Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m ² (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)
1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.

<p>2. All development undertaken by:</p> <ul style="list-style-type: none"> (a) the South Australian Housing Trust either individually or jointly with other persons or bodies or (b) a provider registered under the Community Housing National Law participating in a program relating to the renewal of housing endorsed by the South Australian Housing Trust. 	<p>Except development involving any of the following:</p> <ul style="list-style-type: none"> 1. residential flat building(s) of 3 or more building levels 2. the demolition of a State or Local Heritage Place 3. the demolition of a building (except an ancillary building) in a Historic Area Overlay.
<p>3. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> (a) air handling unit, air conditioning system or exhaust fan (b) ancillary accommodation (c) building work on railway land (d) carport (e) deck (f) dwelling (g) dwelling addition (h) fence (i) jetty, pontoon or boat berth (or any combination thereof) (j) outbuilding (k) pergola (l) private bushfire shelter (m) residential flat building (n) retaining wall (o) shade sail (p) solar photovoltaic panels (roof mounted) (q) swimming pool or spa pool (r) verandah (s) water tank. 	<p>Except development that:</p> <ul style="list-style-type: none"> 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. involves a building wall (or structure) that is proposed to be situated on a side boundary (not being a boundary with a primary street or secondary street) and: <ul style="list-style-type: none"> (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
<p>4. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> (a) consulting room (b) office (c) shop. 	<p>Except development that:</p> <ul style="list-style-type: none"> 1. exceeds the maximum building height specified in Waterfront Neighbourhood Zone DTS/DPF 4.1 or 2. does not satisfy Waterfront Neighbourhood Zone DTS/DPF 1.5 or 3. involves a building wall (or structure) that is proposed to be situated on a side boundary (not being a boundary with a primary street or secondary street) and: <ul style="list-style-type: none"> (a) the length of the proposed wall (or structure) exceeds 11.5m (other than where the proposed wall abuts an existing wall or structure of greater length on the adjoining allotment) or (b) the height of the proposed wall (or post height) exceeds 3m measured from the top of footings (other than where the proposed wall (or post) abuts an existing wall or structure of greater height on the adjoining allotment).
<p>5. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> (a) internal building works (b) land division (c) recreation area (d) replacement building (e) temporary accommodation in an area affected by bushfire (f) tree damaging activity. 	<p>None specified.</p>
<p>6. Demolition.</p>	<p>Except any of the following:</p> <ul style="list-style-type: none"> 1. the demolition of a State or Local Heritage Place 2. the demolition of a building (except an ancillary building) in a Historic Area Overlay.

Placement of Notices - Exemptions for Performance Assessed Development

None specified.

Placement of Notices - Exemptions for Restricted Development

None specified.

Workers' Settlement Zone

Assessment Provisions (AP)

Desired Outcome

DO 1	Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
<p>PO 1.1</p> <p>Development is limited to workers' accommodation and ancillary land uses that support the day to day needs of workers.</p>	<p>DTS/DPF 1.1</p> <p>Development comprises one or more of the following:</p> <ul style="list-style-type: none"> (a) a dwelling (manager's house) (b) amenity block (including shower, toilet and laundry facilities) in association with and ancillary to the workers' accommodation (c) dwelling addition (d) recreational facility in association with and ancillary to the workers' accommodation (e) office in association with and ancillary to the workers' accommodation (f) shop in association with and ancillary to the workers' accommodation (g) workers' accommodation.
<p>PO 1.2</p> <p>Shops, primarily in the form of a restaurant, associated with and ancillary to Workers' accommodation enhance the amenity of the zone for those workers.</p>	<p>DTS/DPF 1.2</p> <p>Shops located on the same site as workers' accommodation meets one of the following:</p> <ul style="list-style-type: none"> (a) it has a gross leasable floor area not exceeding 100m² (b) it is a restaurant.
<p>PO 1.3</p> <p>Office associated with and ancillary to Workers' accommodation supports the management and administrative aspects of the accommodation.</p>	<p>DTS/DPF 1.3</p> <p>Office is ancillary to and located on the same site as Workers' accommodation.</p>
<p>PO 1.4</p> <p>Development provides space adjacent to and around habitable buildings to accommodate areas for parking of vehicles, storage of waste, landscaping, recreation areas, swimming pool/spa and similar facilities to enhance the amenity for resident workers.</p>	<p>DTS/DPF 1.4</p> <p>The total roofed area of all existing and proposed buildings on the site will not exceed 60%.</p>
<p>PO 1.5</p> <p>Workers' accommodation is established in association with major industrial, mining, agricultural and business activities to support and facilitate economic activity.</p>	<p>DTS/DPF 1.5</p> <p>Workers' accommodation is constructed by the principal operator of the relevant business or authorised agent thereof.</p>
<p>PO 1.6</p> <p>A dwelling in the form of a manager or caretaker residence associated with and ancillary to Workers' accommodation provides for the efficient management, maintenance and support of residents.</p>	<p>DTS/DPF 1.6</p> <p>A dwelling is:</p> <ul style="list-style-type: none"> (a) ancillary to and located on the same allotment or within the same lease area as the workers' accommodation (b) has a demonstrated connection with workers' accommodation (c) will not result in more than one dwelling being located on an allotment or lease area used for workers' accommodation.
Land Division	
<p>PO 2.1</p> <p>Land division is designed to:</p> <ul style="list-style-type: none"> (a) minimise fire risk danger to occupants of buildings and firefighting personnel (b) minimise the potential risk of damage to buildings and other property during a bushfire (c) ensure each allotment contains a suitable building envelope that is located away from any vegetation that would pose an unacceptable risk in the event of bushfire. 	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
Built Form and Character	
<p>PO 3.1</p> <p>Buildings and recreational facilities are set back from internal roads to accommodate vehicular movements and contribute to the safety of workers and visitors.</p>	<p>DTS/DPF 3.1</p> <p>Buildings and recreational facilities are set back at least 1 metre from an internal road.</p>
<p>PO 3.2</p> <p>Buildings are set back from public roads to mitigate impacts on the streetscape.</p>	<p>DTS/DPF 3.2</p> <p>Buildings are set back at least 2m from a public road.</p>
<p>PO 3.3</p> <p>Buildings and recreational areas are set back from the boundary of the zone to minimise impacts on neighbouring properties and enhance local amenity.</p>	<p>DTS/DPF 3.3</p> <p>Buildings are set back at least 2 metres from the zone boundary.</p>
<p>PO 3.4</p>	<p>DTS/DPF 3.4</p>

Planning and Design Code - 26 August - Version 2021.12
Buildings use materials and finishes to complement the landscape and mitigate the effects of glare on adjacent land users.

Buildings are clad in, or a combination of:

- (a) materials other than sheet metal
- (b) sheet metal pre-colour treated or painted in a non-reflective colour.

Landscaping

PO 4.1
Landscaping is provided along public roads and thoroughfares, zone boundaries and the perimeter of common vehicle parking areas to enhance the visual appearance of development.

DTS/DPF 4.1
Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site in accordance with the following:

- (a) at least 1.5m wide along any boundary on the perimeter of the zone fronting a public road or thoroughfare
- (b) at least 1m wide around the perimeter of any shared vehicle parking area.

PO 4.2
Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.

DTS/DPF 4.2
Landscape areas comprise:

- (a) not less than 10 percent of the site area
- (b) a dimension of at least 1m.

Concept Plans

PO 5.1
Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.

DTS/DPF 5.1
The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

In relation to DTS/DPF 5.1, in instances where:

- (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.
- (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 5.1 is met.

Table 1 - Accepted Development Classification

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Class of Development	Accepted Development Classification Criteria
<p>Air handling unit, air conditioning system or exhaust fan Except where any of the following apply:</p> <ul style="list-style-type: none"> • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The item will be installed on or within an existing dwelling. 2. The item being installed does not encroach on a public street. 3. If the associated building is in a Historic Area Overlay, no part of the item, when installed, will be able to be seen by a person standing at ground level in a public street.
<p>Building work on railway land Except where any of the following apply:</p> <ul style="list-style-type: none"> • Coastal Areas Overlay • Hazards (Acid Sulfate Soils) Overlay • Local Heritage Place Overlay • Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay • Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. Building work is associated with a railway. 2. It is situated (or to be situated) on railway land (within the meaning of Schedule 4 clause 14 of the Planning, Development and Infrastructure (General) Regulations 2017). 3. It is required for the conduct or maintenance of railway activities. 4. It does not involve the clearance of native vegetation.
<p>Carport Except where any of the following apply:</p> <ul style="list-style-type: none"> • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Total floor area - does not exceed 40m². 6. Post height - does not exceed 3m measured from natural ground level (and not including a gable end). 7. Building height - does not exceed 5m. 8. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 11m unless: <ul style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 9. If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ul style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure.

	<ol style="list-style-type: none"> 10. The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment. 11. Door opening for vehicle access facing a street frontage - does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser). 12. The carport is located so that vehicle access: <ol style="list-style-type: none"> (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State maintained road, and will use a driveway that: <ol style="list-style-type: none"> (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site. 13. If any part involves cladding in sheet metal-will have cladding which is pre-colour treated or painted in a non-reflective colour. 14. Does not involve the clearance of native vegetation.
<p>Internal building work Except where any of the following apply:</p> <ul style="list-style-type: none"> • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. There will be no increase in the total floor area of the building 2. Other than where located within the Historic Area Overlay there will be no alteration to the external appearance of the building to any significant degree. 3. There will be no alteration to the external appearance of the building where located within the Historic Area overlay.
<p>Outbuilding Except where any of the following apply:</p> <ul style="list-style-type: none"> • Coastal Areas Overlay • Future Road Widening Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • Significant Landscape Protection Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is detached from and ancillary to a dwelling erected on the site. 4. Primary street setback - at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary. 5. Secondary street setback - at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads). 6. Total floor area - does not exceed 40m². 7. Wall height - does not exceed 3m measured from natural ground level (and not including a gable end). 8. Building height - does not exceed 5m. 9. If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) - a length not exceeding 10m unless: <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 10. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent. 11. Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%. 12. If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): <ol style="list-style-type: none"> (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure. 13. If the outbuilding is a garage, it is located so that vehicle access: <ol style="list-style-type: none"> (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or (b) is not obtained from a State Maintained Road, and will use a driveway that: <ol style="list-style-type: none"> (i) is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; (ii) will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; (iii) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on

	<p>average</p> <ul style="list-style-type: none"> (iv) is aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of the driveway at the public road boundary and the centre of the front of the covered car parking space for which it provides vehicle access (v) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site <p>14. If clad in sheet metal is pre-colour treated or painted in a non-reflective colour.</p> <p>15. Does not involve-</p> <ul style="list-style-type: none"> (a) excavation exceeding a vertical height of 1 metre; or (b) filling exceeding a vertical height of 1 metre, <p>and, if the development involves both excavation and filling, the total combined excavation and filling must not exceed a vertical height of 2 metres.</p> <p>16. Does not involve the clearance of native vegetation.</p>
<p>Partial demolition of a building or structure Except where any of the following apply:</p> <ul style="list-style-type: none"> • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<p>None</p>
<p>Shade sail Except where any of the following apply:</p> <ul style="list-style-type: none"> • Future Local Road Widening Overlay • Future Road Widening Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. Shade sail consists of permeable material. 4. The total area of the sail - does not exceed 40m². 5. No part of the shade sail will be: <ul style="list-style-type: none"> (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment. 6. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 7. If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 11m. 8. In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment - the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary. 9. Does not involve the clearance of native vegetation.
<p>Solar photovoltaic panels (roof mounted) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof. 3. Panels and associated components do not overhang any part of the roof. 4. Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system. 5. If the building is in a Historic Area Overlay-no part of the system, when installed, will be able to be seen by a person standing at ground level in a public street.
<p>Swimming pool or spa pool Except where any of the following apply:</p> <ul style="list-style-type: none"> • Coastal Areas Overlay • Future Local Road Widening Overlay • Future Road Widening Overlay • Hazards (Acid Sulfate Soils) Overlay • Hazards (Flooding) Overlay • Historic Area Overlay • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. It is ancillary to a dwelling erected on the site or a dwelling to be erected on the site in accordance with a development authorisation which has been granted. 4. Allotment boundary setback - not less than 1m. 5. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 6. Location of filtration system from a dwelling on an adjoining allotment: <ul style="list-style-type: none"> (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise; or (b) not less than 12m in any other case. 7. Does not involve the clearance of native vegetation.
<p>Water tank (above ground) Except where any of the following apply:</p> <ul style="list-style-type: none"> • Local Heritage Place Overlay • State Heritage Area Overlay • State Heritage Place Overlay 	<ol style="list-style-type: none"> 1. The development will not be contrary to the regulations prescribed for the purposes of section 86 of the <i>Electricity Act 1996</i>. 2. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system. 3. The tank is part of a roof drainage system. 4. Total floor area - not exceeding 15m². 5. The tank is located wholly above ground. 6. Tank height - does not exceed 4m above natural ground level. 7. Primary street setback - at least as far back as the building line of the building to which it is ancillary. 8. In the case of a tank made of metal - the tank is pre-colour treated or painted in a non-reflective colour.

9. Does not involve the clearance of native vegetation

Water tank (underground)

1. The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system.
2. The tank (including any associated pump) is located wholly below the level of the ground.
3. Does not involve the clearance of native vegetation.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Class of Development	Deemed-to-Satisfy Development Classification Criteria			
	Zone	General Development Policies	Subzone <small>(applies only in the area affected by the Subzone)</small>	Overlay <small>(applies only in the area affected by the Overlay)</small>

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Class of Development	Applicable Policies			
	Zone	General Development Policies	Subzone <small>(applies only in the area affected by the Subzone)</small>	Overlay <small>(applies only in the area affected by the Overlay)</small>

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m ² (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development	Exceptions
----------------------	------------

<p>1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.</p>	<p>None specified.</p>
<p>2. Any development involving any of the following (or of any combination of any of the following):</p> <ul style="list-style-type: none"> (a) air handling unit, air conditioning system or exhaust fan (b) amenities block (c) building work on railway land (d) internal building works (e) carport (f) deck (g) dwelling (h) dwelling addition (i) office (j) outbuilding (k) pergola (l) replacement building (m) shade sail (n) shop (o) solar photovoltaic panels (roof mounted) (p) swimming pool or spa pool (q) temporary accommodation in an area affected by bushfire (r) tree damaging activity (s) workers accommodation (t) water tank. 	<p>None specified.</p>
<p>3. Demolition.</p>	<p>Except any of the following:</p> <ul style="list-style-type: none"> 1. the demolition of a State or Local Heritage Place 2. the demolition of a building (except an ancillary building) in a Historic Area Overlay.

Placement of Notices - Exemptions for Performance Assessed Development

None specified

Placement of Notices - Exemptions for Restricted Development

None specified

Part 3 - Overlays

Adelaide Dolphin Sanctuary Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the Adelaide Dolphin Sanctuary dolphin population and their habitat.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
<p>PO 1.1 Development avoids or minimises harm to habitat, and the functioning of ecosystems that support the dolphin population.</p>	<p>DTS/DPF 1.1 None are applicable.</p>
<p>PO 1.2 Development does not result in the disruption of critical dolphin behaviours such as breeding, feeding, resting and movement.</p>	<p>DTS/DPF 1.2 None are applicable.</p>
<p>PO 1.3 Stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts to the Adelaide Dolphin Sanctuary.</p>	<p>DTS/DPF 1.3 None are applicable.</p>

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Advertising Near Signalised Intersections Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Provision of a safe road environment by reducing driver distraction at key points of conflict on the road.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Advertisements Near Signalised Intersections	
PO 1.1 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 1.1 Advertising: <ul style="list-style-type: none"> (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Advertisement or advertising hoarding that: <ul style="list-style-type: none"> (a) is within 100m of a: <ul style="list-style-type: none"> (i) signalised intersection or (ii) signalised pedestrian crossing and (b) will: <ul style="list-style-type: none"> (i) be internally illuminated or (ii) incorporate a moving or changing display or message or (iii) incorporate a flashing light. 	Commissioner of Highways.	To provide expert technical assessment on potential risks relating to pedestrian and road safety which may arise from advertisements near intersections.	Development of a class to which Schedule 9 clause 3 item 21 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Affordable Housing Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Affordable housing is integrated with residential and mixed use development.
DO 2	Affordable housing caters for a variety of household structures.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
<p>PO 1.1</p> <p>Development comprising 20 or more dwellings / allotments incorporates affordable housing.</p>	<p>DTS/DPF 1.1</p> <p>Development results in 0-19 additional allotments / dwellings.</p>
<p>PO 1.2</p> <p>Development comprising 20 or more dwellings or residential allotments provides housing suited to a range of incomes including households with low to moderate incomes.</p>	<p>DTS/DPF 1.2</p> <p>Development comprising 20 or more dwellings / or residential allotments includes a minimum of 15% affordable housing except where:</p> <ul style="list-style-type: none"> (a) it can be demonstrated that any shortfall in affordable housing has been provided in a previous stage of development or (b) it can be demonstrated that any shortfall in affordable housing will be accommodated in a subsequent stage or stages of development.
<p>PO 1.3</p> <p>Affordable housing is distributed throughout the development to avoid an overconcentration.</p>	<p>DTS/DPF 1.3</p> <p>None are applicable.</p>
Built Form and Character	
<p>PO 2.1</p> <p>Affordable housing is designed to complement the design and character of residential development within the locality.</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
Affordable Housing Incentives	
<p>PO 3.1</p> <p>To support the provision of affordable housing, minimum allotment sizes may be reduced below the minimum allotment size specified in a zone while providing allotments of a suitable size and dimension to accommodate dwellings with a high standard of occupant amenity.</p>	<p>DTS/DPF 3.1</p> <p>The minimum site area specified for a dwelling can be reduced by up to 20%, or the maximum density per hectare increased by up to 20%, where it is to be used to accommodate affordable housing except where the development is located within the Character Area Overlay or Historic Area Overlay.</p>
<p>PO 3.2</p> <p>To support the provision of affordable housing, building heights may be increased above the maximum specified in a zone.</p>	<p>DTS/DPF 3.2</p> <p>Where a building incorporates dwellings above ground level and includes at least 15% affordable housing, the maximum building height specified in any relevant zone policy can be increased by 1 building level in the:</p> <ul style="list-style-type: none"> (a) Business Neighbourhood Zone (b) City Living Zone (c) Established Neighbourhood Zone (d) General Neighbourhood Zone (e) Hills Neighbourhood Zone (f) Housing Diversity Neighbourhood Zone (g) Neighbourhood Zone (h) Master Planned Neighbourhood Zone (i) Master Planned Renewal Zone (j) Master Planned Township Zone (k) Rural Neighbourhood Zone (l) Suburban Business Zone (m) Suburban Neighbourhood Zone (n) Township Neighbourhood Zone (o) Township Zone (p) Urban Renewal Neighbourhood Zone (q) Waterfront Neighbourhood Zone <p>and up to 30% in any other zone, except where:</p> <ul style="list-style-type: none"> (a) the development is located within the Character Area Overlay or Historic Area Overlay or (b) other height incentives already apply to the development.
Movement and Car Parking	
<p>PO 4.1</p> <p>Sufficient car parking is provided to meet the needs of occupants of affordable housing.</p>	<p>DTS/DPF 4.1</p> <p>Dwellings constituting affordable housing are provided with car parking in accordance with the following:</p> <ul style="list-style-type: none"> (a) 0.3 carparks per dwelling within a building which incorporates dwellings located above ground level within either: <ul style="list-style-type: none"> (i) 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service⁽²⁾ (ii) is within 400 metres of a bus interchange⁽¹⁾ (iii) is within 400 metres of an O-Bahn interchange⁽¹⁾ (iv) is within 400 metres of a passenger rail station⁽¹⁾ (v) is within 400 metres of a passenger tram station⁽¹⁾ (vi) is within 400 metres of the Adelaide Parklands. or (b) 1 carpark per dwelling for any other dwelling.

[NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7.30am and 6.30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development for the purposes of the provision of affordable housing (applying the criteria determined under regulation 4 of the <i>South Australian Housing Trust Regulations 2010</i>).	Minister responsible for administering the <i>South Australian Housing Trust Act 1995</i> .	To provide direction on the conditions required to secure the provision of dwellings or allotments for affordable housing.	Development of a class to which Schedule 9 clause 3 item 20 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Aircraft Noise Exposure Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development sensitive to aircraft noise is designed and located to manage noise intrusion to reduce land use conflict and protect human health.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Buildings that accommodate activities sensitive to aircraft noise are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 1.1 Buildings accommodating sensitive receivers are not located within an area having an ANEF value of 30 or more.
Built Form	
PO 2.1 Additions to buildings involving the addition or extension of habitable rooms are designed and located to minimise aircraft noise intrusion and provide appropriate interior acoustic amenity.	DTS/DPF 2.1 Dwelling additions involving the addition or extension of habitable rooms: (a) do not result in an increase in the total floor area of the existing dwelling by greater than 50 percent (b) do not occur in areas having an ANEF value of 30 or more.
Land Division	
PO 3.1 Land division does not increase the number of allotments used for sensitive receivers in areas adversely affected by aircraft noise to mitigate community exposure to potential adverse environmental and amenity impacts generated by aircraft movements.	DTS/DPF 3.1 Land division: (a) within an area having an ANEF value of less than 30 or (b) within an area having an ANEF value of 30 or more and: (i) does not result in any additional allotments or (ii) none of the allotments will accommodate a sensitive receiver.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Aircraft Landing Areas) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings on the operational and safety requirements of aircraft landing areas.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of an aircraft landing area.	DTS/DPF 1.1 The distance from any part of a runway centreline to the closest point of the building is greater than 30 times building height.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Airport Building Heights (Regulated) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of potential impacts of buildings and generated emissions to maintain operational and safety requirements of registered and certified commercial and military airfields, airports, airstrips and helicopter landing sites.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Building height does not pose a hazard to the operation of a certified or registered aerodrome.	DTS/DPF 1.1 Buildings are located outside the area identified as 'All structures' (no height limit is prescribed) and do not exceed the height specified in the Airport Building Heights (Regulated) Overlay which applies to the subject site as shown on the SA Property and Planning Atlas. In instances where more than one value applies to the site, the lowest value relevant to the site of the proposed development is applicable.
PO 1.2 Exhaust stacks are designed and sited to minimise plume impacts on aircraft movements associated with a certified or registered aerodrome.	DTS/DPF 1.2 Development does not include exhaust stacks.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Any of the following classes of development:</p> <p>(a) building located in an area identified as 'All structures' (no height limit is prescribed) or will exceed the height specified in the <i>Airport Building Heights (Regulated) Overlay</i></p> <p>(b) building comprising exhaust stacks that generates plumes, or may cause plumes to be generated, above a height specified in the <i>Airport Building Heights (Regulated) Overlay</i>.</p>	<p>The airport-operator company for the relevant airport within the meaning of the <i>Airports Act 1996</i> of the Commonwealth or, if there is no airport-operator company, the Secretary of the Minister responsible for the administration of the <i>Airports Act 1996</i> of the Commonwealth.</p>	<p>To provide expert assessment and direction to the relevant authority on potential impacts on the safety and operation of aviation activities.</p>	<p>Development of a class to which Schedule 9 clause 3 item 1 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

Building Near Airfields Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Maintain the operational and safety requirements of certified commercial and military airfields, airports, airstrips and helicopter landing sites through management of non-residential lighting, turbulence and activities that may attract or result in the congregation of wildlife.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>Outdoor lighting associated with a non-residential use does not pose a hazard to commercial or military aircraft operations.</p>	<p>DTS/DPF 1.1</p> <p>Development:</p> <p>(a) primarily or wholly for residential purposes</p> <p>(b) for non-residential purposes that does not incorporate outdoor floodlighting.</p>
<p>PO 1.2</p> <p>Development likely to attract or result in the congregation of wildlife is adequately separated from airfields to minimise the potential for aircraft wildlife strike.</p>	<p>DTS/DPF 1.2</p> <p>All development except where it comprises one or more of the following located not less than 3km from the boundaries of an airport used by commercial or military aircraft:</p> <p>(a) food packing/processing plant</p> <p>(b) horticulture</p> <p>(c) intensive animal husbandry</p> <p>(d) showground</p> <p>(e) waste management facility</p> <p>(f) waste transfer station</p> <p>(g) wetland</p> <p>(h) wildlife sanctuary.</p>
<p>PO 1.3</p> <p>Buildings are adequately separated from runways and other take-off and landing facilities within certified or registered aerodromes to minimise the potential for building-generated turbulence and windshear that may pose a safety hazard to aircraft flight movement.</p>	<p>DTS/DPF 1.3</p> <p>The distance from any part of a runway centreline to the closest point of the building is not less than 35 times the building height.</p>

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Valued streetscape characteristics and development patterns are reinforced through contextually responsive development, design and adaptive reuse that responds to the attributes expressed in the Character Area Statement.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the valued attributes expressed in the Character Area Statement.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 The form of new buildings and structures that are visible from the public realm are consistent with the valued streetscape characteristics of the character area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the character area.	DTS/DPF 2.2 None are applicable.
PO 2.3 Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) are consistent with the prevailing characteristics in the character area.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the character area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the character area.	DTS/DPF 2.5 None are applicable.
Alterations and Additions	
PO 3.1 Additions and alterations do not adversely impact on the streetscape character.	DTS/DPF 3.1 Additions and alterations: <ul style="list-style-type: none"> (a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street or (b) meet all of the following: <ul style="list-style-type: none"> (i) do not include any development forward of the front façade building line (ii) any side or rear extensions are no closer to the side boundary than the existing building (iii) do not involve the construction or alteration of a second or subsequent building level.
PO 3.2 Adaptive reuse and revitalisation of buildings to retain local character consistent with the Character Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary Development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the character of the area and associated building(s).	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).	DTS/DPF 4.2 None are applicable.
PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the of the associated building.	DTS/DPF 4.4 None are applicable.

