<br>Wind turbine generators and ancillary development minimise potential for bird and bat strike. | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations. | DTS/DPF 8.4<br>No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable. |
| PO 8.5<br>Meteorological masts and guidewires are identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes. | DTS/DPF 8.5<br>None are applicable. |
| Renewable Energy Facilities (Solar Power) | |
| PO 9.1<br>Ground mounted solar power facilities generating 5MW or more are not located on land requiring the clearance of areas of intact native vegetation or on land of high environmental, scenic or cultural value. | DTS/DPF 9.1<br>None are applicable. |
| PO 9.2<br>Ground mounted solar power facilities allow for movement of wildlife by:<br>(a) incorporating wildlife corridors and habitat refuges<br>(b) avoiding the use of extensive security or perimeter fencing or incorporating fencing that enables the passage of small animals without unreasonably compromising the security of the facility. | DTS/DPF 9.2<br>None are applicable. |
| PO 9.3<br>Amenity impacts of solar power facilities are minimised through separation from conservation areas and sensitive receivers in other ownership. | DTS/DPF 9.3<br>Ground mounted solar power facilities are set back from land boundaries, conservation areas and relevant zones in accordance with the following criteria:<br>**Generation Capacity** / **Approximate size of array** / **Setback from adjoining land boundary** / **Setback from conservation areas** / **Setback from Township, Rural Settlement, Rural Neighbourhood and Rural Living Zones[1]**<br>50MW> / 80ha+ / 30m / 500m / 2km<br>10MW<50MW / 16ha-<80ha / 25m / 500m / 1.5km<br>5MW<10MW / 8ha to <16ha / 20m / 500m / 1km<br>1MW<5MW / 1.6ha to <8ha / 15m / 500m / 500m<br>100kW<1MW / 0.5ha<1.6ha / 10m / 500m / 100m<br><100kW / <0.5ha / 5m / 500m / 25m<br>Notes:<br>1. Does not apply when the site of the proposed ground mounted solar power facility is located within one of these zones. |
| PO 9.4<br>Ground mounted solar power facilities incorporate landscaping within setbacks from adjacent road frontages and boundaries of adjacent allotments accommodating non-host dwellings, where balanced with infrastructure access and bushfire safety considerations. | DTS/DPF 9.4<br>None are applicable. |
| Hydropower / Pumped Hydropower Facilities | |
| PO 10.1<br>Hydropower / pumped hydropower facility storage is designed and operated to minimise the risk of storage dam failure. | DTS/DPF 10.1<br>None are applicable. |
| PO 10.2<br>Hydropower / pumped hydropower facility storage is designed and operated to minimise water loss through increased evaporation or system leakage, with the incorporation of appropriate liners, dam covers, operational measures or detection systems. | DTS/DPF 10.2<br>None are applicable. |
| PO 10.3<br>Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future. | DTS/DPF 10.3<br>None are applicable. |
| Water Supply | |
| PO 11.1<br>Development is connected to an appropriate water supply to meet the ongoing requirements of the intended use. | DTS/DPF 11.1<br>Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development. |
| PO 11.2<br>Dwellings are connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided. | DTS/DPF 11.2<br>A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is:<br>(a) exclusively for domestic use and<br>(b) connected to the roof drainage system of the dwelling. |
| Wastewater Services | |
| PO 12.1<br>Development is connected to an approved common wastewater disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the ongoing requirements of the intended use in accordance with the following:<br>(a) it is wholly located and contained within the allotment of the development it will service<br>(b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes, disposal systems are included to minimise the risk of pollution to those water resources<br>(c) septic tank effluent drainage fields and other wastewater disposal areas are located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm. | DTS/DPF 12.1<br>Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead capable of being serviced by an on-site waste water treatment system in accordance with the following:<br>(a) the system is wholly located and contained within the allotment of development it will service; and<br>(b) the system will comply with the requirements of the South Australian Public Health Act 2011. |
| PO 12.2<br>Effluent drainage fields and other wastewater disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment. | DTS/DPF 12.2<br>Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system. |
| Temporary Facilities | |

| | |
|---|---|
| PO 13.1<br>In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter. | DTS/DPF 13.1<br>A waste collection and disposal service is used to dispose of the volume of waste at the rate it is generated. |
| PO 13.2<br>Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact. | DTS/DPF 13.2<br>None are applicable. |

## Intensive Animal Husbandry and Dairies

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers and in a manner that minimises their adverse effects on amenity and the environment. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting and Design | |
| PO 1.1<br>Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to prevent the potential transmission of disease to other operations where animals are kept. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions. | DTS/DPF 1.4<br>Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities are located 500m or more from the nearest sensitive receiver in other ownership. |
| PO 1.5<br>Lagoons for the storage or treatment of milking shed effluent is adequately separated from roads to minimise impacts from odour on the general public. | DTS/DPF 1.5<br>Lagoons for the storage or treatment of milking shed effluent are set back 20m or more from public roads. |
| Waste | |
| PO 2.1<br>Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:<br>(a) avoid attracting and harbouring vermin<br>(b) avoid polluting water resources<br>(c) be located outside 1% AEP flood event areas. | DTS/DPF 2.1<br>None are applicable. |
| Soil and Water Protection | |
| PO 3.1<br>To avoid environmental harm and adverse effects on water resources, intensive animal husbandry operations are appropriately set back from:<br>(a) public water supply reservoirs<br>(b) major watercourses (third order or higher stream)<br>(c) any other watercourse, bore or well used for domestic or stock water supplies. | DTS/DPF 3.1<br>Intensive animal husbandry operations are set back:<br>(a) 800m or more from a public water supply reservoir<br>(b) 200m or more from a major watercourse (third order or higher stream)<br>(c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies. |
| PO 3.2<br>Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities that:<br>(a) have sufficient capacity to hold effluent and runoff from the operations on site<br>(b) ensure effluent does not infiltrate and pollute groundwater, soil or other water resources. | DTS/DPF 3.2<br>None are applicable. |

## Interface between Land Uses

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Development is located and designed to mitigate adverse effects on or from neighbouring and proximate land uses. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General Land Use Compatibility | |
| PO 1.1<br>Sensitive receivers are designed and sited to protect residents and occupants from adverse impacts generated by lawfully existing land uses (or lawfully approved land uses) and land uses desired in the zone. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development adjacent to a site containing a sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers is designed to minimise adverse impacts. | DTS/DPF 1.2<br>None are applicable. |
| Hours of Operation | |
| PO 2.1<br>Non-residential development does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) or an adjacent zone primarily for sensitive receivers through its hours of operation having regard to:<br>(a) the nature of the development<br>(b) measures to mitigate off-site impacts<br>(c) the extent to which the development is desired in the zone<br>(d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land. | DTS/DPF 2.1<br>Development operating within the following hours: |

| Class of Development | Hours of operation |
|---|---|
| Consulting room | 7am to 9pm, Monday to Friday<br>8am to 5pm, Saturday |
| Office | 7am to 9pm, Monday to Friday<br>8am to 5pm, Saturday |
| Shop, other than any one or combination of the following:<br>(a) restaurant<br>(b) cellar door in the Productive Rural Landscape Zone, Rural Zone or Rural Horticulture Zone | 7am to 9pm, Monday to Friday<br>8am to 5pm, Saturday and Sunday |

| | |
|---|---|
| Overshadowing | |
| PO 3.1<br>Overshadowing of habitable room windows of adjacent residential land uses in:<br>a. a neighbourhood-type zone is minimised to maintain access to direct winter sunlight<br>b. other zones is managed to enable access to direct winter sunlight. | DTS/DPF 3.1<br>North-facing windows of habitable rooms of adjacent residential land uses in a neighbourhood-type zone receive at least 3 hours of direct sunlight between 9.00am and 3.00pm on 21 June. |
| PO 3.2<br>Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses in:<br>a. a neighbourhood type zone is minimised to maintain access to direct winter sunlight<br>b. other zones is managed to enable access to direct winter sunlight. | DTS/DPF 3.2<br>Development maintains 2 hours of direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in a neighbourhood-type zone in accordance with the following:<br>a. for ground level private open space, the smaller of the following:<br>i. half the existing ground level open space<br>or<br>ii. 35m2 of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m)<br>b. for ground level communal open space, at least half of the existing ground level open space. |
| PO 3.3<br>Development does not unduly reduce the generating capacity of adjacent rooftop solar energy facilities taking into account:<br>(a) the form of development contemplated in the zone<br>(b) the orientation of the solar energy facilities<br>(c) the extent to which the solar energy facilities are already overshadowed. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Development that incorporates moving parts, including windmills and wind farms, are located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker. | DTS/DPF 3.4<br>None are applicable. |
| Activities Generating Noise or Vibration | |
| PO 4.1<br>Development that emits noise (other than music) does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers). | DTS/DPF 4.1<br>Noise that affects sensitive receivers achieves the relevant Environment Protection (Commercial and Industrial Noise) Policy criteria. |
| PO 4.2<br>Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers (or lawfully approved sensitive receivers) and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including:<br>(a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers<br>(b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers<br>(c) housing plant and equipment within an enclosed structure or acoustic enclosure<br>(d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone. | DTS/DPF 4.2<br>None are applicable. |
| PO 4.3<br>Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa are positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers (or lawfully approved sensitive receivers). | DTS/DPF 4.3<br>Pumps and/or filtration systems associated with a swimming pool or spa that is ancillary to a dwelling erected on the same site are:<br>(a) enclosed in a solid acoustic structure located at least 5m from the nearest habitable room located on an adjoining allotment<br>or<br>(b) located at least 12m from the nearest habitable room located on an adjoining allotment. |
| PO 4.4<br>External noise into bedrooms is minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment. | DTS/DPF 4.4<br>Adjacent land is used for residential purposes. |
| PO 4.5<br>Outdoor areas associated with licensed premises (such as beer gardens or dining areas) are designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers (or lawfully approved sensitive receivers). | DTS/DPF 4.5<br>None are applicable. |
| PO 4.6<br>Development incorporating music achieves suitable acoustic amenity when measured at the boundary of an adjacent sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers. | DTS/DPF 4.6<br>Development incorporating music includes noise attenuation measures that will achieve the following noise levels:<br>**Assessment location** / **Music noise level**<br>Externally at the nearest existing or envisaged noise sensitive location / Less than 8dB above the level of background noise ($L_{90,15min}$) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB) |
| Air Quality | |
| PO 5.1<br>Development with the potential to emit harmful or nuisance-generating air pollution incorporates air pollution control measures to prevent harm to human health or unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) within the locality and zones primarily intended to accommodate sensitive receivers. | DTS/DPF 5.1<br>None are applicable. |
| PO 5.2<br>Development that includes chimneys or exhaust flues (including cafes, restaurants and fast food outlets) is designed to minimise nuisance or adverse health impacts to sensitive receivers (or lawfully approved sensitive receivers) by:<br>(a) incorporating appropriate treatment technology before exhaust emissions are released<br>(b) locating and designing chimneys or exhaust flues to maximise the dispersion of exhaust emissions, taking into account the location of sensitive receivers. | DTS/DPF 5.2<br>None are applicable. |
| Light Spill | |
| PO 6.1<br>External lighting is positioned and designed to not cause unreasonable light spill impact on adjacent sensitive receivers (or lawfully approved sensitive receivers). | DTS/DPF 6.1<br>None are applicable. |
| PO 6.2<br>External lighting is not hazardous to motorists and cyclists. | DTS/DPF 6.2<br>None are applicable. |
| Solar Reflectivity / Glare | |
| PO 7.1<br>Development is designed and comprised of materials and finishes that do not unreasonably cause a distraction to adjacent road users and pedestrian areas or unreasonably cause heat loading and micro-climatic impacts on adjacent buildings and land uses as a result of reflective solar glare. | DTS/DPF 7.1<br>None are applicable. |
| Electrical Interference | |
| PO 8.1<br>Development in rural and remote areas does not unreasonably diminish or result in the loss of existing communication services due to electrical interference. | DTS/DPF 8.1<br>The building or structure:<br>(a) is no greater than 10m in height, measured from existing ground level<br>or<br>(b) is not within a line of sight between a fixed transmitter and fixed receiver (antenna) other than where an alternative service is available via a different fixed transmitter or cable. |
| Interface with Rural Activities | |
| PO 9.1<br>Sensitive receivers are located and designed to mitigate impacts from lawfully existing horticultural and farming activities (or lawfully approved horticultural and farming activities), including spray drift and noise and do not prejudice the continued operation of these activities. | DTS/DPF 9.1<br>None are applicable. |
| PO 9.2<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing intensive animal husbandry activities and do not prejudice the continued operation of these activities. | DTS/DPF 9.2<br>None are applicable. |
| PO 9.3<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing land-based aquaculture activities and do not prejudice | DTS/DPF 9.3<br>Sensitive receivers are located at least 200m from the boundary of a site used for land-based aquaculture and associated components in other |

| | |
|---|---|
| the continued operation of these activities. | ownership. |
| PO 9.4<br>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing dairies including associated wastewater lagoons and liquid/solid waste storage and disposal facilities and do not prejudice the continued operation of these activities. | DTS/DPF 9.4<br>Sensitive receivers are sited at least 500m from the boundary of a site used for a dairy and associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities in other ownership. |
| PO 9.5<br>Sensitive receivers are located and designed to mitigate the potential impacts from lawfully existing facilities used for the handling, transportation and storage of bulk commodities (recognising the potential for extended hours of operation) and do not prejudice the continued operation of these activities. | DTS/DPF 9.5<br>Sensitive receivers are located away from the boundary of a site used for the handling, transportation and/or storage of bulk commodities in other ownership in accordance with the following:<br>(a) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility<br>(b) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals) where the handling of these materials into or from vessels does not exceed 100 tonnes per day<br>(c) 500m or more, where it involves the storage of bulk petroleum in individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1000 cubic metres<br>(d) 500m or more, where it involves the handling of coal with a capacity up to 1 tonne per day or a storage capacity up to 50 tonnes<br>(e) 1000m or more, where it involves the handling of coal with a capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes. |
| PO 9.6<br>Setbacks and vegetation plantings along allotment boundaries should be incorporated to mitigate the potential impacts of spray drift and other impacts associated with agricultural and horticultural activities. | DTS/DPF 9.6<br>None are applicable. |
| PO 9.7<br>Urban development does not prejudice existing agricultural and horticultural activities through appropriate separation and design techniques. | DTS/DPF 9.7<br>None are applicable. |
| Interface with Mines and Quarries (Rural and Remote Areas) | |
| PO 10.1<br>Sensitive receivers are separated from existing mines to minimise the adverse impacts from noise, dust and vibration. | DTS/DPF 10.1<br>Sensitive receivers are located no closer than 500m from the boundary of a Mining Production Tenement under the *Mining Act 1971*. |

## Land Division

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Land division:<br>(a) creates allotments with the appropriate dimensions and shape for their intended use<br>(b) allows efficient provision of new infrastructure and the optimum use of underutilised infrastructure<br>(c) integrates and allocates adequate and suitable land for the preservation of site features of value, including significant vegetation, watercourses, water bodies and other environmental features<br>(d) facilitates solar access through allotment orientation<br>(e) creates a compact urban form that supports active travel, walkability and the use of public transport<br>(f) avoids areas of high natural hazard risk. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| All land division | |
| Allotment configuration | |
| PO 1.1<br>Land division creates allotments suitable for their intended use. | DTS/DPF 1.1<br>Division of land satisfies (a) or (b):<br>(a) reflects the site boundaries illustrated and approved in an operative or existing development authorisation for residential development under the *Development Act 1993* or *Planning, Development and Infrastructure Act 2016* where the allotments are used or are proposed to be used solely for residential purposes<br>(b) is proposed as part of a combined land division application with deemed-to-satisfy dwellings on the proposed allotments. |
| PO 1.2<br>Land division considers the physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality. | DTS/DPF 1.2<br>None are applicable. |
| Design and Layout | |
| PO 2.1<br>Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Land division enables the appropriate management of interface impacts between potentially conflicting land uses and/or zones. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Land division maximises the number of allotments that face public open space and public streets. | DTS/DPF 2.3<br>None are applicable. |
| PO 2.4<br>Land division is integrated with site features, adjacent land uses, the existing transport network and available infrastructure. | DTS/DPF 2.4<br>None are applicable. |
| PO 2.5<br>Development and infrastructure is provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services. | DTS/DPF 2.5<br>None are applicable. |
| PO 2.6<br>Land division results in watercourses being retained within open space and development taking place on land not subject to flooding. | DTS/DPF 2.6<br>None are applicable. |
| PO 2.7<br>Land division results in legible street patterns connected to the surrounding street network. | DTS/DPF 2.7<br>None are applicable. |
| PO 2.8<br>Land division is designed to preserve existing vegetation of value including native vegetation and regulated and significant trees. | DTS/DPF 2.8<br>None are applicable. |
| PO 2.9<br>Land division under the *Community Titles Act 1996* or the *Strata Titles Act 1988* is appropriate having regard to the nature and extent of the common property established by the relevant scheme, including but not limited to:<br>(a) common driveway design, function and status (i.e., whether or not intended to serve as a private road), having regard to the type and nature of vehicles expected to use the driveway<br>(b) provision and location of utilities, letterboxes, bin storage and waste collection services<br>(c) landscaping provision<br>(d) maintenance of any of the above. | DTS/DPF 2.9<br>None are applicable. |
| Roads and Access | |
| PO 3.1<br>Land division provides allotments with access to an all-weather public road. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Street patterns and intersections are designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Land division does not impede access to publicly owned open space and/or recreation facilities. | DTS/DPF 3.3<br>None are applicable. |

| | |
|---|---|
| PO 3.4<br>Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles and allow for the efficient movement of service and emergency vehicles. | DTS/DPF 3.4<br>None are applicable. |
| PO 3.5<br>Road reserves are designed to accommodate pedestrian and cycling infrastructure, street tree planting, landscaping and street furniture. | DTS/DPF 3.5<br>None are applicable. |
| PO 3.6<br>Road reserves accommodate stormwater drainage and public utilities. | DTS/DPF 3.6<br>None are applicable. |
| PO 3.7<br>Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites. | DTS/DPF 3.7<br>None are applicable. |
| PO 3.8<br>Roads, open space and thoroughfares provide safe and convenient linkages to the surrounding open space and transport network. | DTS/DPF 3.8<br>None are applicable. |
| PO 3.9<br>Public streets are designed to enable tree planting to provide shade and enhance the amenity of streetscapes. | DTS/DPF 3.9<br>None are applicable. |
| PO 3.10<br>Local streets are designed to create low-speed environments that are safe for cyclists and pedestrians. | DTS/DPF 3.10<br>None are applicable. |
| Infrastructure | |
| PO 4.1<br>Land division incorporates public utility services within road reserves or dedicated easements. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Waste water, sewage and other effluent is capable of being disposed of from each allotment without risk to public health or the environment. | DTS/DPF 4.2<br>Each allotment can be connected to:<br>(a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotment<br>or<br>(b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards. |
| PO 4.3<br>Septic tank effluent drainage fields and other waste water disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment. | DTS/DPF 4.3<br>Development is not built on, or encroaches within, an area that is or will be, required for a sewerage system or waste control system. |
| PO 4.4<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to ensure public health and safety is protected, including by minimising potential public health risks arising from the breeding of mosquitoes. | DTS/DPF 4.4<br>None are applicable. |
| PO 4.5<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment. | DTS/DPF 4.5<br>None are applicable. |
| PO 4.6<br>Constructed wetland systems, including associated detention and retention basins, are sited and designed to function as a landscape feature. | DTS/DPF 4.6<br>None are applicable. |
| Minor Land Division (Under 20 Allotments) | |
| Open Space | |
| PO 5.1<br>Land division proposing an additional allotment under 1 hectare provides or supports the provision of open space. | DTS/DPF 5.1<br>None are applicable. |
| Solar Orientation | |
| PO 6.1<br>Land division for residential purposes facilitates solar access through allotment orientation. | DTS/DPF 6.1<br>None are applicable. |
| Water Sensitive Design | |
| PO 7.1<br>Land division creating a new road or common driveway includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies. | DTS/DPF 7.1<br>None are applicable. |
| PO 7.2<br>Land division designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems. | DTS/DPF 7.2<br>None are applicable. |
| Battle-Axe Development | |
| PO 8.1<br>Battle-axe development appropriately responds to the existing neighbourhood context. | DTS/DPF 8.1<br>Allotments are not in the form of a battle-axe arrangement. |
| PO 8.2<br>Battle-axe development designed to allow safe and convenient movement. | DTS/DPF 8.2<br>The handle of a battle-axe development:<br>(a) has a minimum width of 4m<br>or<br>(b) where more than 3 allotments are proposed, a minimum width of 5.5m. |
| PO 8.3<br>Battle-axe allotments and/or common land are of a suitable size and dimension to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner. | DTS/DPF 8.3<br>Battle-axe development allows a B85 passenger vehicle to enter and exit parking spaces in no more than a three-point turn manoeuvre. |
| PO 8.4<br>Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management. | DTS/DPF 8.4<br>Battle-axe or common driveways satisfy (a) and (b):<br>(a) are constructed of a minimum of 50% permeable or porous material<br>(b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point). |
| Major Land Division (20+ Allotments) | |
| Open Space | |
| PO 9.1<br>Land division allocates or retains evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration. | DTS/DPF 9.1<br>None are applicable. |
| PO 9.2<br>Land allocated for open space is suitable for its intended active and passive recreational use considering gradient and potential for inundation. | DTS/DPF 9.2<br>None are applicable. |
| PO 9.3<br>Land allocated for active recreation has dimensions capable of accommodating a range of active recreational activities. | DTS/DPF 9.3<br>None are applicable. |
| Water Sensitive Design | |
| PO 10.1<br>Land division creating 20 or more allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems. | DTS/DPF 10.1<br>None are applicable. |
| PO 10.2<br>Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies. | DTS/DPF 10.2<br>None are applicable. |
| Solar Orientation | |
| PO 11.1<br>Land division creating 20 or more allotments for residential purposes facilitates solar access through allotment orientation and allotment dimensions. | DTS/DPF 11.1<br>None are applicable. |

