Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| Class of Development | Applicable Policies | | | |

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 3 - Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development | Deemed-to-Satisfy Development Classification Criteria | | | |

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies 6129

referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Class of Development | Deemed-to-Satisfy Development Classification Criteria | | | |

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.