<p>PO 5.1</p> <p>Land division creates allotments that are:</p> <p>(a) compatible with the surrounding pattern of subdivision in the character area</p> <p>(b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the character area.</p>	<p>DTS/DPF 5.1</p> <p>None are applicable.</p>
Context and Streetscape Amenity	
<p>PO 6.1</p> <p>The width of driveways and other vehicle access ways are consistent with the prevalent width of existing driveways in the character area.</p>	<p>DTS/DPF 6.1</p> <p>None are applicable.</p>
<p>PO 6.2</p> <p>Development maintains the valued landscape pattern and characteristics that contribute to the character area, except where they compromise safety, create nuisance, or impact adversely on existing buildings or infrastructure.</p>	<p>DTS/DPF 6.2</p> <p>None are applicable.</p>

Character Area Statements

Statement#	Statement
------------	-----------

Character Areas affecting Alexandrina Council

AlexC1	<p>Milang Character Area Statement (Alex-C1)</p>		
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>		
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>		
	<p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>		
	<p>Eras, themes and context</p>	<p>Small scale shops.</p> <p>Daranda Terrace comprises tourism and waterfront recreation activities.</p>	
	<p>Allotments, subdivision and built form patterns</p>	<p>Buildings typically of square or rectangular floor plans.</p> <p>Front and side boundary setbacks are generally consistent.</p>	
	<p>Architectural styles, detailing and built form features</p>	<p>Gable, hipped or pitches roofs and verandahs.</p> <p>Advertisements comprise small signs under verandahs and bellow parapets.</p>	
	<p>Building height</p>	<p>Predominantly single storey.</p>	
	<p>Materials</p>	<p>Stone.</p> <p>Slate.</p> <p>Rendered masonry walling.</p> <p>Brick and stone quoins.</p> <p>Corrugated iron.</p> <p>Shingle and slate roofing.</p>	
	<p>Fencing</p>	<p>[Not stated]</p>	
<p>Setting, landscaping, streetscape and public realm features</p>	<p>Car parking and service areas are to the rear of buildings or screened by fencing or landscaping.</p>		
<p>Representative Buildings</p>	<p>[Not identified]</p>		

Character Areas affecting The Barossa Council

BaroC1	<p>Eden Valley Character Area Statement (Baro-C1)</p>	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>	
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>	
	<p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	<p>Eras, themes and context</p>	<p>Pre-1950.</p>
<p>Allotments, subdivision and built form patterns</p>	<p>Grid/organic street pattern.</p>	
<p>Architectural styles, detailing and built form features</p>	<p>Mixture of housing styles.</p>	
<p>Building height</p>	<p>[Not stated]</p>	

Statement#	Statement	
	Materials	[Not stated]
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	"Traditional" verge treatments exist in the main street (front boundary, footpath, street trees and gutter).
	Representative Buildings	[Not identified]

BaroC2	Springton Character Area Statement (Baro-C2)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	Pre-1950.
	Allotments, subdivision and built form patterns	Grid pattern.
	Architectural styles, detailing and built form features	Mixture of housing styles of relatively modern design.
	Building height	Generally single storey detached dwellings.
	Materials	[Not stated]
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	"Traditional" verge treatments exist in the main street (front boundary, footpath, street trees and gutter).
	Representative Buildings	[Not identified]

BaroC3	Angaston Character Area Statement (Baro-C3)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	Late 1800s. 1920s, second wave of prosperity for Angaston in the 20th Century.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Residences in 1879-80. Residences of the 1920s.
	Building height	[Not stated]
	Materials	Local stone.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Tree lined streets, attractive gardens, varied topography, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature gums along the creek, and cypress hedges to many 1920s dwellings.
	Representative Buildings	Identified - refer to SA planning database.

Character Areas affecting City of Campbelltown

	Poet's Corner, Tranmere Character Area Statement (Cam-C1)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	Residential.

Statement#	Statement	
CamC1	Allotments, subdivision and built form patterns	Low site coverage, large front and side building set-backs from property boundaries. Substantial allotment widths, consistent pattern of driveway access from the street to garaging and large landscaped open spaces. Detached dwellings at low densities.
	Architectural styles, detailing and built form features	Villas and inter-war bungalows on large allotments with wide frontages, set within well-established landscaped gardens and streets. Consistent roof forms and pitches. Garages, carports and outbuildings are low in scale and generally located to the rear of dwellings or to the side, well set back from the front facade.
	Building height	Predominantly one storey buildings, with attic or loft spaces contained within the roof form, or two storey additions to the rear of dwellings.
	Materials	Red brick, stone and masonry building materials. Roofs of terracotta tiles or red painted corrugated iron.
	Fencing	Low, open fencing to 1 metre in height, providing views to the built form. Low picket fencing, solid brush fencing, stone or masonry materials, wire and creepers, and hedges. Some high masonry fences specifically along Magill and Glynburn Roads.
	Setting, landscaping, streetscape and public realm features	Avenues of street tree planting make an important contribution to the landscape character and visual amenity. Generally single width driveways, located to protect mature street trees. Lawns and vegetated gardens.
	Representative Buildings	Identified - refer to SA planning database.
‎		

Character Areas affecting Clare and Gilbert Valleys Council

CGVC1	Auburn Character Area Statement (CGV-C1)	
	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.	
	The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Buildings constructed in the 19 th century.
	Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.
	Architectural styles, detailing and built form features	Verandahs. Original architectural styles.
	Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
	Materials	<i>[Not stated]</i>
	Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
Setting, landscaping, streetscape and public realm features	Established trees. Residential amenity.	
Representative Buildings	Identified - refer to SA planning database.	

Character Areas affecting City of Holdfast Bay

	Seacliff Character Area Statement (HoB-C1)	
	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.	
The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.		
Eras, themes and context	1880s to 1920s west of the railway line. 1930s to 1960s east of the railway line.	
Allotments, subdivision and built form patterns	19 th century rectilinear road pattern, with small allotment sizes. Large allotments and frontages. Narrow streets, limited street trees. Reduced setbacks.	

Statement#	Statement	
HoBC1		Varied front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Range of architectural styles. Still some remaining examples of bungalows west of the railway line. Influence of Spanish Mission style architecture. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
	Building height	Single storey.
	Materials	Red and cream brick. Stone. Render. Corrugated iron roofing. Terra cotta tile roofing. Varied building materials across the area.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building.
	Setting, landscaping, streetscape and public realm features	Railway line is a significant feature, with associated landscape corridor. Sloping landform. Coastal views.
	Representative Buildings	<i>[Not identified]</i>

<p>Brighton Character Area Statement (HoB-C2)</p>	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>	
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>	
<p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	1900s to 1930s.
Allotments, subdivision and built form patterns	Medium to large sized allotments. Linear and curvilinear street layout adjacent Dunluce Castle. Large allotment sizes and frontages. Large front setbacks. Small side setbacks, including driveway access down one side of the site and a small setback from the non-driveway side boundary.
Architectural styles, detailing and built form features	Federation style dwellings. Inter-War style dwellings including: Tudor Revival, Californian bungalow, Art Deco, Some Spanish mission. Some Post-War Austerity and Conventional style dwellings. Rectilinear plan forms. High degree of modulation and articulation. Low scale.

Statement#	Statement
HoBC2	<p>Steep roof pitches in the order of 25 to 35 degrees.</p> <p>Short roof spans.</p> <p>Hip and gable roof forms.</p> <p>Deep verandahs and porches.</p> <p>Fine-grain detail in elements such as plinths, string courses, projecting sills.</p> <p>High solid to void ratio.</p> <p>Vertical proportions in windows and doors.</p> <p>Garages, carports and outbuildings are low in scale and generally located unobtrusively to the rear of dwellings or to the side, well set back from the front facade.</p>
Building height	Single storey.
Materials	<p>Corrugated iron or terracotta tile roofing.</p> <p>Brick, stone, timber and part-rendered finishes.</p> <p>Fenestration, doorways, windows, eaves and roof forms generally dark in colour.</p>
Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Brush fencing up to 1.4m in height with either rolled or metal capping.
Setting, landscaping, streetscape and public realm features	<p>Heavily landscaped settings, mature trees.</p> <p>Mature and uniform street tree settings on Linwood and Athelney Streets.</p> <p>Outlook toward a row of heritage listed Eucalyptus trees on Alfreda Street.</p> <p>Heritage listed Dunluce Castle.</p>

Residential Character (Norwood) Area Statement (NPSP-C6)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p>	
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p>	
<p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	<p>Residential. Detached (including battleaxe), semi-detached, row and group dwellings. Residential flat buildings.</p> <p>Although the built form character throughout Norwood is relatively varied, there remains a strong theme associated with the original built form, which includes a significant number of Local Heritage Places and buildings constructed before 1940.</p>
Allotments, subdivision and built form patterns	<p>Rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets, with various eras of development overlaid. Broad mix of allotment sizes and a diversity of residential accommodation options.</p> <p>The regular street grid pattern and the high level of vegetation, including mature street trees and landscaped gardens, are elements that assist in unifying the various eras of built form development in Norwood.</p>
Architectural styles, detailing and built form features	<p>Traditional pre-1940s roof forms, eaves, front verandah treatments, window proportions.</p> <p>A mix of housing styles, including workers cottages, bungalows and villas and a variety of post war dwellings, including walk-up flats, townhouses and a range of contemporary detached, attached and group housing styles. This has, over the years, established a broad mix of allotment sizes and provided a diversity of residential accommodation options, including affordable housing.</p>

NPSPC6

Statement#	Statement
	Some undercroft or underground garages along western side of Osmond Terrace. Semi-detached dwellings often presenting as single dwellings.
Building height	Generally single storey streetscape appearance.
Materials	Varied, traditional materials.
Fencing	Low, open-style fencing that allows connectivity to the street. Front fencing and side fencing (between the front of a dwelling and the street) and landscaping are important components of streetscape character. Some more solid forms of fencing along arterial roads.
Setting, landscaping, streetscape and public realm features	Distinct rectilinear pattern of wide tree-lined major streets, intersected by narrow minor streets. Some limited advertising and signage which complements scale and architecture of associated buildings.

Character Areas affecting City of Playford

Elizabeth South Character Area Statement (Play-C1)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	Late 1950s to early 1960s.
Allotments, subdivision and built form patterns	<p>First stage of the post war planned Garden City north of Adelaide.</p> <p>Layout and land division pattern involving irregular allotment shapes and curvilinear street pattern, typical of the planning and construction of Trust development in the late 1950s and early 1960s.</p> <p>Large proportion of open space as parks and gardens.</p> <p>Parks and mature trees in the landscape road reserve make a significant contribution to the character and amenity of the area.</p> <p>Rectangular allotment shapes in varying sizes. Some allotments have been amalgamated to make way for residential flat buildings and units. Generally large front setbacks. Side setbacks provide visual spacing between dwellings.</p>
Architectural styles, detailing and built form features	<p>Small scale, simplified building forms consistent with South Australian Housing Trust development of the late 1950s early 1960s.</p> <p>Single storey semi-detached and detached buildings. Dwellings being of brick and concrete block construction with varying stylistic treatments. Many dwellings without vehicle garaging.</p> <p>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. Rectilinear plan forms. Low scale. Hipped roof forms.</p>
Building heights	Predominantly single storey.
Materials	Consistent with the materials used in the late 1950s to early 1960s period. Brick or rendered finishes. Corrugated iron roofing. Consistent, original windows dimensions facing the street. Main entrance incorporated into front elevation.
Fencing	Where fencing exists, it is predominantly in the form of low style open fencing along the primary road frontage. Corrugated iron fencing evident to side and rear boundaries.
Setting, landscaping, streetscape and public realm features	<p>Low scale suburban feel, within proximity to the open spaces.</p> <p>Strong sense of uniformity of buildings.</p>
Representative Buildings	[Not identified]

Character Areas affecting City of Port Adelaide Enfield

Enfield Character Area Statement (PAE-C1)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	1900s - 1950s built development.
Allotments,	"Garden suburb" street pattern and modified grid. Generous allotment sizes with wide frontages and substantial rear gardens. Consistent front set-backs.

Statement#	Statement	
PADEC1	subdivision and built form patterns	
	Architectural styles, detailing and built form features	The area is large and features a wide variety of housing styles including bungalows, villas, Tudors, art deco, inter-war, cottages and mansions generally built before the 1940s. There is also a significant stock of quality dwellings built between 1940 and 1950 that augment the pre 1940s dwellings and make an important contribution to the character of the area. There is a notable concentration of bungalows in the western portion of the area and this style is a defining feature in this part of the area.
	Building height	Single storey.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	The 1920s street pattern in this area is distinctive and reflects the garden suburb approach to town planning and subdivision. It results in wide nature strips and reserves that together with mature, well landscaped gardens create road verges which contribute to an open and high quality residential character.
	Representative Buildings	[Not identified]

PADEC2	Glanville (East of Carlisle) Character Area Statement (PADE-C2)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	1860s - 1920s built development.
	Allotments, subdivision and built form patterns	The allotment pattern is shaped to accommodate the alignments of Carlisle Street and Causeway Road. Small allotment sizes with narrow frontages. Dwellings are built close to streets.
	Architectural styles, detailing and built form features	Housing styles include cottages, villas, inter-war and bungalows with cottages being the predominant and key defining feature in the area.
	Building height	Single storey.
	Materials	Materials consistent with the style of building and era of its original construction.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	The area is nestled in to the north west of the Jervois Street bridge and contains many old workers' cottages. These are particularly prevalent in the area bound by Sutherland Street, Connor Street, Hart Street and Carlisle Street. The area's simple low rise housing is strongly counterpointed by the modern, multi -storey Port Adelaide waterfront development to the east of the Outer Harbour rail line and provides an important representation of the early settlement and historical development of Port Adelaide.
Representative Buildings	[Not identified]	

	Largs / Largs North Character Area Statement (PADE-C3)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	1900s - 1960s built development.
Allotments, subdivision and built form patterns	Grid pattern with predominately east -west running streets with the long axes of allotments running north-south. Allotments fronting Lady Gowrie Drive and Military Road configured with their long axes running east-west so that buildings address these roads. A high degree of consistency in front setbacks.	

Statement#	Statement
PAdEC3	Regular and generous rectangular allotments with wide frontages.
	Architectural styles, detailing and built form features Wide range of housing styles including bungalows, villas, inter-war, Tudors, cottages and art deco. There is a strong concentration of pre 1940s built form.
	Building height Predominately single storey but some two storey along parts of the Lady Gowrie Drive frontage.
	Materials Materials consistent with the style of building and era of its original construction.
	Fencing Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences. Original hedges retained, restored and where appropriate, extended, (utilizing the same species of planting currently in existence) as an alternative to constructed fences.
	Setting, landscaping, streetscape and public realm features The southern boundary of this area adjoins the Semaphore/Largs Historic Area. It abuts the coast and contains a significant number of dwellings built during the period from 1915-1940. It has a strong relationship with the coast and features tree lined streets with footpaths on both sides that provide vistas and ready walking access to the foreshore and beach. Wide allotment frontages with generous spacing between driveways make a significant contribution to the walkability of these footpaths and the character of the area. An imposing stand of Norfolk Island pines along Lady Gowrie Drive is a key feature of the area.
	Representative Buildings [Not identified]

Rosewater Character Area Statement (PAdE-C4)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	1900s - 1940s built development.
Allotments, subdivision and built form patterns	Grid pattern distorted by the alignment of Newcastle Street. Small allotments with narrow frontages. Front setbacks are consistent on a street by street basis.
Architectural styles, detailing and built form features	A variety of housing styles but cottages, villas and bungalows are the principle styles.
Building height	Single storey.
Materials	Materials of existing buildings retained where practicable and missing elements reinstated consistent with the style of building and era of its original construction.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	Newcastle Street is a well landscaped road that provides the main access into this area. It features well established avenue tree planting that includes plane trees and jacarandas. Simple, single storey, historic detached dwellings built on allotments with consistent widths laid out in a grid pattern, and the adjacent Mt Carmel school and the reserve to the north west, combine to establish a country town like character.

Character Areas affecting City of Prospect	
<p>Suburban Neighbourhood 1 Character Area Statement (Pr-C1)</p> <p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	Late 19th and Early 20th centuries residential. Limited post-1950s residential. Very low density and primarily detached dwellings.

Statement#	Statement	
PrC1	Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Spacious allotments. Large allotment frontages. Large front setbacks. Street facing front dwelling facades. Large spaces around and between dwellings including generous and asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings display consistent side boundary setbacks between building levels.
	Architectural styles, detailing and built form features	Majority bungalows and villas of a significant scale. Pitched roofs with their vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Prominent front verandahs of bull-nose or concave design. Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
	Building height	Primarily single storey presentation to the street with two storey components sited behind. 1 to 2 storey dwellings with vertical proportions consistent with traditional dwellings (wall height at least 3 metres and no more than 3.6 metres for single storey and up to 7 metres for two storeys. Large scale buildings in context with large to very large allotments and frontages.
	Materials	Stone, brick and rendered finishes. Detailing around doors, windows, wall edges and gables. Limited colour palette for the majority of building façade (sandstone to reds; bluestone and grey tones) with colour highlights in the detailing.
	Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Fencing style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
	Setting, landscaping, streetscape and public realm features	Leafy public realm that visually dominates or supports the built form. Extensively landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Mature vegetation in public realm. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.

PrC2	Suburban Neighbourhood 2 Character Area Statement (Pr-C2)	
	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.	
	The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	Late 19th and Early 20th centuries residential. Limited post-1950s infill residential. Primarily low density and low scale residential, including detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Large allotments. Large allotment frontages. Large front setbacks along with reasonable side setbacks. Street facing front dwelling facades. Moderate spaces around dwellings including asymmetrical (one side larger than the other) side setbacks between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels.
	Architectural styles, detailing and built form features	Mainly single storey detached bungalows, cottages and villas. Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Front verandahs (with bull-nose or concave design) with façade detailing and moderate articulation. Moderate front façade detailing and articulation (wall off-sets, verandahs and deep eaves) with walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
	Building height	Primarily single storey presentation to the street with any two storey components sited behind. Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings at least 3 metres and no more than 3.6 metres in wall height for single storey and up to 7 metres for two storeys. Moderate scale in context with low rise development, allotment size and frontages.
	Materials	Stone, brick and rendered finishes. Detailing around doors, windows, wall edges and gables Limited colour palette for the majority of building façade and roof areas (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.
Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.	
Setting, landscaping, streetscape and public realm features	Leafy public realm that supports the built form. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated. Well landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Front and side garden landscaping. Leafy, garden suburb character and visual separation between houses.

In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	Early 20th century residential. Some examples of residential infill comprising units, conventional and recent dwellings. Primarily low density and low scale residential including various dwelling types.
	Allotments, subdivision and built form patterns	Original land division patterns following grid type street pattern and displaying rectangular, rectilinear allotments. Moderate sized allotments. Moderate to compact allotment frontages. Street facing front dwelling facades. Moderate to compact asymmetrical spaces between dwellings providing physical and visual separation between dwellings. Typically two storey dwellings to display consistent side boundary setbacks between building levels.
	Architectural styles, detailing and built form features	Many bungalows with some cottages, Tudor and art deco housing. Pitched roofs with the vertical proportion similar to wall height and typically around 25 to 49 degree pitch. Front verandahs with façade detailing and moderate articulation (wall off-sets, verandahs and deep eaves) walls with a solid to void ratio of greater than 1:1 and fenestrations showing a vertical prominence.
	Building height	Primarily single storey presentation to the street with two storey components sited behind. Predominantly 1 storey dwellings with vertical proportions consistent with traditional dwellings (at least 3 metres and no more than 3.6 metres in wall height). Moderate to compact scale in context with low rise development, allotment size and frontages.
	Materials	Stone, brick and rendered finishes and durable materials. Detailing around doors, windows, wall edges and gables. Limited palette for the majority of building façade and roof areas with colour highlights in the detailing (sandstone to reds; bluestone and grey tones) with complementary colour highlights in the detailing.
	Fencing	Front fences forward of the building are of an open style and low in height (to 1.2 metres high). Style associated with dwelling style and era of development. Some more solid fencing of standard height along major roads.
	Setting, landscaping, streetscape and public realm features	Leafy public realm that supports the built form. Landscaped front yards with mature vegetation/tree canopy. Minimal hard and artificial surfaces. Leafy garden suburb character and maintaining visual separation between houses. Garages and carports are designed and sited to be subordinate to the main dwelling. Access points are narrow and consolidated.

Character Area affecting District Council of Tatiara

TatC1	<p>Mundulla Character Area Statement (TatC1)</p> <p>The Character Area Overlays identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	Pre-1950.
	Allotments, subdivision and built form patterns	Original land division, large allotments. Buildings sited regularly and facing towards street frontages.
	Architectural styles, detailing and built form features	Consistent roof pitches. Unity of design and scale.
	Building height	Consistent, low scale.
	Materials	Earthen colours. Materials consistent with pre-1950s buildings.
	Fencing	Informal fencing.

Statement#	Statement
	Setting, landscaping, streetscape and public realm features Individual and stands of trees, stone culverts, drainage and footpath system add to character of townscape. Informal street furniture, lighting, footpaths, road surface treatments, kerbing and guttering. Surrounded by well vegetated parklands and grazing land. Uncluttered appearance. Advertisements of traditional styles and scale consistent with the era.

Character Areas affecting City of Victor Harbor

Burke Street Character Area Statement (VIH-C1)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	Consistent low scale detached dwellings, primarily constructed after World War 1 to the later part of the 19th Century (mid 1800s to 1930s). Early settlement, consolidation and growth of residential development.
Allotments, subdivision and built form patterns	Original street layout including rear access lanes and local roads. Curvilinear street with relatively large allotments roughly perpendicular to the street, most with rear laneway access.
Architectural styles, detailing and built form features	Mix of small mid-1800s detached cottages of early Vernacular style, symmetrical and asymmetrical cottages and villas of the mid to late 1800s with Victorian stylistic influences, early 1900s cottages and villas with Federation stylistic influences, Inter-War bungalows. Church and Hall with late Victorian Gothic stylistic influences located at the bend in the road are landmarks. Adjacent to the Church is a Manse built in the Inter-War period with Georgian Revival stylistic influences. Rectilinear plan form. Buildings are typically two or more pavilions rather than a single mass. Steeply-pitched roof forms, typically 35 to 40 degrees on 1800s and early 1900s era buildings and slightly lower on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce the bulk and scale and add visual interest. Lean-to forms are common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.
Building height	Single storey, low scale and simple in form.
Materials	Limestone walls. Red brick or rendered quoin work and details. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials assists in breaking down bulk and scale and adds visual interest.
Fencing	Low, open style construction front fencing (1.2 metres or less) associated with the traditional period and style of building, and providing views to the building. Low timber pickets, post and rails, pier and plinth masonry or wrought iron. Rear and side fencing behind building line up to 1.8 metres, corrugated iron.
Setting, landscaping, streetscape and public realm features	Established garden settings. Varied, small front and side setbacks. Landscaped verges. Garages and carports are sited behind dwellings, accessed from rear laneways or well set back from the front of dwellings.

Character Areas affecting Town of Walkerville

Gilberton Character Area Statement (Walk-C1)	
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to early 1900s.
Allotments, subdivision and built form patterns	Predominantly low density detached dwellings on allotments that are medium in width and of a range of sizes. Some semi-detached and group dwellings on larger allotments.
Architectural styles, detailing and built form features	The historic built form exhibits a mixture of architectural styles from the late 1800s and early 1900s. Edwardian villas alongside Victorian cottages pepper the locality providing a significant narrative that reflects the contemporaneous construction styles.
Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
Fencing	Original fencing with bluestone plinths and cast iron fence railings above. Low front fencing.
Setting, landscaping, streetscape and public realm features	There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. The landscape setting is an important element of the area, with generally open, well vegetated streetscapes through a combination of public and private plantings and low fencing forward each dwelling.