## Marinas and On-Water Structures

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Marinas and on-water structures are located and designed to minimise the impairment of commercial, recreational and navigational activities and adverse impacts on the environment. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Navigation and Safety | |
| PO 1.1<br>Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>The operation of wharves is not impaired by marinas and on-water structures. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Navigation and access channels are not impaired by marinas and on-water structures. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Commercial shipping lanes are not impaired by marinas and on-water structures. | DTS/DPF 1.4<br>Marinas and on-water structures are set back 250m or more from commercial shipping lanes. |
| PO 1.5<br>Marinas and on-water structures are located to avoid interfering with the operation or function of a water supply pumping station. | DTS/DPF 1.5<br>On-water structures are set back:<br>(a) 3km or more from upstream water supply pumping station take-off points<br>(b) 500m or more from downstream water supply pumping station take-off points. |
| PO 1.6<br>Maintenance of on-water infrastructure, including revetment walls, is not impaired by marinas and on-water structures. | DTS/DPF 1.6<br>None are applicable. |
| Environmental Protection | |
| PO 2.1<br>Development is sited and designed to facilitate water circulation and exchange. | DTS/DPF 2.1<br>None are applicable. |

## Open Space and Recreation

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Pleasant, functional and accessible open space and recreation facilities are provided at State, regional, district, neighbourhood and local levels for active and passive recreation, biodiversity, community health, urban cooling, tree canopy cover, visual amenity, gathering spaces, wildlife and waterway corridors, and a range of other functions and at a range of sizes that reflect the purpose of that open space. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Recreation facilities are compatible with surrounding land uses and activities. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Open space areas include natural or landscaped areas using locally indigenous plant species and large trees. | DTS/DPF 1.2<br>None are applicable. |
| Design and Siting | |
| PO 2.1<br>Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Open space and recreation facilities incorporate park furniture, shaded areas and resting places. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities. | DTS/DPF 2.3<br>None are applicable. |
| Pedestrians and Cyclists | |
| PO 3.1<br>Open space incorporates:<br>(a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes;<br>(b) safe crossing points where pedestrian routes intersect the road network;<br>(c) easily identified access points. | DTS/DPF 3.1<br>None are applicable. |
| Usability | |
| PO 4.1<br>Land allocated for open space is suitable for its intended active and passive recreational use taking into consideration its gradient and potential for inundation. | DTS/DPF 4.1<br>None are applicable. |
| Safety and Security | |
| PO 5.1<br>Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible. | DTS/DPF 5.1<br>None are applicable. |
| PO 5.2<br>Play equipment is located to maximise opportunities for passive surveillance. | DTS/DPF 5.2<br>None are applicable. |
| PO 5.3<br>Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park. | DTS/DPF 5.3<br>None are applicable. |
| PO 5.4<br>Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment. | DTS/DPF 5.4<br>None are applicable. |
| PO 5.5<br>Adequate lighting is provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities. | DTS/DPF 5.5<br>None are applicable. |
| PO 5.6<br>Pedestrian and bicycle movement after dark is focused along clearly defined, adequately lit routes with observable entries and exits. | DTS/DPF 5.6<br>None are applicable. |
| Signage | |

| | |
|---|---|
| PO 6.1<br>Signage is provided at entrances to and within the open space and recreation facilities to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like. | DTS/DPF 6.1<br>None are applicable. |
| Buildings and Structures | |
| PO 7.1<br>Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive. | DTS/DPF 7.1<br>None are applicable. |
| PO 7.2<br>Buildings and structures in open space areas are clustered where practical to ensure that the majority of the site remains open. | DTS/DPF 7.2<br>None are applicable. |
| PO 7.3<br>Development in open space is constructed to minimise the extent of impervious surfaces. | DTS/DPF 7.3<br>None are applicable. |
| PO 7.4<br>Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve. | DTS/DPF 7.4<br>None are applicable. |
| Landscaping | |
| PO 8.1<br>Open space and recreation facilities provide for the planting and retention of large trees and vegetation. | DTS/DPF 8.1<br>None are applicable. |
| PO 8.2<br>Landscaping in open space and recreation facilities provides shade and windbreaks:<br>(a) along cyclist and pedestrian routes;<br>(b) around picnic and barbecue areas;<br>(c) in car parking areas. | DTS/DPF 8.2<br>None are applicable. |
| PO 8.3<br>Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity. | DTS/DPF 8.3<br>None are applicable. |
| PO 8.4<br>Landscaping including trees and other vegetation passively watered with local rainfall run-off, where practicable. | DTS/DPF 8.4<br>None are applicable. |

## Out of Activity Centre Development

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO1 | The role of Activity Centres in contributing to the form and pattern of development and enabling equitable and convenient access to a range of shopping, administrative, cultural, entertainment and other facilities in a single trip is maintained and reinforced. |

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Non-residential development outside Activity Centres of a scale and type that does not diminish the role of Activity Centres:<br>(a) as primary locations for shopping, administrative, cultural, entertainment and community services<br>(b) as a focus for regular social and business gatherings<br>(c) in contributing to or maintaining a pattern of development that supports equitable community access to services and facilities. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Out-of-activity centre non-residential development complements Activity Centres through the provision of services and facilities:<br>(a) that support the needs of local residents and workers, particularly in underserviced locations<br>(b) at the edge of Activities Centres where they cannot readily be accommodated within an existing Activity Centre to expand the range of services on offer and support the role of the Activity Centre. | DTS/DPF 1.2<br>None are applicable. |

## Resource Extraction

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Resource extraction activities are developed in a manner that minimises human and environmental impacts. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Land Use and Intensity | |
| PO 1.1<br>Resource extraction activities minimise landscape damage outside of those areas unavoidably disturbed to access and exploit a resource and provide for the progressive reclamation and betterment of disturbed areas. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Resource extraction activities avoid damage to cultural sites or artefacts. | DTS/DPF 1.2<br>None are applicable. |
| Water Quality | |
| PO 2.1<br>Stormwater and/or wastewater from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on site. | DTS/DPF 2.1<br>None are applicable. |
| Separation Treatments, Buffers and Landscaping | |
| PO 3.1<br>Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding. | DTS/DPF 3.2<br>None are applicable. |

## Site Contamination

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Ensure land is suitable for the proposed use in circumstances where it is, or may have been, subject to site contamination. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Ensure land is suitable for use when land use changes to a more sensitive use. | DTS/DPF 1.1<br>Development satisfies (a), (b), (c) or (d):<br>(a) does not involve a change in the use of land<br>(b) involves a change in the use of land that does not constitute a change to a more sensitive use<br>(c) involves a change in the use of land to a more sensitive use on land at which site contamination is unlikely to exist (as demonstrated in a site contamination declaration form)<br>(d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following:<br>(i) a site contamination audit report has been prepared under Part 10A of the *Environment Protection Act 1993* in relation to the land within the previous 5 years which states that-<br>A. site contamination does not exist (or no longer exists) at the land<br>or<br>B. the land is suitable for the proposed use or range of uses (without the need for any further remediation)<br>or<br>C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)<br>and<br>(ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form). |

## Tourism Development

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Tourism development is built in locations that cater to the needs of visitors and positively contributes to South Australia's visitor economy. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| General | |
| PO 1.1<br>Tourism development complements and contributes to local, natural, cultural or historical context where:<br>(a) it supports immersive natural experiences<br>(b) it showcases South Australia's landscapes and produce<br>(c) its events and functions are connected to local food, wine and nature. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) is clustered to minimise environmental and contextual impact. | DTS/DPF 1.2<br>None are applicable. |
| Caravan and Tourist Parks | |
| PO 2.1<br>Potential conflicts between long-term residents and short-term tourists are minimised through suitable siting and design measures. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Occupants are provided privacy and amenity through landscaping and fencing. | DTS/DPF 2.2<br>None are applicable. |
| PO 2.3<br>Communal open space and centrally located recreation facilities are provided for guests and visitors. | DTS/DPF 2.3<br>12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation. |
| PO 2.4<br>Perimeter landscaping is used to enhance the amenity of the locality. | DTS/DPF 2.4<br>None are applicable. |
| PO 2.5<br>Amenity blocks (showers, toilets, laundry and kitchen facilities) are sufficient to serve the full occupancy of the development. | DTS/DPF 2.5<br>None are applicable. |
| PO 2.6<br>Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverine locations. | DTS/DPF 2.6<br>None are applicable. |
| Tourist accommodation in areas constituted under the National Parks and Wildlife Act 1972 | |
| PO 3.1<br>Tourist accommodation avoids delicate or environmentally sensitive areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation (including regenerated areas of native vegetation lost through bushfire). | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Tourist accommodation is sited and designed in a manner that is subservient to the natural environment and where adverse impacts on natural features, landscapes, habitats and cultural assets are avoided. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Tourist accommodation and recreational facilities, including associated access ways and ancillary structures, are located on cleared (other than where cleared as a result of bushfire) or degraded areas or where environmental improvements can be achieved. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Tourist accommodation is designed to prevent conversion to private dwellings through:<br>(a) comprising a minimum of 10 accommodation units<br>(b) clustering separated individual accommodation units<br>(c) being of a size unsuitable for a private dwelling<br>(d) ensuring functional areas that are generally associated with a private dwelling such as kitchens and laundries are excluded from, or physically separated from individual accommodation units, or are of a size unsuitable for a private dwelling. | DTS/DPF 3.4<br>None are applicable. |

## Transport, Access and Parking

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Movement Systems | |
| PO 1.1<br>Development is integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Development is sited and designed so that loading, unloading and turning of all traffic avoids interrupting the operation of and queuing on public roads and pedestrian paths. | DTS/DPF 1.4<br>All vehicle manoeuvring occurs onsite. |
| Sightlines | |
| PO 2.1<br>Sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians are maintained or enhanced to ensure safety for all road users and pedestrians. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians. | DTS/DPF 2.2<br>None are applicable. |
| Vehicle Access | |
| PO 3.1<br>Safe and convenient access minimises impact or interruption on the operation of public roads. | DTS/DPF 3.1<br>The access is:<br>(a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land<br>or<br>(b) not located within 6m of an intersection of 2 or more roads or a pedestrian activated crossing. |
| PO 3.2<br>Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Access points are sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Access points are sited and designed to minimise any adverse impacts on neighbouring properties. | DTS/DPF 3.4<br>None are applicable. |
| PO 3.5<br>Access points are located so as not to interfere with street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets. | DTS/DPF 3.5<br>Vehicle access to designated car parking spaces satisfy (a) or (b):<br>(a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land<br>(b) where newly proposed, is set back in accordance with all of the following:<br>(i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner<br>(ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance<br>(iii) 6m or more from the tangent point of an intersection of 2 or more roads<br>(iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing. |
| PO 3.6<br>Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate). | DTS/DPF 3.6<br>Driveways and access points:<br>(a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided<br>(b) for sites with a frontage to a public road greater than 20m:<br>(i) a single access point no greater than 6m in width is provided<br>or<br>(ii) not more than two access points with a width of 3.5m each are provided. |
| PO 3.7<br>Access points are appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation. | DTS/DPF 3.7<br>Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing:<br>(a) 80 km/h road - 110m<br>(b) 70 km/h road - 90m<br>(c) 60 km/h road - 70m<br>(d) 50km/h or less road - 50m. |
| PO 3.8<br>Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated. | DTS/DPF 3.8<br>None are applicable. |
| PO 3.9<br>Development is designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads. | DTS/DPF 3.9<br>None are applicable. |
| Access for People with Disabilities | |
| PO 4.1<br>Development is sited and designed to provide safe, dignified and convenient access for people with a disability. | DTS/DPF 4.1<br>None are applicable. |
| Vehicle Parking Rates | |
| PO 5.1<br>Sufficient on-site vehicle parking and specifically marked accessible car parking places are provided to meet the needs of the development or land use having regard to factors that may support a reduced on-site rate such as:<br>(a) availability of on-street car parking<br>(b) shared use of other parking areas<br>(c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site, the provision of vehicle parking may be shared<br>(d) the adaptive reuse of a State or Local Heritage Place<br>(e) proximity to high frequency public transport<br>Note: In circumstances where a land use is not defined in Table 2 - Off-Street Vehicle Parking Requirements in Designated Areas or Table 1 - General Off-Street Car Parking Requirements (as applicable), an appropriate car parking rate may be defined by reference to similar development in comparable locations. | DTS/DPF 5.1<br>Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using one of the following, whichever is relevant:<br>(a) Transport, Access and Parking Table 2 - Off-Street Vehicle Parking Requirements in Designated Areas if the development is a class of development listed in Table 2 and the site is in a Designated Area<br>(b) Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements where (a) does not apply<br>(c) if located in an area where a lawfully established carparking fund operates, the number of spaces calculated under (a) or (b) less the number of spaces offset by contribution to the fund. |
| Vehicle Parking Areas | |
| PO 6.1<br>Vehicle parking areas are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another. | DTS/DPF 6.1<br>Movement between vehicle parking areas within the site can occur without the need to use a public road. |
| PO 6.2<br>Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like. | DTS/DPF 6.2<br>None are applicable. |
| PO 6.3<br>Vehicle parking areas are designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points. | DTS/DPF 6.3<br>None are applicable. |

| | |
|---|---|
| PO 6.4<br>Pedestrian linkages between parking areas and the development are provided and are safe and convenient. | DTS/DPF 6.4<br>None are applicable. |
| PO 6.5<br>Vehicle parking areas that are likely to be used during non-daylight hours are provided with sufficient lighting to entry and exit points to ensure clear visibility to users. | DTS/DPF 6.5<br>None are applicable. |
| PO 6.6<br>Loading areas and designated parking spaces for service vehicles are provided within the boundary of the site. | DTS/DPF 6.6<br>Loading areas and designated parking spaces are wholly located within the site. |
| PO 6.7<br>On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times. | DTS/DPF 6.7<br>None are applicable. |
| Undercroft and Below Ground Garaging and Parking of Vehicles | |
| PO 7.1<br>Undercroft and below ground garaging of vehicles is designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles. | DTS/DPF 7.1<br>None are applicable. |
| Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks | |
| PO 8.1<br>Internal road and vehicle parking areas are surfaced to prevent dust becoming a nuisance to park residents and occupants. | DTS/DPF 8.1<br>None are applicable. |
| PO 8.2<br>Traffic circulation and movement within the park is pedestrian friendly and promotes low speed vehicle movement. | DTS/DPF 8.2<br>None are applicable. |
| Bicycle Parking in Designated Areas | |
| PO 9.1<br>The provision of adequately sized on-site bicycle parking facilities encourages cycling as an active transport mode. | DTS/DPF 9.1<br>Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle Parking Requirements. |
| PO 9.2<br>Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and deters property theft. | DTS/DPF 9.2<br>None are applicable. |
| PO 9.3<br>Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the facilities to encourage cycling as a mode of journey-to-work transport. | DTS/DPF 9.3<br>None are applicable. |
| Corner Cut-Offs | |
| PO 10.1<br>Development is located and designed to ensure drivers can safely turn into and out of public road junctions. | DTS/DPF 10.1<br>Development does not involve building work, or building work is located wholly outside the land shown as Corner Cut-Off Area in the following diagram:<br><br> |
| Heavy Vehicle Parking | |
| PO 11.1<br>Heavy vehicle parking and access is designed and sited so that the activity does not result in nuisance to adjoining neighbours as a result of dust, fumes, vibration, odour or potentially hazardous loads. | DTS/DPF 11.1<br>Heavy vehicle parking occurs in accordance with the following:<br>(a) the site is not located within a Neighbourhood-type zone (except a Rural Living Zone)<br>(b) the site is a minimum of 0.4 ha<br>(c) where the site is 2 ha or more, no more than 2 vehicles exceeding 3,000 kilograms each (and trailers) are to be parked on the allotment at any time<br>(d) where the site is between 0.4 ha and 2 ha, only one vehicle exceeding 3,000 kilograms (and one trailer) are to be parking on the allotment at any time<br>(e) the vehicle parking area achieves the following setbacks:<br>(i) behind the building line or 30m, whichever is greater<br>(ii) 20m from the secondary street if it is a State Maintained Road<br>(iii) 10m from the secondary street if it is a local road<br>(iv) 10m from side and rear boundaries<br>(f) parking and access areas (including internal driveways) should be sealed or have a surface that can be treated and maintained to minimise dust and mud nuisance<br>(g) does not include refrigerated trailers or vehicles<br>(h) vehicles only enter and exit the property in accordance with the following hours:<br>(i) Monday to Saturday 6:00am and 9:30pm<br>(ii) Sunday and public holidays between 9:30 am and 7:00 pm<br>(i) the handling or trans-shipment of freight is not carried out on the property. |
| PO 11.2<br>Heavy vehicle parking ensures that vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic. | DTS/DPF 11.2<br>Heavy vehicles:<br>(a) can enter and exit the site in a forward direction; and<br>(b) operate within the statutory mass and dimension limited for General Access Vehicles (as prescribed by the National Heavy Vehicle Regulator). |
| PO 11.3<br>Heavy vehicle parking is screened through siting behind buildings, screening, landscaping or the like to obscure views from adjoining properties and public roads. | DTS/DPF 11.3<br>None are applicable. |

**Table 1 - General Off-Street Car Parking Requirements**

The following parking rates apply and if located in an area where a lawfully established carparking fund operates, the number of spaces is reduced by an amount equal to the number of spaces offset by contribution to the fund.

