

Tram Network Improvements

Project update – September 2026

What's happening

As part of Tram Network Improvements works, we are upgrading the power supply along the tram line.

New equipment cabinets will be installed near each tram stop between South Terrace and Brighton Road. Cabinets at Stops 2 and 15 will be located just outside the rail corridor, while all other cabinets will be installed within the rail corridor.

The new cabinets will be installed next to existing electrical cabinets. They will be slightly larger in size and painted a similar grey colour to match the existing cabinets.

How this affects you

Work to instal the new cabinets will occur from early September and is expected to be completed in late 2026.

Works will be carried out in stages and crews will be on site at various times throughout the project.

There will be no disruption to tram services during these works.

Thank you for your patience while we deliver these important improvements.

When

Early September 2026 to late 2026

Hours of operation

7am – 6pm Monday to Friday

Where

Tram line between South Terrace and Brighton Road