In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	1920s - 1950s.
	Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide street frontages. Detached and semi-detached dwellings on substantial allotments.
	Architectural styles, detailing and built form features	Mixture of Bungalows, Tudor, Dutch Colonial and Art deco style dwellings with examples of Spanish Mission and Arts and Crafts. Pitched roofs. Verandahs / porticos.
	Building height	Single and double storey.
	Materials	Brick. Painted brick. Stone. Rendered masonry. Tiled roofs. Corrugated pre-coloured or galvanised iron sheeting.
	Fencing	No or low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.
	Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Consistent side and rear setbacks, large private yards. Wide side setbacks. Carports and garages are behind the main face of dwellings. Generous traditional well-maintained gardens. Tree lined streets. Low site coverage.
Representative Buildings	[Not identified]	

WeToC5	Novar Gardens Character Area Statement (WeTo-C5)	
	<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>	
	Eras, themes and context	1950s - 1970s.
	Allotments, subdivision and built form patterns	Low density site areas. Wide street frontages. Strong uniformity of allotment patterns. Detached dwellings on relatively square allotments.
	Architectural styles, detailing and built form features	Predominantly Art deco dwellings. Pitched roofs with eaves. Verandahs / porticos.
Building height	Single storey. Discreetly integrated two storey elements within roof space.	

Statement#	Statement	
	Materials	Brick. Face stone. Corrugated pre-coloured or galvanised iron sheeting. Tiled roofs. Timber windows. Feature stone chimneys.
	Fencing	No front fences. Side fences are no further forward than the building line.
	Setting, landscaping, streetscape and public realm features	Consistent front setbacks. Carports and garages are behind the main face of dwellings. Generous well-maintained gardens.
	Representative Buildings	[Not identified]

Thebarton Character Area Statement (WeTo-C6)		
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>		
Eras, themes and context	1890s - 1940s.	
Allotments, subdivision and built form patterns	Medium to very low density site areas. Subdivision consistent with allotment pattern in the immediate locality. Detached, semi-detached and row dwellings on substantial allotments.	
Architectural styles, detailing and built form features	Predominantly detached and semi-detached Victorian and Federation villas/cottages and Bungalow style dwellings with examples of Single fronted cottages; Row dwellings; and Tudor style dwellings. Hip, gable and Dutch gable roofs. Verandahs / porticos. Additions are generally located to the rear of the dwelling.	
Building height	Generally single storey. Second storey within the roof space.	
Materials	Brick. Painted brick. Stone. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Timber verandah posts. Timber filigree. Red brick chimneys.	
Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.	
Setting, landscaping, streetscape and public realm features	Front setbacks small to medium front and side setbacks. Large rear setbacks provide sense of space. Low site coverage. Carports and garages are behind the main face of dwellings. Well established tree lined streets. Narrow frontages (east of South Road). Vehicle access generally via rear laneways.	
Representative Buildings	[Not identified]	

Torrensvile Character Area Statement (WeTo-C7)		
<p>The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.</p> <p>The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.</p>		
Eras, themes and context	1890s - 1940s.	
Allotments, subdivision and built form patterns	Low to very low density site areas. Wide frontages. Commercial development along Henley Beach Road on smaller/ narrower allotments. Detached and semi-detached dwellings on substantial allotments.	
Architectural styles, detailing and built form features	Predominantly Victorian and Federation Villas, Tudor and Bungalow style dwellings with examples of Row cottages; Single fronted cottages; Spanish Mission dwellings; and Parapeted shopfronts. Strong uniformity of layout and buildings. Hip, gable and Dutch gable roofs. Integrated and complementary verandahs / porticos. Additions are generally located to the rear of the dwelling.	
Building height	Generally single storey. Second storey within the roof space.	
Materials	Brick. Painted brick. Stone. Rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Brick chimneys.	
Fencing	Low fencing facilitating views of the dwelling. Post and rail with woven wire. Low level stone or masonry. Timber picket.	
Setting, landscaping, streetscape and public realm features	Large front and side setbacks. Consistent rear setbacks, large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been design and located to preserve existing street trees.

Character Areas affecting Whyalla City Council

WhC1	Whyalla Character Area Statement (Wh-C1)	
	The Character Area Overlay identifies localities that comprise valued character attributes. They can be characterised by a consistent rhythm of allotment patterns, building setting and spacing, landscape or natural features and the scale, proportion and form of buildings and their key elements.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of a Character Area.	
	The preparation of a Contextual Analysis can assist in determining potential additional attributes of a Character Area where these are not identified in the below table.	
	Eras, themes and context	1900 - 1940. Developed in the first 40 years of Whyalla up until the 1940's. Illustrates the increasing prosperity of the city from the small corrugated or rendered masonry cottages to the substantial stone bungalow dwellings constructed by BHP for their senior staff at the steelworks.
	Allotments, subdivision and built form patterns	Pattern of division in predominantly quarter acre lots, generous roads and road reserves with ample provision for on street parking and street planting.
	Architectural styles, detailing and built form features	Colonial Cottages with half-hipped roofs, rendered masonry walls with open verandahs the width of the dwelling, symmetrical fronted dwellings with return verandahs and Bungalow dwellings dominate the architectural style of the dwellings.
	Building height	[Not stated]
	Materials	Corrugated iron, rendered masonry and BHP stone (including stone coins) and BHP brick are the predominant construction materials with corrugated irons roofs.
	Fencing	Simple low picket or low rendered masonry, low open fencing or hedging.
Setting, landscaping, streetscape and public realm features	Pedestrian and cycle connection to the foreshore, Ada Ryan Gardens and Hummock Hill.	
Representative Buildings	[Not identified]	

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Character Preservation District Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognise, protect and enhance the special character of Character Preservation Districts.
DO 2	The long term use of land outside of townships for primary production and associated value adding enterprises is assured and promoted.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land division is undertaken in accordance with Section 8 of the <i>Character Preservation (Barossa Valley) Act 2012</i> and Section 8 of the <i>Character Preservation (McLaren Vale) Act 2012</i> .	DTS/DPF 1.1 None are applicable.
PO 1.2 Residential development located in townships to reinforce settlement patterns within the district and support the continuation of primary production on land outside townships.	DTS/DPF 1.2 Residential development located within designated township areas of the Character Preservation District Overlay.
Built Form and Character	
PO 2.1 Development occurring at the edge of townships is sympathetic to the rural landscape and	DTS/DPF 2.1 None are applicable.

Planning and Design Code - 26 August - Version 2021.12
 reinforces a clear transition between townships and rural landscape through measures including:

- (a) being of a low scale
- (b) orientating residential development towards the rural area
- (c) ensuring visual separation from the rural area through landscaping and road reserves.

PO 2.2 Development contributes to and maintains the historic identity and character of townships through appropriate:	DTS/DPF 2.2 None are applicable.
<ul style="list-style-type: none"> (a) form (b) scale (c) siting (d) design (e) landscaping. 	

PO 2.3 Adaptive re-use of rural structures and historic and/or character buildings supports their preservation and ongoing contribution to the landscape.	DTS/DPF 2.3 None are applicable.
--	-------------------------------------

Built Form and Character in the Rural Area

PO 3.1 Preservation of existing natural features including topography, watercourses and mature trees.	DTS/DPF 3.1 None are applicable.
--	-------------------------------------

PO 3.2 Buildings and structures do not interrupt views of the skyline through measures including being sited below ridge lines.	DTS/DPF 3.2 None are applicable.
--	-------------------------------------

PO 3.3 Buildings and structures harmonise with the natural features of the landscape and reinforce the rural character through the use of muted, neutral, non-reflective landscape colours on external surfaces.	DTS/DPF 3.3 None are applicable.
---	-------------------------------------

PO 3.4 Large buildings and structures are sited and oriented to minimise their visual bulk, particularly if close to roads or in open settings where there are no other buildings or mature trees in close proximity.	DTS/DPF 3.4 None are applicable.
--	-------------------------------------

PO 3.5 Buildings and structures are grouped to create compact clusters well set back from public roads.	DTS/DPF 3.5 None are applicable.
--	-------------------------------------

PO 3.6 Development mitigates the need for long, steep access roads that require excessive grading or removal of vegetation.	DTS/DPF 3.6 None are applicable.
--	-------------------------------------

Earthworks

PO 4.1 Excavation and filling of land is limited to that associated with:	DTS/DPF 4.1 Excavation and/or filling of land is:
<ul style="list-style-type: none"> (a) minimising the visual impact of buildings or structures <p>or</p> <ul style="list-style-type: none"> (a) construction of water storage facilities. 	<ul style="list-style-type: none"> (a) no greater than 1.5 metres from natural ground level (b) only undertaken in order to reduce the visual impact of buildings or structures or to construct water storage facilities.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Coastal Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	The natural coastal environment (including environmentally important features such as mangroves, wetlands, saltmarsh, sand dunes, cliff tops, native vegetation, wildlife habitat, shore and estuarine areas) is conserved and enhanced.
DO 2	Provision is made for natural coastal processes; and recognition is given to current and future coastal hazards including sea level rise, flooding, erosion and dune drift to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature																															
Land Division																																
<p>PO 1.1</p> <p>Land is divided only if it or the subsequent development and use of the land will not adversely affect the environmental values or ability of the land or adjoining land to adapt to changing coastal processes.</p>	<p>DTS/DPF 1.1</p> <p>Land division for minor adjustment of allotment boundaries removes an anomaly in the current boundaries with respect to the location of buildings or structures.</p>																															
<p>PO 1.2</p> <p>Land is not divided unless a layout is achieved whereby roads, parking areas and development sites for each allotment are at least 0.3m above the standard sea flood risk level, unless the land has, or can be provided with, appropriate and acceptable coastal protection measures.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>																															
<p>PO 1.3</p> <p>Other than small-scale infill land division in a predominantly urban zone, land division adjacent to the coast incorporates an existing or proposed public reserve (not including a road or erosion buffer) of a size adequate to provide for natural coastal processes, public access and recreation.</p>	<p>DTS/DPF 1.3</p> <p>None are applicable.</p>																															
Hazard Risk Minimisation																																
<p>PO 2.1</p> <p>Buildings sited over tidal water or that are not capable of being raised or protected by flood protection measures in the future are protected against the standard sea flood risk level and 1m of sea level rise.</p>	<p>DTS/DPF 2.1</p> <p>Building floor levels are at least 1.25m above the standard sea flood risk level.</p>																															
<p>PO 2.2</p> <p>Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.</p>	<p>DTS/DPF 2.2</p> <p>Development incorporates finished ground and floor levels not less than:</p> <table border="1" style="width: 100%; Minimum finished ground level is 3.05m AHD; Minimum finished floor level is 3.3m AHD	
Minimum finished ground level is 3.8m AHD; Minimum finished floor level is 4.05m AHD	
In instances where no value is specified (i.e. there is a blank field):	
(a) finished ground levels allow for sea level rise by being raised 0.3m or more above the standard sea flood risk level	
(b) finished floor levels are 0.55m or more above the standard sea flood risk level	
(c) practical measures can be implemented to provide future protection against an additional sea level rise of 0.7m plus an allowance to accommodate 100 years of land subsidence.	
PO 2.3 Development will not create or aggravate coastal erosion or require coast protection works that cause or aggravate coastal erosion.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is set back a sufficient distance from the coast to provide an erosion buffer in addition to a public reserve that will allow for at least 100 years of coastal retreat for single buildings or small-scale developments, or 200 years of coastal retreat for large scale developments unless: (a) the development incorporates appropriate private coastal protection measures to protect it from anticipated erosion or (b) there are formal commitments to protect the existing or proposed public reserve and development from anticipated coastal erosion.	DTS/DPF 2.4 None are applicable.
PO 2.5 Additions or alterations to, or replacement of, a dwelling do not increase the risk of effects from natural coastal processes such as flooding, sea-level rise, sand drift and erosion.	DTS/DPF 2.5 None are applicable.
Coast Protection Works	
PO 3.1 Development avoids the need for coast protection works through measures such as setbacks to protect development from coastal erosion, sea or stormwater flooding, sand drift or other coastal processes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not compromise the structural integrity of any sea wall or levee bank or the ability to maintain, modify or upgrade any sea wall or levee bank.	DTS/DPF 3.2 None are applicable.
PO 3.3 Unavoidable coast protection works are the subject of binding agreements to cover the cost of future construction, operation, maintenance and management measures and will not: (a) have an adverse effect on coastal ecology, processes, conservation, public access and amenity (b) require commitment of public resources including land (c) present an unacceptable risk of failure relative to potential hazard resulting from failure.	DTS/DPF 3.3 None are applicable.
Environment Protection	
PO 4.1	DTS/DPF 4.1

Development will not unreasonably affect the marine and onshore coastal environment by pollution, erosion, damage or depletion of physical or biological resources; interference with natural coastal processes; or the introduction of and spread of marine pests or any other means.	None are applicable.
PO 4.2 Development avoids delicate or environmentally sensitive coastal areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation.	DTS/DPF 4.2 None are applicable.
PO 4.3 Development allows for ecological and natural landform adjustment to changing climatic conditions and sea levels, by allowing landward migration of dunes, coastal wetlands, mangrove and samphire areas.	DTS/DPF 4.3 None are applicable.
PO 4.4 Development avoids, or in built up areas minimises, impacts on important habitat areas that support the nesting, breeding and movement/migration patterns of fauna, including threatened shorebirds.	DTS/DPF 4.4 None are applicable.
PO 4.5 Development is designed so that wastewater is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.5 Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development or on-site wastewater systems set back a minimum of 100m from the Mean High Water Mark at spring tide.
PO 4.6 Development is designed so that stormwater runoff is disposed of in a manner that avoids pollution or other detrimental impacts on the marine and on-shore environment of coastal areas.	DTS/DPF 4.6 None are applicable.
PO 4.7 Development involving the removal of shell grit, cobbles or sand, other than for coastal protection works purposes, is not undertaken.	DTS/DPF 4.7 Development does not involve the removal of shell grit or sand.
Access	
PO 5.1 Development maintains or enhances appropriate public access to and along the foreshore.	DTS/DPF 5.1 None are applicable.
PO 5.2 Public access through sensitive coastal landforms, particularly sand dunes, wetlands and cliffs, is restricted to defined pedestrian paths and constructed to minimise adverse environmental impact.	DTS/DPF 5.2 None are applicable.
PO 5.3 Access roads to the coast, lookouts and places of interest: (a) do not detract from the amenity or the environment (b) are designed for slow-moving traffic (c) are minimised in number.	DTS/DPF 5.3 None are applicable.
PO 5.4 Development on land adjoining a coastal reserve is sited and designed to be compatible with the purpose, management and amenity of the reserve and to prevent inappropriate access to or use of the reserve.	DTS/DPF 5.4 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, the following:</p> <p>(a) excavation and/or filling where the total volume of material excavated and/or filled exceeds 9m³</p> <p>(b) dwellings and habitable buildings that:</p> <p style="margin-left: 20px;">(i) do not meet DTS/DPF 2.2 or</p> <p style="margin-left: 20px;">(ii) are within 100m of the mean high water mark</p> <p>(c) other than within a Rural Settlement Zone:</p> <p style="margin-left: 20px;">(i) buildings with a floor area greater than 60m² or</p> <p style="margin-left: 20px;">(ii) tourist accommodation, including a caravan park or</p> <p style="margin-left: 20px;">(iii) division of land that would create 1 or more additional allotments</p>	Coast Protection Board.	<p>To provide expert assessment and direction to the relevant authority on:</p> <ul style="list-style-type: none"> • the risk to development from current and future coastal hazards (including sea-level rise, coastal flooding, erosion, dune drift and acid sulfate soils); • coast protection works; • potential impacts from development on public access and the coastal environment (including important coastal features). 	<p>Development of a class to which Schedule 9 clause 3 item 3 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

- (d) off-shore structures
- (e) coast protection works
- (f) infrastructure within 100m landward of the mean high water mark.

Coastal Flooding Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Recognition of coastal flood hazards to avoid the need, now and in the future, for public expenditure on protection of the environment and development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature																																													
<p>PO 1.1</p> <p>Development, including associated roads and parking areas, but not minor structures unlikely to be adversely affected by flooding, is protected from the standard sea flood risk level and 1m of sea level rise.</p>	<p>DTS/DPF 1.1</p> <p>Development incorporates finished ground and floor levels not less than:</p> <table border="1" style="width: 100%; Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Future Road Widening	
PO 1.1 Development does not compromise or is located and designed to minimise its impact on future road widening requirements.	DTS/DPF 1.1 Development does not involve building work, or building work is located wholly outside the land subject to the 6m Consent Area, the C Type Requirement or the Strip Requirement of the Metropolitan Adelaide Road Widening Plan.

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Other than where all deemed-to-satisfy criteria for all policies relevant to this referral are met, development (including the division of land) that is within or may encroach within a Future Road Widening Area.	Commissioner of Highways.	To provide expert technical assessment and direction to the relevant authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 4 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gas and Liquid Petroleum Pipelines Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on strategic gas and liquid petroleum pipelines.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated
	4140

Land Use and Intensity

<p>PO 1.1</p> <p>Community exposure to a potential hazard from the failure of a gas or liquid petroleum pipeline is mitigated by locating development that may accommodate or result in large congregations of people, buildings for housing and / or caring for vulnerable people and community facilities outside areas that pose an unacceptable risk to protect life.</p>	<p>DTS/DPF 1.1</p> <p>Development satisfies one of the following:</p> <p>(a) it does not comprise:</p> <ul style="list-style-type: none"> (i) caravan and tourist park (ii) educational establishment (iii) buildings comprising 3 or more building levels (iv) land division creating allotments under 1ha for residential purposes (except where the existing allotment is less than 1ha) (v) prison (vi) pre-school (vii) residential park (viii) retirement facility (ix) student accommodation (x) supported accommodation (xi) shop or shops with a gross leasable floor area of 1000m² or greater (xii) tourist accommodation (xiii) stadium <p>(b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the <i>Planning, Development and Infrastructure Act, 2016</i></p>
<p>PO 1.2</p> <p>Emergency service and major community health related facilities are located outside areas where a gas or liquid petroleum pipeline failure may disrupt ongoing operations to maintain the response capacity in the event of an emergency.</p>	<p>DTS/DPF 1.2</p> <p>Development does not comprise any of the following:</p> <p>(a) emergency services facility</p> <p>(b) hospital.</p>
<p>PO 1.3</p> <p>Development involving the manufacture, collection, handling or bulk storage of flammable, explosive, or otherwise hazardous materials is located and designed to avoid escalating the potential for and effects of a gas or liquid petroleum pipeline failure.</p>	<p>DTS/DPF 1.3</p> <p>Development satisfies one of the following:</p> <p>(a) it does not comprise:</p> <ul style="list-style-type: none"> (i) general industry (ii) special industry (iii) landfill (iv) renewable energy facility (v) electricity substation (vi) fuel depot (vii) retail fuel outlet (viii) store (ix) warehouse (x) waste treatment facility <p>(b) a class of development referred to in part (a), or any combination thereof, which will occur in accordance with an agreement under section 123 of the <i>Planning, Development and Infrastructure Act, 2016</i></p>

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Gas and Liquid Petroleum Pipelines Overlay DTS/DPF 1.1, 1.2 and 1.3.</p>	<p>The Chief Executive of the Department of the Minister responsible for administering the <i>Petroleum and Geothermal Energy Act 2000</i>.</p>	<p>To provide expert assessment and direction to the relevant authority in relation to:</p> <ul style="list-style-type: none"> (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines). 	<p>Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

Gas and Liquid Petroleum Pipelines (Facilities) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Management of risk to public safety, the environment and security of energy supply from the encroachment of development on gas and liquid petroleum pipeline facilities.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Safety	
PO 1.1 Development (including land division) does not present a risk to public health and safety due to any of the following: (a) continuous noise associated with pipeline facilities used for energy transportation that exceeds the Environment Protection (Noise) Policy (b) potential for occasional noise associated with high pressure venting.	DTS/DPF 1.1 Development (including land division creating additional allotments for such purposes) comprises one or more of the following: (a) open space (b) roadways (c) a class of development that will occur in accordance with an agreement under section 123 of the <i>Planning, Development and Infrastructure Act, 2016</i> (d) a dwelling or ancillary building/structure on an allotment approved for residential purposes.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral, a class of development that does not satisfy Overlay DTS/DPF 1.1.	The Chief Executive of the Department of the Minister responsible for administering the Petroleum and Geothermal Energy Act 2000.	To provide expert assessment and direction to the relevant authority in relation to: (a) potential safety issues relating to development or (b) the potential for development to adversely impact upon the lawful continued operation of strategic infrastructure (gas and liquid petroleum pipelines).	Development of a class to which Schedule 9 clause 3 item 9B of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Gateway Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	The visual amenity and streetscape appeal along prominent entrances into towns, tourist and historic precincts, activity centres and main streets is maintained and improved through the careful siting of buildings and other activities in a well landscaped setting.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form and Character	
PO 1.1 Buildings are set back from main roads to support a consistent high-quality streetscape character where the prominence of larger buildings is appropriately mitigated.	DTS/DPF 1.1 Buildings are set back at least the height of the building and no less than 10m from arterial and main roads and highways, whichever is the greater.
PO 1.2 Building are set back from side boundaries to moderate the appearance of buildings and enhance the outlook from arterial and main roads and highways.	DTS/DPF 1.2 None are applicable.
PO 1.3 The main facade of principal buildings facing arterial and main roads and highways incorporate articulation and various materials to promote a high standard of building design and external	DTS/DPF 1.3 None are applicable.

Landscape Amenity	
<p>PO 2.1</p> <p>Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are sited to reduce visual clutter and untidiness from arterial and main roads and highways.</p>	<p>DTS/DPF 2.1</p> <p>Ancillary buildings including carports, outbuildings and garages, other minor structures, waste storage bins and outdoor storage areas are located in a manner to satisfy one of the following:</p> <ul style="list-style-type: none"> (a) behind principal building(s) facing arterial and main roads and highways (b) behind the building line of principal building(s) and obscured from public view from arterial and main roads and highways by solid fencing or landscaping.
Landscaping	
<p>PO 3.1</p> <p>Development incorporates generous landscaping areas along the frontage to arterial roads and highways to enhance visual amenity and complement associated buildings.</p>	<p>DTS/DPF 3.1</p> <p>None are applicable.</p>
<p>PO 3.2</p> <p>Existing mature on-site vegetation is retained and incorporated into landscape and parking areas to enhance the appearance of land and buildings.</p>	<p>DTS/DPF 3.2</p> <p>None are applicable.</p>
<p>PO 3.3</p> <p>Development incorporates generous landscaping areas along the frontage to arterial roads and landscaped using a combination of high crown evergreen trees, low shrubs and groundcovers to enhance visual amenity and complement the associated buildings.</p>	<p>DTS/DPF 3.3</p> <p>None are applicable.</p>
<p>PO 3.4</p> <p>Vehicle parking areas are located and designed to enhance the streetscape setting by:</p> <ul style="list-style-type: none"> (a) being located to the side or rear of buildings facing arterial and main roads and highways (b) incorporating landscaping, including trees, to break up large parking areas. 	<p>DTS/DPF 3.4</p> <p>None are applicable.</p>
Advertisements	
<p>PO 4.1</p> <p>Advertisements along arterial and main roads, and highways are consistent in height, size and design to support a cohesive and uniform appearance in gateway locations without dominating the streetscape.</p>	<p>DTS/DPF 4.1</p> <p>Advertisements meet all the following:</p> <ul style="list-style-type: none"> (a) will not result in more than 1 advertisement per allotment (b) will not exceed 5m in height (c) do not exceed 3m² per advertising face (d) are not internally illuminated (e) are not animated, flash or move in any way.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Acid Sulfate Soils) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located and undertaken to minimise disturbance of potential or actual acid sulfate soils and / or the release of acid drainage.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
<p>PO 1.1</p> <p>Development that involves excavation or a change to a water table where potential or actual</p>	<p>DTS/DPF 1.1</p> <p>Development does not involve or cause:</p>

acid sulfate soils are present is undertaken to minimise soil disturbance or drainage; prevent or minimise oxidation; and contain and treat any acid drainage to prevent harm or damage to the environment, primary production, buildings, structures and infrastructure or public health.

- (a) excavation of land
- (b) change to a water table.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Hazards (Bushfire - General Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development, including land division responds to the general level of bushfire risk by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep slopes.	DTS/DPF 3.1 None are applicable.
PO 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.	DTS/DPF 3.2 Residential and tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b): (a) the asset protection zone has a minimum width of at least: (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
PO 3.3 Residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) has a dedicated area available that is capable of	DTS/DPF 3.3 None are applicable.

Land Division	
PO 4.1 Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.	DTS/DPF 4.1 None are applicable.
PO 4.2 Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.	DTS/DPF 4.2 None are applicable.
PO 4.3 Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.	DTS/DPF 4.3 None are applicable.
PO 4.4 Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.	DTS/DPF 4.4 None are applicable.
Vehicle Access – Roads, Driveways and Fire Tracks	
PO 5.1 Roads are designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors.	DTS/DPF 5.1 Roads: (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
PO 5.2 Access to habitable buildings is designed and constructed to facilitate the safe and effective: (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors	DTS/DPF 5.2 Access is in accordance with (a) or (b): (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5) (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1) (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either: A. a loop road around the building B. a turning area with a minimum radius of 12.5m (Figure 3) C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4) (xi) incorporate solid, all-weather crossings over any watercourse that support

PO 5.3
Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.