| Class of Development | Car Parking Rate (unless varied by Table 2 onwards)<br><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. |
|---|---|
| Residential Development | |
| Co-located Housing | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling to be located in a shared car parking area / arrangement.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling to be located in a shared car parking area / arrangement.<br><br>Where development involves 3 or more dwellings, 0.33 spaces per dwelling for visitor parking to be located in a shared car parking area / arrangement. |
| Detached Dwelling | Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. |
| Group Dwelling | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.<br><br>0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings. |
| Residential Flat Building | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. |

| | |
|---|---|
| | 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings. |
| Row Dwelling where vehicle access is from the primary street | Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. |
| Row Dwelling where vehicle access is not from the primary street (i.e. rear-loaded) | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. |
| Semi-Detached Dwelling | Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling. |
| Aged / Supported Accommodation | |
| Retirement facility | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.<br><br>0.2 spaces per dwelling for visitor parking. |
| Supported accommodation | 0.3 spaces per bed. |
| Residential Development (Other) | |
| Ancillary accommodation | No additional requirements beyond those associated with the main dwelling. |
| Residential park | Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.<br><br>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.<br><br>0.2 spaces per dwelling for visitor parking. |
| Student accommodation | 0.3 spaces per bed. |
| Workers' accommodation | 0.5 spaces per bed plus 0.2 spaces per bed for visitor parking. |
| Co-living | Co-living residence: 0.5 spaces per bedroom. |
| Tourist | |
| Caravan and tourist park | Parks with 100 sites or less - a minimum of 1 space per 10 sites to be used for accommodation.<br><br>Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation.<br><br>A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin. |
| Tourist accommodation other than a caravan and tourist park | 1 car parking space per accommodation unit / guest room. |
| Commercial Uses | |
| Auction room/ depot | 1 space per 100m2 of building floor area plus an additional 2 spaces. |
| Automotive collision repair | 3 spaces per service bay. |
| Motor repair station | 3 spaces per service bay. |
| Office | For a call centre, 8 spaces per 100m2 of gross leasable floor area<br><br>For an office subordinate to, and associated with, a retirement facility or supported accommodation located on a significant retirement facility and supported accommodation site, 0 spaces.<br><br>In all other cases, 4 spaces per 100m2 of gross leasable floor area. |
| Retail fuel outlet | 3 spaces per 100m2 gross leasable floor area. |
| Service trade premises | 2.5 spaces per 100m2 of gross leasable floor area<br><br>1 space per 100m2 of outdoor area used for display purposes. |
| Shop (no commercial kitchen) | 5.5 spaces per 100m2 of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.<br><br>5 spaces per 100m2 of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.<br><br>0 spaces where located on a significant retirement facility and supported accommodation site, and is subordinate to, and associated with, a retirement facility or supported accommodation. |
| Shop (in the form of a bulky goods outlet) | 2.5 spaces per 100m2 of gross leasable floor area. |
| Shop (in the form of a restaurant or involving a commercial kitchen) | Premises with a dine-in service only (which may include a take-away component with no drive-through) - 0.4 spaces per seat.<br><br>Premises with take-away service but with no seats - 12 spaces per 100m2 of total floor area plus a drive-through queue capacity of ten vehicles measured from the pick-up point.<br><br>Premises with a dine-in and drive-through take-away service - 0.3 spaces per seat plus a drive through queue capacity of 10 vehicles measured from the pick-up point. |
| Community and Civic Uses | |
| Community facility | For a library, 4 spaces per 100m2 of total floor area.<br><br>For a hall/meeting hall, 0.2 spaces per seat.<br><br>For a community facility located on a significant retirement facility and supported accommodation site, and is subordinate to and associated with a retirement facility or supported accommodation, 0 spaces.<br><br>In all other cases, 10 spaces per 100m2 of total floor area. |
| Educational facility | For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.<br><br>For a secondary school - 1.1 per full time equivalent employee plus 0.1 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.<br><br>For a tertiary institution - 0.4 per student based on the maximum number of students on the site at any time. |
| Place of worship | 1 space for every 3 visitor seats. |
| Child care facility | For a child care centre, 0.25 spaces per child<br><br>In all other cases, 1 per employee plus 0.25 per child (drop off/pick up bays). |
| Health Related Uses | |
| Consulting room | 4 spaces per consulting room excluding ancillary facilities.<br><br>0 spaces per consulting room where subordinate to and associated with a retirement facility or supported accommodation on a significant retirement facility and supported accommodation site. |
| Hospital | 4.5 spaces per bed for a public hospital.<br><br>1.5 spaces per bed for a private hospital. |
| Recreational and Entertainment Uses | |
| Cinema complex | 0.2 spaces per seat. |
| Concert hall / theatre | 0.2 spaces per seat. |
| Hotel | 1 space for every 2m2 of total floor area in a public bar plus 1 space for every 6m2 of total floor area available to the public in a lounge, beer garden plus 1 space per 2 gaming machines, plus 1 space per 3 seats in a restaurant. |
| Indoor recreation facility | 6.5 spaces per 100m2 of total floor area for a Fitness Centre<br><br>4.5 spaces per 100m2 of total floor area for all other Indoor recreation facilities. |
| Industry/Employment Uses | |
| Fuel depot | 1.5 spaces per 100m2 total floor area<br><br>1 spaces per 100m2 of outdoor area used for fuel depot activity purposes. |
| Industry | 1.5 spaces per 100m2 of total floor area. |
| Store | 0.5 spaces per 100m2 of total floor area. |
| Timber yard | 1.5 spaces per 100m2 of total floor area<br><br>1 space per 100m2 of outdoor area used for display purposes. |
| Warehouse | 0.5 spaces per 100m2 total floor area. |
| Other Uses | |
| Funeral Parlour | 1 space per 5 seats in the chapel plus 1 space for each vehicle operated by the parlour. |
| Radio or Television Station | 5 spaces per 100m2 of total building floor area. |

**Table 2 - Off-Street Car Parking Requirements in Designated Areas**

The following parking rates apply in any zone, subzone or other area described in the 'Designated Areas' column.

In the area identified in Concept Plan 152 Brompton Gasworks, car parking can be provided in a consolidated manner for that precinct rather than on a development-by-development basis

| Class of Development | Car Parking Rate<br><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. | | Designated Areas |
|---|---|---|---|
| | Minimum number of spaces | Maximum number of spaces | |
| Development generally | | | |
| All classes of development | No minimum. | No maximum except in the Primary Pedestrian Area identified in the Primary Pedestrian Area Concept Plan, where the maximum is:<br><br>1 space for each dwelling with a total floor area less than 75 square metres<br><br>2 spaces for each dwelling with a total floor area between 75 square metres and 150 square metres<br><br>3 spaces for each dwelling with a total floor area greater than 150 square metres.<br><br>Residential flat building or Residential component of a multi-storey building: 1 visitor space for each 6 dwellings. | Capital City Zone<br><br>City Main Street Zone<br><br>City Riverbank Zone<br><br>Adelaide Park Lands Zone<br><br>Business Neighbourhood Zone (within the City of Adelaide)<br><br>The St Andrews Hospital Precinct Subzone and Women's and Children's Hospital Precinct Subzone of the Community Facilities Zone |
| Non-residential development | | | |
| Non-residential development excluding tourist accommodation | 3 spaces per 100m2 of gross leasable floor area. | 5 spaces per 100m2 of gross leasable floor area. | City Living Zone<br><br>Urban Corridor (Boulevard) Zone<br><br>Urban Corridor (Business) Zone<br><br>Urban Corridor (Living) Zone<br><br>Urban Corridor (Main Street ) Zone<br><br>Urban Neighbourhood Zone (except for Bowden, Brompton or Hindmarsh) |
| Non-residential development excluding tourist accommodation | 3 spaces per 100m2 of gross leasable floor area. | 6 spaces per 100m2 of gross leasable floor area. | Strategic Innovation Zone in the City of Burnside, City of Marion or City of Mitcham<br><br>Strategic Innovation Zone outside the City of Burnside, City of Marion or City of Mitcham when the site is also in a high frequency public transit area<br><br>Suburban Activity Centre Zone when the site is also in a high frequency public transit area<br><br>Suburban Business Zone when the site is also in a high frequency public transit area<br><br>Business Neighbourhood Zone outside of the City of Adelaide when the site is also in a high frequency public transit area<br><br>Suburban Main Street Zone when the site is also in a high frequency public transit area<br><br>Urban Activity Centre Zone |
| Non-residential development excluding tourist accommodation | 3 spaces per 100 square metres of gross leasable floor area<br><br>1.5 spaces per 100 square metres of gross leasable floor area above ground floor level other than for a shop | 3 spaces per 100 square metres of gross leasable floor area | Urban Neighbourhood Zone (in Bowden, Brompton or Hindmarsh) |

| Notes | | | |
| 1 | In the area identified in Concept Plan 152 Brompton Gasworks, car parking can be provided in a consolidated manner for that precinct rather than on a development-by-development basis | | |

**Table 3 - Off-Street Bicycle Parking Requirements**

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

| Class of Development | Bicycle Parking Rate<br><br>Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type. |
|---|---|
| Co-living | 1 per co-living residence for residents, plus 1 per 10 co-living residences for visitors. |
| Consulting room | 1 space per 20 employees plus 1 space per 20 consulting rooms for customers. |
| Educational facility | For a secondary school - 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors.<br><br>For tertiary education - 1 space per 20 employees plus 1 space per 10 full time students. |
| Hospital | 1 space per 15 beds plus 1 space per 30 beds for visitors. |
| Indoor recreation facility | 1 space per 4 employees plus 1 space per 200m2 of gross leasable floor area for visitors. |
| Licensed Premises | 1 per 20 employees, plus 1 per 60 square metres total floor area, plus 1 per 40 square metres of bar floor area, plus 1 per 120 square metres lounge and beer garden floor area, plus 1 per 60 square metres dining floor area, plus 1 per 40 square metres gaming room floor area. |
| Office | 1 space for every 200m2 of gross leasable floor area plus 2 spaces plus 1 space per 1000m2 of gross leasable floor area for visitors. |
| Child care facility | 1 space per 20 full time employees plus 1 space per 40 full time children. |
| Recreation area | 1 per 1500 spectator seats for employees plus 1 per 250 visitor and customers. |
| Residential flat building | Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors. |
| Residential component of a multi-storey building (except for co-living) | Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors. |
| Shop | 1 space for every 300m2 of gross leasable floor area plus 1 space for every 600m2 of gross leasable floor area for customers. |
| Tourist accommodation | 1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors. |
| Schedule to Table 3 | **Designated Area** / **Relevant part of the State**<br>**The bicycle parking rate applies to a designated area located in a relevant part of the State described below.**<br>All zones — City of Adelaide<br>Business Neighbourhood Zone<br>Strategic Innovation Zone<br>Suburban Activity Centre Zone<br>Suburban Business Zone<br>Suburban Main Street Zone<br>Urban Activity Centre Zone<br>Urban Corridor (Boulevard) Zone<br>Urban Corridor (Business) Zone<br>Urban Corridor (Living) Zone<br>Urban Corridor (Main Street ) Zone<br>Urban Neighbourhood Zone — Metropolitan Adelaide |

## Waste Treatment and Management Facilities

### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Mitigation of the potential environmental and amenity impacts of waste treatment and management facilities. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| Siting | |
| PO 1.1<br>Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions. | DTS/DPF 1.1<br>None are applicable. |
| Soil and Water Protection | |
| PO 2.1<br>Soil, groundwater and surface water are protected from contamination from waste treatment and management facilities through measures such as:<br>(a) containing potential groundwater and surface water contaminants within waste operations areas<br>(b) diverting clean stormwater away from waste operations areas and potentially contaminated areas<br>(c) providing a leachate barrier between waste operations areas and underlying soil and groundwater. | DTS/DPF 2.1<br>None are applicable. |
| PO 2.2<br>Wastewater lagoons are set back from watercourses to minimise environmental harm and adverse effects on water resources. | DTS/DPF 2.2<br>Wastewater lagoons are set back 50m or more from watercourse banks. |
| PO 2.3<br>Wastewater lagoons are designed and sited to: | DTS/DPF 2.3<br>None are applicable. |

| | |
|---|---|
| (a) avoid intersecting underground waters;<br>(b) avoid inundation by flood waters;<br>(c) ensure lagoon contents do not overflow;<br>(d) include a liner designed to prevent leakage. | |
| PO 2.4<br>Waste operations areas of landfills and organic waste processing facilities are set back from watercourses to minimise adverse impacts on water resources. | DTS/DPF 2.4<br>Waste operations areas are set back 100m or more from watercourse banks. |
| Amenity | |
| PO 3.1<br>Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity. | DTS/DPF 3.1<br>None are applicable. |
| PO 3.2<br>Access routes to waste treatment and management facilities via residential streets is avoided. | DTS/DPF 3.2<br>None are applicable. |
| PO 3.3<br>Litter control measures minimise the incidence of windblown litter. | DTS/DPF 3.3<br>None are applicable. |
| PO 3.4<br>Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation. | DTS/DPF 3.4<br>None are applicable. |
| Access | |
| PO 4.1<br>Traffic circulation movements within any waste treatment or management site are designed to enable vehicles to enter and exit the site in a forward direction. | DTS/DPF 4.1<br>None are applicable. |
| PO 4.2<br>Suitable access for emergency vehicles is provided to and within waste treatment or management sites. | DTS/DPF 4.2<br>None are applicable. |
| Fencing and Security | |
| PO 5.1<br>Security fencing provided around waste treatment and management facilities prevents unauthorised access to operations and potential hazard to the public. | DTS/DPF 5.1<br>Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site. |
| Landfill | |
| PO 6.1<br>Landfill gas emissions are managed in an environmentally acceptable manner. | DTS/DPF 6.1<br>None are applicable. |
| PO 6.2<br>Landfill facilities are separated from areas of environmental significance and land used for public recreation and enjoyment. | DTS/DPF 6.2<br>Landfill facilities are set back 250m or more from a public open space reserve, forest reserve, national park or Conservation Zone. |
| PO 6.3<br>Landfill facilities are located on land that is not subject to land slip. | DTS/DPF 6.3<br>None are applicable. |
| PO 6.4<br>Landfill facilities are separated from areas subject to flooding. | DTS/DPF 6.4<br>Landfill facilities are set back 500m or more from land inundated in a 1% AEP flood event. |
| Organic Waste Processing Facilities | |
| PO 7.1<br>Organic waste processing facilities are separated from the coast to avoid potential environment harm. | DTS/DPF 7.1<br>Organic waste processing facilities are set back 500m or more from the coastal high water mark. |
| PO 7.2<br>Organic waste processing facilities are located on land where the engineered liner and underlying seasonal water table cannot intersect. | DTS/DPF 7.2<br>None are applicable. |
| PO 7.3<br>Organic waste processing facilities are sited away from areas of environmental significance and land used for public recreation and enjoyment. | DTS/DPF 7.3<br>Organic waste processing facilities are set back 250m or more from a public open space reserve, forest reserve, national park or a Conservation Zone. |
| PO 7.4<br>Organic waste processing facilities are located on land that is not subject to land slip. | DTS/DPF 7.4<br>None are applicable. |
| PO 7.5<br>Organic waste processing facilities separated from areas subject to flooding. | DTS/DPF 7.5<br>Organic waste processing facilities are set back 500m or more from land inundated in a 1% AEP flood event. |
| Major Wastewater Treatment Facilities | |
| PO 8.1<br>Major wastewater treatment and disposal systems, including lagoons, are designed to minimise potential adverse odour impacts on sensitive receivers, minimise public and environmental health risks and protect water quality. | DTS/DPF 8.1<br>None are applicable. |
| PO 8.2<br>Artificial wetland systems for the storage of treated wastewater are designed and sited to minimise potential public health risks arising from the breeding of mosquitoes. | DTS/DPF 8.2<br>None are applicable. |

### Workers' accommodation and Settlements

#### Assessment Provisions (AP)

Desired Outcome (DO)

| Desired Outcome | |
|---|---|
| DO 1 | Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts. |

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

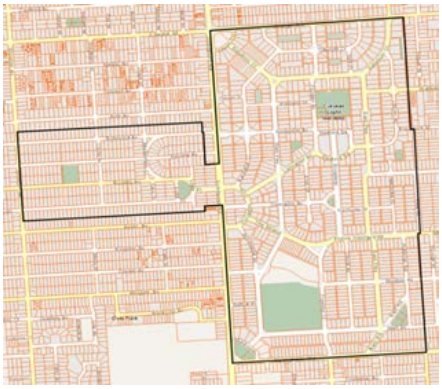
| Performance Outcome | Deemed-to-Satisfy Criteria / Designated Performance Feature |
|---|---|
| PO 1.1<br>Workers' accommodation and settlements are obscured from scenic routes, tourist destinations and areas of conservation significance or otherwise designed to complement the surrounding landscape. | DTS/DPF 1.1<br>None are applicable. |
| PO 1.2<br>Workers' accommodation and settlements are sited and designed to minimise nuisance impacts on the amenity of adjacent users of land. | DTS/DPF 1.2<br>None are applicable. |
| PO 1.3<br>Workers' accommodation and settlements are built with materials and colours that blend with the landscape. | DTS/DPF 1.3<br>None are applicable. |
| PO 1.4<br>Workers' accommodation and settlements are supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers. | DTS/DPF 1.4<br>None are applicable. |

## Part 5 - Specified matters and areas identified under the Act and Regulations

The *Planning, Development and Infrastructure Act 2016* and the *Planning, Development and Infrastructure (General) Regulations 2017* allow the Planning and Design Code to specify matters and identify areas for certain purposes. Column A identifies the purpose of a specified matter or identified area and Column B identifies the relevant matter or zone, subzone or overlay in the Planning and Design Code or other area identified for that purpose, including limits to the extent of an identified area.

Where the extent of an identified area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

**Table 1 - Specified matters and areas identified under the Planning, Development and Infrastructure (General) Regulations 2017**



| Introduction (Column A) | Specified matters / identified areas (Column B) |
|---|---|
| Interpretation | |
| Areas identified as 'designated airport building heights area' for the purposes of clause 3(1) of the Regulations - Interpretation | Airport Building Heights (Aircraft Landing Areas) Overlay<br>Airport Building Heights (Regulated) Overlay<br>Defence Aviation Area Overlay |
| Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation | None specified |
| Areas identified as 'designated flood zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation | Coastal Areas Overlay<br>Hazards (Flooding) Overlay<br>River Murray Flood Plain Protection Area Overlay |
| Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations - Interpretation | Regulated and Significant Tree Overlay |
| Building Rules: bushfire prone areas | |
| Areas identified as 'designated bushfire prone areas' for the purposes of clause 98(b) of the Regulations - Building Rules: bushfire prone areas | Refer to *Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements* |
| Areas identified as a 'bushfire prone area' for the purposes of clause 14 of Schedule 8 of the Regulations - Additional requirements for bushfire prone areas | Hazards (Bushfire - General Risk) Overlay<br>Hazards (Bushfire - High Risk) Overlay<br>Hazards (Bushfire - Medium Risk) Overlay<br>Hazards (Bushfire - Outback) Overlay<br>Hazards (Bushfire - Regional) Overlay<br>Hazards (Bushfire - Urban Interface) Overlay |
| Additions to definition of development | |
| Areas identified for the purposes of clause 1 of Schedule 3 under the Regulations - Excavating or filling in identified zones or areas | Hills Face Zone<br>Hills Neighbourhood Zone<br>Significant Landscape Protection Overlay<br>Hazard (Acid Sulfate Soils) Overlay |
| Areas identified for the purposes of clause 3 of Schedule 3 under the Regulations - Excavation or filling in identified zones or areas subject to inundation or flooding | In addition to a 'designated flood zone, subzone or overlay', the following:<br>None specified |
| Exclusions from definition of development - general | |
| Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(i) of Schedule 4 under the Regulations - Council works | Conservation Zone<br>Significant Landscape Protection Overlay |
| Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(ii)(A) of Schedule 4 under the Regulations - Council works | Coastal Areas Overlay |
| Areas identified for the purposes of clause 4 (1)(a) of Schedule 4 under the Regulations - Outbuilding | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay |
| Areas identified for the purposes of clause 4(1)(c) of Schedule 4 under the Regulations - Swimming pool | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone |
| Areas identified for the purposes of clause 4 (1)(d)(i)(B) of Schedule 4 under the Regulations - Fence not exceeding 2.1m in height | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay |
| Areas identified for the purposes of clause 4(1)(i) of Schedule 4 under the Regulations - Deck | In addition to a 'designated bushfire prone area', the following:<br>Coastal Areas Overlay<br>Hills Face Zone<br>Significant Landscape Protection Overlay |
| Areas identified for the purposes of clause 10 of Schedule 4 under the Regulations - Demolition of the whole of a building | Historic Area Overlay |
| Areas identified for the purposes of clause 11 of Schedule 4 under the Regulations - Dams | In addition to a 'designated flood zone, subzone or overlay', the following:<br>Hills Face Zone<br>Significant Landscape Protection Overlay |
| Areas identified for the purposes of clause 13(1) of Schedule 4 under the Regulations - Aerials, towers | Hills Face Zone<br>Significant Landscape Protection Overlay |
| Areas identified for the purposes of clause 13(2) of Schedule 4 under the Regulations - Aerials, towers in the Hills Face Zone | Hills Face Zone |
| Relevant authority - Commission | |
| Areas identified for the purposes of clause 4(1) of Schedule 6 of the Regulations - Buildings exceeding 4 storeys | Either of the following:<br>(a) Those parts of the Design Overlay within the following areas:<br>(i) City of Burnside<br>(ii) The Corporation of the City of Norwood Payneham and St Peters<br>(iii) City of Prospect<br>(iv) The Corporation of the City of Unley<br>(v) City of West Torrens<br>(vi) City of Holdfast Bay<br>(b) A significant retirement facility and supported accommodation site in the Significant Retirement Facility and Supported Accommodation Sites Overlay. |
| Areas identified for the purposes of clause 5(1) of Schedule 6 of the Regulations - Developments over $3m in the City of Port Adelaide | Design Overlay |
| Areas identified for the purposes of clause 8(1) of Schedule 6 of the Regulations - Developments over $3m in the City of Charles Sturt | That part of the Urban Neighbourhood Zone identified as 'Bowden Urban Village' in the *Concept Plan Technical and Numeric Variation layer* |

| | |
|---|---|
| Areas identified for the purposes of clause 11 of Schedule 6 of the Regulations - Developments in the show grounds | That part of the Recreation Zone in the City of Unley shown in Figure Un/1 of Schedule 1. |
| State agency development exempt from approval | |
| Areas identified for the purposes of clause 3 of Schedule 13 of the Regulations - Certain development in part of City of Mitcham | The area identified in Figure Mit/1 of Schedule 1 |

