

Port Lincoln projects

Community update

We're delivering multiple projects throughout Port Lincoln to improve safety

These projects include the Porter Street, Liverpool Street and Railway Place Intersection Upgrade and replacement of existing timbers at the Lincoln Cove Marina promenade.

Porter Street, Liverpool Street and Railway Place Intersection upgrade

We're improving safety for motorists and pedestrians at this intersection. These works are jointly funded by the Australian (80%) and South Australian (20%) governments as part of the Heavy Vehicle Safety and Productivity Program.

Local insights and feedback received during our consultation in late 2024 has helped inform the development of the final design. See the final design overleaf.

Construction timeline

In the coming months you may notice some early work activities around the intersection, including site surveys and service relocations.

Major construction is scheduled to commence in late 2025, with project completion expected in early 2026. Advance notice will be provided ahead of early works and before works major construction commences.

Lincoln Cove Marina - promenade timber replacement

The Lincoln Cove Marina, located five kilometres from the centre of the town, is a hub for the region's thriving commercial fishing industry and recreational boating community. It is home to the largest commercial fishing fleet in the Southern Hemisphere and is a vital hub for South Australia's world class seafood industry.

To ensure the continued safe use of this facility, and support economic and community development in the region, we are undertaking timber replacement works across three areas of the promenade within the marina.

Three existing timber walkway promenades, including handrailing, will be replaced with marine grade fibre reinforced composite polymer (FRP). FRP is highly resistant to the corrosive effects of saltwater, and its use in this project will ensure the promenades are safe and accessible for years to come.

Lincoln Cove Marina

Construction timeline

Construction is scheduled to commence from mid-June 2025, with project completion expected in late 2025, weather permitting.

To safely undertake these works, access to some areas along the promenade will be restricted the duration of the works. A work zone map can be viewed overleaf, and online at www.dit.sa.gov.au/PortLincolnProjects.

We will continue to work closely with the City of Port Lincoln, and the local community to minimise impacts as much as practically possible.

The Lincoln Cove Marina will remain open to all users during these works.

Thank you for your understanding while these important works to increase the longevity of the Lincoln Cove Marina are undertaken.