DTS/DPF 5.3
None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

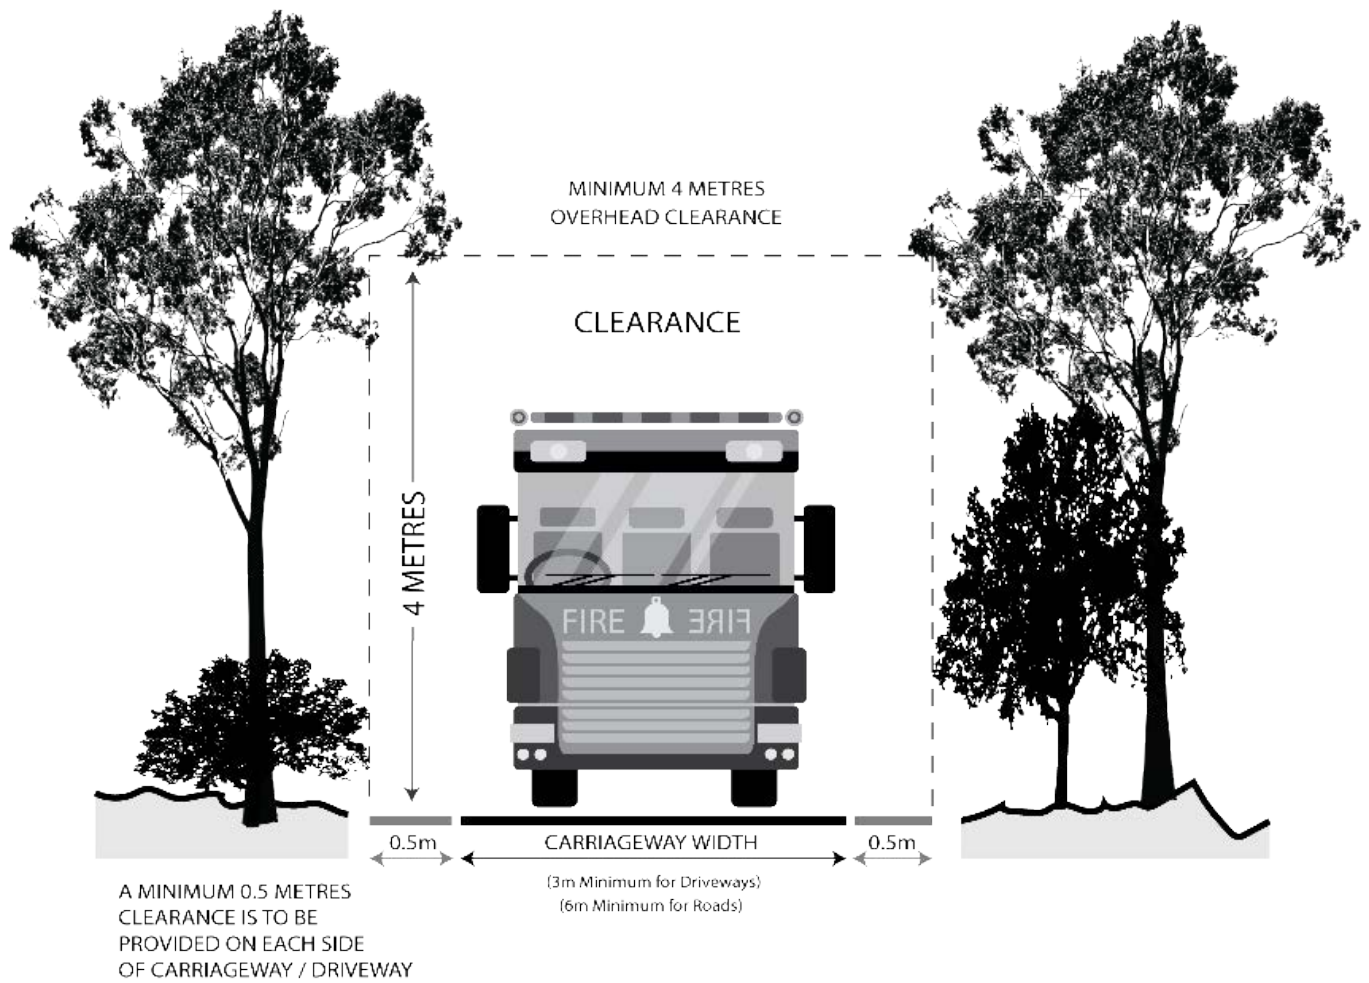

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

<p>PO 5.3</p> <p>Land division is designed to provide a continuous street pattern (avoiding the use of dead end roads/cul-de-sac road design) to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors. Where cul-de-sac / dead end roads are proposed, an alternative emergency evacuation route is provided.</p>	<p>DTS/DPF 5.3</p> <p>None are applicable.</p>
<p>PO 5.4</p> <p>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>	<p>DTS/DPF 5.4</p> <p>None are applicable.</p>
<p>PO 5.5</p> <p>Land division provides sufficient space for future asset protection zones and incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>	<p>DTS/DPF 5.5</p> <p>None are applicable.</p>
<p>Vehicle Access – Roads, Driveways and Fire Tracks</p>	
<p>PO 6.1</p> <p>Roads are designed and constructed to facilitate the safe and effective:</p>	<p>DTS/DPF 6.1</p> <p>Roads:</p>

Planning and Design Code - 26 August - Version 2021.12
 (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel
 (b) evacuation of residents, occupants and visitors.

- (a) are constructed with a formed, all-weather surface
- (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road
- (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road
- (d) have a minimum formed road width of 6m
- (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1)
- (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)
- (g) incorporating cul-de-sac endings or dead end roads are provided within an alternative evacuation route and do not exceed 200m in length and the end of the road has either:
 - (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or
 - (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4)
- (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

PO 6.2
 Access to habitable buildings is designed and constructed to facilitate the safe and effective:

- (a) use, operation and evacuation of fire-fighting and emergency personnel
- (b) evacuation of residents, occupants and visitors.

DTS/DPF 6.2
 Access is in accordance with (a) or (b):

- (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road
- (b) driveways:
 - (i) do not exceed 600m in length
 - (ii) are constructed with a formed, all-weather surface
 - (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8)
 - (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway
 - (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway
 - (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings and/or structures (Figure 1)
 - (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5)
 - (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1)
 - (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)
 - (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either:
 - A. a loop road around the building or
 - B. a turning area with a minimum radius of 12.5m (Figure 3) or
 - C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4)
 - (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

PO 6.3
 Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.

DTS/DPF 6.3
 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except if a relevant certificate accompanies the application for planning consent in respect of the development, any of the following classes of development (including alterations and additions which increase the floor area of such buildings by 10% or more): <ul style="list-style-type: none"> (a) land division creating one or more additional allotments (b) dwelling (c) ancillary accommodation (d) residential flat building 	South Australian Country Fire Service.	To provide expert assessment and direction to the relevant authority on the potential impacts of bushfire on the development.	Development of a class to which Schedule 9 clause 3 item 2 of the Planning, Development and Infrastructure (General)

- (e) tourist accommodation
- (f) boarding home
- (g) dormitory style accommodation
- (h) workers' accommodation
- (i) student accommodation
- (j) pre-school
- (k) educational establishment
- (l) retirement village
- (m) supported accommodation
- (n) residential park
- (o) hospital
- (p) camp ground.

Curves to allow fire trucks to turn into the track without having to back-up several times - minimum external radius of 12.5m.

Figure 3 - Full Circle Turning Area

Fire truck turning area - minimum radius 12.5m

Figure 4 - 'T' or 'Y' Shaped Turning Head

“T” shaped turning area for fire trucks to reverse into so they can turn around
- minimum length 11 m.

“Y” shaped turn around area
- minimum length 11 metres.

Figure 5 - Driveway Passing Bays

Passing bay for fire trucks - minimum width 6 metres, minimum length 17 metres.

Hazards (Bushfire - Medium Risk) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development, including land division responds to the medium level of bushfire risk and potential for ember attack and radiant heat by siting and designing buildings in a manner that mitigates the threat and impact of bushfires on life and property taking into account the increased frequency and intensity of bushfires as a result of climate change.
DO 2	To facilitate access for emergency service vehicles to aid the protection of lives and assets from bushfire danger.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Buildings and structures are located away from areas that pose an unacceptable bushfire risk as a result of vegetation cover and type, and terrain.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 Buildings and structures are designed and configured to reduce the impact of bushfire through using designs that reduce the potential for trapping burning debris against or underneath the building or structure, or between the ground and building floor level in the case of transportable buildings and buildings on stilts.	DTS/DPF 2.1 None are applicable.
PO 2.2 Extensions to buildings, outbuildings and other ancillary structures are sited and constructed using materials to minimise the threat of fire spread to residential and tourist accommodation (including boarding houses, hostels, dormitory style accommodation, student accommodation and Workers' accommodation) in the event of bushfire.	DTS/DPF 2.2 Outbuildings and other ancillary structures are sited no closer than 6m from the habitable building.
Habitable Buildings	
PO 3.1 To minimise the threat, impact and potential exposure to bushfires on life and property, residential and tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited on the flatter portion of allotments away from steep	DTS/DPF 3.1 None are applicable.

slopes.	
<p>PO 3.2</p> <p>Residential, tourist accommodation and habitable buildings for vulnerable communities (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation) is sited away from vegetated areas that pose an unacceptable bushfire risk.</p>	<p>DTS/DPF 3.2</p> <p>Residential, tourist accommodation and habitable buildings for vulnerable communities are provided with asset protection zone(s) in accordance with (a) and (b):</p> <ul style="list-style-type: none"> (a) the asset protection zone has a minimum width of at least: <ul style="list-style-type: none"> (i) 50 metres to unmanaged grasslands (ii) 100 metres to hazardous bushland vegetation (b) the asset protection zone is contained wholly within the allotment of the development.
<p>PO 3.3</p> <p>Residential, tourist accommodation and habitable buildings for vulnerable communities, (including boarding houses, hostels, dormitory style accommodation, student accommodation and workers' accommodation), has a dedicated area available that is capable of accommodating a bushfire protection system comprising firefighting equipment and water supply in accordance with <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i>.</p>	<p>DTS/DPF 3.3</p> <p>None are applicable.</p>
Land Division	
<p>PO 4.1</p> <p>Land division is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.</p>	<p>DTS/DPF 4.1</p> <p>None are applicable.</p>
<p>PO 4.2</p> <p>Land division is designed to provide a continuous street pattern to facilitate the safe movement and evacuation of emergency vehicles, residents, occupants and visitors.</p>	<p>DTS/DPF 4.2</p> <p>None are applicable.</p>
<p>PO 4.3</p> <p>Where 10 or more new allotments are proposed, land division includes at least two separate and safe exit points to enable multiple avenues of evacuation in the event of a bushfire.</p>	<p>DTS/DPF 4.3</p> <p>None are applicable.</p>
<p>PO 4.4</p> <p>Land division incorporates perimeter roads of adequate design in conjunction with bushfire buffer zones to achieve adequate separation between residential allotments and areas of unacceptable bushfire risk and to support safe access for the purposes of fire-fighting.</p>	<p>DTS/DPF 4.4</p> <p>None are applicable.</p>
Vehicle Access - Roads, Driveways and Fire Tracks	
<p>PO 5.1</p> <p>Roads are designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors. 	<p>DTS/DPF 5.1</p> <p>Roads:</p> <ul style="list-style-type: none"> (a) are constructed with a formed, all-weather surface (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road (d) have a minimum formed road width of 6m (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1) (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2) (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either: <ul style="list-style-type: none"> (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4) (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.
<p>PO 5.2</p> <p>Access to habitable buildings is designed and constructed to facilitate the safe and effective:</p> <ul style="list-style-type: none"> (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel (b) evacuation of residents, occupants and visitors. 	<p>DTS/DPF 5.2</p> <p>Access is in accordance with (a) or (b):</p> <ul style="list-style-type: none"> (a) a clear and unobstructed vehicle or pedestrian pathway of not greater than 60 metres in length is available between the most distant part of the habitable building and the nearest part of a formed public access road (b) driveways: <ul style="list-style-type: none"> (i) do not exceed 600m in length (ii) are constructed with a formed, all-weather surface (iii) are connected to a formed, all-weather public road with the transition area between the road and driveway having a gradient of not more than 7 degrees (1-in-8) (iv) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the driveway (v) have a crossfall of not more than 6 degrees (1-in-9.5) at any point along the driveway (vi) have a minimum formed width of 3m (4m where the gradient of the driveway is steeper than 12 degrees (1-in-4.5)) plus 0.5 metres clearance either side of the driveway from overhanging branches or other obstructions, including buildings

- and/or structures (Figure 1)
- (vii) incorporate passing bays with a minimum width of 6m and length of 17m every 200m (Figure 5)
- (viii) provide overhead clearance of not less than 4.0m between the driveway surface and overhanging branches or other obstructions, including buildings and/or structures (Figure 1)
- (ix) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around driveway curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)
- (x) allow fire-fighting vehicles to safely enter and exit an allotment in a forward direction by using a 'U' shaped drive through design or by incorporating at the end of the driveway either:
 - A. a loop road around the building
or
 - B. a turning area with a minimum radius of 12.5m (Figure 3)
or
 - C. a 'T' or 'Y' shaped turning area with a minimum formed length of 11m and minimum internal radii of 9.5m (Figure 4)
- (xi) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

PO 5.3
Development does not rely on fire tracks as means of evacuation or access for fire-fighting purposes unless there are no safe alternatives available.

DTS/DPF 5.3
None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay is designed and incorporates measures to minimise the danger of fire hazard to residents and occupants of buildings, and to protect buildings and property from physical damage in the event of a bushfire.

(Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or does not create 10 or more new allotments.

Vehicle Access - Roads, Driveways and Fire Tracks

PO 2.1
 Roads that are within 100 metres of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay are designed and constructed to facilitate the safe and effective:

- (a) access, operation and evacuation of fire-fighting vehicles and emergency personnel
- (b) evacuation of residents, occupants and visitors.

DTS/DPF 2.1
 Any proposed new roads are not within 100m of a Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire - Medium Risk) Overlay or Hazards (Bushfire - High Risk) Overlay or

- (a) are constructed with a formed, all-weather surface
- (b) have a gradient of not more than 16 degrees (1-in-3.5) at any point along the road
- (c) have a cross fall of not more than 6 degrees (1-in-9.5) at any point along the road
- (d) have a minimum formed road width of 6m
- (e) provide overhead clearance of not less than 4.0m between the road surface and overhanging branches or other obstructions including buildings and/or structures (Figure 1)
- (f) allow fire-fighting services (personnel and vehicles) to travel in a continuous forward movement around road curves by constructing the curves with a minimum external radius of 12.5m (Figure 2)
- (g) incorporating cul-de-sac endings or dead end roads do not exceed 200m in length and the end of the road has either:
 - (i) a turning area with a minimum formed surface radius of 12.5m (Figure 3) or
 - (ii) a 'T' or 'Y' shaped turning area with a minimum formed surface length of 11m and minimum internal radii of 9.5m (Figure 4)
- (h) incorporate solid, all-weather crossings over any watercourse that support fire-fighting vehicles with a gross vehicle mass (GVM) of 21 tonnes.

Procedural Matters (PM) - Referrals

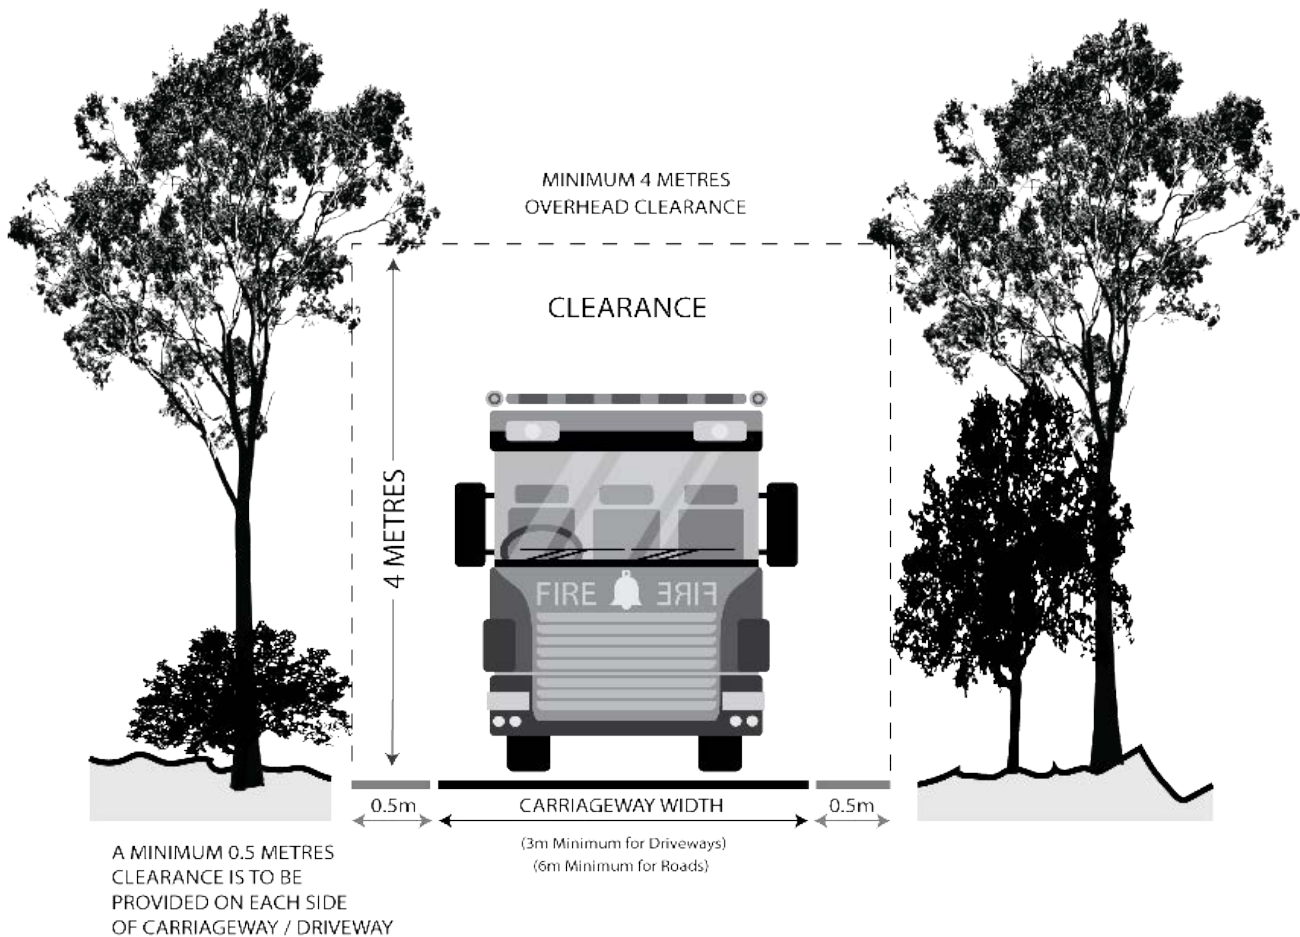

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Figures and Diagrams

Fire Engine and Appliance Clearances

Figure 1 - Overhead and Side Clearances

Roads and Driveway Design

Figure 2 - Road and Driveway Curves

Curves to allow fire trucks to turn into the track without having to back-up several times - minimum external radius of 12.5m.

Figure 3 - Full Circle Turning Area

Fire truck turning area - minimum radius 12.5m

Figure 4 - 'T' or 'Y' Shaped Turning Head

"T" shaped turning area for fire trucks to reverse into so they can turn around - minimum length 11m.

Figure 5 - Driveway Passing Bays

Passing bay for fire trucks - minimum width 6 metres, minimum length 17 metres.

Hazards (Flooding) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Impacts on people, property, infrastructure and the environment from high flood risk are minimised by retaining areas free from development, and minimising intensification where development has occurred.
------	---

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Division	
PO 1.1 Land division is limited to areas where the consequences to buildings and safety are low and can be readily managed or overcome.	DTS/DPF 1.1 None are applicable.
Land Use	
PO 2.1 Development sited and designed to minimise exposure of people and property to unacceptable flood risk.	DTS/DPF 2.1 None are applicable.
PO 2.2 Buildings housing vulnerable people, community services facilities, key infrastructure and emergency services are sited away from flood prone areas to enable uninterrupted operation of services and reduce likelihood of entrapment.	DTS/DPF 2.2 Pre-schools, educational establishments, retirement and supported accommodation, emergency services facilities, hospitals and prisons are not located within the Overlay area.
Flood Resilience	
PO 3.1 Development avoids the need for flood protection works.	DTS/DPF 3.1 None are applicable.
PO 3.2 Development does not cause unacceptable impacts on any adjoining property by the diversion of flood waters or an increase in flood velocity or flood level.	DTS/DPF 3.2 None are applicable.
PO 3.3 Development does not impede the flow of floodwaters through the allotment or the surrounding land, or cause an unacceptable loss of flood storage.	DTS/DPF 3.3 None are applicable.
PO 3.4 Development avoids frequently flooded or high velocity areas, other than where it is part of a flood mitigation scheme to reduce flood impact.	DTS/DPF 3.4 Other than a recreation area, development is located outside of the 5% AEP principal flow path.
PO 3.5 Buildings are sited, designed and constructed to prevent the entry of floodwaters in a 1% AEP flood event where the entry of floodwaters is likely to result in undue damage to, or compromise ongoing activities within, buildings.	DTS/DPF 3.5 Buildings comprise one of the following: <ul style="list-style-type: none"> (a) a porch or portico with at least 2 open sides (b) a verandah with at least 3 open sides (c) a carport or outbuilding with at least 2 open sides (whichever elevations face the direction of the flow) (d) any post construction with open sides (e) a building with a finished floor level that is at least 300mm above the height of a 1% AEP flood event.
PO 3.6 Fences do not unreasonably impede floodwaters.	DTS/DPF 3.6 A post and wire fence (other than a chain mesh fence).
Environmental Protection	
PO 4.1 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building during a 1% AEP flood event to avoid potential environmental harm.	DTS/DPF 4.1 Development involving the storage or disposal of hazardous materials is wholly located outside of the 1% AEP flood plain or flow path.
PO 4.2 Development does not create or aggravate the potential for erosion or siltation or lead to the destruction of vegetation during a flood.	DTS/DPF 4.2 None are applicable.
Site Earthworks	
PO 5.1 The depth and extent of filling required to raise the finished floor level of a building does not cause unacceptable impact on any adjoining property by diversion of flood waters, an increase in flood velocity or flood level, or an unacceptable loss of flood storage.	DTS/DPF 5.1 None are applicable.
PO 5.2 Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.	DTS/DPF 5.2 Filling for ancillary purposes: <ul style="list-style-type: none"> (a) does not exceed 300mm above existing ground level

Access	
PO 6.1 Development does not occur on land: (a) from which evacuation to areas not vulnerable to flood risk is not possible during a 1% AEP flood event (b) which cannot be accessed by emergency services vehicles or essential utility service vehicles during a 1% AEP flood event.	DTS/DPF 6.1 None are applicable.
PO 6.2 Access driveways and tracks to significant development (i.e. dwellings, places of work, etc.) consist of a safe, all-weather trafficable surface that is accessible during a 1% AEP flood event.	DTS/DPF 6.2 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

None	None	None	None

Hazards (Flooding - Evidence Required) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development adopts a precautionary approach to mitigate potential impacts on people, property, infrastructure and the environment from potential flood risk through the appropriate siting and design of development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Flood Resilience	
PO 1.1	DTS/DPF 1.1

Planning and Design Code - 26 August - Version 2021.12
 Development is sited, designed and constructed to minimise the risk of entry of potential floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.

Habitable buildings, commercial and industrial buildings, and buildings used for animal keeping incorporate a finished floor level at least 300mm above:

- (a) the highest point of top of kerb of the primary street
or
- (b) the highest point of natural ground level at the primary street boundary where there is no kerb

Environmental Protection

PO 2.1
 Buildings and structures used either partly or wholly to contain or store hazardous materials are designed to prevent spills or leaks leaving the confines of the building.

