James Congdon Drive and Sir Donald Bradman Drive upgrade

Australian Government

Government
of South Australia
Department for Infrastructure
and Transport

We are planning to upgrade this intersection by introducing right turn lanes from James Congdon Drive into Sir Donald Bradman Drive (city-bound). This will improve network connectivity and options for motorists to access the CBD.

This project is being delivered as part of an \$850 million suite of projects is designed to ensure Adelaide's road network functions efficiently during construction of the River Torrens to Darlington (T2D) Project, and once it has been completed.

What's happening

To assist with the early project planning, ground investigation works will continue to be undertaken on and around the intersection.

How this affects you

To minimise impacts to road users, these works will be undertaken at night between 7pm and 6am from **Sunday 7 July until Wednesday 31 July 2024, weather permitting.**

Works will commence at the northern section of the intersection on James Congdon Drive near Railway Terrace, moving progressively south and then from west to east on Sir Donald Bradman Drive.

To do this work safely, temporary lane and speed restrictions will be in place.

Please plan ahead and expect some delays.

Some noise disturbance can be expected at times while these works are completed; however, the work will be managed to minimise disturbance to nearby residents and businesses as much as practically possible.