### Table 2 – Specified matters and areas identified under the Planning, Development and Infrastructure Act 2016

| Introduction (Column A) | Specified matters / identified areas (Column B) |
|---|---|
| For the purposes of paragraph (g) of the definition of development under section 3(1) of the Act - External painting of a building | Any building located within the area identified in Figure Ga/1 or Figure Ga/2 of Schedule 1. |
| Land identified as an infrastructure reserve for the purposes of section 129 (1)(a) | Land within the Infrastructure (Airfield) Zone located on the Andamooka Road (11km east of the eastern most boundary of Roxby Downs [Municipality]) and / or the site of Olympic Dam mining settlement (as per the approved Olympic Dam mining lease), within 150m north, and 50m south, of the existing road alignment of Andamooka Road, between the eastern boundary of the Roxby Downs (Municipality) and the eastern zone boundary of the Infrastructure (Airfield) Zone is land identified as having a land use that is suitable for infrastructure. |
| For the purposes of paragraph (f) of the definition of 'development' under section 3(1) of the Act - Works in relation to a local heritage place | The demolition, removal, conversion, alteration or external painting of, or addition to, the place, or any other work (not including internal painting but including, in the case of a tree, any tree-damaging activity) that could materially affect the heritage value of the place |
| Pursuant to section 102(4) of the *Planning, Development and Infrastructure Act 2016*, a matter specified by the Planning and Design Code to be reserved on the application of the applicant | Any of the matters in DTS/DPF 1.1 of the Urban Tree Canopy Overlay |
| 1. Development within the ambit of subclause (2) is specified as a class of development for the purposes of section 121(1) of the Act. | 2. Development that is—<br>(a) within the area of a council that has determined to make design review available in its area by participating in the scheme determined by the Minister for the purposes of section 121 of the Act; and<br>(b) a form of development that is, or has the potential to be, either performance assessed development or restricted development that is within a class of development that has been—<br>(i) selected by the council as a class of development for the purposes of this clause; and<br>(ii) specified by the Chief Executive by a notice published on the SA planning portal for the purposes of this clause.<br>3. A council may from time to time vary the classes of development applying in its area under this clause by a further notice published by the Chief Executive on the SA planning portal at the request of the council. |

### Schedule 1 - Figures for Specified Areas

| Location | Figures |
|---|---|
| Corporation of the Town of Gawler | Figure Ga/1<br> |
| | Figure Ga/2<br> |
| City of Mitcham - Colonel Light Gardens | Figure Mit/1<br> |
| City of Unley | Figure Un/1 |

## Part 6 - Index of Technical and Numeric Variations

### Part 6.1 Minimum Allotment Sizes

| Minimum Site Area |
|---|
| Minimum site area for a group dwelling is 250 sqm; residential flat building is 250 sqm |
| Minimum site area for a detached dwelling is 100 sqm; semi-detached dwelling is 100 sqm; row dwelling is 100 sqm; group dwelling is 100 sqm; residential flat building is 100 sqm |
| Minimum site area for a detached dwelling is 1,000 sqm |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 1,000 sqm; group dwelling is 1,000 sqm; residential flat building is 1,000 sqm |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 400 sqm; group dwelling is 500 sqm |
| Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 450 sqm; group dwelling is 1,200 sqm; residential flat building is 450 sqm |
| Minimum site area for a detached dwelling is 120 sqm; semi-detached dwelling is 120 sqm; row dwelling is 120 sqm; group dwelling is 120 sqm; residential flat building is 120 sqm |
| Minimum site area for a detached dwelling is 1,200 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm |
| Minimum site area for a detached dwelling is 125 sqm; semi-detached dwelling is 125 sqm; row dwelling is 125 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm |
| Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm |
| Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm |
| Minimum site area for a detached dwelling is 1,500 sqm |
| Minimum site area for a detached dwelling is 1,500 sqm; group dwelling is 1,500 sqm |
| Minimum site area for a detached dwelling is 160 sqm; semi-detached dwelling is 160 sqm; row dwelling is 160 sqm; group dwelling is 160 sqm; residential flat building is 160 sqm |
| Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 180 sqm; row dwelling is 120 sqm; group dwelling is 150 sqm; residential flat building is 80 sqm |
| Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm |
| Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 230 sqm; semi-detached dwelling is 230 sqm; row dwelling is 230 sqm; group dwelling is 230 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 200 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 220 sqm; row dwelling is 170 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 150 sqm; group dwelling is 175 sqm; residential flat building is 175 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 190 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 220 sqm; group dwelling is 220 sqm; residential flat building is 220 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 250 sqm; group dwelling is 250 sqm |
| Minimum site area for a detached dwelling is 250 sqm; semi-detached dwelling is 250 sqm; row dwelling is 250 sqm; group dwelling is 250 sqm; residential flat building is 250 sqm |
| Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 250 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm |
| Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 270 sqm; semi-detached dwelling is 270 sqm; row dwelling is 270 sqm |
| Minimum site area for a detached dwelling is 300 sqm |
| Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 200 sqm; row dwelling is 180 sqm; group dwelling is 200 sqm; residential flat building is 150 sqm |
| Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 180 sqm; group dwelling is 275 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 220 sqm; row dwelling is 220 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |
| Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; group dwelling is 250 sqm; residential flat building is 120 sqm |
| Minimum site area for a detached dwelling is 300 sqm; semi-detached dwelling is 250 sqm; row dwelling is 200 sqm; group dwelling is 200 sqm; residential flat building is 200 sqm |

|---|
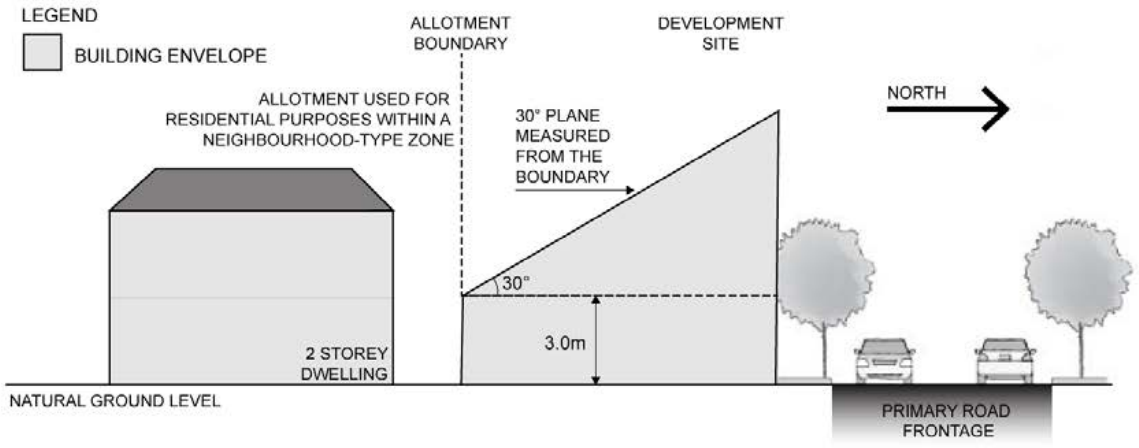
| Minimum finished floor level is 9.85m AHD |
| Minimum finished floor level is 4.64m AHD |

## Part 6.6 Interface Heights



| Interface Height |
|---|
| Buildings constructed within a building envelope provided by a:<br><br>(a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of the allotment where abutting a residential use, or where the allotment is separated by a road less than 6.5 metres in width measured from the residential allotment boundary, within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):<br><br><br><br><br>(b) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): |

| Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a street boundary): |

### Part 6.7 Primary Street Setback

| Minimum Primary Street Setback |
| --- |
| Minimum primary street setback is 0m |
| Minimum primary street setback is 2m |
| Minimum primary street setback is 3m |
| Minimum primary street setback is 4m |
| Minimum primary street setback is 6m |
| Minimum primary street setback is 8m |

### Part 6.8 Side Boundary Setback

| Minimum Side Boundary Setback |
| --- |
| Minimum side boundary setback is 3m |
| Minimum side boundary setback is 2m |
| Minimum side boundary setback is 1m |
| Minimum side boundary setback is 4m |
| Minimum side boundary setback is 1.5m |
| Minimum side boundary setback is 1.5m for the first building level; 2m for any second building level or higher |
| Minimum side boundary setback is 1.5m for the first building level; 3m for any second building level or higher |
| Minimum side boundary setback is 1.5m for the first building level; 4m for any second building level or higher |
| Minimum side boundary setback is 1m for the first building level; 2m for any second building level or higher |
| Minimum side boundary setback is 1m for the first building level; 2.5m for any second building level or higher |
| Minimum side boundary setback is 1m for the first building level; 3m for any second building level or higher |
| Minimum side boundary setback is 2m for the first building level; 4m for any second building level or higher |
| Minimum side boundary setback is 3m for the first building level; 4m for any second building level or higher |
| Minimum side boundary setback is 4m for the first building level; 8m for any second building level or higher |

### Part 6.9 Site Coverage

| Site Coverage |
| --- |
| Maximum site coverage is 50 per cent |
| Maximum site coverage is 70 per cent |
| Maximum site coverage is 65 per cent |
| Maximum site coverage is 60 per cent |
| Maximum site coverage is 45 per cent |
| Maximum site coverage is 40 per cent |
| Maximum site coverage is 35 per cent |
| Maximum site coverage is 33.5 per cent |

### Part 6.10 Gradient Minimum Site Area

| Gradient Minimum Site Area |
| --- |

| Gradient Minimum Site Area |
|---|
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 2000sqm; 1-in-8 to 1-in-4 is 2000sqm; greater than 1-in-4 is 2000sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 500sqm; 1-in-8 to 1-in-4 is 500sqm; greater than 1-in-4 is 500sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 550sqm; 1-in-8 to 1-in-4 is 550sqm; greater than 1-in-4 is 550sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 600sqm; 1-in-8 to 1-in-4 is 700sqm; greater than 1-in-4 is 900sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 625sqm; 1-in-8 to 1-in-4 is 625sqm; greater than 1-in-4 is 625sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 700sqm; 1-in-8 to 1-in-4 is 800sqm; greater than 1-in-4 is 950sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 750sqm; 1-in-8 to 1-in-4 is 750sqm; greater than 1-in-4 is 750sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 1000sqm; 1-in-8 to 1-in-4 is 1000sqm |
| Minimum site area for all dwellings where the site gradient is less than 1-in-8 is 2200sqm; 1-in-8 to 1-in-4 is 2200sqm; greater than 1-in-4 is 2200sqm |

| Gradient Minimum Site Area (Detached) |
|---|
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 1000sqm; 1-in-8 to 1-in-4 is 1000sqm; greater than 1-in-4 is 1000sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 1200sqm; 1-in-8 to 1-in-4 is 1500sqm; greater than 1-in-4 is 2000sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 1500sqm; 1-in-8 to 1-in-4 is 1500sqm; greater than 1-in-4 is 1500sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 1860sqm; 1-in-8 to 1-in-4 is 1860sqm; greater than 1-in-4 is 1860sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 350sqm; 1-in-8 to 1-in-4 is 400sqm; greater than 1-in-4 is 400sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 360sqm; 1-in-8 to 1-in-4 is 360sqm; greater than 1-in-4 is 390sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 420sqm; 1-in-8 to 1-in-4 is 420sqm; greater than 1-in-4 is 420sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 450sqm; 1-in-8 to 1-in-4 is 540sqm; greater than 1-in-4 is 540sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 500sqm; 1-in-8 to 1-in-4 is 1000sqm; greater than 1-in-4 is 2000sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 550sqm; 1-in-8 to 1-in-4 is 550sqm; greater than 1-in-4 is 550sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 560sqm; 1-in-8 to 1-in-4 is 560sqm; greater than 1-in-4 is 560sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 650sqm; 1-in-8 to 1-in-4 is 1200sqm; greater than 1-in-4 is 1200sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 700sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 1100sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 700sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 1200sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 800sqm; 1-in-8 to 1-in-4 is 800sqm; greater than 1-in-4 is 800sqm |
| Minimum site area for detached dwellings where the site gradient is less than 1-in-8 is 900sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 900sqm |

| Gradient Minimum Site Area (Group) |
|---|
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 300sqm; 1-in-8 to 1-in-4 is 300sqm; greater than 1-in-4 is 325sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 300sqm; 1-in-8 to 1-in-4 is 400sqm; greater than 1-in-4 is 400sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 500sqm; 1-in-8 to 1-in-4 is 700sqm; greater than 1-in-4 is 900sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 700sqm; 1-in-8 to 1-in-4 is 1200sqm; greater than 1-in-4 is 1600sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 900sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 900sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 350sqm; 1-in-8 to 1-in-4 is 550sqm; greater than 1-in-4 is 550sqm |
| Minimum site area for group dwellings where the site gradient is less than 1-in-8 is 700sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 1100sqm |

| Gradient Minimum Site Area (Residential Flat) |
|---|
| Minimum site area for residential flat building where the site gradient is less than 1-in-8 is 300sqm; 1-in-8 to 1-in-4 is 300sqm; greater than 1-in-4 is 325sqm |
| Minimum site area for residential flat building where the site gradient is less than 1-in-8 is 300sqm; 1-in-8 to 1-in-4 is 400sqm; greater than 1-in-4 is 400sqm |
| Minimum site area for residential flat building where the site gradient is less than 1-in-8 is 600sqm |
| Minimum site area for residential flat building where the site gradient is less than 1-in-8 is 350sqm; 1-in-8 to 1-in-4 is 550sqm; greater than 1-in-4 is 550sqm |
| Minimum site area for residential flat building where the site gradient is less than 1-in-8 is 900sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 900sqm |

| Gradient Minimum Site Area (Row) |
|---|
| Minimum site area for row dwellings where the site gradient is less than 1-in-8 is 250sqm; 1-in-8 to 1-in-4 is 250sqm; greater than 1-in-4 is 280sqm |
| Minimum site area for row dwellings where the site gradient is less than 1-in-8 is 300sqm; 1-in-8 to 1-in-4 is 350sqm; greater than 1-in-4 is 350sqm |
| Minimum site area for row dwellings where the site gradient is less than 1-in-8 is 450sqm; 1-in-8 to 1-in-4 is 540sqm; greater than 1-in-4 is 540sqm |

| Gradient Minimum Site Area (Semi-detached) |
|---|
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 1860sqm; 1-in-8 to 1-in-4 is 1860sqm; greater than 1-in-4 is 1860sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 350sqm; 1-in-8 to 1-in-4 is 400sqm; greater than 1-in-4 is 400sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 360sqm; 1-in-8 to 1-in-4 is 360sqm; greater than 1-in-4 is 390sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 375sqm; 1-in-8 to 1-in-4 is 375sqm; greater than 1-in-4 is 375sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 450sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 450sqm; 1-in-8 to 1-in-4 is 540sqm; greater than 1-in-4 is 540sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 600sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 650sqm; 1-in-8 to 1-in-4 is 1200sqm; greater than 1-in-4 is 1200sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 850sqm; 1-in-8 to 1-in-4 is 850sqm; greater than 1-in-4 is 850sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 900sqm; 1-in-8 to 1-in-4 is 900sqm; greater than 1-in-4 is 900sqm |
| Minimum site area for semi-detached dwellings where the site gradient is less than 1-in-8 is 350sqm; 1-in-8 to 1-in-4 is 550sqm; greater than 1-in-4 is 550sqm |

## Part 6.11 Gradient Minimum Frontage

| Gradient Minimum Frontage |
|---|
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 10m; 1-in-8 to 1-in-4 is 10m; greater than 1-in-4 is 10m |
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 18m |
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 25m; 1-in-8 to 1-in-4 is 25m; greater than 1-in-4 is 25m |
| Minimum frontage for all dwellings where the site gradient is less than 1-in-8 is 45m; 1-in-8 to 1-in-4 is 45m; greater than 1-in-4 is 45m |

| Gradient Minimum Frontage (Detached) |
|---|
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 10m; 1-in-8 to 1-in-4 is 12m; greater than 1-in-4 is 12m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 12m; greater than 1-in-4 is 12m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 20m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 21m; greater than 1-in-4 is 30m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 14m; 1-in-8 to 1-in-4 is 14m; greater than 1-in-4 is 14m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 15m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 24m; 1-in-8 to 1-in-4 is 24m; greater than 1-in-4 is 24m |
| Minimum frontage for detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 25m |

| Gradient Minimum Frontage (Group) |
|---|
| Minimum frontage for group dwellings where the site gradient is 1-in-8 to 1-in-4 is 25m; greater than 1-in-4 is 25m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 12m; greater than 1-in-4 is 12m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 20m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m |
| Minimum frontage for group dwellings where the site gradient is less than 1-in-8 is 24m; 1-in-8 to 1-in-4 is 26m; greater than 1-in-4 is 26m |

| Gradient Minimum Frontage (Residential Flat) |
|---|
| Minimum frontage for residential flat building where the site gradient is less than 1-in-8 is 11m |

| Gradient Minimum Frontage (Residential Flat) |
|---|
| Minimum frontage for residential flat building where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for residential flat building where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for residential flat building where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m |
| Minimum frontage for residential flat building where the site gradient is less than 1-in-8 is 25m; 1-in-8 to 1-in-4 is 25m; greater than 1-in-4 is 25m |

| Gradient Minimum Frontage (Row) |
|---|
| Minimum frontage for row dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 15m |
| Minimum frontage for row dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for row dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for row dwellings where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m |
| Minimum frontage for row dwellings where the site gradient is less than 1-in-8 is 9m; 1-in-8 to 1-in-4 is 10m; greater than 1-in-4 is 10m |

| Gradient Minimum Frontage (Semi-detached) |
|---|
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 10m; 1-in-8 to 1-in-4 is 10m; greater than 1-in-4 is 10m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 10m; 1-in-8 to 1-in-4 is 12m; greater than 1-in-4 is 12m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 11m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 12m; 1-in-8 to 1-in-4 is 12m; greater than 1-in-4 is 12m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 15m; greater than 1-in-4 is 15m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 24m; 1-in-8 to 1-in-4 is 24m; greater than 1-in-4 is 24m |
| Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 9m |

### Part 6.12 Minimum Dwelling Allotment Size

| Minimum Dwelling Allotment Size |
|---|
| Minimum dwelling allotment size is 10 ha |

| Minimum future local road widening setback is 6m |

## Part 7 - Land Use Definitions

### Land Use Terms

The following table lists terms which may be used in this Planning and Design Code in relation to the use of land.

### Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B.

### Inclusions and Exclusions

Land uses and activities set out in Column C are to be taken as being **included** in the meaning of the land use term set out in Column A.

Land uses and activities set out in Column D are to be taken as being **excluded** from the meaning of the land use term set out in Column A.

In the event of any inconsistency Column D prevails over Column C.

### Ancillary and Subordinate

Unless stated to the contrary, a term set out in the following table which purports to define a form of land use will be taken to include a use which is ancillary and subordinate to that defined use.