DTS/DPF 2.1
 Development does not involve the storage of hazardous materials.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Heritage Adjacency Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development adjacent to State and Local Heritage Places maintains the heritage and cultural values of those Places.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 Development adjacent to a State or Local Heritage Place does not dominate, encroach on or unduly impact on the setting of the Place.	DTS/DPF 1.1 None are applicable.
Land Division	
PO 2.1 Land division adjacent to a State or Local Heritage Place creates allotments that are of a size and dimension that enables the siting and setbacks of new buildings from allotment boundaries so that they do not dominate, encroach or unduly impact on the setting of the Place.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that may materially affect the context of a State Heritage Place.	Minister responsible for the administration of the <i>Heritage Places Act 1993</i> .	To provide expert assessment and direction to the relevant authority on the potential impacts of development adjacent State Heritage Places.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Historic Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Historic themes and characteristics are reinforced through conservation and contextually responsive development, design and adaptive reuse that responds to existing coherent patterns of land division, site configuration, streetscapes, building siting and built scale, form and features as exhibited in the Historic Area and expressed in the Historic Area Statement.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
PO 1.1 All development is undertaken having consideration to the historic streetscapes and built form as expressed in the Historic Area Statement.	DTS/DPF 1.1 None are applicable.
Built Form	
PO 2.1 The form and scale of new buildings and structures that are visible from the public realm are consistent with the prevailing historic characteristics of the historic area.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is consistent with the prevailing building and wall heights in the historic area.	DTS/DPF 2.2 None are applicable.
PO 2.3 Design and architectural detailing of street-facing buildings (including but not limited to roof pitch and form, openings, chimneys and verandahs) complement the prevailing characteristics in the historic area.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development is consistent with the prevailing front and side boundary setback pattern in the historic area.	DTS/DPF 2.4 None are applicable.
PO 2.5 Materials are either consistent with or complement those within the historic area.	DTS/DPF 2.5 None are applicable.
Alterations and additions	
PO 3.1 Alterations and additions complement the subject building, employ a contextual design approach and are sited to ensure they do not dominate the primary façade.	DTS/DPF 3.1 Alterations and additions are fully contained within the roof space of an existing building with no external alterations made to the building elevation facing the primary street.
PO 3.2 Adaptive reuse and revitalisation of buildings to support retention consistent with the Historic Area Statement.	DTS/DPF 3.2 None are applicable.
Ancillary development	
PO 4.1 Ancillary development, including carports, outbuildings and garages, complements the historic character of the area and associated buildings.	DTS/DPF 4.1 None are applicable.
PO 4.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s) and does not dominate the building or its setting.	DTS/DPF 4.2 None are applicable.
PO 4.3 Advertising and advertising hoardings are located and designed to complement the building, be unobtrusive, be below the parapet line, not conceal or obstruct significant architectural elements and detailing, or dominate the building or its setting.	DTS/DPF 4.3 None are applicable.
PO 4.4 Fencing and gates closer to a street boundary (other than a laneway) than the elevation of the associated building are consistent with the traditional period, style and form of the associated building.	DTS/DPF 4.4 None are applicable.

<p>PO 5.1 Land division creates allotments that are:</p> <ul style="list-style-type: none"> (a) compatible with the surrounding pattern of subdivision in the historic area (b) of a dimension to accommodate buildings of a bulk and scale that reflect existing buildings and setbacks in the historic area 	<p>DTS/DPF 5.1 None are applicable.</p>
Context and Streetscape Amenity	
<p>PO 6.1 The width of driveways and other vehicle access ways are consistent with the prevailing width of existing driveways of the historic area.</p>	<p>DTS/DPF 6.1 None are applicable.</p>
<p>PO 6.2 Development maintains the valued landscape patterns and characteristics that contribute to the historic area, except where they compromise safety, create nuisance, or impact adversely on buildings or infrastructure.</p>	<p>DTS/DPF 6.2 None are applicable.</p>
Demolition	
<p>PO 7.1 Buildings and structures, or features thereof, that demonstrate the historic characteristics as expressed in the Historic Area Statement are not demolished, unless:</p> <ul style="list-style-type: none"> (a) the front elevation of the building has been substantially altered and cannot be reasonably restored in a manner consistent with the building's original style or (b) the structural integrity or safe condition of the original building is beyond reasonable repair. 	<p>DTS/DPF 7.1 None are applicable.</p>
<p>PO 7.2 Partial demolition of a building where that portion to be demolished does not contribute to the historic character of the streetscape.</p>	<p>DTS/DPF 7.2 None are applicable.</p>
<p>PO 7.3 Buildings or elements of buildings that do not conform with the values described in the Historic Area Statement may be demolished.</p>	<p>DTS/DPF 7.3 None are applicable.</p>
Ruins	
<p>PO 8.1 Development conserves and complements features and ruins associated with former activities of significance.</p>	<p>DTS/DPF 8.1 None are applicable.</p>

Historic Area Statements

Statement#	Statement						
Historic Areas affecting City of Adelaide							
	<p>North Adelaide Hill Street Historic Area Statement (Adel1)</p> <p>The Historic Area Overlays identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p> <table border="1" data-bbox="148 1547 1552 2168"> <tr> <td data-bbox="148 1547 539 1742">Eras, themes and context</td> <td data-bbox="539 1547 1552 1742"> 1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period. 1920s to 1942 - Inter-war period. Low and medium density cottages. Villas and terrace houses. Historically intact residential areas. Long established institutions. </td> </tr> <tr> <td data-bbox="148 1742 539 2168">Allotments, subdivision and built form patterns</td> <td data-bbox="539 1742 1552 2168"> Large allotments together with low and medium density residential. North Adelaide Childers East Historic Area Statement (Adel2)

The Historic Area Overlays identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p>1837 to 1901 - Victorian period.</p> <p>1901 to 1910 - Edwardian period.</p> <p>1920's to 1942 - Inter-war period.</p> <p>Mansions; historic low and medium density detached and semi-detached residential development such as typical cottages and terrace houses.</p>
Allotments, subdivision and built form patterns	<p>Range of subdivision patterns including large allotments together with low and medium density residential development on narrow frontages.</p> <p><u>Childers Street</u></p> <p>Consistently sited row cottages on north side. Varying setbacks on south side.</p> <p><u>Gover Street</u></p> <p>Generous scale and siting of heritage placed on south side (west of Mansfield Street).</p> <p><u>Jeffcott Street</u></p> <p>North of Childers Street, consistent and intensive built form edge to the eastern frontage sited on or close to the primary street frontage. South of Childers Street, buildings sited close to the primary street frontage.</p>

Statement#	Statement	Statement
Adel2	Architectural styles, detailing and built form features	<p><u>Barton Terrace West</u></p> <p>Cohesive edge along Barton Terrace West.</p> <p>Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights.</p> <p>Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile.</p> <p>Inter-War Housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen’s Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments.</p> <p>Elegant and finely detailed mansions; Large Villas set on large allotments.</p> <p><u>Childers Street</u></p> <p>Victorian, Edwardian and Inter-war housing.</p> <p>Single storey Local Heritage Places, including consistently sited single-storey row cottages, detached cottages and the occasional terrace house with narrow frontages on the northern side and on the southern side, detached and attached cottages with varying set-backs.</p> <p>Continuity of verandahs and parapets and roof profiles.</p> <p>Single storey detached or semi-detached cottages on the southern side.</p> <p><u>Gover Street</u></p> <p>Victorian and Edwardian housing.</p> <p>Primarily single storey detached dwellings.</p> <p>Generous scale and siting patterns of Heritage Places to the southern side of street west of Mansfield Street.</p> <p><u>Jeffcott Street</u></p> <p>Diversity of traditional dwelling types reflecting the different stages of early Victorian residential development.</p> <p>Low scale row dwellings (north of Childers Street).</p> <p>Larger detached bay window and gable-fronted villas on individual sites</p> <p>Continuity of roof and verandah profiles north of Childers Street.</p> <p><u>Barton Terrace West</u></p> <p>Highly modified character.</p> <p>Victorian and Edwardian housing.</p> <p>One or two storey detached or semi-detached dwellings.</p> <p><u>Hack Street</u></p> <p>Intimate character derived from Victorian single storey detached cottages.</p> <p>Single width car parking.</p> <p><u>Mansfield Street</u></p> <p>Single storey detached, semi-detached and row cottages.</p>
	Building height	<p>Low scale, one and two storey residential.</p> <p>Single storey in appearance along the Childers Street, 4181</p>

Statement#	Statement	
	<p>Materials</p>	<p>Gover Street, Jeffcott Street, Hack Street and Mansfield Street frontages.</p> <p><u>Victorian Houses</u></p> <p>Bluestone, limestone or sandstone, with brick or rubble side and rear walls.</p> <p>Timber framed windows and doors.</p> <p>Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration.</p> <p>Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses.</p> <p><u>Edwardian Houses</u></p> <p>Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.</p> <p>Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding.</p> <p>Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels.</p> <p>Masonry fencing with cast iron palisade, or timber (picket).</p> <p><u>Inter-War Houses</u></p> <p>Australian-made Wunderlich roof tiles.</p> <p>Timber joinery with some use of metal framed windows.</p> <p>Typically low masonry walls, built from materials matching the main building.</p>
	<p>Fencing</p>	<p>Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.</p> <p>Front fences of stone and cast iron, brick, stone or rendered pillars and plinths, timber or well detailed masonry.</p> <p>Brick, rendered masonry and timber side fences on secondary street frontages.</p> <p>Rear and side fences (behind main face of building) of corrugated metal sheeting.</p>
	<p>Setting, landscaping, streetscape and public realm features</p>	<p>Tall trees at the intersection of Barton Terrace West and Jeffcott Street create an imposing 'gateway' to this major entrance to North Adelaide and complement the character of existing street tree planting.</p> <p>Street trees and high quality paving and landscaping.</p> <p>Existing vehicle access points along Barton Terrace West.</p> <p><u>Hack Street</u></p> <p>Intimate character of narrow streets.</p>

North Adelaide Carclew Historic Area Statement (Adel5)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p>1837 to 1901 - Victorian period.</p> <p>1901 to 1920s - Edwardian period.</p> <p>1920s to 1942 - Inter-war period.</p> <p>1950 plus - Post War Period.</p> <p>Residential development with intact and generally cohesive townscapes of nineteenth and twentieth century detached houses set in landscaped grounds and imposing two-storey terrace houses.</p>
Allotments, subdivision and built form patterns	<p><u>Strangways Terrace</u></p> <p>Large allotments.</p> <p><u>Ward Street (east of Jeffcott Street)</u></p> <p>Setback established by Heritage Places.</p> <p><u>Ward Street (west of Jeffcott Street) (south side)</u></p> <p>Intimate development pattern.</p> <p>Low density; close grouping of smaller detached cottages of local heritage value located on or near the street to the southern frontage.</p> <p><u>Jeffcott Street</u></p> <p>Dwellings sited close to the street frontage.</p>
Architectural styles, detailing and built form features	<p>Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights.</p> <p>Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile.</p> <p>Inter-War Housing consisting of Bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments.</p> <p>Post War Housing consisting of Old English and Georgian Revival styles. The Old English Revival style uses elements that reference some Elizabethan/Tudor architectural details, steeply pitched roof form and tall chimneys. The Georgian Revival style displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and classically derived proportions and details. This style had no verandah but often displayed an entrance portico. Post-war International Style are generally cubiform with flat roofs, large areas of glass and</p>

Adel5

smooth masonry walls and cantilevered elements and recessed porch areas were typical of the style.

Nineteenth and twentieth century detached houses.

Montefiore Hill, Palmer Place and Brougham Place

Victorian, Edwardian, Inter-war and Post-war housing.

Unique historic townscapes derived from the setting of prominent heritage places and large, generously proportioned mansions set in landscaped grounds, with articulation and modelling with intricate detailing and ornamentation and exhibiting variations in architectural style. Ancillary buildings are subordinate to heritage places and setback from the principal road frontages.

Strangways Terrace

Imposing large detached Victorian Villas to the western part of the Terrace.

Cohesive detached houses, consistency of masonry facades, vertically proportioned windows, pitched roofs, verandahs and porches within a landscaped setting.

Detached and semi-detached dwellings.

Jeffcott Street

Victorian, Edwardian and Inter-war housing.

North of Ward Street the residential character is derived from the low scale and close grouping of small cottages and row dwellings sited close to the street frontage.

South of Ward Street, the townscape character is derived from detached residences, institutional buildings and a large contemporary apartment building.

Articulated masonry facades, gable frontages, pitched roofs, verandahs and cast iron decoration.

Ward Street (east of Jeffcott Street)

Victorian, Edwardian and Inter-war housing.

Detached and semi-detached dwellings and residential flat buildings.

Ward Street (west of Jeffcott Street)

Single-storey detached residences of consistent architectural style, form and siting.

Plain or articulated gabled frontages with a high proportion of solid to void in the composition of facades of these existing dwellings.

Prominence of early limestone walls and outbuildings.

Building height

Low scale.
Note: Concept Plan.

Materials

Victorian Houses

Bluestone, limestone or sandstone, with brick or rubble side and rear walls.

Timber framed windows and doors.

Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration.

Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses.

Edwardian Houses

Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.

Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding.

North Adelaide Margaret Street Historic Area Statement (Adel7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1837 to 1901 - Victorian period
--------------------------	---------------------------------

Statement#	Statement
	<p>1901 to 1920s - Edwardian period</p> <p>1920's to 1942 - Inter-war period</p> <p>One of the most historically intact residential areas in South Australia.</p>
Allotments, subdivision and built form patterns	<p>Continuous built form edge in an historic landscape.</p> <p><u>Gover Street</u></p> <p>Regular pattern of Heritage Places addressing the principal road frontage with a consistent building setback from the street.</p> <p><u>Tynte Street</u></p> <p>Buildings set close to the street frontage west of Margaret Street.</p> <p>Buildings with deeper setbacks east of Margaret Street.</p> <p>Buildings about the street frontage on the intersection of Tynte and Margaret Street.</p> <p><u>Archer Street</u></p> <p>Buildings situated close to the street frontage.</p> <p><u>Ward Street</u></p> <p>Individual dwellings set close to the street.</p> <p><u>Beviss Street</u></p> <p>Consistently sited.</p> <p><u>Curtis Street</u></p> <p>Buildings built close to the street frontage.</p> <p><u>Murray Street</u></p> <p>Closely sited semi-detached cottages.</p>
Architectural styles, detailing and built form features	<p>Victorian housing consisting of single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex verandah roof and four panelled doors with fanlights and often sidelights.</p> <p>Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile.</p> <p>Inter-War housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments.</p> <p>Continuous built form edge in an historic streetscape.</p> <p>Verandahs or balconies over footpaths are not characteristic to the area, other than on existing non-residential corner buildings.</p> <p><u>Gover Street</u></p> <p>Victorian and Edwardian housing.</p> <p>Detached, semi-detached dwellings and residential flat buildings.</p> <p>Consistent building set-back from the street of Heritage places.</p> <p>Appearance of detached or semi-detached dwellings or residential flat buildings on southern side.</p> <p><u>Tynte Street</u></p> <p>Victorian, Edwardian and Inter-war housing. Non-residential buildings larger in scale and frontage.</p> <p>Mix of dwellings characterised by more generous landscaped grounds and deeper setbacks east of Margaret Street.</p> <p>West of Margaret Street, a mixture of dwellings up to two storeys set close to the street frontage.</p> <p>Two storey buildings built to the street adjacent the Tynte and Margarate Streets intersection.</p> <p><u>Archer Street</u></p> <p>Victorian terrace housing, Victorian institutional buildings, a former traditional corner hotel and Victorian detached houses situated close to the street frontage.</p> <p>One and two storey dwellings.</p> <p><u>Ward Street</u></p> <p>Victorian, Edwardian and Inter-war housing.</p> <p>Single-storey detached cottages.</p> <p>Individual dwellings set close to the street and a cohesive built form character with sympathetic interpretation of traditional</p>

Statement#	Statement
	<p>residential forms.</p> <p><u>Ralston Street</u></p> <p>Victorian single-storey semi-detached dwellings.</p> <p>Edwardian historic houses of brick construction to the eastern side of the street.</p> <p>Varying scale, siting and character to the western side of the street.</p> <p><u>Beviss Street</u></p> <p>Consistent sited, Victorian detached and semi-detached single-storey cottages.</p> <p><u>Curtis Street</u></p> <p>Consistent townscape of Victorian detached and semi-detached nineteenth century houses built close to the street frontage.</p> <p><u>Murray Street</u></p> <p>Victorian style row housing built in the form of closely sited semi-detached pairs.</p> <p>Consistent roof forms and verandahs contribute to the cohesive townscape.</p> <p>Almost exclusively comprised of Local Heritage Places.</p> <p><u>Margaret Street</u></p> <p>Victorian and Inter-war housing.</p> <p>Single storey detached or semi-detached buildings.</p>
Building height	<p>Up to two storeys at street corners and junctions.</p> <p>Single storey in appearance along the Margaret Street, Beviss Street and Ralston Street frontages.</p> <p><u>Gover Street</u></p> <p>Single and two storey.</p> <p><u>Ward, Ralston, Beviss Streets</u></p> <p>Single storey.</p>
Materials	<p><u>Victorian Houses</u></p> <p>Bluestone, limestone or sandstone, with brick or rubble side and rear walls.</p> <p>Timber framed windows and doors.</p> <p>Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration.</p> <p>Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses.</p> <p><u>Edwardian Houses</u></p> <p>Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.</p> <p>Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding.</p> <p>Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels.</p> <p>Masonry fencing with cast iron palisade, or timber.</p> <p><u>Inter-War Houses</u></p> <p>Australian-made Wunderlich roof tiles, face brick and rendered masonry.</p> <p>Timber joinery with some use of metal framed windows.</p>
Fencing	<p>Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.</p>
Setting, landscaping, streetscape and public realm features	<p>Pedestrian amenity and shelter provided by street trees and a consistently high standard of paving and other landscaping.</p> <p>Vehicle access provided from rear laneways or minor streets.</p>
Representative Buildings	<p>[Not identified]</p>

North Adelaide LeFevre Historic Area Statement (Adel8)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

Statement#	Statement
	<p>These attributes have been identified in the below table. North Adelaide Cathedral Historic Area Statement (Adel9)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p>1837 to 1901 - Victorian period.</p> <p>1920's to 1942 - Inter-war period.</p> <p>Diverse range of nineteenth century predominantly residential architecture with extensive Park Lands frontages.</p>
Allotments, subdivision and built form patterns	<p>Cohesive lines of buildings set behind landscaping.</p> <p><u>Brougham Court</u></p> <p>Closely sited dwellings with consistent setbacks.</p> <p><u>Kermode Street</u></p> <p>Traditional subdivision pattern to the east of Bagot Street.</p> <p>Existing pattern of development characterised by freestanding buildings within landscaped grounds.</p> <p><u>Pennington Terrace</u></p> <p>Considerable siting, set-back, scale and character variation of State Heritage places.</p> <p><u>King William Road</u></p> <p>Grand, spacious character of the townscape created by St Peter's Cathedral.</p> <p><u>Lakeman Street</u></p> <p>Dwellings sited on the street frontage.</p>
Architectural styles, detailing and built form features	<p>Victorian housing that is single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex form verandah roof and four panelled doors with fanlights and often sidelights.</p>

Adel9

Inter-War housing consisting of bungalows incorporating a broad spreading roof and verandah with typical masonry columns supporting verandah elements and the expansive two storey version was often known as a Gentlemen's Bungalow; and Tudor Revival style displaying steeply pitched roofs with half-timber gable ends and variations of the verandah porch treatments.

Diverse range of nineteenth century architecture including mansions, detached and semi-detached dwellings and cottages.

Brougham Place, Palmer Place

Low scale, Victorian and Inter-war detached dwellings.

Brougham Court

Closely sited Victorian semi-detached and detached Local Heritage Places, with consistent set-backs.

Strong built form definition at the junction of Brougham Place and Brougham Court.

Kermode Street

Victorian and Inter-war housing.

Detached residences on individual allotments

Semi-detached buildings of local heritage value.

Existing pattern of development characterised by freestanding buildings within landscaped grounds.

Appearance of single storey detached or semi-detached dwellings or residential flat buildings west of Bagot Street.

Pennington Terrace

Victorian and Inter-war housing.

State heritage places (including those forming part of St Marks College).

Lakeman Street

Victorian housing.

Small cottages and other single storey dwellings sited on the street frontage. Two storey development generally set back from the street giving single storey appearance.

Side boundary walling of larger residences with frontages to Pennington Terrace and Kermode Street.

Low scale townscape character with two storey building setback.

King William Road

Victorian and Inter-war buildings.

St Peters Cathedral and Anglican Church Offices, Cathedral Hotel.

Building height

Low scale.
Note: Concept Plan.

Materials

Victorian Houses

Bluestone, limestone or sandstone, with brick or rubble side and rear walls.

Timber framed windows and doors.

Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration.

Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses.

Edwardian Houses

Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock

Statement#	Statement	Statement

North Adelaide Women's and Children's Historic Area Statement (Adel10)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

Statement#	Statement	
Adel10	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	<p>Traditional institutional buildings including Angus Building and Alan Campbell Building at the Women’s and Children’s Hospital, the Anglican Church Offices, Former dwellings at Memorial Hospital (‘The Avenues’ and ‘Leahurst’) and the Cathedral Hotel.</p> <p>North Adelaide retains strong physical evidence of the historical stages of the development of the colony, most particularly the typical 1850s to 1880s village type settlement pattern, with shops and other services. Until 1856, Kermode Street was the ‘High Street’ of North Adelaide.</p>
	Allotments, subdivision and built form patterns	<p><u>King William Street</u></p> <p>Cohesive buildings reinforce the setback pattern established by Heritage Places.</p> <p><u>Sir Edwin Smith Drive (South of Kermode) and Pennington Terrace.</u></p> <p>Buildings reinforce the setback pattern established by Heritage Places.</p> <p><u>Kermode Street</u></p> <p>Buildings that reinforce one of the first local main streets of North Adelaide.</p>
	Architectural styles, detailing and built form features	Traditional institutional architecture, including State Heritage Places.
	Building height	<p>Low scale Heritage Places on King William Street, Sir Edwin Smith Drive (South of Kermode) and Pennington Terrace.</p> <p>Buildings enable the visual prominence of the St Peter’s Anglican Cathedral to be seen from the Adelaide Park Lands (Park 11, Park 12, and Park 25).</p>
	Materials	<p>Traditional materials reflecting the architectural styles of the Heritage Places.</p> <p>Cast iron fence and stone walling along Sir Edwin Smith Avenue and Pennington Terrace</p>
	Fencing	Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.
	Setting, landscaping, streetscape and public realm features	<p>St Peter’s Cathedral, dating from 1869, is a major landmark and visually dominates this area which is characterised by large institutional buildings.</p> <p>High degree of pedestrian amenity and shelter provided by street trees and on-site landscaping.</p> <p>Visually interesting streetscapes.</p> <p><u>High quality urban realm that supports cultural and community services within the locality. Landscaping and open space breaks up building mass and provides amenity.</u></p> <p>Pedestrian comfort is supported by a high quality public realm and limited vehicle access from King William Road and Sir Edwin Smith Drive and Kermode Street.</p> <p>Park Land frontages including to the Cross of Sacrifice, Brougham Gardens and Peace Park.</p>
Representative Buildings	<i>[Not identified]</i>	

North Adelaide Stanley Historic Area Statement (Adel11)	
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
Eras, themes and context	<p>Low density residential with a distinctive and cohesive character derived from large nineteenth and early twentieth century dwellings and other low density detached and semi-detached dwellings in a variety of forms and styles.</p> <p>Brougham Place Uniting Church has visual prominence.</p>
Allotments, subdivision and built form patterns	<p>Built form edge to Brougham Gardens and the Park Lands along Brougham Place.</p> <p><u>Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street)</u></p> <p>Close subdivision pattern west of New Street.</p> <p><u>Kingston Terrace</u></p> <p>Consistent setbacks established by Heritage Places.</p>
Architectural styles, detailing and built form features	Victorian housing that is single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections; contains vertically proportioned

Statement#	Statement	
Adel11		<p>window and door surrounds highlighted with moulded render or brick dressings with roofs that are generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay, concave or convex form verandah roof and four panelled doors with fanlights and often sidelights.</p> <p>Edwardian housing with prominent strapped gables and detailing, tall brick chimneys, verandahs incorporated under the main pitch of the roof verandahs with a convex (or bullnose) profile.</p> <p>Georgian Revival housing displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico.</p> <p>Large nineteenth and early twentieth century dwellings comprising more substantial Victorian, Edwardian and Georgian Revival villas, and other low density detached and semi-detached dwellings in a variety of forms and styles.</p> <p>Buildings on Stanley Street, Kingston Terrace and Brougham Place are defined by the landfall and escarpment. Development takes advantage of the landfall by providing semi-basement floors.</p> <p><u>Kingston Terrace</u></p> <p>Victorian and Inter-war housing.</p> <p>Large one and two storey detached residences on individual allotments set close to the street with a Park Lands frontage.</p> <p>Towards Lefevre Terrace: Imposing rear elevations of two storey mansions with frontages to Stanley Street.</p> <p>Modelled and articulated, constructed of masonry, with a high proportion of solid to void in the composition of facades and often feature verandahs and balconies.</p> <p><u>Stanley Street (northern side)</u></p> <p>Victorian, Edwardian and Inter-war.</p> <p>Two large mansions set well back from the northern frontage on elevated ground above Stanley Street and large detached and semi-detached residences.</p> <p><u>Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street)</u></p> <p>Victorian, Edwardian and Inter-war.</p> <p>Two-storey residences on the southern frontage presenting a single-storey appearance to Stanley Street and Brougham Place due to sloping topography.</p> <p>Consistent set-back of stone Victorian villas typified by rich detailing and cast-iron ornamentation west of New Street.</p> <p>Detached or semi-detached dwellings presenting as single storey to the street frontage.</p> <p><u>Brougham Place (western boundary)</u></p> <p>Imposing and finely detailed Brougham Place Uniting Church with its dominant central tower.</p> <p>Low scaled St Ann's College buildings which step down the Brougham Place frontage reflecting the topography of the locality.</p>
	Building height	<p>Low scale dwellings and buildings that enable views of the City from Stanley Street and Brougham Place.</p> <p><u>Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street)</u></p> <p>Single storey to the street frontage.</p>
	Materials	<p><u>Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street)</u></p> <p>Stone with rich detailing and cast iron west of New Street.</p>

