

Southend Jetty Lower Landings Remediation

Works notice

We are undertaking remediation works on the Southend Jetty lower landings to improve the jetty's structural integrity and lifespan.

These works are being undertaken as part of the South Australian Marine Asset Sustainment fund. The fund is designed to ensure ongoing access to jetties, which provide significant economic, social, and environmental benefits for communities.

What's happening

Remediation works on the Southend Jetty are continuing and are progressing well. Recently completed works include:

- remediation of lower landings one, two and three
- the installation of new structural piles
- installation of new cross brace brackets and decking

These works will help to facilitate safer berthing and mooring for vessels.

We have also identified further opportunities to upgrade the jetty, including installing extra jetty bracing and handrails further improving the condition and longevity of the jetty.

These works will be carried out as part of these works and prior to the start of the commercial fishing season.

How this affects you

To safely undertake these works the Southend Jetty will remain temporarily closed to all users.

Workers will be operating across the jetty and from the water.

Works will be undertaken outside the main Southern Rock Lobster commercial fishing season to minimise impacts to the industry. Outside of work hours commercial operators can access landings 4, 5 and 6 as required. During work hours no access will be permitted.

We would like to thank community for your support while we undertake these important upgrade works.

When

Ongoing until late August 2026, weather permitting

Hours of work

Monday to Sunday
7am to 4pm

Where

Southend Jetty, Southend