### No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

### Land Use Definitions Table

| Land Use Term (Column A) | Definition (Column B) | Includes (Column C) | Excludes (Column D) |
|---|---|---|---|
| Adult entertainment premises | Means a premises used for the exhibition, display, or performance of any entertainment or act which is sexually explicit such as nude dancing or lap dancing, and to which admittance by minors is restricted by law but does not include a personal or domestic services establishment | | Personal or domestic services establishment; Shop. |

| | | | |
|---|---|---|---|
| Adult products and services premises | Means a premises used for the sale, exchange, hire, exhibition, loan, delivery or display, or to otherwise render accessible or available to the public, sexually explicit material including:<br>(a) publications classified as restricted or prohibited under the *Classification (Publications, Films and Computer Games) Act 1995*; and/or<br>(b) material compounds, objects or devices (other than contraception and medical treatments) designed to be used in connection with sexual behaviour or activities; and/or<br>(c) films, video films or tapes, any other form of optical or electronic records from which a visual image may be produced or any other pictorial matter, the sale, delivery, exhibition, advertisement or display of which is restricted or prohibited under the *Classification (Publications, Films and Computer Games) Act 1995*.<br>It does not include premises used for prostitution. | | Personal or domestic services establishment;<br>Shop. |
| Affordable housing | Means housing that meets the relevant criteria for 'affordable housing' as determined by the Minister responsible for the *South Australian Housing Trust Act 1995* under Regulation 4 of the South Australian Housing Trust Regulations 2010. | | |
| Agricultural building | Means a building used wholly or partly for purposes associated with farming, commercial forestry, intensive animal husbandry, dairying or horticulture, or to support the operations of that use, but does not include frost fans or a building used wholly or partly for any of the following:<br>(a) the processing or packaging of commodities<br>(b) the housing of animals for the purposes of intensive animal husbandry<br>(c) the purposes of a dairy. | Farm shed;<br>Farm silo;<br>Horticultural shed;<br>Hay shed;<br>Implement shed;<br>Pump shed | Dairy;<br>Dwelling;<br>Industry;<br>Intensive animal husbandry;<br>Office;<br>Outbuilding;<br>Shop |
| Ancillary accommodation | Means accommodation that:<br>(a) is located on the same site as an existing dwelling and is ancillary to that dwelling; and<br>(b) can be (but need not be) self-contained; and<br>(c) contains no more than 2 bedrooms or rooms or areas capable of being used as a bedroom. | | Dwelling;<br>Tourist Accommodation |
| Animal keeping | Means the boarding (short or long term), keeping, breeding or training of animals, except horses and/or commercially kept livestock. | Dog kennelling<br>Catteries | Aquaculture;<br>Farming;<br>Horse keeping;<br>Intensive animal husbandry;<br>Low intensity animal husbandry |
| Aquaculture | Has the same meaning as in the Aquaculture Act 2001. | | Intensive animal husbandry. |
| Automotive collision repair | Means repairs to motor vehicles involving structural repairs, panel beating, replacement of vehicle body parts or spray painting. | | Motor repair station |
| Bulky goods outlet | Means premises used primarily for the sale, rental, display or offer by retail of goods, other than foodstuffs, clothing, footwear or personal effects goods, unless the sale, rental, display or offer by retail of the foodstuffs, clothing, footwear or personal effects goods is incidental to the sale, rental, display or offer by retail of other goods. Examples— The following are examples of goods that may be available or on display at bulky goods outlets or retail showrooms:<br>(a) automotive parts and accessories;<br>(b) furniture;<br>(c) floor coverings;<br>(d) window coverings;<br>(e) appliances or electronic equipment;<br>(f) home entertainment goods;<br>(g) lighting and electric light fittings;<br>(h) curtains and fabric;<br>(i) bedding and manchester;<br>(j) party supplies;<br>(k) animal and pet supplies;<br>(l) camping and outdoor recreation supplies;<br>(m) hardware;<br>(n) garden plants (primarily in an indoor setting);<br>(o) office equipment and stationery supplies;<br>(p) baby equipment and accessories;<br>(q) sporting, fitness and recreational equipment and accessories;<br>(r) homewares;<br>(s) children's play equipment. | | |
| Caravan and tourist park | Means land used to provide short-term accommodation in caravans, recreational vehicles (RVs), cabins, tents and other similar demountable forms of shelter in a managed setting. | | Residential park |
| Child care facility | Means a place primarily for the care or instruction of children of less than primary school age, children with special needs or out-of-school-hours care (including vacation care) and not resident on the site. | Child care centre;<br>Early learning centre;<br>Kindergarten;<br>Nursery;<br>Pre-school. | |
| Co-living | Means a building used for residential accommodation that:<br>(a) contains 6 or more residences that do not include either a full kitchen (provision for a sink, fixed oven, food preparation area and full-sized fridge) for its exclusive use or a full bathroom (provision for a bath or shower, toilet, and a wash basin) for its exclusive use;<br>and<br>(b) includes common facilities for shared use including at a minimum:<br>(i) shared cooking facilities where a full kitchen is not provided in residences;<br>(ii) shared bathroom facilities where a full bathroom is not provided in residences;<br>(iii) common rooms and/or recreation areas. | | Ancillary accommodation;<br>Co-located housing;<br>Dwelling<br>Student accommodation<br>Supported accommodation |
| Co-located Housing | Means a group of 2 or more dwellings contained on land within the Co-located Housing Overlay that:<br>(a) each occupy an allotment created or proposed to be created under the *Community Titles Act 1996* and are subject to a community scheme description; and<br>(b) comprises and retains (with or without alteration/modification) all established dwellings on the site of the proposed development; and<br>(c) incorporates communal open space that is accessible to all dwellings within the site of the proposed development; and<br>(d) may also comprise other common areas and / or facilities for shared use by all occupants including (but not limited to):<br>(i) a common building that includes facilities such as a shared kitchen, dining and / or living facilities<br>(ii) shared laundry facilities<br>(iii) shared car parking. | | Ancillary accommodation;<br>Co-living;<br>Group dwelling;<br>Residential flat building |
| Commercial forestry | Means the practice of planting and managing plantation forests that are to be harvested for wood products or used for other commercial purposes, including through the commercial exploitation of the carbon absorption capacity of the forest. | | Horticulture;<br>Cropping;<br>Farming. |
| Community facility | Means premises used for the provision of social, artistic, educational or community support services to the public but does not include a child care facility, educational facility, place of worship or indoor recreation facility. | Library;<br>Community hall. | Educational facility;<br>Place of worship;<br>Child care facility;<br>Indoor recreation facility |
| Consulting Room | Means a building or part of a building (not being a hospital) used in the practice of a profession by a medical, veterinary or dental practitioner, or a practitioner in any curative science, in the provision of medical services, mental, moral or family guidance, but does not involve any overnight accommodation other than for animals that are recovering from surgery, medical care or in for observation as part of a veterinary practice. | | |
| Cropping | Means propagating, cultivating and/or harvesting of grains, cereals, oilseeds, lupins, legumes, hops, hemp, hay, lucerne or other similar plants or plant products for commercial production. | | Commercial forestry;<br>Horticulture;<br>Mushroom production. |
| Dairy | Means a building or part of a building used for all or any of the operations of commercial milk production (whether mechanical or otherwise) and includes a milking shed, milk room, wash room or engine room. | | |
| Detached dwelling | Means a detached building comprising 1 dwelling on its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation | | |
| Dwelling | Means a building or part of a building used as a self-contained residence. | | Ancillary accommodation |
| Educational facility | Means a primary school, secondary school, reception to year 12 school, college, university or technical institute, and includes an associated child care facility or institution for the care and maintenance of children. | | Trade training facility |
| Electricity substation | Means:<br>(a) works for the conversion, transformation or control of electricity by 1 or more transformers, or by any switchgear or other equipment;<br>or<br>(b) any equipment, building, structure or other works ancillary to or associated with works referred to in paragraph (a), other than any such works:<br>(i) that are mounted on a pole;<br>or<br>(ii) that are wholly enclosed in a weather-proof enclosure not exceeding $8.5m^3$;<br>or<br>(iii) that are incidental to any lawful use of the land which the works are situated. | | |

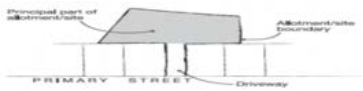
| | | | |
|---|---|---|---|
| Emergency services facility | Means premises used for the provision of essential emergency or disaster management services. The use may include administrative, operational or storage facilities associated with the provision of emergency or disaster management services. | Ambulance station;<br>Emergency management support facility;<br>Evacuation centre;<br>Fire station;<br>Police station;<br>State emergency services facility. | Hospital;<br>Residential care;<br>Supported accommodation. |
| Farming | Means cropping, grazing or low intensity animal husbandry. | Cropping;<br>Grazing;<br>Low intensity animal husbandry. | Animal keeping;<br>Commercial forestry;<br>Horse keeping;<br>Horticulture;<br>Intensive animal husbandry;<br>Mushroom production. |
| Fuel depot | Means land used primarily for the storage of petrol, gas, oils or other petroleum products and within or upon which no retail trade is conducted. | | |
| Function venue | Means premises used primarily for the hosting of events, conferences, conventions, receptions or functions. | | |
| General industry | Means any industry other than a light industry or special industry. | | |
| Group dwelling | Means 1 of a group of 2 or more detached buildings, each of which is used as a dwelling and 1 or more of which has a site without a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current development authorisation but does not include a building that is part of co-located housing. | | Co-located Housing |
| Heavy vehicle parking | Means the parking of any vehicle exceeding 3000 kg in weight (including the weight of any attached trailer) on land used for residential purposes. | | |
| Home care | Has the same meaning as in the *Commonwealth Aged Care Act 1997*. | | |
| Horse keeping | Means the keeping or husbandry of horses where more than 1 horse is kept per 3ha of land used for such purposes. | | |
| Horticulture | Means the use of land for market gardening, viticulture, floriculture, orchards, wholesale plant nurseries or commercial turf growing. | | Commercial forestry;<br>Mushroom production. |
| Hotel | Means premises licensed, or proposed to be licensed as a general and hotel licence under the *Liquor Licensing Act 1997*. | | |
| Indoor recreation facility | Means a building or part of a building designed or adapted primarily for recreation or fitness pursuits. | Bowling alley;<br>Squash courts;<br>Fitness centre;<br>Gymnasium;<br>Pilates studio;<br>Yoga studio;<br>Dance studio;<br>Indoor swimming centre;<br>Indoor trampoline centre;<br>Indoor rock climbing centre;<br>Indoor children's play centre;<br>Indoor skating rink. | |
| Industry | Means the carrying on, in the course of a trade or business, of any process (other than the generation of electricity using a renewable energy source or a process in the course of farming or mining) for, or incidental to:<br>(a) the making of any article, ship or vessel, or of part of any article, ship or vessel; or<br>(b) the altering, repairing, ornamenting, finishing, assembling, cleaning, washing, packing, bottling, canning or adapting for sale, or the breaking up or demolition, of any article, ship or vessel; or<br>(c) the getting, dressing or treating of materials.<br>The use may include:<br>(d) selling by wholesale of goods manufactured on site<br>(e) selling by retail of goods manufactured on site, provided the total floor area occupied for such sale does not exceed 250m$^2$ (and industrial will be construed accordingly). | General industry;<br>Light industry;<br>Special industry | |
| Intensive animal husbandry | Means the commercial production of animals or animal products where the animals are kept in enclosures or other confinement and their main food source is introduced from outside the enclosures or area of confinement in which they are kept. | Broiler shed;<br>Feedlot;<br>Poultry hatchery;<br>Piggery;<br>Poultry battery. | Animal keeping;<br>Apiculture;<br>Aquaculture;<br>Horse keeping;<br>Low intensity animal husbandry;<br>Stock sales yard. |
| Landfill | Land used for the receipt and controlled disposal of refuse through burial and/or spreading over land. | | |
| Light industry | Means an industry where the process carried on, the materials and machinery used, the transport of materials, goods or commodities to and from the land on or in which (wholly or in part) the industry is conducted and the scale of the industry does not:<br>(a) detrimentally affect the amenity of the locality or the amenity within the vicinity of the locality by reason of the establishment or the bulk of any building or structure, the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil, spilled light, or otherwise howsoever; or<br>(b) directly or indirectly cause dangerous or congested traffic conditions in any nearby road. | | |
| Low intensity animal husbandry | Means the commercial production of animals or animal products (eg meat, wool) on either native or improved pastures or vegetation where the animal's main food source is obtained by grazing or foraging. | Grazing; | Animal keeping;<br>Aquaculture;<br>Horse keeping;<br>Intensive animal husbandry. |
| Motor repair station | Means any land or building used for carrying out repairs, servicing and/or maintenance (other than panel beating or spray painting) to motor vehicles and / or farm machinery. | | Automotive collision repair |
| Mushroom production | Means the commercial production of mushrooms or any other type of fungi. | | |
| Office | Means any building or part of a building used for administration or the practice of a profession, but does not include a consulting room or premises where materials are stored for sale or manufacture. | | Consulting room. |
| Organic waste processing facility | Means the commercial processing of organic waste by composting, mulching, shredding, grinding or similar process into organic material for use as mulch, soil improver, growing medium or the like. | | |
| Outbuilding | Means a non-habitable detached building on the same site as a main building which is ancillary and subordinate to the main building and has a use and function which relates to the main building, but does not include a private bushfire shelter. | | Private bushfire shelter. |
| Personal or domestic services establishment | Means premises used for the provision of personal or domestic services catering to the needs of customers, which are related to the care and/or appearance of the individual, the cleaning and/or grooming of pets, or the cleaning and/or repair of personal effects:<br>Examples- The following are examples of services that may be available at a personal or domestic services establishment:<br>(a) clothing repair and alterations;<br>(b) cutting, trimming, waxing, shaving, colouring, dyeing and styling hair;<br>(c) piercing and tattooing;<br>(d) domestic pet grooming;<br>(e) manicures and pedicures;<br>(f) non-surgical cosmetic procedures;<br>(g) personal care procedures;<br>(h) self-service clothes laundering;<br>(i) shoe repair;<br>(j) watch repair.<br>For the purposes of this definition, 'personal effects' does not include vehicles, boats, caravans, trailers or similar articles. | | Adult entertainment premises;<br>Adult products and services premises;<br>Car wash;<br>Consulting room;<br>Office;<br>Financial institute. |
| Place of worship | Means premises used by an organised group for worship and religious activities.<br>The use may include facilities for social, educational and charitable activities associated with the congregation. | Chapel;<br>Church;<br>Mosque;<br>Synagogue;<br>Temple. | Funeral parlour. |
| Protective tree netting structure | Means netting and any associated structure that:<br>(a) is designed to protect trees or plants grown for the purpose of commercial horticulture; and<br>(b) consists of a netting canopy attached to a structure (such as poles and cables). | | |
| Public service depot | Means land used for storage and operations connected with the provision of public services (including gas, electricity, water supply, sewerage, drainage, roadworks or telecommunication services) by a body responsible for the provision of those services. | | |
| Recreation area | Means any park, garden, children's playground or sports ground that is under the care, control and management of the Crown or a council, and is open to the public without payment of a charge. | Outdoor public sports courts;<br>Public ovals and fields. | Golf course. |
| Renewable energy facility | Means land and/or water used to generate electricity from a renewable source such as wind, solar, tidal, hydropower, biomass and/or geothermal.<br>This use may also include:<br>(a) any associated facility for the storage and/or transmission of the generated electricity;<br>(b) any building or structure used in connection with the generation of electricity. | Battery storage facility;<br>Hydropower or pumped hydropower facility;<br>Solar power facility;<br>Wave power generator;<br>Wind farm | |
| Replacement building | The construction of a new building in the same, or substantially the same, position as a building which was demolished within the previous 3 years and has the same, or substantially the same, layout and external appearance as the previous building. | | |
| Residential care | Has the same meaning as in the *Commonwealth Aged Care Act 1997*. | | |
| Residential flat building | Means a single building in which there are 2 or more dwellings but does not include a building that is part of co-located housing. | | Co-located Housing;<br>Group dwelling;<br>Row dwelling;<br>Semi-detached dwelling; |
| Residential park | Means a residential park operating under the regulatory framework of the *Residential Parks Act 2007*. | | Caravan and tourist park; |
| Restaurant | Means land used primarily for the consumption of meals on the site. | | |

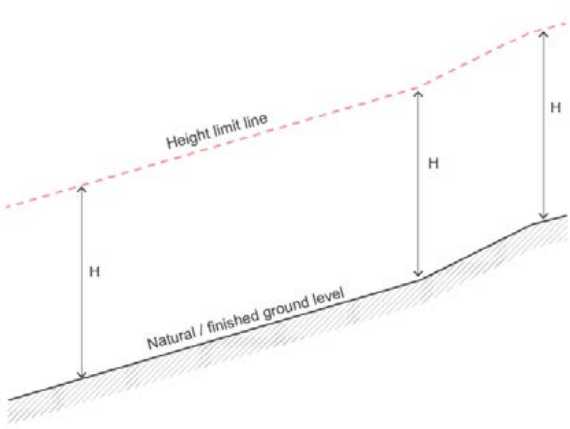
| | | | |
|---|---|---|---|
| Retail fuel outlet | Means land used for:<br>(a) the fuelling of motor vehicles involving the sale by retail of petrol, oil, liquid petroleum gas, automotive distillate and any other fuels; and<br>(b) the sale by retail of food, drinks and other convenience goods for consumption on or off the land; and<br>both are operated as and constitute one integrated facility where on-site facilities, systems and processes, car parking and access and egress are all shared.<br>The use may also include one or more of the following secondary activities:<br>(c) the washing and cleaning of motor vehicles<br>(d) the washing of other equipment or things including dogs and other pets<br>(e) the provision (on a paid or free basis) of facilities for charging electric vehicles<br>(f) the hiring of trailers<br>(g) selling of motor vehicle accessories and/or parts<br>(h) the installation of motor vehicle accessories and/or parts. | | Fuel depot;<br>Motor repair station. |
| Retirement facility | Means a facility operating under the regulatory framework of the *Retirement Villages Act 2016.* | | |
| Row dwelling | Means a dwelling:<br>(a) occupying its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation; and<br>(b) comprising 1 of 3 or more dwellings erected side by side, joined together and forming, by themselves, a single building. | | |
| Sales office | Means the use of an existing building or premises for a temporary period of no more than 2 years to display land parcels or buildings that are for sale, proposed to be sold, or can be won as a prize in a competition. | | Office |
| Semi-detached dwelling | Means a dwelling:<br>(a) occupying its own site and has a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current planning authorisation; and<br>(b) comprising 1 of 2 dwellings erected side by side, joined together and forming, by themselves, a single building. | | |
| Service trade premises | Means premises used primarily for the sale, rental or display of any of the following:<br>(a) basic plant, equipment or machinery used in agriculture or industry; or<br>(b) boats; or<br>(c) caravans and recreational vehicles (RVs); or<br>(d) domestic garages; or<br>(e) sheds; or<br>(f) outbuildings; or<br>(g) motor vehicles; or<br>(h) marquees; or<br>(i) trailers; or<br>(j) swimming pools, equipment and accessories; or<br>(k) building materials in bulk supply; or<br>(l) landscaping materials; or<br>(m) garden plants (primarily in an outdoor setting); or<br>(n) agricultural supplies such as agricultural chemicals, fertilisers, seed and animal feed; or<br>(o) rainwater tanks and irrigation supplies;<br>or similar articles or merchandise.<br>The use may also include the servicing and repair of any of the listed items (but not vehicle panel beating or spray painting). | Motor vehicle showroom;<br>Used car yard. | Bulky goods outlet. |
| Shop | Means:<br>(a) premises used primarily for the sale by retail, rental or display of goods, foodstuffs, merchandise or materials; or<br>(b) a personal or domestic services establishment. | Bulky goods outlet;<br>Personal or domestic services establishment;<br>Restaurant | Adult entertainment premises;<br>Adult products and services premises;<br>Hotel;<br>Motor repair station;<br>Retail fuel outlet;<br>Service trade premises;<br>Wholesale plant nursery |
| Special Industry | Means an industry where the processes carried on, the methods of manufacture adopted or the particular materials or goods used, produced or stored, are likely to:<br>(a) cause or create dust, fumes, vapours, smells or gases; or<br>(b) discharge foul liquid or blood or other substance or impurities liable to become foul,<br>and thereby:<br>(c) endanger, injure or detrimentally affect the life, health or property of any person (other than any person employed or engaged in the industry); or<br>(d) produce conditions which are, or may become, offensive or repugnant to the occupiers or users of land in the locality of or within the vicinity of the locality of the land on which (whether wholly or partly) the industry is conducted. | | |
| Stock sales yard | Means land or premises used for the commercial conduct of buying and selling of livestock. | | Stock slaughter works. |
| Stock slaughter works | Means a building or part of a building, or land used primarily for slaughter of stock (including camels, goats and deer) or poultry,<br>This use may also include:<br>(a) the keeping of animals prior to slaughter on site<br>(b) processing of animal products for human or animal consumption. | | Retail butcher. |
| Store | Means a building or enclosed land used for the storage of goods and within or upon which no trade (whether wholesale or retail) or industry is carried on. | | Junk yard;<br>Outbuilding;<br>Public service depot. |
| Student accommodation | Mean premises used to accommodate students in room or dormitory style accommodation that can be (but need not be) self-contained and that includes common facilities for shared use by student occupants such as:<br>(a) shared cooking facilities and/or the provision of meals;<br>(b) common rooms and recreation areas;<br>(c) shared laundry facilities or a laundry service; or<br>(d) shared bathroom facilities. | | Co-living;<br>Dwelling;<br>Residential flat building. |
| Supported accommodation | Means premises in which residential accommodation is provided to persons requiring/together with regular medical and/or personal care assistance, but does not include home care. | Nursing home;<br>Residential care | Hospital;<br>Retirement facility. |
| Telecommunications facility | Means a facility within the meaning of the *Commonwealth Telecommunications Act 1997*. | | |
| Temporary accommodation in an area affected by bushfire | Means the construction or placement of a building or structure on land on which a dwelling, or part of a dwelling, has been destroyed or significantly damaged by a bushfire if:<br>(a) the building or structure is to be used as accommodation by the owner of the land and<br>(b) the building or structure is a minimum of 20 metres from any remaining or regenerating cluster of vegetation (whether that vegetation is on the land or on adjoining land) and<br>(c) the owner of the land complies with any requirements of the South Australian Country Fire Service relating to the maintenance of a clearance area between the temporary accommodation and any remaining or regenerating cluster of vegetation and<br>(d) the building or structure is to be used as accommodation:<br>(i) for a period not exceeding 2 years or<br>(ii) until a Class 1a building on the land is able to be occupied in accordance with regulation 103 of the Planning, Development and Infrastructure (General) Regulations 2017,<br>whichever occurs first. | | |
| Tourist accommodation | Means premises in which temporary or short-term accommodation is provided to travellers on a commercial basis.<br>This use may also include:<br>(a) onsite services and facilities primarily for the use by guests;<br>(b) facilities for the management of the accommodation. | Caravan and tourist park | Campground;<br>Residential Park |
| Trade training facility | Means land used for the provision of education and training in trade, construction, earthmoving or similar related activities and includes one or more of the following activities:<br>(a) operation of heavy machinery, trench shoring equipment and/or earthmoving equipment<br>(b) operation of moving and/or lifting equipment or processes | | Educational facility |

| | | | |
|---|---|---|---|
| | (c) the process of cutting and/or finishing of materials. | | |
| Warehouse | Means a building or enclosed land used for the storage of goods and the carrying out of commercial transactions involving the sale of such goods, but does not include any land or building used for sale by retail. | | Store |
| Wind farm | Means land used to generate electricity from wind force with wind turbine generators.<br>This use may also include:<br>(a) any associated facility for the storage and/or transmission of the generated electricity;<br>(b) any building or structure used in connection with the generation of electricity including a wind turbine, substation, maintenance shed, access road or wind monitoring mast.<br>The use does not include a wind farm principally used to supply and/or store electricity to an existing use of land (e.g., domestic wind generator). | | |
| Workers' accommodation | Means premises used to accommodate workers on a temporary basis while they carry out employment:<br>(a) on the same site as the workers' accommodation; or<br>(b) in mining or petroleum extraction; or<br>(c) in seasonally intensive rural activities including fruit picking, pruning, animal shearing, meat processing, bulk handling or freight handling; or<br>(d) in the construction of essential infrastructure; or<br>(e) in seasonally intensive hospitality, tourist development or tourist accommodation activities. | Mining camp;<br>Road workers camp;<br>Shearing quarters;<br>Railway workers camp | Tourist accommodation. |