Statement#		Statement
		<p><u>Victorian Houses</u></p> <p>Bluestone, limestone or sandstone, with brick or rubble side and rear walls.</p> <p>Timber framed windows and doors.</p> <p>Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast iron brackets and frieze decoration.</p> <p>Masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses.</p> <p><u>Edwardian Houses</u></p> <p>Face brick walling with decorative brick detailing, ashlar stone with brick dressings or moulded render or 'rock face' sandstone (or freestone) for wall material.</p> <p>Unglazed terracotta Marseilles roof tiles, corrugated iron roof cladding.</p> <p>Timber framed windows and doors. Windows often grouped and doors often divided into three or four horizontal panels.</p> <p>Masonry fencing with cast or wrought iron palisade, or timber.</p> <p><u>Georgian Revival Houses</u></p> <p>The Georgian Revival style displays symmetrical elevation with rendered or brick walls, fanlight above central entrance door, hipped roof form and generally classically derived proportions and details. This style had no verandah but often displayed an entrance portico.</p> <p>Masonry fencing (brick and /or dressed stone or rendered) and may include cast or wrought iron palisade and gates.</p>
Fencing		<p>Low, open front fencing (including secondary streets to the main façade of the building) associated with the traditional period and style of the building up to 1.2 metres, allowing views to the building. Rear and side boundary fences (behind main building façade) to 2 metres, and 1.8 metres on corner sites.</p> <p><u>Stanley Street (southern side) and Brougham Place (where it is a visual continuation of Stanley Street).</u></p> <p>Stone and cast iron ornamental boundary fencing along street frontage west of New Street.</p>
Setting, landscaping, streetscape and public realm features		<p>Views of the City from Stanley Street and Brougham Place.</p> <p>Landscape qualities of public and private open space.</p> <p>Vistas to the Park Lands, Brougham Place and the eastern end of Stanley Street.</p> <p>Street trees, avenue planting and other landscaping and a high standard of paving to the public realm.</p> <p>Landmark significance of the Brougham Place Uniting Church.</p> <p>The topography is characterised by the North Adelaide scarp, a steep rise from Melbourne Street to Stanley Street, below which the area is relatively flat, towards the River Torrens. The ridge of the scarp along Kingston Terrace/Stanley Street and the frontages to the Park Lands provided for prestigious residential addresses. The higher concentration of small cottages in the lower section below the scarp reflects the early subdivision of these Town Acres into estates providing workers housing following the establishment of local manufacturing industries such as the Lion Brewery. The creation of the road through Brougham Place in the 1860s and the introduction of horse drawn trams along Melbourne Street in 1878 gave this section of North Adelaide closer links with the rest of the City and made the area an attractive location for workers to live.</p> <p>Vehicle access is via minor streets, side and rear lanes</p>

North Adelaide Kentish Arms Historic Area Statement (Adel12)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
	Eras, themes and context	Residential area reflecting the townscapes of large nineteenth and early twentieth century. 1837 to 1901 - Victorian period. 1901 to 1920s - Edwardian period.
	Allotments, subdivision and built form patterns	Strong residential built form edge to the Park Lands and Mann Terrace with regular siting and pattern of building addressing principal road frontage. <u>Stanley Street (south side), East and West Pallant Streets</u> Closely sited single-storey buildings. <u>Stanley Street (north side)</u> Close siting of buildings.
	Architectural styles, detailing and built form features	<u>Victorian Dwellings</u> Single or two storey houses built in a variety of sizes and scale. Single fronted, symmetrically fronted, and asymmetrically fronted houses, some with bay fronted projections. Vertically proportioned window and door surrounds highlighted with moulded render or brick dressings. Roofs generally hipped in form, with the asymmetrical style, gable ended or hipped roof to the projecting bay. Concave or convex form verandah roof Four panelled doors with fanlights and often sidelights. Fencing consisting of masonry base and piers with cast iron panels or railings, timber railing, timber picket fencing for smaller houses. <u>Edwardian dwellings</u> Prominent strapped gables and detailing, tall brick chimneys, and verandahs incorporated under the main pitch of the roof. Verandahs with convex (or bullnose) profile. Masonry fencing with cast iron palisade, or timber. <u>Stanley Street (south side), East and West Pallant Streets - Victorian and Inter-war dwellings.</u> Adelaide's earliest residential buildings. <u>Stanley Street (north side)</u> Victorian and Edwardian dwellings. Cohesive, single-storey detached, semi-detached and row housing of the Victorian and Edwardian periods with verandahs along the street frontages and hipped roofs or parapets to front facades. <u>Sussex Street</u> Victorian and Edwardian dwellings. Early German settler cottages and Victorian row dwellings. Sections of small scale, closely sited and cohesive

Adel12

development to the eastern and western end.

Early settler cottages on the northern side and Victorian row houses on the southern side.

Kingston Terrace

Victorian dwellings.

A mixture of single-storey row housing and detached and semi-detached houses of the late Victorian to Edwardian periods from Jerningham Street to Francis Street (west), with more recent detached houses and contemporary three storey town houses.

A diversity of architectural styles and housing types which present a cohesive townscape.

Jerningham Street

Victorian dwellings.

Single storey nineteenth century detached and semi-detached dwellings.

MacKinnon Parade

East of Dunn Street has detached and semi-detached houses of similar scale and design that are of identified heritage value.

West of Dunn Street has eroded streetscape pattern.

Mann Terrace

Victorian dwellings.

A group of identical villas. The articulated and gabled facades, pitched roof profiles and verandahs create a highly cohesive character.

South of Melbourne Street the townscape comprises a group of identical villas, all of local heritage value. The articulated and gabled facades, pitched roof profiles and verandahs create a highly cohesive character.

North of Melbourne Street there is also a cohesive townscape established by closely developed detached and semi-detached dwellings most of which have local heritage value and a regular building set-back from the street.

Hart Street

Victorian dwellings.

Cohesive and intense built form consisting of detached stone cottages of a consistent scale, built form character and siting with masonry construction, fenestration, pitched roofs and verandahs.

Bower Street/Provost Street

Victorian dwellings.

Small detached cottages and row dwellings set on or close to the street.

Arthur Street

Victorian and Edwardian dwellings.

Low scale character.

Building height

Buildings up to two storeys in Jerningham Street, Stanley Street, MacKinnon Parade, Sussex Street, Hart, Street and East and West Pallant Streets, presenting as single storey to the street. Single storey on Kingston Terrace between Fuller Street and Francis Street (west).

Materials

Victorian Houses

Bluestone, limestone or sandstone, with brick or rubble side and rear walls.

Timber framed windows and doors.

Cast iron or timber posts to the verandahs elaborated with moulded capitals and trim, and widely used cast 4200

Historic Areas Affecting Adelaide Hills Council

AdHi1	<p>Mylor Historic Area Statement (AdHi1)</p>	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>	
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>	
	<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1880 to late 1890s. Commercial centre. Workingmen’s Block movement.
	Allotments, subdivision and built form patterns	Uniform rectangular allotments fronting the main street. Large site areas. Large street frontages. Varying front setbacks (residential development has generous setbacks with commercial/retail development located closer to the front boundary to address the main street). Varying side setbacks, with limited boundary development.
	Architectural styles, detailing and built form features	1890s commercial buildings interspersed with a variety of civic and residential buildings.
	Building height	Generally small scale, single storey construction with the exception of the larger public buildings such as the Uniting Church and the former Institute building.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked and bullnose verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective incorporating a natural autumnal palette.
Fencing	Front fences of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, to a height of 1200 millimetres.	
Setting, landscaping, streetscape and public realm features	<p>Rustic character. The township is enclosed on three sides by highly valued remnant vegetation within the Mylor Parklands. Leslie Creek and Aldgate Creek meander through the township before joining up with the Onkaparinga River to the south. The main entrance to Mylor from the north is marked by bridge crossings over Leslie and Aldgate Creeks, the war memorial and views to an avenue of deciduous trees which define the centre of the township. Views of the historic building within the primary school.</p> <p>Other important views along Strathalbyn Road include the heritage buildings containing the general store and rural supplies establishment which defines the southern entry to the township. Wide landscaped verge that incorporates an avenue of trees along Strathalbyn road accentuates the historic built form.</p> <p>Vehicular access at the rear of allotments fronting Strathalbyn Road.</p>	
Representative Buildings	<i>[Not identified]</i>	

	<p>Stirling - Ayres Hill Road Historic Area Statement (AdHi2)</p>
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>
	<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>

Statement#	Statement	
AdHi2	Eras, themes and context	Mid to late 1880s residential.
	Allotments, subdivision and built form patterns	Large blocks of land. Larger houses on large, well vegetated grounds. Dwellings set well back from the street boundary. Smaller subordinate buildings located closer to the street boundary.
	Architectural styles, detailing and built form features	The architectural style of the buildings varies with their date of construction.
	Building height	Building height to 9 metres. Original scale of buildings.
	Materials	Consistent with the materials associated with the architectural style of the subject building. Random, coursed and dressed stone. Rendered stone. Brick, stone and rendered quoins. String courses. Hipped and gabled roofs. Dormer windows. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. Decorative cast iron features. Brick and stone chimneys. Stone Porticos. Decorative and ornate timber bargeboards. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire and masonry (exposed or rendered brickwork or stonework) often obscured by hedges or other plantings, with varying heights to between 1200-1800 millimetres.
	Setting, landscaping, streetscape and public realm features	<p>'Secluded' nature of houses, in most cases set well back on their blocks, hidden behind the gardens and hedges.</p> <p>Streetscape is dominated by tree plantings and fencing behind which can be seen the larger trees and shrubs of the gardens. The lower section of the road (from Laurel Road to the roundabout near St Catherine's) is winding and bordered by hedges and trees. The upper portion of the road is straight and reveals a wider footpath margin than the lower section, adding to the feeling of privacy of the houses.</p> <p>Wide footpath verges which are of a rustic nature.</p> <p>Row and avenue plantings of exotic trees in the road verges.</p>

AdHi3	<p>Woodside Historic Area Statement (AdHi3)</p>	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>	
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>	
	<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Late 1880s.
	Allotments, subdivision and built form patterns	Original grid subdivision pattern. Uniform rectangular allotments.
	Architectural styles, detailing and built form features	The predominant character is single storey detached dwellings with an eclectic mix of European architecture set in large landscaped surrounds, interspersed with buildings including workers cottages and churches, at times built to the front boundary. The architectural style of the buildings varies with their date of construction.
	Building height	Primarily single storey detached buildings.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape. Random coursed and rubble stone. Rendered stone. Brick and rendered quoins. Hipped and gabled roofs. Raked verandahs supported with timber posts and masonry pillars. Corrugated iron roofs. External finishes non-reflective and utilise natural colours.
	Fencing	Front fencing of pickets, post and wire, and masonry (exposed or rendered brickwork or stonework), with maximum heights ranging from 1000 of 1200 millimetres.
Setting, landscaping, streetscape and public realm features	Relatively narrow streets, typically featuring box-style kerb and gutters, do not often have footpaths.

<p>Historic Areas affecting Alexandrina Council</p>	
<p>Strathalbyn Suburban Neighbourhood Historic Area Statement (Alex1)</p>	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>	
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>	
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	<p><u>Northern (Manse Road, Melville Lane, Taylors Lane, Melville Street, Harriet Street and North Parade)</u></p> <p>1860s-1910s. Symmetrical double-fronted early settler cottages and simple workers accommodation.</p> <p>Centred on North Parade, the area was initially subdivided in 1856 and was developed to contain a mixture of functions ranging from an early butcher's shop, to a school, a hospital and a Rechabite Hall and residences.</p>

Statement#	Statement
	<p>The early commercial and institutional functions have declined over time and the area is now mainly residential.</p> <p><u>Western (Sandegrove Road, King Street, Coronation Road)</u></p> <p>1910s. Symmetrical double-fronted cottages and early Bungalow era dwellings.</p> <p>The Western area is important in the overall character of Strathalbyn as it reflects the period at the turn of the century which was one of consolidation and prosperity for the town. The specific residential character of the area derives from the consistent character of the circa 1910 residences, which display typical characteristics of domestic architecture at the time.</p> <p><u>Central (East Terrace, Murray Street, North Parade, Grey Street, Chapel Street, Rowe Street, Commercial Road, West Terrace, Jeff Street, Wallbank Street, Mill Street)</u></p> <p>1860s - 1950.s. Symmetrical double-fronted cottages and early Bungalow era dwellings.</p> <p>The Central area represents the predominantly residential area within the bounds of the original town boundary following, North Parade, East Terrace, South Terrace and West Terrace. The area also includes church landmarks to the east of the town centre on Murray and Chapel Streets.</p>
Allotments, subdivision and built form patterns	<p><u>Northern</u></p> <p>Large allotments and setbacks. Medium- to large front setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side. This subdivision has a less regular layout, in part due to path of Middle Creek which borders the area on the north and east.</p> <p><u>Western</u></p> <p>Large allotments and setbacks. Consistent medium- to large front setbacks. Buildings parallel to street. Buildings typically located symmetrically on allotments with very wide side setbacks.</p> <p><u>Central</u></p> <p>Large allotments and setbacks. Buildings parallel to street. Buildings typically located asymmetrically on allotments, allowing for access to rear of blocks on one side.</p>
Architectural styles, detailing and built form features	<p><u>Western and Northern</u></p> <p>Symmetrical stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with detached verandah (concave, convex and bullnosed) set 300mm below main building gutter. High solid to void (window & door opening) ratio.</p> <p>Carports and sheds generally to the rear of allotments and not attached to dwellings.</p> <p><u>Central</u></p> <p>Stone double fronted cottages with some early bungalow styles. Predominantly hipped roofs of 27-35 degree pitch with verandahs. High solid to void (window & door opening) ratio.</p> <p>Carports and sheds generally to the rear of allotments and not attached to dwellings.</p>
Building height	Single storey with external wall heights generally 3.8-4.1m and ceilings at least 3.
Materials	Sandstone and limestone with red brick quoins predominantly. Corrugated (mostly galvanised) roofing.
Fencing	<p><u>Northern</u></p> <p>Timber post and rail (local variation diamond style), low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries.</p> <p><u>Western</u></p> <p>Hedges, brush, pickets, low masonry and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries.</p> <p><u>Central</u></p> <p>Timber post and rail (local variation diamond style), hedges, low masonry, timber post and cyclone mesh, rural post and wire fencing to a height of 1.2m at front and 1.8m on side boundaries.</p>
Setting, landscaping, streetscape and public realm features	<p>Limited use of signage, where present it incorporates simple fonts consistent with the era with no internal illumination.</p> <p><u>Northern</u></p> <p>Heavily vegetated, rural character, especially to Taylors Lane and Melville Street.</p> <p><u>Western</u></p> <p>Newly formed footpaths with planted verges and street trees.</p> <p><u>Central</u></p> <p>Rural character, wide streets and footpaths with regular street trees.</p>
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting The Barossa Council

Angaston Centre Historic Area Statement (Baro1)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	Early settlement in 1850s and 1860s. 19th and early 20th Century buildings and streetscapes.
Allotments, subdivision and built form patterns	Original development and subdivision pattern, especially in the vicinity of Hannay Crescent including the cemetery allotment.
Architectural styles, detailing and built form features	Banks, churches and hotels along Murray Street. Early post-supported verandas along sections of Murray Street.
Building height	Two storeys.
Materials	[Not stated]
Fencing	[Not stated]
Setting, landscaping, streetscape and public realm features	<p>Significant visual backdrop formed by the hills, cemetery and stone walling when viewed from the Hannay Crescent area and Murray Street.</p> <p>The configuration of Murray Street with a bend at the Sturt Street junction provides interesting vistas east and west along the street.</p> <p>A vista is evident along Washington Street towards the Town Hall. Marble walling in front of the former Station Masters Residence, and former animal pound walls on the railway land.</p> <p>Along Murray Street, the paddock like nature of the land adjoining the creek bank links with the residential surrounds and, in association with the Murray Street park and rural backdrop, creates an attractive setting.</p> <p>Mature landscaping, deciduous street trees, Moreton Bay Fig trees, English Elm and the grouping of deciduous trees adjacent to the Laucke Mill on Murray Street.</p>
Representative Buildings	Identified - refer to SA planning database.

Angaston Residential Historic Area Statement (Baro2)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	<p>Late 1800s.</p> <p>1920s, second wave of prosperity for Angaston in the 20th Century.</p>
Allotments, subdivision and built form patterns	[Not stated]
Architectural styles, detailing and built form features	<p>Substantial residences in 1879-80.</p> <p>Residences of the 1920s.</p>
Building height	[Not stated]
Materials	Local stone.

Statement#	Statement	
	Fencing	<i>[Not stated]</i>
	Setting, landscaping, streetscape and public realm features	<p>Tree lined streets, attractive gardens, varied topography, mature white cedars along Schilling Street, coprosma hedges in front of some houses (retaining early post and wire fence structures), mature ficus at the base of Dean Street, mature gums along the creek, and cypress hedges to many 1920s dwellings.</p> <p>Angas Recreation Park forms an important element located within the residential area. The park between Dean Street and Hill Street and Angaston Children’s Reserve provides an open area for community use.</p>
	Representative Buildings	Identified - refer to SA planning database.
Baro3	<p>Bethany Historic Area Statement (Baro3)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Established in 1842 - one of the earliest substantial German settlements in the Barossa.
	Allotments, subdivision and built form patterns	Subdivided according to the hufendorf principle of long strips. Houses built close to the road with long narrow allotments stretching out behind, together with significant timber structures, particularly farm buildings either close to the road or behind the farm houses.
	Architectural styles, detailing and built form features	Early houses dating from the 1850s and the 1860s, many of which retain layouts and construction techniques clearly indicating their German origin.
	Building height	<i>[Not stated]</i>
	Materials	<i>[Not stated]</i>
	Fencing	<i>[Not stated]</i>
	Setting, landscaping, streetscape and public realm features	<p>The Herberge Christi Lutheran Church and the cemetery in the eastern end of the settlement form a dominant element.</p> <p>Vegetation and landscaping located within the public realm and mature street tree plantings lining the road, together with the mature gardens associated with the early dwellings. The Tanunda Creek, the Bethany Reserve and the creek crossing at Bethany Road are also important to the character of the settlement.</p>
Representative Buildings	Identified - refer to SA planning database.	
Baro4	<p>Krondorf Historic Area Statement (Baro4)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Established in 1847. First plan of division 1877.
	Allotments, subdivision and built form patterns	Division of land undertaken to the hufendorf arrangement. Linear nature.
	Architectural styles, detailing and built form features	Early farm complexes and buildings indicative of its early date of settlement.
	Building height	<i>[Not stated]</i>
	Materials	Pioneer building techniques and specifically German traditions in construction. Significant stone and timber structures, particularly farm sheds.
	Fencing	<i>[Not stated]</i>
	Setting, landscaping, streetscape and public realm features	Buildings close to the road alignment. Zum Kripplein Christi Church (“Manger of Christ”) forms a dominant building in the middle of the settlement.
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Burnside

Bur1	Rose Park Historic Area Statement (Bur1)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1940 Post WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Generally large site areas. Generally large street frontage widths large. Large front of dwelling set-back. Vehicular access from rear lanes of many dwellings.
	Architectural styles, detailing and built form features	Late 19th Century and early 20th Century dwellings with forms, scale and detailing reflective of the era Villas and cottages in bluestone, freestone and/or brick. Many substantial dwellings as well as some more modest, unornamented dwellings . Brick quoinwork common. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports are located behind the main façade of dwellings. Visible chimneys.
	Building height	Predominantly single storey. Upper storey elements are integrated sympathetically into the dwelling design and generally not visible from street.
	Materials	Wall materials consistent with era of original construction including bluestone, freestone, sandstone and brickwork. Pitched roofs in galvanised iron sheet or terracotta tiles. Some original slate tiles. Retention of original materials and finishes and unpainted masonry.
Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Timber picket or dowelling. Masonry and cast iron palisade. Some substantial hedging.	
Setting, landscaping, streetscape and public realm features	Substantial avenues, trees and gardens. Significant front landscaped gardens. Modest verges containing single line of streets trees. Double row of mature trees planted along Alexandra Avenue and Prescott Terrace as a war memorial. Area includes school, churches, mews cottages and other community facilities.

They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	Majority 1918 - 1950 Post WW1. Few 1900 - 1918 Federation.	
Allotments, subdivision and built form patterns	Traditional rectangular grid pattern. Large site areas. Large street frontages Large front set-backs.	
Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors of varying designs. Forms, scale and detailing reflective of the era. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports are located behind the main façade of dwellings. Visible chimneys.	
Building height	Single storey.	
Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.	
Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building facade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Masonry with galvanised steel ribbon. Low masonry wall under 900mm in brick matching dwelling. Masonry base with wrought iron steel top rail. Timber paling with timber top rail not exceeding 1m high. Some substantial hedging.	
Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Established vegetated gardens.	
Representative Buildings	Identified - refer to SA planning database.

Bur9	Kensington Gardens - The Terraces Historic Area Statement (Bur9)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1880 - 1917 Victorian and Federation. 1918 - 1949 Post WW1.
	Allotments, subdivision and built form patterns	Traditional rectangular grid pattern set out around a large recreational reserve. Large site areas. Large street frontage widths Large front of dwelling set-back.
	Architectural styles, detailing and built form features	Interwar styles including Bungalows and Tudors , of various forms, designs and detailing reflective of the era. Ranging from substantial residences to more modest, unornamented dwellings. Hip and gable roof forms with pitches above 25 degrees. Various porch and verandah styles including return verandahs, ranging from modest to generous proportions either projecting or as a continuation of the main roof structure. Garages and carports located behind the main façade of dwellings. Visible chimneys.
	Building height	Predominantly single storey.
	Materials	Wall materials consistent with era of original construction including sandstone and brickwork. Pitched roofs in galvanised iron sheet. Few terracotta tiles. Retention of original materials and finishes and unpainted masonry.
	Fencing	Typical of the era of historic development. Low and/or open fencing forward of the main building façade. Maximum height to 1.2m. Woven crimped wire. Wire mesh with timber or galvanised tube framing. Masonry and cast iron palisade. Masonry with galvanised steel ribbon. Masonry base with wrought iron steel top rail. Low masonry wall under 900mm in brick matching dwelling. Timber pailing with timber top rail not exceeding 1m high.
	Setting, landscaping, streetscape and public realm features	Tree lined streets. Buildings square to and on street alignments. Large central public recreational reserve.
Representative Buildings	Identified - refer to SA planning database.	

Historic Areas affecting City of Charles Sturt

	Bowden / Brompton Historic Area Statement (ChSt1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1850s to early 1900s. Victorian era with an intimate and small-scale character.
	Allotments, subdivision and built form patterns	Small, long narrow allotments.
	Architectural styles, detailing and built form	Single storey, detached and attached, single and double fronted workers' cottages.

Statement#	Statement	
ChSt1	features	Some parapet walling to street with visible side return. Shop and dwelling typically on street corners. Early commercial and industrial buildings. Detached and semi-detached bungalow dwellings with wide verandahs, austerity and later townhouses.
	Building height	Single storey with ceiling heights at least 3m. Industrial scale walls of up to 5m.
	Materials	Red brick and bluestone walls and piers. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public realm features	Small setbacks from the street. Narrow streets with minimal on site car parking. Original shopfronts to street corners. Industrial buildings constructed to street frontages.
	Representative Buildings	Identified - refer to SA planning database.

ChSt2	Ovingham Historic Area Statement (ChSt2)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s to 1900s. 1930s to 1940s. 1970s to 1980s (SA Housing Trust).
	Allotments, subdivision and built form patterns	Small narrow lots, often on strongly sloping sites. Allotment shape and size variable and angled to suit strongly sloping sites and street pattern including Albert Turnbull Reserve.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Bungalows and Austerity houses. Some early SA Housing Trust stock. Typically gable and hipped roofs facing the street, with separate verandah form. Generous roof planes and eaves overhangs to bungalows. Low wide bungalow style overhang verandah or gable.
Building height	Single storey with ceiling heights at least 3m.	
Materials	Bluestone, sandstone and pressed metal/corrugated walls. Chimneys; brick or painted render. Red brick walls, chimneys and piers. Render to verandah piers, chimneys and banding. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim.	
Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.	

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Small to some generous variable setbacks from the street. Some dwellings parallel with angled side boundaries.
	Representative Buildings	Identified - refer to SA planning database.