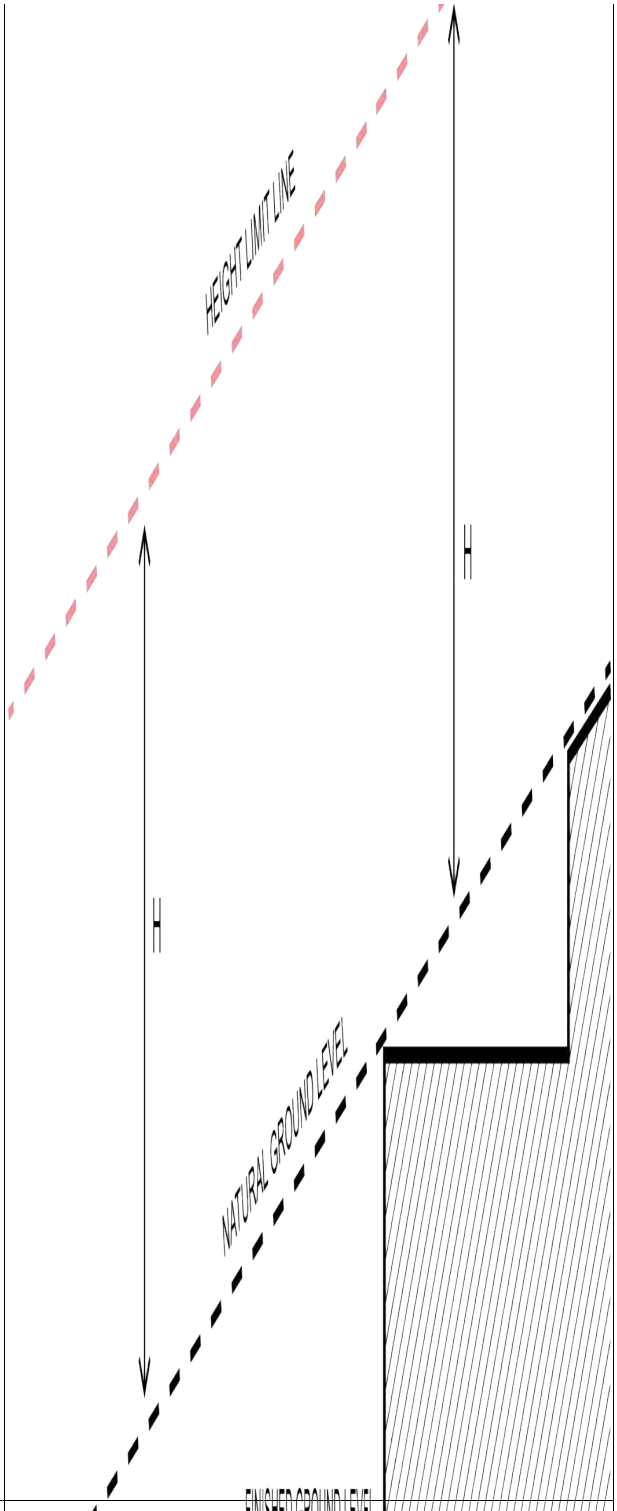
## Part 8 - Administrative Terms and Definitions

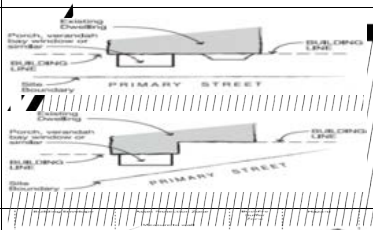
The following table lists terms which may be used to assist with the interpretation of policy used in the Planning and Design Code.



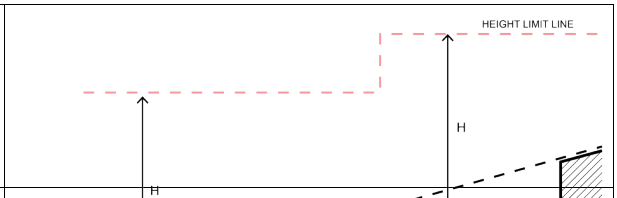


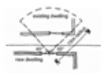
### Meaning of Terms

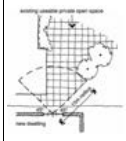


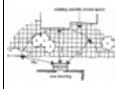


A term listed in Column A has the meaning set out beside that term in Column B. Column C contains, where applicable, illustrations to assist with the interpretation of the meaning provided in Column B.

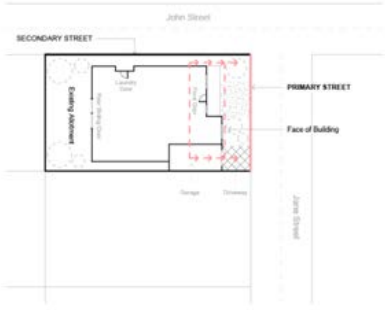








### No Definition



A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

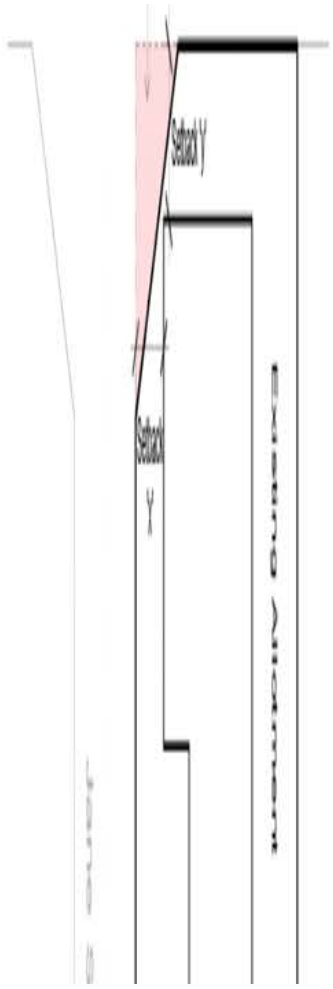
### Administrative Terms and Definitions Table

| Term (Column A) | Definition (Column B) | Illustrations (Column C) |
|---|---|---|
| Accessible car parking place | Means a parking place designed in accordance with AS/NZS 2890.6-2009 Parking facilities Off-street parking for people with disabilities. | |
| Activity centre | Means land contained in a Local Activity Centre Zone, Suburban Activity Centre Zone, Suburban Main Street Zone, Township Activity Centre Zone, Township Main Street Zone, Urban Activity Centre Zone, Urban Corridor (Main Street) Zone, Urban Corridor Living Retail Subzone, Urban Neighbourhood Retail Subzone, Activity Node Subzone, Retail Activity Centre Subzone or in relation to the Emerging Activity Centre Subzone or Emerging Main Street Subzone in the Master Planned Neighbourhood Zone or the Emerging Township Activity Centre Subzone in the Master Planned Township Zone, either:<br>(a) land identified for the purposes of an activity centre on a building envelope plan<br>(b) an activity centre nominated on a Concept Plan in Part 12 of the Code. | |
| AEP | Means annual exceedance probability | |
| AHD | Means Australian Height Datum. | |
| ANEF | Means Australian Noise Exposure Forecast. | |
| Asset protection zone | In relation to bushfire protection, means an area generally clear of vegetation that is maintained to minimise the spread of fire between areas of hazardous vegetation and habitable buildings.<br>Asset protection zones may incorporate features such as driveways, vegetable gardens or landscaped gardens incorporating deciduous trees and fire-retardant plant species.<br>Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes. |  |
| Battle-axe allotment | Means an allotment or site that comprises:<br>(a) a driveway or 'handle' (and any related open space) that leads back from a road to the balance of the allotment or site; and<br>(b) a balance of the allotment or site that is the principal part of the allotment or site and that does not have a boundary with a road. | <br>Note: Battle-axe allotments are often referred to as 'hammerhead' or 'flagpole' allotments. |
| Building envelope plan | Means a building envelope plan that has been approved under the Planning, Development and Infrastructure (General) Regulations 2017, has been published on the SA planning portal by the Chief Executive, and applies in relation to the site where the relevant development is proposed to be situated. | |
| Building height | Means the maximum vertical distance between the reference point at any point of any part of a building and the finished roof height at its highest point immediately above the reference point, ignoring any antenna, aerial, chimney, flagpole or the like or any lift overruns or stairwell protrusions that are used for maintenance purposes only. For the purposes of this definition, building does not include any of the following:<br>(a) flues connected to a sewerage system<br>(b) telecommunications facility tower or monopole<br>(c) electricity pole or tower<br>(d) or any similar structure.<br>NOTE: for the purposes of this definition, reference point means the lower of the natural or finished ground level or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) |  |

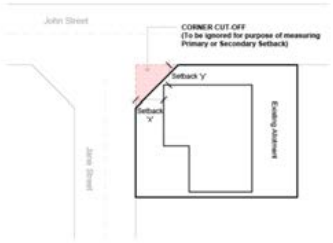
| | | |
|---|---|---|
| | |  |
| Building level | Means that portion of a building which is situated between the top of any floor and the top of the next floor above it, and if there is no floor above it, that portion between the top of the floor and the ceiling above it. It does not include any mezzanine or any building level having a floor that is located 1.5m or more below finished ground level. | |
| Building line | In relation to a building on a site, means a line drawn parallel to the wall of the building closest to the boundary of the site that faces the primary street and any existing projection from that wall of the building such as a verandah, porch, balcony, awning or bay window is not to be taken to form part of the building for the purposes of determining the relevant wall of the building. |  |
| Bushfire buffer zone | In relation to bushfire protection, means an area of land designed to isolate residential allotments from areas that pose a bushfire risk such as areas with rugged terrain or hazardous vegetation.<br><br>Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes. |  |
| Catalyst site | Means a site greater than 1500m$^2$, which may include one or more allotments | NATURAL GROUND LEVEL AS REFERENCE POINT |
| Central site | Means the site of a row dwelling or dwelling in a terrace arrangement that does not share a side boundary with an allotment outside of the development site. | |
| Class 1 activity | Has the same meaning as in the *Practice Direction 14 Site Contamination Assessment* | |
| Class 2 activity | Has the same meaning as in the *Practice Direction 14 Site Contamination Assessment* | |

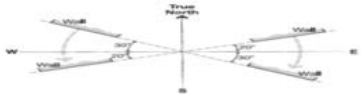
| | | |
|---|---|---|
| Communal open space | Means open space shared by more than one dwelling, but is not publicly accessible.<br><br>It excludes any of the following:<br><br>(a) private open space<br>(b) public rights of way<br>(c) private streets<br>(d) parking areas and driveways;<br>(e) service and storage areas<br>(f) land with a minimum dimension less than 2.0m. |  |
| Community wastewater management system | Means a system for the collection and management of wastewater generated in a town, regional or other community. | |
| Defence aviation area | Has the same meaning as in the Commonwealth *Defence Act 1903*. | |
| Direct overlooking | In relation to direct overlooking from a window, is limited to an area that falls within a horizontal distance of 15 metres measured from the centre line of the overlooking window and not less than 45 degree angle from the plane of that wall containing the overlooking window.<br><br>In relation to direct overlooking from a deck, balcony or terrace, is limited to an area that falls within a horizontal distance of 15 metres measured from any point of the overlooking deck, balcony or terrace. | Overlooking window<br><br>FINISHED GROUND LEVEL AS REFERENCE POINT<br><br>Overlooking deck, balcony or terrace<br><br> |
| EPA Licence | Means an activity requiring a licence under the *Environment Protection Act 1993* (and this will determine the applicable referral fee under the 'Chief Executive Schemes and Requirements as to the Payment and Distribution of Fees under the Planning, Development and Infrastructure (Fees, Charges and Contributions) Regulations 2019') | |
| Exceedances per year (EY) | Means the number of times an event is likely to occur or be exceeded within any given year. | |
| Excluded boundary | Means, for the purposes of Table 5 – Procedural Matters (PM) – Notification, an allotment boundary where the allotment and the adjoining allotment are both part of the development site. | |
| Excluded building | Means, for the purposes of Table 5 - Procedural Matters (PM) - Notification, a building, structure or landscape feature (or part thereof) that is:<br><br>(a) in an area established as a State Heritage Area under the *Heritage Places Act 1993* and the relevant authority is of the opinion that the building, structure or landscape feature (or part thereof) does not contribute to the buildings or features of identified heritage value within the State Heritage Area; or<br>(b) in a Historic Area Overlay and the building (or part thereof):<br>(i) is an ancillary building; or<br>(ii) in the opinion of the relevant authority, does not demonstrate the historic characteristics as expressed in the Historic Area Statement; or<br>(c) on the same site as a State or Local Heritage Place but is not an element of the relevant listing in Part 11 of the Code and/or the South Australian Heritage Register.<br><br>Notes:<br><br>1. For the purposes of this definition, building, structure or landscape feature does not include a building, structure or landscape feature that is specifically listed in Part 11 of the Code as a Local Heritage Place or a State Heritage Place in the South Australian Heritage Register.<br><br>2. The application of Part (c) is subject to the heritage listing being specifically clear that the element does not form part of the heritage place. | |
| Excluded land division | Means land division that reflects the site boundaries, common property and easement requirements illustrated and approved in an operative or existing development authorisation for residential development under the *Development Act 1993* or *Planning, Development and Instructure Act 2016.* | |
| FFL | Means finished floor level. | |
| Gross leasable floor area | Means the total floor area of a building excluding public or common tenancy areas such as malls, hallways, verandahs, public or shared tenancy toilets, common storage areas and loading docks. | |
| Groundwater | Means water that is naturally contained beneath the surface of the ground. | |
| Habitable room | Means any room used for domestic purposes other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, stair, dedicated corridor/hallway, lobby, clothes drying room or other space of a specialised nature occupied neither frequently nor for extended periods. | |
| Heritage agreement | In relation to State Heritage, is an agreement that is registered under section 34 of the *Heritage Places Act 1993*. | |
| High frequency public transit area | A site that is wholly located within Metropolitan Adelaide and satisfies one or more of the following:<br><br>(a) is within 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service (2)<br>(b) is within 400 metres of a bus interchange (1)<br>(c) is within 400 metres of an O-Bahn interchange (1)<br>(d) is within 400 metres of a passenger rail station (1)<br>(e) is within 400 metres of a passenger tram station (1)<br>(f) is within 400 metres of the Adelaide Parklands.<br><br>[NOTE(S): (1) Measured from an areas that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7:30am and 6:30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.] | |
| High net residential density | Means greater than 70 dwelling units per hectare. | |
| High-rise | In relation to development, means 7 building levels and above. | |
| Hours of operation | Means the hours that a land use is open to the public or conducting activities related to the land use, not including administration or routine activities normally associated with opening and closing or start up and shut down. | |
| Human wastewater | Has the same meaning as in the *Environment Protection (Water Quality) Policy 2015*. | |
| Liquid waste | Means waste classified as liquid waste in accordance with the assessment process set out in the guideline Liquid waste classification test, re-issued by the Environment Protection Authority in September 2003; as defined in Schedule 1 of the *Environment Protection Act 1993*. | |
| Listed waste | Means a substance or thing listed in Part B of Schedule 1 of the *Environment Protection Act 1993*. | |
| Low net residential density | Means less than 35 dwelling units per hectare | |
| Low-rise | In relation to development, means up to and including 2 building levels. | |
| Main street | Means, for the purposes of the Emerging Main Street Subzone in the Master Planned Neighbourhood Zone, land that is identified for the purposes of a 'main street' on an authorised plan of division or building envelope plan. | |
| Medical waste | Has the same meaning as in the *Environment Protection (Waste to Resources) Policy 2010.* | |
| Medium net residential density | Means 35 to 70 dwelling units per hectare. | |
| Medium-rise | In relation to development, means 3 to 6 building levels. | |
| Mezzanine | Means an intermediate floor within a building level that is open to the floor below and does not extend over the whole floor space. | |
| More sensitive use | Has the same meaning as in the *Practice Direction 14 Site Contamination Assessment* | |
| More than one dwelling on an allotment | Reference to 'dwelling' in this phrase includes any dwelling that:<br><br>(a) already exists on the allotment<br>or<br>(b) has a valid development authorisation for construction on the allotment<br>or<br>(c) is subject to a development application that is yet to be determined. | |
| Native vegetation | Has the same meaning as in the *Native Vegetation Act 1991*. | |

| | | |
|---|---|---|
| Neighbourhood-type zone | Means any of the following:<br>Business Neighbourhood Zone<br>City Living Zone<br>Established Neighbourhood Zone<br>General Neighbourhood Zone<br>Golf Course Estate Zone<br>Hills Neighbourhood Zone<br>Housing Diversity Neighbourhood Zone<br>Master Planned Neighbourhood Zone<br>Master Planned Renewal Zone<br>Master Planned Township Zone<br>Neighbourhood Zone<br>Residential Park Zone<br>Rural Living Zone<br>Rural Neighbourhood Zone<br>Rural Settlement Zone<br>Rural Shack Settlement Zone<br>Suburban Neighbourhood Zone<br>Township Zone<br>Township Neighbourhood Zone<br>Urban Renewal Neighbourhood Zone<br>Waterfront Neighbourhood Zone | |
| Net residential density | Is calculated by dividing the total number of dwellings by the area of residential land that they occupy (excluding other land uses, roads, public open space and services) and expressed as dwelling units per hectare (du/ha) | |
| Non-sensitive use | Means use of land other than sensitive use. | |
| Post height | Means the height of the post measured from the top of its footings or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) noting that the height measurement does not include any part of the post that is concealed behind an eave or similar roof structure and not visible external to the land. | |
| Power system | Has the same meaning as in the *Electricity Act 1996*. | |
| Prescribed approved activity | Means any of the following:<br><br>(a) the on-site storage or disposal of domestic waste<br>(b) a regulated beverage container activity<br>(c) a regulated drop-off station for e-waste<br>(d) the temporary on-site storage of waste (other than tyre waste) while awaiting transport to another place<br>(e) incineration by way of thermal oxidation using fuel burning equipment for the disposal of solid trade waste with a processing capacity not exceeding 100 kilograms per hour<br>(f) the storage or disposal of tyre waste in a manner approved by the Environment protection Authority<br>(g) the disposal of human wastewater or sewage to land in a manner approved by the Environment protection Authority. | |
| Prescribed factors | Has the same meaning as in Schedule 1 of the *Environment Protection Act 1993*. | |
| Primary street | In relation to an existing or proposed building on a site is:<br><br>(a) in the case of a site that has a frontage to only 1 road - that road<br>(b) if the site abuts two or more roads - the road to which the existing building or proposed building principally faces.<br><br>Notes:<br><br>1. In determining the principal face of the building for the purposes of (b), regard will be given to the following:<br><br>(a) building form and design elements and how they present to the streetscape, including window type and orientation<br>(b) front door and porch entry orientation<br>(c) street setbacks, front yard location and fencing arrangements.<br><br>2. Corner cut-off boundary alignments will be ignored for the purposes of measuring primary or secondary street setbacks, other than where the street setback would result in the building being located inside the corner cut-off area. | Example of (a):<br><br>Single Street Frontage Only<br><br><br><br><br>Examples of (b):<br><br>Primary & Secondary Street Frontage<br><br><br><br><br>Irregular Shaped Allotment<br><br><br> |