ChSt3	Brompton Park Historic Area Statement (ChSt3)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1870s to 1890s. Victorian era.
	Allotments, subdivision and built form patterns	Very narrow, long allotments.
	Architectural styles, detailing and built form features	Single storey, detached and attached, single and double fronted workers' cottages. Typically, small span steeply pitched gable and hipped 'M' roofs facing the street with ridge perpendicular or parallel to the street. Separate verandah to higher front wall or parapet.
	Building height	Single storey with ceiling heights at least 3m.
	Materials	Bluestone and sandstone front walls, and red brick sidewalls. Render to verandah piers, banding and parapets. Corrugated steel roofing in galvanised or paint finish. OG guttering in galvanised or paint finish. Painted timber to window frames, doors and roof trim. Chimneys; brick or painted render.
	Fencing	Low front fencing, typically picket fencing and low masonry walls or combination thereof.
	Setting, landscaping, streetscape and public realm features	Small setbacks from the street. Narrow streets with minimal on-site car parking. Original shopfronts and hotels to street corners. Some industrial buildings constructed to street frontages.
	Representative Buildings	Identified - refer to SA planning database.

ChSt4	Blight Street, Ridleyton Historic Area Statement (ChSt4)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	From 1939. Early SA Housing Trust.
	Allotments, subdivision and built form patterns	Regular rectangular allotments with generous frontage and depth, central shared boundary and small side boundary setbacks for driveways.
	Architectural styles, detailing and built form features	Single storey, 'early modern' style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gabled roofs, with porch a continuation of main roof or separate and awnings over front door and windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.

Statement#	Statement	
	Building height	Single storey with ceiling heights around 2.7m - 3m.
	Materials	Red brick, protruding courses, painted and rendered sections, generally ay high level to walls. Corrugated steel and tiled roofing. Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement	
ChSt5	Bell Street, Pennington Historic Area Statement (ChSt5)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	From 1938. Early SA Housing Trust.
	Allotments, subdivision and built form patterns	Layout reflects 'Garden Suburb' design concept, generally with shared central boundary and side boundary setbacks for driveways. Strong urban focal points in Sinclair Square and Tulloch Avenue. Regular rectangular allotments with generous frontage and depth central shared boundary and side boundary setbacks for driveways.
	Architectural styles, detailing and built form features	Austere, with late modern style, typically semi-detached (duplex). Symmetrical frontage to duplex. Variable pattern of duplexes in street. Vertical proportions to windows. Hipped and gable roof forms with porches continuous to main roof and separate awnings over windows. Some projecting hipped roofs. Shallow roof pitch of 20 degrees maximum.
	Building height	Single storey with ceiling heights around 2.7m - 3m.
	Materials	Red brick walls with protruding courses, painted and rendered sections, generally at high level to walls. Corrugated steel roofing and terracotta tile roofing (Bell Street). Porches either corrugated steel or curved flat concrete canopies. Timber framed sunshade awnings with corrugated iron sheet roof. Red brick chimneys. Painted timber framed window frames, doors and roof trim.
	Fencing	Low open cyclone wire fencing or low tubular steel fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Generous setting to each side of duplex.
	Representative Buildings	Identified - refer to SA planning database.

	Croydon / West Croydon (North east of the railway line) Historic Area Statement (ChSt6)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>	

Statement#	Statement	
ChSt6	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	<p>1890s - 1910s.</p> <p>1910s - 1940s (west of Brown Street, north of Herbert Road).</p>
	Allotments, subdivision and built form patterns	<p>Very regular, consistent and long, rectangular allotments, with generous widths.</p> <p>Some combined shops and dwelling buildings to Rosetta and Elizabeth Street.</p> <p>Generous allotments facing Railway line.</p>
	Architectural styles, detailing and built form features	<p>Detached dwellings on generous allotments.</p> <p>Edwardian to early Federation.</p> <p>Post-Edwardian villas along Day Terrace.</p> <p>Early bungalow styles, including some Queen Anne, Tudor and Art Deco styles in latter period areas.</p> <p>A number of more substantial buildings, particularly fronting the railway line.</p> <p>Combined shop/dwellings and rows of shops (Elizabeth Street, Rosetta Street).</p> <p>Hipped, gable and Dutch-gable (gambrel) roofs, 'M' roofs with ridge parallel to street and separate verandahs.</p> <p>Some verandahs continuous with main roof line.</p> <p>Typical bungalow verandahs as low height gable frontage.</p> <p>Generous roof planes and eaves overhangs to bungalows.</p>
	Building height	Single storey with generous ceiling and external wall heights of at least 3m.
	Materials	<p>Bluestone, sandstone and redbrick, quoins and window surrounds.</p> <p>Red brick and rendered chimneys.</p> <p>Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers.</p> <p>Corrugated steel and terracotta (latter period) roofing.</p> <p>Painted timber window frames, doors and roof trim.</p> <p>Vertical proportioned timber windows with double sliding sashes.</p> <p>Some elaborate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.</p>
	Fencing	<p>Woven wire fences with painted timber posts.</p> <p>Painted timber picket fencing reflecting era of associated dwelling.</p> <p>Low masonry fencing with simple masonry piers, sometimes with simple iron and steel infill panels (from hume iron to tubular steel variations).</p>
	Setting, landscaping, streetscape and public realm features	<p>Medium to large front setbacks, typically set in mature gardens</p> <p>Typically tree lined streets particularly Day Terrace with railway line in treed setting.</p> <p>Generous side setbacks.</p>
	Representative Buildings	Identified - refer to SA planning database.

<p>Croydon / West Croydon (South west of the railway line) Historic Area Statement (ChSt7)</p>		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	<p>1890s - 1910s.</p> <p>1940's bungalow style.</p>	
Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, with large widths.	
Architectural styles, detailing and built form features	<p>Villas and symmetrical cottages, with some later, intrusive infill.</p> <p>Some worker's cottages of earlier periods.</p> <p>Some bungalow style.</p>	

Statement#	Statement
ChSt7	Hipped and gable roofs, and separate verandahs.
	Building height Single storey with ceiling heights at least 3m.
	Materials Bluestone, sandstone and redbrick. Corrugated steel roofing. Ornate render surrounds to window. Red brick and rendered chimneys. Bungalows have rendered or brick piers and low walling to verandahs with some tapered piers. Corrugated steel and terracotta (latter period) roofing. Painted timber window frames, doors and roof trim. Vertical proportioned timber windows with double sliding sashes. Some ornate decorative elements including painted timber fretwork, cast iron lacework to verandahs, finials, cover battens to gables and decorative barges.
	Fencing Low masonry and original cast-iron and hume metal fencing. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling.
	Setting, landscaping, streetscape and public realm features Medium front setbacks. Plane Trees to Euston Terrace.
	Representative Buildings Identified - refer to SA planning database.

ChSt8	Allenby Gardens Historic Area Statement (ChSt8)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1920s - 1930s.
	Allotments, subdivision and built form patterns	Very regular and consistent rectangular allotments, with large widths. Some angular allotments due to street pattern and subdivision layout between main roads abounding area.
	Architectural styles, detailing and built form features	Late Edwardian, Federation and bungalow styles. Smaller number of Queen Anne and Tudor style houses. Mainly detached housing. Hipped, gable and Dutch gable roofs with decorative gable panelling and timber trim. Ridge lines that are mainly perpendicular or parallel to street frontage. Federation verandahs continuous with main roof. Some projecting gable forms to street. Low height bungalow style gables.
	Building height	Single storey with ceiling heights at least 3m.
Materials	Terracotta tiles and corrugated steel roofing. Red brick and sandstone walls; some render. Red brick and render chimney.	
Fencing	Typically, low masonry fencing, sometimes with steel inserts. Woven wire fences with painted timber posts. Painted timber picket fencing reflecting era of associated dwelling.	
Setting, landscaping, streetscape and public realm features	Cohesive pattern of established detached dwellings with garden settings Medium front setbacks. Tree lined streets. Coombe Road is the natural focus of the area, and includes a school complex of a similar period to surrounding housing.

	Kilkenny Historic Area Statement (ChSt13) The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality. These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area. 4231
--	---

Statement#	Statement	
ChSt13	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850s to 1950s. Predominant era is 1920s to 1930s in the north and 1910s to 1920s in the south.
	Allotments, subdivision and built form patterns	Typically regular and consistent rectangular allotments, typically very wide. Narrow allotments to Wilpena Terrace, Arkaba Road and Mundulla Street.
	Architectural styles, detailing and built form features	Single front cottages. Edwardian and post-Edwardian cottages in the south. Federation and bungalow houses in the north. Small group of Victorian former shops located at the southern end of Wilpena Terrace reflecting the original main street of Kilkenny. High-quality 1930s houses on large allotments at the northern end Predominantly detached and some attached housing. Semi-Detached dwellings to Wilpena Terrace west of Mundulla Street. Small scale hipped, gable and louvre roofs typically with ridge line perpendicular to the street. Some 'M' roofs with ridge line parallel to the street. Relatively steeper roof pitch. Generous Bungalow roofing with simple roof plane and generous overhangs. Some federation verandahs continuous with main roof. Some separate bullnose verandahs lower than main wall height. Some central gable to verandah with finial.
	Building height	Single storey with ceiling heights at least 3m. Some traditional two storey.
	Materials	Freestone and red brick side walls. Red brick quoins. Rendered walling, tapered piers to bungalow verandahs and parapets. Corrugated iron and terracotta tile roofs. Brick or render chimneys with some decoration. Painted timber frame windows and doors with painted timber roof trim.
	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
	Setting, landscaping, streetscape and public realm features	Medium to large front setbacks. Shop and attached dwelling a strong characteristic in Wilpena Terrace with corner shops and verandahs over footpaths. Some dwellings and former shops constructed closer to front boundaries, especially if located on a corner allotment.
Representative Buildings	Identified - refer to SA planning database.	

Woodville Park Historic Area Statement (ChSt14)	
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
Eras, themes and context	1900s to 1950s.
Allotments, subdivision and built form patterns	Very regular and consistent rectangular, deep allotments, to both sides of the railway line typically very wide with some narrow allotments to Belmore and Russell Terraces.
Architectural styles, detailing and built form features	Generally detached, later symmetrical cottages, Villas, Federation, Queen Anne, occasional Austerity and bungalow styles with some attached housing to suit narrow allotments. Hipped, gable and louvre roofs with verandahs. Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments. Separate verandahs to suit Villa style.

Statement#	Statement
ChSt14	<p>Steeper roof pitches to earlier styles and Tudor with shallower pitched bungalow roofing.</p> <p>Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls.</p> <p>Simple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street.</p> <p>Steeply pitched Tudor gables and verandah gables facing the street.</p>
Building height	Single storey with ceiling heights at least 3m.
Materials	<p>Red brick and freestone walls.</p> <p>Galvanised corrugated iron and terracotta roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels.</p> <p>Some ornate painted timber fretwork and posts to verandahs.</p> <p>Brick or rendered masonry chimneys.</p>
Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
Setting, landscaping, streetscape and public realm features	<p>Fences and front gardens are strong elements.</p> <p>Medium to large front setbacks.</p>
Representative Buildings	Identified - refer to SA planning database.

Woodville Historic Area Statement (ChSt15)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	1880s to 1940s.
Allotments, subdivision and built form patterns	<p>Large, deep allotments typically very wide with slightly smaller scale housing south of the railway line.</p> <p>The Stanley Street change in direction results in allotments of lesser depth.</p> <p>Large corner allotments to Woodville Road.</p> <p>Some narrow allotments to Hughes Street North.</p>
Architectural styles, detailing and built form features	<p>Generally large single-storey detached houses, bluestone Victorian villas, large Federation, Queen Anne and elaborate, large bungalow dwellings.</p> <p>Significantly larger mansions to Woodville Road.</p> <p>Smaller symmetrical cottages with some return verandah and smaller, simple bungalows to Russell Terrace.</p> <p>Semi-detached houses designed to look like one dwelling on Hughes Street North.</p> <p>Hipped, gable and louvre roofs.</p> <p>Relatively more complex hipped, gable and louvre roofs with verandahs.</p> <p>Separate verandahs, typically bullnose, across frontages of symmetrical cottages, with many return verandahs not always on corner allotments.</p> <p>Separate verandahs to suit Villa style.</p> <p>Federation style verandahs continuous with main roof.</p> <p>Steeper roof pitches to earlier styles with shallower pitched bungalow roofing.</p> <p>Wide low height verandah frontages to bungalows with gable and half gable styles with masonry piers and low plinth walls.</p> <p>Simple, multiple generous roof planes and eaves overhangs to bungalows with main ridge generally parallel to the street.</p>
Building height	Single storey with ceiling heights at least 3m - 3.5m.
Materials	<p>Bluestone, red brick and freestone walls.</p> <p>Galvanised corrugated iron and tiled roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels.</p> <p>Some ornate painted timber fretwork and posts to verandahs.</p> <p>Brick or rendered masonry chimneys.</p>
Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.
Setting, landscaping,	Wide, tree-lined streets and large established gardens.

Statement#	Statement																	
	streetscape and public realm features	Large front setbacks.																
	Representative Buildings	Identified - refer to SA planning database.

Architectural styles, detailing and built form features	Villas and symmetrical cottages, Federation and bungalow styles. Predominantly detached. Simple steeply pitched hipped, gable, louvre roof forms and verandas. Some separate and bullnose generally symmetrical with occasional return verandahs not always on corner allotments. Bungalow roof forms with simple generous roof planes and eaves overhangs. Some verandahs continuous with main roof. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.	Building height	Single storey with ceiling heights at least 3m - 3.5m.	Materials	Pressed metal, 'stone' front, metal or weatherboard clad, red brick, freestone and sandstone walls. Corrugated iron and terracotta tiled roofs. Red brick and rendered finish to chimneys. Painted timber window frames, doors, roof trim and cover battens to gable panels. Generally, less ornate painted timber fretwork and posts to verandahs. Some cast iron lacework to verandahs.	Fencing	Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.	Setting, landscaping, streetscape and public realm features	Varied, small to medium front setbacks.	Representative Buildings	Identified - refer to SA planning database.
Eras, themes and context	1880 -1940. Small early cottages, Federation through to Bungalow.																	
Allotments, subdivision and built form patterns	Small and variable allotment sizes, typically wide. Some substantial corner allotments remain.

Grange Historic Area Statement (ChSt19)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p><u>Grange Road</u></p> <p>Late 1800s to 1950s.</p> <p><u>Beach Street</u></p> <p>Late 1800s to 1950s.</p> <p><u>Jetty Street</u></p> <p>Late 1800s in the west, to 1950s in the east.</p> <p><u>Grange Esplanade</u></p> <p>1880s to 1940s.</p>
Allotments, subdivision and built form patterns	<p><u>Grange Road</u></p> <p>Allotments typically large and wide.</p> <p><u>Beach Street</u></p> <p>Allotments typically large and wide. Some angled allotments west of Military Road.</p> <p><u>Jetty Street</u></p> <p>Allotments typically large and wide. Large corner allotments.</p> <p><u>Grange Esplanade</u></p> <p>Varied, elevated allotments.</p>
Architectural styles, detailing and built form features	<p><u>Grange Road</u></p> <p>Bungalows, Spanish Mission.</p> <p>Symmetrical cottages to Grange Road.</p> <p>Pitched Hipped, gable with verandahs (continuous and separate).</p> <p>Bungalow roof forms with simple generous roof planes and eaves overhangs.</p> <p>Some verandahs continuous with main roof.</p> <p>Some separate bullnose verandahs and return verandah.</p> <p>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.</p> <p><u>Beach Street</u></p> <p>Victorian houses, Federation, Bungalows, Spanish Mission, Austerity.</p> <p>Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs.</p> <p>Some verandahs continuous with main roof.</p> <p>Some separate bullnose verandahs and return verandah. Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.</p> <p><u>Jetty Street</u></p> <p>Bungalows, cottages, and villas. Some Austerity.</p> <p>Concentration of Tudor homes on Jetty Street (from Charles Sturt Avenue to High Street).</p> <p>Pitched Hipped, gable with verandahs (continuous and separate). Bungalow roof forms with simple generous roof planes and eaves overhangs.</p> <p>Some verandahs continuous with main roof.</p> <p>Some separate bullnose verandahs and return verandah on corner allotments.</p>

Statement#	Statement
	<p>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.</p> <p><u>Grange Esplanade</u></p> <p>The Marines (State Heritage Place).</p> <p>Grange Hotel (Local Heritage Place).</p> <p>Federation dwellings, bungalows.</p> <p>Hipped, gable and louvre roofs.</p> <p>Some verandahs continuous with main roof.</p> <p>Some separate bullnose verandahs and return verandah on corner allotments.</p> <p>Low height street facing bungalow verandahs with tapered masonry piers and low plinth walls.</p>
ChSt19	<p>Building height</p> <p><u>Grange Road</u></p> <p>Single storey with ceiling heights at least 3.5m.</p> <p><u>Beach Street and Jetty Street</u></p> <p>Single storey with ceiling heights at least 3m.</p> <p><u>Grange Esplanade</u></p> <p>The Esplanade: 3 storeys.</p> <p>Along western frontage to Seaview Road: 2 storeys.</p> <p>To the east of Seaview Road: 2 storeys.</p>
	<p>Materials</p> <p><u>Grange Road</u></p> <p>Red brick, painted render and freestone walls.</p> <p>Corrugated sheeting and terracotta tile roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels.</p> <p>Generally less ornate painted timber fretwork and posts to verandahs.</p> <p>Red brick and rendered finish to chimneys.</p> <p><u>Beach Street</u></p> <p>Red brick and freestone walls.</p> <p>Corrugated sheeting roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow.</p> <p>Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys Curved enclosed verandah form with flat roof.</p> <p><u>Jetty Street</u></p> <p>Red brick and freestone walls Corrugated metal sheeting and terracotta tile roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels especially Tudor and Bungalow.</p> <p>Generally less ornate painted timber fretwork and posts to verandahs. Red brick and rendered finish to chimneys.</p> <p><u>Grange Esplanade</u></p> <p>Stone and red brick walls.</p> <p>Corrugated iron and terracotta tiled roofs.</p> <p>Painted timber window frames, doors, roof trim and cover battens to gable panels.</p> <p>Generally less ornate painted timber fretwork and posts to verandahs.</p> <p>Brick (sometimes painted) and rendered finish to chimneys.</p>
	<p>Fencing</p> <p><u>Grange Road</u></p> <p>Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.</p> <p><u>Beach Street</u></p> <p>Predominantly small masonry retaining walls that border the footpath.</p> <p><u>Jetty Street</u></p> <p>Typically, low masonry sometimes with steel inserts, timber picket or wire mesh with timber post fencing.</p> <p><u>Grange Esplanade</u></p>

Statement#	Statement
	<p>Variety of fencing styles or remaining unfenced.</p> <p>East of Seaview Road, given the retaining walls in this location, low or no fencing.</p>
Setting, landscaping, streetscape and public realm features	<p><u>Grange Road</u></p> <p>Small, front setbacks relatively consistent.</p> <p><u>Beach Street</u></p> <p>Tree lined streets.</p> <p>Large presence of Norfolk Island pines.</p> <p>Vehicle access has been designed and located to preserve existing street trees.</p> <p><u>Jetty Street</u></p> <p>Large presence of Norfolk Island pines along Jetty Street.</p> <p>Vehicle access has been designed and located to preserve existing street trees.</p> <p><u>Grange Esplanade</u></p> <p>Seaview Road dominated by rendered retaining walls of varying heights between one to two metres.</p> <p>Presence of Norfolk Island pines.</p> <p>Vehicle access has been designed and located to preserve existing street trees.</p>

Statement#	Statement	
ChSt21	Eras, themes and context	1840s to 1930s.
	Allotments, subdivision and built form patterns	Narrow fronted with deep allotments facing Port Road. Wider allotments to Manton and Milner Street.
	Architectural styles, detailing and built form features	Narrow fronted two-storey built form interspersed with some narrow fronted single storey of intimate scale. Generous verandahs over footpaths, balconies and parapets with some decorative elements including pediments. Some detached single and two storey residential buildings to Orsmond Street. Occasional upper level balconies. Vertically proportioned elements with high solid to void ratio, particularly at upper levels. Substantial church buildings. Decorative parapets to street frontages and returns. Steeply pitched hipped roofs visible behind parapets, with separate, wide verandahs across frontage. Some gable forms including simple cottage form to Milner Street.
	Building height	Single and two-storey built form with ceiling heights that vary from 3m through to substantial church buildings.
	Materials	Limestone, bluestone, sandstone, face red brick walls and rendered walls. Use of brick and rendered quoins. Corrugated galvanised steel roofing. Decorative cast iron posts and balustrades. Painted timber posts and fascia elements.
	Fencing	Built form typically to the street with verandahs over public realm. Some rendered masonry fencing with cast iron infill.
	Setting, landscaping, streetscape and public realm features	Historic heart of the Hindmarsh Village and the principal area for a range of retail, business, ecclesiastic and office uses.
	Representative Buildings	Identified - refer to SA planning database.

ChSt22	Henley Square Historic Area Statement (ChSt22)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1840s to 1920s.
	Allotments, subdivision and built form patterns	Traditional patterns of development incorporating verandahs, balconies and parapets clustered around Henley Square.
	Architectural styles, detailing and built form features	Substantial two-storey buildings with wide balconies and verandahs, some over footpaths. Traditional single storey buildings with verandahs over footpaths. Modern development including large expansive verandahs on the square. Decorative parapets to the street and Henley Square facades. Steeply pitched hipped and gable roof forms, with attached balconies and verandahs across frontage. Skillion and curved (bull nose) verandah roof forms.
Building height	Single and double storey buildings with ceiling heights at least 4.5m per floor giving an imposing character.	
Materials	Bluestone, sandstone, red brick walls and rendered walls. Some corrugated iron walling. Use of brick and rendered quoins, brick banding and other traditional decoration. Imposing masonry pediments and gables with brick banding.	

Statement#	Statement
	<p>Corrugated steel roofing.</p> <p>Decorative cast iron and painted timber verandahs and balconies.</p>
Fencing	<p>Some low masonry walling.</p> <p>Typically, open shop fronts with verandahs over public realm.</p>
Setting, landscaping, streetscape and public realm features	Historic heart of Henley Beach and the principal area for a range of retail, business and entertainment uses.
Representative Buildings	Identified - refer to SA planning database.

Architectural styles, detailing and built form features	Verandahs.	Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.
	Eras, themes and context	Town centre as the original village of Auburn. Buildings constructed in the 19 th century.							
	Allotments, subdivision and built form patterns	Original land division pattern, street layout and setback patterns.							
	Architectural styles, detailing and built form features	Verandahs.							
Building height	1-2 storeys, with 2 storey buildings generally for retail and civic uses.								

Statement#	Statement	
	Materials	[Not stated]
	Fencing	Front fences and gates of timber pickets, pier and plinth masonry, wrought iron, brush or masonry not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Wide streets and established trees contribute to a village setting.
	Representative Buildings	Identified – refer to SA planning database.

Historic Areas affecting Coorong

COOD1	Raukkan Historic Area Statement (CooD1)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	A significant meeting place for the Ngarrindjeri people. Community buildings (including the Raukkan Church, community hall and school) are of particular value.
	Allotments, subdivision and built form patterns	Allotments of 700 to 800m ² .
	Building height	Single storey.
Materials	Stone and corrugated iron roofing.	
Setting, landscaping, streetscape and public realm features	Settlement arranged around the green open space defined by Lealinyeri, Seymour and Taplin streets. Wide streets, large grassed verges and buildings constructed to street frontages.	
Representative Buildings	[Not identified]	

Historic Areas affecting Copper Coast

COCO1	Moonta Mines Buffer Historic Area Statement (CoCo1)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Rural.
	Allotments and subdivision pattern	[Not stated]
	Architectural styles, detailing and built form features	[Not stated]
	Building height	[Not stated]
Materials	[Not stated]	
Fencing	[Not stated]	
Setting, landscaping, streetscape and public realm features	Open rural character that provides a setting for the historic mining features to be read and interpreted.	
Representative Buildings	[Not identified]	

	Residential North Yelta (CoCo2)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.		
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
Eras, themes and context	Late 19 th century and early 20 th century.	