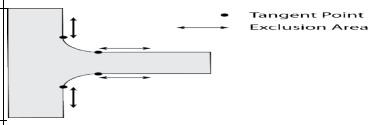
Example of Note (2.):





| | |
|---|---|
| Private open space | Means a private outdoor area associated with a dwelling or co-living residence that:<br>(a) is for the exclusive use of the occupants of that dwelling or co-living residence<br>(b) has a minimum dimension of:<br>(i) 2.0m for ground level areas and 1.8m for balconies for a dwelling<br>(ii) 1.5m for a co-living residence<br>(c) is screened from public view by a building, fence, wall or other similar structure with a minimum height of 1.8m above ground level and a maximum transparency of 20%.<br>Private open space may include verandahs, alfrescos, balconies, terraces, decks where not enclosed on all sides. Private open space does not include areas used for bin storage, laundry drying, rainwater tanks, utilities, driveways or vehicle parking areas. |
| Proclaimed shipwreck | Means:<br>(a) a historic shipwreck or historic relic within the meaning of the *Historic Shipwrecks Act 1981*; or<br>(b) a historic shipwreck or historic relic within the meaning of the *Commonwealth Underwater Cultural Heritage Act 2018*. |
| Pumps and/or filtration systems | In relation swimming pools or spas, does not include a heat pump. |
| Quarantine waste | Means waste that is subject to quarantine under the *Quarantine Act 1908* of the Commonwealth. |
| Regulated surface level | Means the measured ground surface level within the boundaries of the Tunnel Protection Overlay as established at the time of commencement of operation of the Tunnel Protection Overlay Code Amendment, as shown on the Planning Reference layer of the SA Property and Planning Atlas. |
| Relevant certificate | Means a certificate by, or on behalf of, the South Australian Country Fire Service certifying that:<br>(a) a Bushfire Attack Level assessment of the development has been undertaken within 3 months prior to lodgement of the application for planning consent in respect of the development and<br>(b) the Bushfire Attack Level is –19 range. |
| Representative buildings | Representative buildings referenced in Historic Area Statements and Character Area Statements and mapped in the South Australian Planning and Property Atlas are buildings which display characteristics of importance in a particular area. The identification of representative buildings in a particular area is not intended to imply that other buildings in an historic area are not of importance. |
| River Murray protection Area | Means a River Murray Protection Area under the *River Murray Act 2003*. |
| Secondary street | In relation to an existing or proposed building on a site is any road that is not a primary street.<br>Notes:<br>1. Corner cut-off boundary alignments will be ignored for the purposes of measuring primary or secondary street setbacks, other than where the street setback would result in the building being located inside the corner cut-off area. |
| Sensitive receiver | Means:<br>(a) any use for residential purposes or land zoned primarily for residential purposes;<br>(b) child care facility;<br>(c) educational facility;<br>(d) hospital;<br>(e) supported accommodation;<br>(f) tourist accommodation |
| Sensitive use | Has the same meaning as in the *Environment Protection Act 1993*. |
| Sewerage infrastructure | Has the same meaning as in the *Water Industry Act 2012* |
| Significant retirement facility and supported accommodation site | Means contiguous land located within the Significant Retirement Facility and Supported Accommodation Sites Overlay used for a retirement facility or supported accommodation (or both), with an area of 6,500m2 or greater.<br>For the purposes of this definition, contiguous land means – land that is not separated by a road, reserve, or any other public or private land that is under different ownership to the retirement facility or supported accommodation, and may include one or more allotments. |
| Site | Means the area of land (whether or not comprising a separate or entire allotment) on which a building is built, or proposed to be built, including the curtilage of the building, or in the case of a building comprising more than 1 separate occupancy, the area of land (whether or not comprising a separate or entire allotment) on which each occupancy is built, or proposed to be built, together with its curtilage. |
| Site contamination | Has the same meaning as in the *Environment Protection Act 1993*. |
| Site coverage | Is calculated by adding the total roof area of all roofed buildings/structures on a site (excluding any eaves surrounding a habitable building) dividing this by the site area and then multiplying it by 100. Site coverage is expressed as a percentage. |
| Soft landscaping | Means landscaped areas that are pervious and capable of supporting the growth of plant species. It does not include artificial turf or any form of pervious paving or paved/hardstand areas used for pedestrian and/or vehicle movement. |
| South | Means true south. |
| South facing | In relation to building orientation, a side wall is south facing if the wall is orientated anywhere between E20°N/W20°S and E30°S/W30°N. |

Example of Note (1.):



Corner Cut-off

Example of south facing walls.

| | | |
|---|---|---|
| Standard sea flood risk level | Means the 1% AEP sea flood level (tide, stormwater and associated wave effects combined) plus an allowance to accommodate 100 years of land subsidence. | |
| Tangent point | Means the end point of a road's curve at the point of intersection, measured at the kerb. |  |
| Terrace arrangement | Means a group of 3 or more detached dwellings erected side by side and abutting each other but not joined by way of a party wall or party walls. | |
| Total floor area | Means the sum of the superficies of horizontal sections of a building or other roofed area made at the level of each floor (including any mezzanine floor), inclusive of all roofed areas and of the external walls and of such portions of any party walls as belong to the building. | |
| Treatment | Is taken to have the same meaning as defined in section 3(1) as in the *Environment Protection Act 1993*. | |
| Wall height | Means the height of the wall measured from the top of its footings or a measurement point specified by the applicable policy of the Code (in which case the Code policy will prevail in the event of any inconsistency) noting that the height measurement does not include any part of the wall that is concealed behind an eave or similar roof structure and not visible external to the land. | |
| Waste | Means waste within the meaning of the *Environment Protection Act 1993*. | |
| Wastewater | Means waste principally consisting of water and includes:<br>(a) human wastewater<br>(b) sewage<br>(c) water containing food or beverage waste<br>(d) wash down water or cooling water<br>(e) irrigation runoff or contaminated stormwater<br>(f) water containing any other trade waste or industrial waste<br>(g) any other water that has been used in any form of human activity<br>(h) a combination of any 1 or more of the above. | |
| Water protection area | Has the same meaning as in the *Environment protection Act 1993*. | |

## Part 9 - Referrals

### Notes: Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code.

### Part 9.1 Referral Body: Environment Protection Authority

### Referral Body: Environment Protection Authority

**Interpretation**

For the purposes of item 9 of the table in clause 3 of schedule 9 of the Planning Development and Infrastructure (General) Regulations 2017, development that involves, or is for the purposes of, an activity specified in the table below, requires a referral to the Environment Protection Authority, including:

(a) development that reaches a threshold specified in the table below;
(b) development with the capacity or potential to operate above the threshold level specified in the table below; or
(c) an alteration or expansion of an existing development (or existing use) where the alteration or expansion will have the effect of producing a total capacity exceeding the relevant threshold level specified in the table below.

The above does not apply for the purposes of items 9A and 9AB of the table in clause 3 of schedule 9 of the Planning Development and Infrastructure (General) Regulations 2017, which relate to site contamination and land division.

| Class of Development / Activity | | | Policies Relevant to the Referral | Purpose of Referral | Statutory Reference |
|---|---|---|---|---|---|
| Energy generation and storage facilities | Wind farms | Development that involves the establishment of a wind farm where 1 or more wind turbine generators (whether or not located on the same site) are used to generate electricity that is then supplied to another person for use at another place. | Section 57 of *Environment Protection Act 1993* sets out criteria to be considered by the EPA in relation to the assessment of development applications. This head power also links to other statutory criteria in the *Environment Protection (Air Quality) Policy 2016, Environment Protection (Commercial and Industrial Noise) Policy 2023, Environment Protection (Waste to Resources) Policy 2010 and the Environment Protection (Water Quality) Policy 2015*. | To provide expert technical assessment and direction to the relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm. | Activity of environmental significance to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| | Energy recovery from waste | Development involving energy recovery from *waste*, including *anaerobic digestion* and thermal activities such as *direct combustion*, *pyrolysis* and *gasification* used to generate gas, heat, electricity or a combination.<br>In this class of development / activity:<br>***anaerobic digestion*** involves a series of processes in which microorganisms break down biodegradable material to biogas in the absence of oxygen<br>***direct combustion*** involves burning in excess oxygen (from air) to produce heat or release energy contained in the fuel<br>***pyrolysis*** involves the thermo-chemical decomposition of organic or inorganic material- for example synthetic tyres - at elevated temperatures in the absence of oxygen<br>***gasification*** of waste is a process that converts organic or fossilised organic material such as coal, at elevated temperatures and with controlled amounts of oxygen, into a synthetic gas (syngas). | | | |
| | Energy generation | Development involving an *electricity generating plant* (other than a *battery storage facility or pumped hydroelectricity production works*) using any other energy source (excluding *fuel burning* and solar photovoltaic) with a capacity to generate or store 30 megawatts (MW) or more.<br>In this class of development / activity:<br>***battery storage facility*** means a facility for the purpose of 1 or more batteries that are capable of being charged, storing energy and discharging in into the State's power system<br>***electricity generating plant*** means electricity generating plant within the ambit of paragraph (a) of the definition of electricity infrastructure in section 4(1) of the *Electricity Act 1996*. | | | |
| | Pumped hydroelectricity production works | Development involving the conduct of works or a facility for the generation of electricity by means of passing water through a turbine with a total full-load sustained output capacity of 30 megawatts or more (EPA Licence). | | | |
| Petroleum and chemical | Chemical storage and warehousing facilities | The storage or warehousing of chemicals or chemical products that are, or are to be, stored or kept in bulk or in containers having a capacity exceeding 200 litres at facilities with a total storage capacity exceeding 1,000 cubic metres. (EPA Licence) | | | |
| | Chemical works | The conduct of:<br>(a) works with a total processing capacity exceeding 10 tonnes per year (EPA Licence required at processing capacity exceeding 100 tonnes per year), involving either or both of the following operations:<br>(i) manufacture (through chemical reaction) of any inorganic chemical, including sulphuric acid, inorganic fertilisers, soap, sodium silicate, lime or other calcium compound<br>(ii) manufacture (through chemical reaction) or processing of any organic chemical or chemical product or petrochemical, including the separation of such materials into different products by distillation or other means<br>or<br>(b) works with a total processing capacity exceeding 5,000 tonnes per year involving operations for salt production. (EPA Licence)<br>or<br>(c) works for the production of hydrogen with a production capacity of more than 100 tonnes per year (EPA Licence). | | | |
| | Coke works | The production, quenching, cutting, crushing and grading of coke. (EPA Licence) | | | |
| | Hydrocarbon storage or production works | The conduct of works or a facility: | | | |

| | | |
|---|---|---|
| | | (a) for the storage of hydrocarbon or hydrocarbon products in tanks that, in aggregate, have a storage capacity exceeding 100m$^3$ (EPA Licence required at more than 2000m$^3$) or<br>(b) for the production of hydrocarbon or hydrocarbon products, being works having a total capacity exceeding 20 tonnes per hour. (EPA Licence) |
| | Petrol stations | The conduct of a petrol station, being a facility for the storage and retail sale of petroleum products or other liquid organic chemical substances. (EPA Licence)<br><br>In this class of development / activity:<br><br>***petroleum product*** has the same meaning as in the *Petroleum Products Regulation Act 1995*. |
| | Timber preservation works | The conduct of works for the preservation of timber by chemicals, but excluding the preservation by a primary producer of timber for use in the course of primary production carried on by the producer. (EPA Licence) |
| Manufacturing and mineral processing | Abrasive blasting | The cleaning of materials by the abrasive action of any metal shot or mineral particulate propelled in a gaseous or liquid medium (otherwise than solely by using blast cleaning cabinets less than 5m$^3$ in volume or totally enclosed automatic blast cleaning units). (EPA Licence) |
| | Hot mix asphalt preparation | The conduct of works at which crushed or ground rock aggregates are mixed with bituminous or asphaltic materials (by heating in a furnace, kiln or other fuel fired plant) for the purposes of producing road building mixtures. (EPA Licence) |
| | Cement works | The conduct of works for the use of *argillaceous* and *calcareous* materials in the production of cement clinker or the grinding of cement clinker. (EPA Licence)<br><br>In this class of development / activity:<br><br>***argillaceous*** means having to do with or resembling clay<br><br>***calcareous*** means having to do with calcium carbonate |
| | Ceramic works | The conduct of works for the production of any products such as bricks, tiles, pipes, pottery goods, refractories, or glass that are manufactured or are capable of being manufactured in furnaces or kilns fired by any fuel, being works with a total capacity for the production of such products exceeding 100 tonnes per year. (EPA Licence) |
| | Concrete batching works | The conduct of works for the production of concrete or concrete products that are manufactured or are capable of being manufactured by the mixing of cement, sand, rock, aggregate or other similar materials, being works with a total capacity for production of such products exceeding 0.5m$^3$ per production cycle. (EPA Licence) |
| | Drum reconditioning or treatment works | The conduct of works for the cleaning, repairing, reconditioning or other treatment of metal or plastic drums or containers for the purposes of their reuse, including any associated storage facility. (EPA Licence) |
| | Ferrous and non-ferrous metal melting | The melting of ferrous or non-ferrous metal in a furnace or furnaces that alone or in aggregate have the capacity to melt:<br><br>(a) in excess of 50 but not in excess of 500 kilograms of metal during the normal cycle of operation but excluding facilities more than 500m from residential premises not associated with the works<br>or<br>(b) in excess of 500 kilograms of metal during the normal cycle of operation. (EPA Licence) |
| | Metallurgical works | The conduct of works at which ores are smelted or reduced to produce metal. (EPA Licence) |
| | Mineral works | The conduct of works for processing mineral ores, sands or earths to produce mineral concentrates. (EPA Licence) |
| | Pulp or paper works | The conduct of works at which paper pulp or paper is manufactured or is capable of being manufactured, being works with a total capacity for production of such products exceeding 10 tonnes per year. (EPA Licence required at production exceeding 100 tonnes per year) |
| | Surface coating | The conduct of:<br><br>(a) works for metal finishing, in which metal surfaces are prepared or finished by means of electroplating, electrolyse plating, anodising (chromating, phosphating and colouring), chemical etching or milling, or printed circuit board manufacture, being works producing more than 5 kilolitres per day of effluent (EPA Licence)<br>or<br>(b) works for hot dip galvanising (EPA Licence)<br>or<br>(c) works for spray painting or powder coating with a capacity to use more than 100 litres per day of paint or 10kg per day of dry powder (EPA Licence). |
| | Timber processing works | The conduct of works (other than works at a builders supply yard or a home improvement centre) at which timber is sawn, cut, chipped, compressed, milled or machined, being works with a total processing capacity exceeding 4,000m$^3$ per year. (EPA Licence) |
| | Maritime construction works | The conduct of works for the construction or repair of ships, vessels or floating platforms or structures, being works with the capacity to construct or repair ships, vessels or floating platforms or structures of a mass exceeding 80 tonnes. (EPA Licence) |
| | Vehicle production | The conduct of works for the production of motor vehicles, being works with a production capacity exceeding 2,000 motor vehicles per year. (EPA Licence) |
| | Fibre-reinforced plastic manufacturing | The conduct of facilities for the purposes of manufacturing fibre-reinforced plastic products, but excluding facilities more than 300m from residential premises not associated with the facility. |
| Resource recovery, waste disposal and related activities | Waste recovery *(excluding a prescribed approved activity)* | |
| | Waste recovery facility | The conduct of a *waste recovery facility*, being a depot, works or facility (including, but not limited to, a transfer station or material recovery facility) that, during a 12 month period, receives for *preliminary treatment*, or has the capacity for the *preliminary treatment* of:<br><br>(a) more than 100 tonnes of solid waste or matter<br>or<br>(b) more than 100 kilolitres of liquid waste or matter<br><br>prior to its transfer elsewhere for lawful reuse, further treatment or disposal but excluding a prescribed approved activity or an activity in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)<br><br>In this class of development / activity:<br><br>***preliminary treatment*** of waste or matter, includes sorting, aggregating, compacting, |

| | |
|---|---|
| | baling or packaging the waste or matter as defined in Schedule 1 of the *Environment Protection Act 1993*. |
| Waste reprocessing *(excluding a prescribed approved activity)* | |
| Composting works | Being a depot, facility or works with the capacity to treat, during a 12 month period:<br>(a) in the case of works located wholly or partly within a water protection area - more than 200 tonnes of organic waste or matter<br>or<br>(b) in the case of works located wholly outside of a water protection area - more than 1,000 tonnes of organic waste or matter<br>for the production of compost, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Scrap metal treatment works | Being a depot, facility or works for the treatment of scrap metal (by processes involving electrically heated furnaces or other fuel burning equipment or by mechanical processes), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Tyre waste treatment works | Being a depot, facility or works with the capacity to treat more than 5 tonnes of *tyre waste* during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)<br>In this class of development / activity:<br>***tyre waste*** means waste comprised of tyres or tyre pieces as defined in Schedule 1 of the *Environment Protection Act 1993*. |
| Waste lead acid battery treatment works | Being a depot, facility or works with the capacity to treat more than 500 waste lead acid batteries during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Other waste reprocessing facility | Being a depot, works or facility (other than a waste reprocessing facility specified above) that, during a 12 month period, receives or has the capacity to treat:<br>(a) more than 100 tonnes of solid waste or matter<br>or<br>(b) more than 100 kilolitres of liquid waste or matter<br>for the production of energy or materials that are ready for use (without requiring further treatment), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Waste disposal *(excluding a prescribed approved activity)* | |
| Landfill depot | Being a depot, facility or works for the disposal of waste to land, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Liquid waste depot | Being a depot, facility or works for the reception and disposal of liquid waste, or the reception, treatment and disposal of liquid waste, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Incineration depot | Being a depot, facility or works for the disposal, by incineration, pyrolysis or gasification by high temperature chemical decomposition, or thermal oxidation using fuel burning equipment, of solid waste, a listed waste or quarantine waste (EPA Licence), but excluding:<br>(a) facilities with a processing capacity not exceeding 100 kilograms per hour and more than 500m from residential premises not associated with the facility<br>or<br>(b) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. |
| Wastewater treatment | |
| Wastewater treatment works | Being sewage treatment works, a *CWMS*, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period:<br>(a) in the case of works located wholly or partly within a water protection area - more than 2.5 ML of wastewater (EPA Licence required at more than 5 ML)<br>or<br>(b) in the case of works located wholly outside of a water protection area - more than 12.5 ML of wastewater (EPA Licence required at more than 50 ML). |
| Activities involving listed wastes | |
| Activity producing listed waste | The conduct of an activity in which a *listed waste* is produced as waste or becomes waste, but excluding any of the following:<br>(a) a domestic activity<br>(b) retail pharmacy<br>(c) medical practice (other than the practice of pathology)<br>(d) nursing practice<br>(e) dental practice<br>(f) veterinary practice<br>(g) the conduct of a nursing home or other residential aged care facility<br>(h) the conduct of an immunisation clinic<br>(i) the conduct of a hospital with capacity of fewer than 40 beds<br>(j) a *prescribed industrial activity*<br>(k) an activity in which the waste produced is lawfully disposed of to a sewer<br>(l) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.<br>(EPA Licence)<br>In this class of development / activity:<br>***prescribed industrial activity*** - means any of the following:<br>(a) building work<br>(b) carpentry or joinery<br>(c) film processing<br>(d) plumbing or gas fitting<br>(e) dry cleaning<br>(f) primary or secondary school education |

| | | |
|---|---|---|
| | | (g) agriculture or horticulture<br>(h) french polishing<br>(i) manufacturing jewellery<br>(j) painting or decorating<br>(k) panel beating and associated spray painting<br>(l) an activity that results in the production of less than 50 000 litres of waste oil per year<br>(m) an activity authorised by a lease or licence under the *Mining Act 1971, the Petroleum and Geothermal Energy Act 2000 or the Roxby Downs (Indenture Ratification) Act 1982* where the waste is lawfully disposed of to land and contained within the area of the lease or licence<br>(n) an activity authorised by a lease under the *Mining Act 1971* where the waste is lawfully disposed of to land and contained within the area of a miscellaneous purposes licence under that Act adjacent to the area of the lease. |
| | Reception or storage of listed waste | The conduct of a depot, facility or works for the reception or storage of a *listed waste*, but excluding the following:<br><br>(a) the temporary on-site storage of such waste while awaiting transport to another place<br>(b) an activity consisting only of storing or distributing goods, in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority<br>(c) the reception or storage by a council or hospital of medical waste produced in the course of a *prescribed medical activity*<br>(d) the reception or storage by a retail pharmacy of *personal sharps waste*, *pharmaceutical waste* or other medical waste, in connection with a return system for such waste.<br>(EPA Licence)<br><br>In this class of development / activity:<br><br>***personal sharps waste*** means medical sharps that have been used in a domestic situation for medical purposes<br><br>***pharmaceutical waste*** means waste comprised of medicines or other pharmaceutical products<br><br>***prescribed medical activity*** - means any of the following:<br><br>(a) a medical practice other than:<br>(i) medical practice at a hospital<br>or<br>(ii) the practice of pathology<br>(b) nursing practice other than at a hospital<br>(c) dental practice other than at a hospital<br>(d) operating a nursing home<br>(e) veterinary practice<br>(f) operating a hospital with a capacity of less than 40 beds<br>(g) operating an immunisation clinic. |
| | Treatment of listed waste | The conduct of a depot, facility or works for the treatment of a *listed waste*, or *wastewater* containing a listed waste, by immobilising, stabilising or sterilising the waste by any process (before its further treatment or disposal), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) |
| Activities in specified areas | Brukunga Mine Site | The management of the abandoned Brukunga mine site and associated acid neutralisation plant situated adjacent to Dawesley Creek in the Mount Lofty Ranges. (EPA Licence) |
| | Discharge of stormwater to underground aquifer | Discharge of stormwater from a catchment area exceeding 1 hectare to an underground aquifer by way of a well or other direct means where the stormwater drains to the aquifer from:<br><br>(a) land or premises on which a business is carried on in the council area of the City of Mount Gambier<br>or<br>(b) a stormwater drainage system in the council area of the City of Mount Gambier<br>or<br>(c) a stormwater drainage system in Metropolitan Adelaide.<br>(EPA Licence) |
| Animal husbandry, aquaculture and other activities | Feedlots | Carrying on an operation for holding in a confined yard or area and feeding principally by mechanical means or by hand:<br><br>(a) not less than an average of 500 cattle (EPA Licence), or 4,000 sheep or goats per day over any period of 12 months<br>or<br>(b) where the yard or area is situated in a water protection area - not less than an average of 200 cattle (EPA Licence), or 1,600 sheep or goats per day over any period of 12 months<br><br>but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding. |
| | Aquaculture or Fish Farming | The land based propagation or rearing of marine, estuarine or fresh water fish or other marine or freshwater organisms that involves the discharge of wastewater into marine or inland waters, or onto land but excluding where wastewater is discharged to an approved wastewater management system. |
| | Saleyards | The commercial conduct of yards at which cattle, sheep or other animals are gathered or confined for the purpose of their sale, auction or exchange, including associated transport loading facilities, being yards with a throughput exceeding 50,000 sheep equivalent units per year [sheep equivalent units: 1 sheep or goat = 1 unit, 1 pig (< 40kg) = 1 unit, 1 pig (> 40kg) = 4 units, 1 cattle (< 40kg) = 3 units, 1 cattle (40-400kg) = 6 units, 1 cattle (> 400kg) = 8 units]. (EPA Licence) |
| | Piggeries | The conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of:<br><br>(a) in the case of a piggery located wholly outside of a water protection area - 1,300 or more *standard pig units* (EPA Licence required at 6500 or more standard pig units)<br>or<br>(b) in the case of a piggery located wholly or partly within a *water protection area* - 130 or more *standard pig units*. (EPA Licence required at 650 or more standard pig units)<br><br>In this class of development / activity:<br><br>***standard pig units*** is a unit of measurement of pigs determined:<br><br>(a) by reference to clause 4.3 of the *National Environmental Guidelines for Piggeries 2010* (second edition (revised)) prepared by Australian Pork Limited<br>or<br>(b) in a manner approved by the Environment Protection Authority and published on a website determined by the Environment Protection Authority. |
| | Poultry farms | The keeping of *poultry* in confined or roofed structure(s) exceeding 1,000$m^2$ (EPA Licence required for the growing of *poultry* meat only where the total area of the sheds or structures used to keep the *poultry* is 13,500$m^2$ or more.<br><br>In this class of development / activity: |

| | | |
|---|---|---|
| | | ***poultry*** means chicken, turkey, guinea fowl, duck, geese, pheasants, quail, squab (pigeons), muttonbirds or other avian species but does not include ratites. |
| | Dairies | Carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time in a *water protection area*. |
| Food production and animal and plant product processing | Meat processing works | The conduct of slaughtering works for commercial purposes for the production of meat or meat products for human or animal consumption, being:<br>(a) in the case of poultry or poultry meat products - works with a rate of production exceeding 100 tonnes per year (EPA Licence required at rate of production exceeding 200 tonnes per year)<br>or<br>(b) in the case of any other animal meat or animal meat products - works with a rate of production exceeding 50 tonnes per year. (EPA Licence required at rate of production exceeding 100 tonnes per year) |
| | Breweries and cideries | The conduct of works for the production of beer (EPA Licence only for beer production), cider or any other alcoholic beverage (excluding wine and spirits) by infusion, boiling or fermentation, being works with a production capacity exceeding 5,000 litres per day. |
| | Fish processing | The conduct of works for scaling, gilling, gutting, filleting or otherwise *processing fish* for sale (EPA Licence), but excluding:<br>(a) works with a processing output of less than 100 tonnes per year where wastewater is disposed of to a sewer or CWMS<br>or<br>(b) works with a processing output of less than 2 tonnes per year where wastewater is disposed of otherwise than to a sewer or CWMS<br>or<br>(c) processing of *fish* only in the course of a business of selling *fish* by retail.<br>In this class of development / activity:<br>***fish*** has the same meaning as in the *Fisheries Management Act 2007*<br>***processing fish*** does not include freezing, chilling or packing the fish. |
| | Milk processing works | The conduct of works at which milk is separated, evaporated or otherwise processed for the manufacture of evaporated or condensed milk, cheese, butter, ice cream or other similar dairy products, being works at which milk is processed at a rate exceeding 5ML per year. (EPA Licence) |
| | Produce processing works | The conduct of works for processing any agricultural crop material being:<br>(a) works for the processing of agricultural crop material by deep fat frying, roasting or drying through the application of heat with a processing capacity exceeding 30kg per hour (EPA Licence)<br>or<br>(b) works at which more than 10ML of wastewater is generated per year and disposed of otherwise than to a sewer or CWMS. (EPA Licence) |
| | Rendering and fat extraction works | The conduct of works at which animal, fish or grease trap wastes or other matter is processed or is capable of being processed by rendering or extraction or by some other means to produce tallow or fat or their derivatives or proteinaceous matter, being works with a total processing capacity exceeding 25 kg per hour. (EPA Licence required at processing capacity exceeding 250 kilograms per hour) |
| | Curing or drying works | The conduct of works at which meat, fish or other edible products are smoked, dried or cured by the application of heat or smoke:<br>(a) with a total processing capacity of between 25kg and 250kg per hour but excluding works that are more than 200m from residential premises not associated with the works<br>or<br>(b) with a total processing capacity exceeding 250kg per hour. (EPA Licence) |
| | Tanneries or fellmongeries | The conduct of works for the commercial preservation or treatment of animal skins or hides being works processing more than 5 tonnes of skins or hides per year, but excluding:<br>(a) the processing of skins or hides by primary producers in the course of primary production activities outside township areas<br>or<br>(b) the processing of skins or hides in the course of taxidermy.<br>(EPA Licence) |
| | Woolscouring or wool carbonising works | The conduct of works for the commercial cleaning or carbonising of wool, but excluding cleaning or carbonising of wool in the course of handicraft activities where the wool is further processed for sale by retail. (EPA Licence) |
| | Wineries or Distilleries | The conduct of works for the processing of grapes or other produce to make wine or spirits, being works at which more than 50 tonnes of grapes or other produce are processed per year, but excluding works for bottling only. (EPA Licence required for wineries or distilleries processing more than 50 tonnes of grapes or other produce per year in the Mt Lofty Ranges Water Protection Area or processing more then 500 tonnes of grapes or other produce per year outside of the Mt Lofty Ranges Water Protection Area) |
| Materials handling and transportation | Bulk shipping facilities | The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any wharf or wharf side facility (including sea-port grain terminals), being facilities handling or capable of handling these materials into or from vessels at a rate:<br>(a) of between 10 tonnes and 100 tonnes per day, excluding facilities that are more than 300m from residential premises not associated with the facility<br>or<br>(b) exceeding 100 tonnes per day. (EPA Licence) |
| | Bulk storage | The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility at a rate exceeding 100 tonnes per day, excluding facilities more than 300m from residential premises not associated with the facility. |
| | Railway operations | The conduct of any of the following activities associated with a *railway*:<br>(a) the construction or operation of *rail infrastructure*<br>(b) the operation of *rolling stock* on a *railway*<br>(c) other activities conducted on *railway land* (EPA Licence required for the above activities but not the following exclusions)<br>but excluding:<br>(d) any activities associated with any of the following:<br>(i) a *railway* with a track gauge that is less than 600mm<br>(ii) a *railway* in a mine which is underground or predominantly underground and used in connection with the performance of mining operations<br>(iii) a slipway<br>(iv) a crane-type runway<br>(v) a *railway* used solely for the purposes of horse-drawn trams<br>(vi) a *railway* used solely for the purposes of static displays<br>(vii) a *railway* at an amusement park used solely for the purposes of an amusement structure |

| | | |
|---|---|---|
| | | (viii) the transfer of freight into or onto, and unloading of freight from, *rolling stock*<br>(ix) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.<br><br>In this class of development / activity:<br><br>***rail infrastructure*** means infrastructure associated with the operation of a railway and includes (but is not limited to) railway track, associated track structures, over or under track structures, supports, tunnels, bridges, stations, platforms, train control systems, signalling systems, communication systems, electric traction infrastructure and buildings, but does not include any workshop or repair facility<br><br>***railway*** means a guided system designed for the movement of rolling stock which has the capability of transporting passengers, freight or both on a railway track, together with its infrastructure and associated sidings or crossing, or passing loops, and includes a railway in a marshalling yard or a passenger or freight terminal<br><br>***railway land*** means any of the following:<br><br>(a) land within a rail corridor or rail reserve, including any associated sidings<br>(b) railway yards<br>(c) other land over which a railway track passes<br><br>***rolling stock*** means a vehicle (whether or not self-propelled) that operates on or uses a railway track, but does not include a vehicle designed to operate both on and off a railway track when the vehicle is not operating on a railway track<br><br>Examples of rolling stock - A locomotive, carriage, rail car, rail motor, light rail vehicle, train, tram, light inspection vehicle, road/rail vehicle, trolley, wagon. |
| | Crushing, grinding or milling | Processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or in any other manner) of any of the following:<br><br>(a) chemicals or rubber at a rate:<br>(i) of between 1 tonne and 100 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility<br>or<br>(ii) in excess of 100 tonnes per year (EPA Licence)<br>(b) agricultural crop products at a rate:<br>(i) of between 50 tonnes and 500 tonnes per year, excluding facilities that are more than 300m from residential premises not associated with the facility<br>or<br>(ii) in excess of 500 tonnes per year (EPA Licence)<br>but excluding non-commercial processing for on farm use<br>(c) rock, ores or minerals at a rate:<br>(i) of between 100 tonnes and 1,000 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility<br>or<br>(ii) in excess of 1,000 tonnes per year (EPA Licence)<br>but excluding processing of wet sand. |
| | Dredging | The conduct of capital dredging being the excavation of more than $10m^3$ of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means and any associated disposal of dredged material to land or waters (EPA Licence), but excluding any of the following:<br><br>(a) *maintenance dredging*<br>(b) works associated with the establishment of a visual aid<br>(c) any lawful fishing or recreational activity<br><br>In this class of development / activity:<br><br>***marine waters*** has the same meaning as in Section 3 of *Environment Protection Act 1993*.<br><br>***maintenance dredging*** means the excavation of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means for the purpose of maintaining a previously dredged (approved) depth, width and area in marine or inland waters. |
| | Coal handling and storage | The handling of coal or carbonaceous material by any means or the storage of coal, coke or carbonaceous reject material at facilities with a total handling capacity exceeding 100 tonnes per day or a storage capacity exceeding 5,000 tonnes. (EPA Licence) |
| | Extractive industries | The conduct of operations involving extraction, or extraction and processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or any other manner), of sand, gravel, stone, shell, shale, clay or soil, being operations with an extraction production rate exceeding 100,000 tonnes per year. (EPA Licence) |
| Other | Aerodromes | The conduct of facilities for commercial or charter aircraft take-off and landing, being facilities estimated to be used for:<br><br>(a) more than 200 flight movements per year, excluding facilities more than 3km from residential premises not associated with the facilities<br>or<br>(b) more than 2000 flight movements per year in any case. (EPA Licence for aerodromes used for more than 20000 flight movements per year) |
| | Fuel burning | The conduct of works or facilities involving the use of fuel burning equipment, including flaring (other than flaring at hydrocarbon storage or production works that do not have a total storage capacity or total production rate exceeding the levels respectively specified in 'Hydrocarbon storage or production works' above) or incineration, where the equipment alone or in aggregate is capable of burning combustible matter:<br><br>(a) a rate of heat release exceeding 5MW (EPA Licence)<br>or<br>(b) at a rate of heat release exceeding 500KW and the products of combustion are used:<br>(i) to stove enamel (EPA Licence)<br>or<br>(ii) to bake or dry any substance that on heating releases dust or air impurities. (EPA Licence) |
| | Helicopter landing facilities | The conduct of facilities designed for the arrival and departure of helicopters, but excluding:<br><br>(a) facilities that are more than 3km from residential premises not associated with the facilities (EPA Licence required for helicopter landing facilities situated within 1km of residential premises not associated with the facilities)<br>or<br>(b) facilities at the site of an activity authorised under the Mining *Act 1971, the Petroleum and Geothermal Energy Act 2000,* the *Petroleum (Submerged Lands) Act 1982* or the *Roxby Downs (Indenture Ratification) Act 1982*. |
| | Marinas and boating facilities | The conduct of facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for:<br><br>(a) 50 or more powered vessels at any 1 time (EPA Licence)<br>or<br>(b) works for the repair or maintenance of vessels with the capacity to handle 5 or more vessels at any one time or vessels 12m or more in length (EPA Licence). |

| | | | | | |
|---|---|---|---|---|---|
| | Motor racing or testing venues | The conduct of facilities designed and used for motor vehicle competitions or motor vehicle speed or performance trials, but excluding facilities that are situated more than 3km from residential premises not associated with the facilities. (EPA Licence required for facilities that are situated 200 metres or less from residential premises not associated with the facilities) | | | |
| | Shooting ranges | The conduct of facilities for shooting competitions, practice or instruction (being shooting involving the propulsion of projectiles by means of explosion), but excluding facilities that are more than 3km from residential premises not associated with the facilities. (EPA Licence required for outdoor facilities only that are situated 200 metres or less from residential premises not associated with the facilities) | | | |
| | Desalination plants | The conduct of a desalination plant being a plant for the production of desalinated water that has a production capacity exceeding 200 kilolitres of desalinated water per day, and includes:<br>(a) an *underground desalination plant*<br>(b) a number of *underground desalination plants* within any 1 square kilometre area that, in aggregate, have a production capacity exceeding 200 kilolitres of desalinated water per day (EPA Licence)<br>but does not include:<br>(c) a plant that disposes of all of its wastewater to a wastewater management system that is the subject of a licence<br>or<br>(d) a plant that produces 2 megalitres or less of wastewater per year.<br>In this class of development / activity:<br>***underground desalination plant*** means a plant having a system comprised of a borehole, submersible pump and associated equipment for the desalination below the ground of underground water<br>***underground water*** means water occurring naturally under the ground or introduced to an aquifer or other area under the ground. | | | |
| | Discharges to marine or inland waters | The conduct of operations (other than a desalination plant referred to above) involving discharges into marine waters or inland waters where:<br>(a) the discharges:<br>(i) raise the temperature of the receiving waters by more than 2 degrees Celsius at any time at a distance of 10m or more from the point of discharge<br>or<br>(ii) contain antibiotic or chemical water treatments<br>and<br>(b) the total volume of the discharges exceeds 50kl per day. (EPA Licence) | | | |
| | Saline water discharge | An activity involving the discharge to land, surface water or underground water of more than 0.5Ml of water per day containing more than 1500mg of total dissolved solids per litre. | | | |
| | Cremation or incineration of human or animal remains | The conduct of a facility for the cremation or incineration of *human or animal remains* by means of thermal oxidation using fuel burning equipment. (EPA Licence)<br>In this class of development / activity:<br>***human or animal remains*** does not include any of the following:<br>(a) medical waste<br>(b) cytotoxic wastes<br>(c) quarantine waste<br>***Cytotoxic wastes*** means waste that is toxic to living things. | | | |
| Land division | Land division | Land division creating 1 or more additional allotments for residential purposes within 500 metres of land used as a landfill waste depot. | Section 57 of *Environment Protection Act 1993* sets out criteria to be considered by the EPA in relation to the assessment of development applications. This head power also links to other statutory criteria in the *Environment Protection (Air Quality) Policy 2016*, *Environment Protection (Commercial and Industrial Noise) Policy 2023*, *Environment Protection (Waste to Resources) Policy 2010* and *the Environment Protection (Water Quality) Policy 2015*. | To provide expert technical assessment and advice to the relevant authority on the appropriateness of further residential opportunities being established within close proximity to landfill waste depots, due to potential health and safety impacts. | Development of a class to which Schedule 9 clause 3 item 23 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Site contamination | Change in the use of land to a more sensitive use. | Change in the use of land to a more sensitive use on land at which site contamination exists or may exist as a result of one of the following:<br>(a) class 1 activity (including where a class 1 activity exists or previously existed on adjacent land)<br>(b) class 2 activity and the proposed use is a sensitive use<br>or<br>Change in the use of land to a more sensitive use on land where one or more of the following applies:<br>(a) that is the subject of a notation on the relevant title under section 103P of the Environment Protection Act 1993 that a site contamination audit report has been prepared;<br>(b) subject to a notification of site contamination of underground water (known as a section 83A notification under the Environment Protection Act 1993), or where such a notification exists on adjacent land, shown on the South Australian Property and Planning Atlas;<br>(c) located within a Groundwater Prohibition Area as shown on the South Australian Property and Planning Atlas<br>No referral is required where, in relation to the subject land:<br>(a) a site contamination audit report has been prepared under Part 10A of the Environment Protection Act 1993 in relation to the land within the previous 5 years which concludes one or more of the following:<br>(i) site contamination does not exist (or no longer exists) at the land<br>(ii) the land is suitable for the proposed use or range of uses (without the need for any further remediation)<br>(iii) where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)<br>(b) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report | Site Contamination General Development Policies and Section 57 of Environment Protection Act 1993 that sets out criteria to be considered by the EPA in relation to the assessment of development applications. | To provide direction to the relevant authority on whether they must consider the advice of either a site contamination consultant or site contamination auditor regarding site suitability, including through the imposition of conditions of planning consent. | Development of a class to which Schedule 9 clause 3 item 9A of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| | Land Division | Subject to clause 1(4) of Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017, development involving the division of land if—<br>(a) Schedule 8 clause 2A(1)(b) applies to the application in respect of the development; and<br>(b) site contamination exists or may exist at the land because of 1 or more of the following circumstances:<br>(i) a class 1 activity has been conducted on the land or on adjacent land;<br>(ii) a class 2 activity has been conducted on the land;<br>(iii) the land or adjacent land is the subject of a section 83A notification under the *Environment Protection Act 1993* that appears on the South Australian Property and Planning Atlas;<br>(iv) the land is within a groundwater prohibition area that appears on the South Australian Property and Planning Atlas; | Site Contamination General Development Policies and Section 57 of *Environment Protection Act 1993* that sets out criteria to be considered by the EPA in relation to the assessment of development applications. | To provide direction to the relevant authority on whether they must consider the advice of either a site contamination consultant or site contamination auditor regarding site suitability, including through the imposition of conditions of planning consent. | Development of a class to which Schedule 9 clause 3 item 9AB of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

| | | | | | |
|---|---|---|---|---|---|
| | | (v) the land is the subject of a notation on the certificate of title for the land under section 103P of the *Environment Protection Act 1993* that a site contamination audit report has been prepared. | | | |

### Part 9.2 Referral Body: Relevant authority under the Landscape South Australia Act 2019.

### Referral Body: Relevant authority under the *Landscape South Australia Act 2019* that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.

| Class of Development / Activity | | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Dams | Except where located within the River Murray Flood Plain Protection Area Overlay, River Murray Tributaries Protection Area, Prescribed Surface Water Overlay, Prescribed Watercourse Overlay, Prescribed Water Resources Area Overlay, Mount Lofty Ranges Catchment (Area 1) Overlay or the Mount Lofty Ranges Catchment (Area 2) Overlay, development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing:<br>(a) over land<br>or<br>(b) in a watercourse that is not prescribed. | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan, water affecting activities control policy, or regional landscape plan or equivalent. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |
| Commercial Forestry | Development that involves a change in use of land for the purposes of undertaking commercial forestry for which a permit would be required under section 104(4)(k) of the *Landscape South Australia Act 2019*. | To provide expert assessment and direction to the relevant authority on potential impacts from such development on water resources. | Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Part 9.3 Referral Body: Technical Regulator

### Referral Body: Technical Regulator

| Class of Development / Activity | | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Building near powerlines | Development that involves the construction of a building where a declaration has not been given under Schedule 8 clause 6 of the *Planning, Development and Infrastructure (General) Regulations 2017*, other than where the development is a building that is intended only to house, or that constitutes, electricity infrastructure (within the meaning of the *Electricity Act 1996*) or is limited to:<br>(a) an internal alteration of a building<br>or<br>(b) an alteration to the walls of a building but not so as to alter the shape of the building. | To provide expert technical assessment and direction to the relevant authority on:<br>• potential impacts of development on electricity infrastructure<br>• potential safety issues relating to development in close proximity to electricity infrastructure. | Development of a class to which Schedule 9 clause 3 item 18 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

### Part 9.4 Referral Body: Minister responsible for the administration of the Aquaculture Act 2001

### Referral Body: Minister responsible for the administration of the *Aquaculture Act 2001*

| Class of Development / Activity | | Purpose of Referral | Statutory Reference |
|---|---|---|---|
| Aquaculture development | Aquaculture development, other than development which involves an alteration to an existing or approved development which in the opinion of the relevant authority is minor in nature. | To provide expert technical assessment and direction to the relevant authority on matters which may impact upon the associated aquaculture leases and/or licences, and any other existing aquaculture leases and/or licences within the region, and aquaculture zone policies under the *Aquaculture Act 2001*. | Development of a class to which Schedule 9 clause 3 item 19 of the Planning, Development and Infrastructure (General) Regulations 2017 applies. |

## Part 10 - Significant Trees

### Notes: Declared Trees

Pursuant to Section 68 of the Planning, Development and Infrastructure Act 2016, the following trees or stand of trees have been declared as significant by the Planning and Design Code.

### Adelaide

| Property Address | Suburb | Certificate of Title | Location | Species and Common Name | Criteria |