Statement#	Statement	
COCO2	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Within North Yelta, miners' cottages of simple design with skillion-roofed lean-to additions at the rear and verandahs to the front.
	Building height	[Not stated]
	Materials	Rendered stone.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Within North Yelta, buildings are sited in a linear fashion along Kadina Road, framing the entrance to Moonta.
	Representative Buildings	[Not identified]

COCO3	<p>Cornish Village Historic Area Statement (CoCo3)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. Historic Areas affecting Town of Gawler

Ga1	<p>Gawler East Historic Area Statement (Ga1)</p>	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1850-1940; residential and local scale retail.
	Allotments, subdivision and built form patterns	The Area is divided into two sections by Lyndoch Road. Large allotments with large dwellings and gardens exist along High Street and Duffield Street. Smaller allotments exist along Lyndoch Road. Traditional grid north of Lyndoch Road. Allotments typically are of consistent width and depth, rectangular in shape orthogonal to the street layout apart from some dwellings facing Lyndoch Road on the north side, which have an angled front boundary. The pattern of streets stem from orthogonal junctions with Lyndoch Road and rising ground.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century Villas/Mansions. Nineteenth century double fronted symmetrical cottages; parapet end gables a feature. Bungalows with some Inter War. Roof pitches in the order of 27 degrees and 35 degrees. Stone walls and stone outbuildings. Steeply pitched hipped and simple gable roofs of small and large scale. Large roofs typically gambrel in form with additional central gables and villa style projecting gable. Smaller early roof forms with ridge parallel to the street. Separate, generous verandahs to the street of bullnose, straight and concave form. Some return verandahs and some central entrance gable. Some verandahs continuous with main roof. Shallower pitched bungalow roof forms with simple generous roof planes and overhangs. Wide bungalow style verandahs with masonry supports and low plinth walls.
	Materials	Sandstone/Limestone with red brick quoins. Ornate render. Corrugated profile roofing. Vertically proportioned painted timber window frames and doors. Painted timber cover battens. Decorative brick, stone or rendered chimneys. Cast iron decoration and painted timber detailing to verandahs.
	Building height	Single storey forms generally influenced by site topography. Buildings on low side of streets appear as single storey with double level to rear, particularly in north west of area. Buildings on high side of street appear as double storey or elevated single storey with verandahs occurring on high plinth and central access steps.
	Fencing	Low open style fencing which includes masonry pier and plinth fence with decorative open infill. Low masonry walls up to 1.2 metres. Timber picket fences. Hedges. Stone walls on front boundaries are important features.
	Setting, landscaping, streetscape and public realm features	Important entrance to Gawler from east with significant north to south connecting streets such as Duffield and East. Unique angled street layout north of Lyndoch Road with Edith and Blanch Street connected by Short Street. North western edge defined by Railway Line. A portion of the west side faces Pioneer Park; some small scale mixed use to Union Street. North to south streets generally run with contours of land with high and low side. Generous front and side setbacks. Landscaped setting derived from generous gardens with substantial trees and wide tree-lined streets. Surfaces consistent with the footpaths and streets. Views to and from the area.

Statement#	Statement
	Setting, landscaping, streetscape and public realm features Subdivision retains planning undertaken by Light, Finnis and Co in 1839. Low lying areas that rise from surrounding rivers to Church Hill State Heritage Area. King Street is located on a ridge so dwellings on both sides appear as single story to the street with double storey to rear. Wide streets with slate kerbs and substantial trees. Gardens in scale with the buildings and large allotments. Front setbacks to streets such as King, Queen, Howard and Cameron Streets outside of Church Hill State Heritage Area have lesser front setbacks and generous side setbacks; notable exception is Jerningham Street that exhibits generous setbacks.
	Representative Buildings Identified - refer to SA planning database.

Large allotments with greater width mainly to the lower side and narrower allotments to the high side. Allotment shapes and dwelling placement suit rising ground. Allotments are generally orthogonal to Redbanks Road resulting in a unique north west orientation for allotments.	Architectural styles, detailing and built form features	Victorian and turn-of-the-century villas and double fronted cottages with some small and substantial bungalow style. Typically larger span (front 4 rooms) hipped roof with gambrel. Some simple gable roof forms and 'M' roofs with ridge parallel to the street. Variety of separate verandahs including bullnose, double curve, concave and straight mono pitch. Roof pitch typically steep (27 to 35 degrees) with some shallower bungalow style roofs.	Building height	Single storey with wall heights in the order of 3.6m. Roof pitches in the order of 27 degrees to 35 degrees.	Materials	Sandstone and limestone external walls of modest detail Corrugated iron roof sheeting. Painted timber window frames and doors, verandah posts and roof trim with modest embellishment. Red brick or rendered masonry chimneys.	Fencing	Low stone walls and other open style fencing which includes woven wire with timber posts, picket and masonry pier and plinth fence with decorative open sections of up to 1.2 metres in total height. Stone walls and retaining walls due to rising ground.	Setting, landscaping, streetscape and	Redbanks Road defined by walling and fending to street boundary with substantial gardens and street trees on the low (southern) side. Dwellings typically set back substantially from street frontage with generous spaces between Princess Park provides angled open space at angled junction of Redbanks
	Eras, themes and context	1850 to 1940. Residential.													
	Allotments, subdivision and built form patterns	Redbanks Road is on rising ground to the north west. Large allotments with greater width mainly to the lower side and narrower allotments to the high side. Allotment shapes and dwelling placement suit rising ground. Allotments are generally orthogonal to Redbanks Road resulting in a unique north west orientation for allotments.

Statement#

Glenelg Village Historic Area Statement (HoB1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

<p>Eras, themes and context</p>	<p>1840s-1860s.</p> <p>1870s - 1900s.</p> <p>1910s - 1930s.</p> <p>Subdivision in 1839.</p> <p>Growth period in 1920s associated with increase in holidaymaking and leisure pursuits.</p>
<p>Allotments, subdivision and built form patterns</p>	<p>Orderly street layout, centred around the St Peters Anglican Church in Torrens Square.</p> <p>Grid pattern of large allotments.</p> <p>Subject to further land division over time but legibility of original pattern remains.</p> <p>Consistent small front setbacks.</p> <p>Small side setbacks.</p>
<p>Architectural styles, detailing and built form features</p>	<p>Early symmetrical and asymmetrical cottages of low scale and simple form with restrained detailing.</p> <p>Mid-Victorian Period cottages and villas (symmetrical and asymmetrical), semi-detached cottages and row dwellings with detailing typical of the era including verandahs, cast iron lacework, hipped and gable roof forms, plaster and render mouldings.</p> <p>Inter-War buildings, mostly Bungalows.</p> <p>Low scale to medium, relatively small dimensions and basic building details.</p> <p>Many dwellings without vehicle garaging.</p> <p>Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.</p> <p>Rectilinear plan forms.</p> <p>High degree of modulation and articulation.</p> <p>Low scale.</p> <p>Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings).</p> <p>Short roof spans.</p> <p>Hip and gable roof forms.</p> <p>Concave, bullnose and straight-pitched verandahs.</p> <p>Fine-grain detail in elements such as plinths, string courses, projecting sills.</p> <p>High solid to void ratio.</p> <p>Vertical proportions in windows and doors.</p>
<p>Building height</p>	<p>Predominantly single storey but some two storey.</p>
<p>Materials</p>	<p>Consistent with the materials used in the 1840s to 1930s period.</p> <p>Bluestone, sandstone, walls (unpainted).</p> <p>Some brick.</p> <p>Brick or rendered quoin work and plinths.</p> <p>Corrugated iron roofing.</p> <p>Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.</p>

		Vistas toward St Peters Anglican Church from Augusta and Nile Streets.	
	Representative Buildings	Identified - refer to SA planning database.	
HoB2	Maturin Road Historic Area Statement (HoB2)		
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.		
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.		
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
	Eras, themes and context	1920s or 30s.	
	Allotments, subdivision and built form patterns	Original subdivision of The Olives and Bromley. Allotments on southwest end were subdivided in 1886 and 1912. Mixed allotment sizes with large frontages. Substantial building setbacks. Large front setbacks. Side setbacks provide visual spacing between dwellings.	
	Architectural styles, detailing and built form features	Typical 1890s to early 20th Century dwellings. Victorian dwellings. Inter-War dwelling styles including Bungalow, Tudor, Art Deco and Mediterranean. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on Inter-War buildings). Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.	
Building height	Single storey and two storey (some in-roof or partly in-roof).		
Materials	Consistent with the materials used in the 1880s to 1930s period. Sandstone, red brick, rendered facades. Corrugated iron and terracotta tiled roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.		
Fencing	Fencing associated with the era and style of the building, and providing views to the building. Timber picket, timber dowel, timber paling. Hedging. Low masonry plinth with cast iron or wrought iron in a traditional arrangement. Woven wire or low masonry with or without geometric steel for Inter-war buildings.		
Setting, landscaping, streetscape and public realm features	Narrow street. Well-established garden settings. Lack of street planting due to the narrow width of Maturin Road. The Olives is a significant State Heritage Place on Olive Street.

HoB3	<p>Da Costa Park Historic Area Statement (HoB3)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1923 subdivision. 1920s - 1930s dwellings.
	Allotments, subdivision and built form patterns	Subdivision is indicative of 1920s town planning with angled, diagonal streets centred radially around a central park or reserve. Garden city theory in practice. The pattern of the subdivision and the arrangement and size of individual allotments remains largely unaltered. Large allotments with large frontages. Consistent, large front setbacks. Side setbacks provide visual spacing between dwellings.
	Architectural styles, detailing and built form features	Inter-War style dwellings including Tudor Revival, Californian bungalow, Art Deco, and some Spanish mission. Rectilinear plan forms. High degree of modulation and articulation. Low scale. Steep roof pitches in the order of 25 to 35 degrees. Short roof spans. Hip and gable roof forms. Deep verandahs and porches. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors. Garages, carports and outbuildings, where they exist, are low in scale and simple in form. They are located unobtrusively, to the rear of dwellings or the principal building on the site or, alternatively to the side and well-setback from the front façade.
	Building height	Single storey.
	Materials	Consistent with the materials used in the 1920s to 1930s period. Terracotta tiled and corrugated iron roofing. Brick, sandstone, and stucco and part-rendered finishes. Roofing, facades and fenestration in natural red brick and terracotta colouration. Timber joinery including fascia, barges, window frames, door frames and doors. Timber strapping on Inter-War dwelling gables.
	Fencing	Fencing associated with the era and style of the building, and providing views to the building. Woven wire. Low masonry with geometric steel. Low masonry (stepped). Low masonry fencing (often stepped). Low Rock face sandstone. Hedging.
	Setting, landscaping, streetscape and public realm features	Centred around Da Costa Park, with its triangular landscaped area and mature trees. Relatively wide streets.
Representative Buildings	Identified - refer to SA planning database.

	Eras, themes and context	1870's to 1880's dwellings with later development dating from the 1920's and 1930's and the dominance of the railway.
	Allotments, subdivision and built form patterns	Large conventional land division pattern with a mix of allotment sizes.
	Architectural styles, detailing and built form features	A mix of building types including small villas and cottages representing a range of periods.
	Building height	Single storey built scale to the streetscape.
	Materials	Consistent with the materials associated with the architectural styles of the subject building and streetscape.
	Fencing	Low, open fencing reflective of the architectural style of the subject building.
	Setting, landscaping, streetscape and public realm features	Areas of wide streets and expansive allotments with established street trees.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Marion

Mar1	<p>Worthing Mine Historic Area Statement (Mar1)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	<p>1850/51.</p> <p>Structures and workings associated with Worthing Mine site.</p>
	Allotments, subdivision and built form patterns	Sited in the steep valley of the Field River.
	Architectural styles, detailing and built form features	Mine, Chimney and Pump House/Engine House associated with copper mining (oldest surviving Cornish Engine House in Australia).
	Building height	[Not stated]

Statement#	Statement	
	Materials	Random rubble with timber lintels.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Sited in the steep valley of the Field River amongst undulating grassland. Recent housing development is located to the north, west and east of the site (200m plus in distance). Views to the Worthing Mine are available from parts of the adjacent residential areas.
	Representative Buildings	[Not identified]

Historic Areas affecting City of Mitcham

Mit1	Residential (Central Plains) Historic Area Statement (Mit1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Early 20th century dwellings.
	Allotments, subdivision and built form patterns	Substantial rectangular blocks. Substantial consistently wide and deep rectangular blocks that retains the historic pattern of land division. Consistent generous spacing between dwellings.
	Architectural styles, detailing and built form features	Predominance of Queen Anne style villas and bungalow style dwellings. A number of early villas. Steeply pitched hipped and gable roof forms including smaller scale corner gable to return verandah villas. Separate typically bull nose verandah with some a continuation of the main roof form. Return verandahs particularly at corner allotments. Bungalows with slightly shallower roof pitch, simple generous roof plane facing the street with main ridge typically parallel to street. Wide Bungalow verandahs with tapered or upright masonry support piers and low infill walling. Timber framed and iron clad awnings to windows. Tudor roof forms generally steeper with two main projecting gables and smaller gable porch over main entrance.
	Building height	Predominately single storey with external wall height of 3-3.5 metres. Second storey development located within the roof space or to rear of dwellings.
	Materials	Original materials, finishes and profiles of building elements. External walls of sandstone, rendered masonry, face brick Decorative wall treatments such as rendered, or brick quoins and low plinths defined by cant brick set out. Painted timber cover battens to gables and roof trim. Painted decorative timber to verandahs and finials to gables. Verandahs supported on timber posts with some on painted masonry pillars. Roofs of corrugated galvanised iron cladding or terracotta tiles. Original unpainted plaster, brickwork, stonework or other masonry preserved unpainted. Decorated face brick or rendered masonry chimneys. Painted metal gutters to D or OG profile and round painted metal downpipes. Painted timber window frames and doors.
	Fencing	Typically fences reflect the era of the dwelling. Low masonry plinth and post, wrought iron, brush, timber woven with wire, painted timber picket. Height of 1.2m. Rear and side boundary fences located behind the front dwelling alignment 1.8m in height in corrugated profile metal.
	Setting, landscaping, streetscape and public realm features	Regularly planted tree lined verges. Established front gardens. Consistent setback of buildings.
	Representative Buildings	Identified - refer to SA planning database.

Statement#

Adey Road Historic Area Statement (Mit2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1879 subdivision with predominance of buildings built between 1881-1920.
Allotments, subdivision and built form patterns	Traditional pattern and scale of low density, rectangular allotments associated with the original subdivision for the purpose of detached dwellings. Variable width to allotments. East side is orthogonal to Adey Road. West side has angled side boundaries to Adey Road.
Architectural styles, detailing and built form features	Detached dwellings of simple, modest, small scale with symmetrical early stone and brick villas. Victorian Regency and Edwardian to smaller and later bungalows. Gambrel roof typically with short ridge parallel to street, with projecting gable. Simple 'M' Roof with ridge parallel to street. Federation style verandahs continuous with main roof. Separate verandahs attached to main wall of varying profiles. Some bungalow influence roof forms and verandahs with masonry support piers and low plinth wall.
Building height	Predominantly single storey with external wall height of 3 - 3.5 metres. Second storey development located within the roof space or to rear of dwellings behind ridgeline of roof. Second storey windows with total length less than 30 percent of total roof length along each elevation.
Materials	Original materials, finishes and profiles of building elements. External walls incorporating sandstone, red brick, render. Roof in corrugated metal cladding. Render with some ornate detail to window surrounds. Simple painted timber detail and roof trim. Painted timber window frames and doors. Simple and modestly detailed timber posts to verandah. Red brick or render chimneys, some tapered in height with some ornate detailing. Some ornate painted timber barge boards and finials. Most original unpainted plaster, brickwork, stonework or other masonry is preserved unpainted.
Fencing	Low and/or open fencing, typically in the form of hedges, woven wire, timber picket or low stone walls reflecting and the traditional period, style and form of the associated building. Generally, no more than 1.2m in height. Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height.
Setting, landscaping, streetscape and public realm features	Minimal driveway widths with established front gardens dominant, including mature vegetation. Sense of space between buildings. Sloping land with minimal alteration to the land form. Bowling Club provides focal point and sense of Place. Traditional dwelling pattern located parallel to front boundaries.
Representative Buildings	[Not identified]

Mit2

Belair Village Historic Area Statement (Mit3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#	Statement	
Mit3	Eras, themes and context	1880-1900 (built form) original township of Belair developed around the railway. Village / residential character with an evident railway theme and rural character and the development of an old township.
	Allotments, subdivision and built form patterns	<p>Historic land division pattern, demonstrating a diverse array of allotments of varying sizes and shapes resulting from the change to rural character brought about through the introduction of the railway.</p> <p>A diverse mix of residential, education and commercial buildings with a cohesive style and generous setting.</p>
	Architectural styles, detailing and built form features	<p>Mix of development including, churches, school, local shop, and concrete water tower. Clusters of substantial villas (4-6 rooms) with return verandahs to both sides of Sheoak Road.</p> <p>Long linear buildings constructed along the Sheoak Road ridge and generally oriented facing Sheoak Road, resulting in a variable but cohesive pattern of buildings.</p> <p>Traditional steeply pitched hipped and gabled roof forms and some projecting gables, typical of the Victorian era.</p> <p>Ridges tend to be parallel to the street.</p> <p>Separate verandahs of bullnose, straight monopitch or concave profile supported on painted timber posts.</p>
	Building height	Predominantly single storey with generally substantial external wall height up to 3.5 metres.
	Materials	<p>Original or otherwise complementary materials, colours and finishes, including stone, rendered masonry, face brick, corrugated iron and timber board.</p> <p>Original verandah detailing including paving, posts and decoration.</p> <p>External walls of sandstone or limestone.</p> <p>Red brick quoins.</p> <p>Corrugated sheet roofing in painted or galvanised finish.</p> <p>Vertically proportioned painted timber window and door frames.</p> <p>Decorative brick and rendered chimneys.</p>
	Fencing	<p>Open rural style fencing using timber posts with draw wire.</p> <p>Hedges define property boundaries.</p> <p>Front fences and gates that reflect the traditional period, style and form of the associated building.</p> <p>Open rural style Front fences and gates that are a maximum of 1.2 metres in height to a maximum of 1.5 metres if wrought iron, brush, timber and/or wire or woven mesh style.</p>
	Setting, landscaping, streetscape and public realm features	<p>Village character with an evident railway theme and historic Residential character.</p> <p>Historic views of open railway side in a treed setting.</p> <p>The Village area retains much of its original character and integrity, with a railway theme evident in various places of state heritage, local heritage and other buildings of historic character.</p> <p>There are many prominent intact historic buildings and features within it and the streetscapes, townscape and landscapes created by these historic features.</p> <p>Central bitumen roadway with gravel verge and no kerb or guttering Street trees to Sheoak Road.</p> <p>Gravel driveway entrances to properties.</p>
	Representative Buildings	Identified - refer to SA planning database.

Mitcham Village Historic Area Statement (Mit4)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p>Village Setting - 1840.</p> <p>Core precinct of the village is readily identifiable and exhibits many of the original aspects of its early beginnings, including a range of single and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.</p> <p>Historic buildings and features that contribute to the historic character including State and Local Heritage Places and other buildings displaying historic architectural features.</p>
Allotments, subdivision and built form patterns	The village was laid out on the lines of an English village and contained traditional elements such as a village green and high street. Further subdivision has occurred since the date, however the majority of the original land division is intact.
Architectural styles, detailing and built form features	<p>Single, semi-detached, row and cottage houses, commercial buildings, post office, bakery, shops, hotel and other public buildings.</p> <p>Intimate small scale and finely grained buildings.</p>

Statement#	Statement
Mit4	<p>Hotel and Institute with tall gabled ornate rendered parapets.</p> <p>Modestly detailed parapet walling above verandahs to shopfronts and shops attached to dwellings, mostly over pavements.</p>
	<p>Building height</p> <p>Single storey with 3 to 3.5 metres ceiling height.</p>
	<p>Materials</p> <p>Consistent with the architectural era of the building.</p> <p>Original unpainted brickwork or stonework.</p> <p>Bluestone walling.</p> <p>Corrugated profile roofing.</p> <p>Painted timber window frames and doors.</p> <p>Modest detailing to verandah posts and roof trim.</p> <p>Brick, stone and rendered masonry chimneys.</p>
	<p>Fencing</p> <p>Front fences and gates reflecting the traditional period, style and form of the associated building.</p> <p>Generally timber picket, brush or wire Fence height typically no more than 1.2m.</p> <p>Rear and side boundary fences located behind the front dwelling alignment no more than 1.8 metres in height with corrugated profile cladding.</p>
	<p>Setting, landscaping, streetscape and public realm features</p> <p>Traditional village setting with village green reflecting a mix of uses. Unbuilt land adjoining Brownhill Creek of Aboriginal heritage significance.</p> <p>Regular pattern of street trees.</p> <p>Varied historic townscape views due to plan of village and open space.</p> <p>Consistent building setbacks for dwellings.</p> <p>Shops attached to dwellings, commercial and institutional buildings constructed to the front boundary.</p>
	<p>Representative Buildings</p> <p>Identified - refer to SA planning database.</p>

Historic Areas affecting Mount Barker District Council

	Druids Avenue, Mount Barker Historic Area Statement (MtB3)
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>

Statement#	Statement	
MtB3	Eras, themes and context	19th and early 20th Century. Buildings and structures predominantly dating from the 19 th Century. Small, compact workers cottages and larger residential buildings.
	Allotments, subdivision and built form patterns	Allotment pattern reflective of the original land division pattern.
	Architectural styles, detailing and built form features	Early stone dwellings. Compact, intact collection of small scale detached and semi-detached buildings dating predominantly from the 19 th and 20 th century. Symmetrical frontages and separate verandahs. Hipped and gabled roof forms with ridge typically parallel to the street Some parapet walling.
	Building height	Single storey. External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick or rendered chimneys.
	Fencing	Some timber picket fencing. Hedges. Low stone walling to front boundary. Hardwood post and wire mesh or cyclone mesh.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Street hedging. Some red brick pavers to footpath.
	Representative Buildings	Identified - refer to SA planning database.

MtB4	Echunga Historic Area Statement (MtB4)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
Eras, themes and context	1849 - 1940. Commercial buildings including single storey shops, ecclesiastical, civic, former post office and hotel. Some rural structures including outbuildings. Some former shops being converted to dwelling. Single storeyed detached and semi-detached dwellings. Small cottages on large allotments.	
Allotments, subdivision and built form patterns	Shopfronts close to footpath. Generous setbacks to north-eastern side of Adelaide Road. Consistent, deep allotments.	
Architectural styles, detailing and built form features	Verandahs and porches up to and over footpath. Small scale, single storeyed detached and semi-detached built form of early European settlements. Structures reflecting early local production. Parapets to shop fronts. Symmetrical and asymmetric frontages. Separate verandahs.	

Statement#		Hipped and gabled roofs. Ridge typically parallel to street for residential dwellings. Parapet ends and gable roof for shops.
Building height		External wall height of 3 to 4 metres for residential dwellings.
Materials		Stone external walls. Brick quoins. Corrugated profile roof sheeting. Painted timber window frames and doors. Painted timber verandah posts. Brick, render or stone chimneys. Fibre cement sheeting to parapets (e.g. Echunga Memorial Institute).
Fencing		Hardwood post and wire mesh or cyclone mesh. Some timber picket fencing. Metal posts with metal rails, wire or mesh infill varieties evident within the area.
Setting, landscaping, streetscape and public realm features		Wide street. Evenly spaced deciduous street trees to north-eastern side. Verandahs and porches to footpath providing shelter for pedestrians.
Representative Buildings		Identified - refer to SA planning database.

MtB5	Exhibition Road, Mount Barker Historic Area Statement (MtB5)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From mid-19 th and 20 th Century. Public open space. Small cottages on large allotments. Small scale, single storeyed, detached built form.
	Allotments, subdivision and built form patterns	Variety of allotment sizes and shapes to Exhibition Road. Aligning setbacks from street frontage. Wellington Road dwellings parallel to side boundary providing angled frontage.
Architectural styles, detailing and built form features	Small scale, intact, single storeyed, detached built form. Cottages. Stone dwellings. Symmetrical frontages and separate verandahs. Hipped roof forms. Roof ridge typically parallel to the street. Separate verandahs with bullnose, concave or monopitch form. Some verandahs continuous with main roof or adopting change in pitch. Painted timber roof trim, verandah posts.	
Building height		External wall height varies from 3 to 4 metres.
Materials		Stone external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors.

Statement#	Statement
	<p>Painted timber verandah posts with some ornate decoration.</p> <p>Brick, render or stone chimneys.</p>
Fencing	Low masonry. Brush. Metal picket fence.
Setting, landscaping, streetscape and public realm features	<p>Public open space.</p> <p>Open interface between the public space and residential uses. Stands of densely planted eucalypts and mature deciduous trees.</p>
Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement	
	Materials	Stone external walls. Brick external walls. Some rendered walling. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts. Masonry and masonry half columns to verandahs. Brick, render or stone chimneys.
	Fencing	Hedging to street fronts. Some timber picket fencing. Rendered masonry retaining walls.
	Setting, landscaping, streetscape and public realm features	Mature indigenous and significant trees. Vegetated landscape. Shop verandahs providing amenity to pedestrians.
	Representative Buildings	Identified - refer to SA planning database.

MtB10	Macclesfield Historic Area Statement (MtB10)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From 1840's and 19th Century. Buildings, sites and structures represent the town's service provision to the local farming district. 19 th century buildings associated with commercial and community services.
	Allotments, subdivision and built form patterns	Laid out around a village green, Davenport Square by the Angas River. Regular and repeated pattern of allotments becoming denser to the northern end of Strathalbyn road.
	Architectural styles, detailing and built form features	Early stone dwellings and outbuildings, shops and hotels. Small scale, single storeyed, detached buildings and structures dating predominantly from the 19 th century. Parapet walls to shop fronts. Symmetrical frontages. Separate verandahs of a concave, monopitch or bullnose profile. Verandahs as a continuation of the main roof.
	Building height	Dwelling external wall height 3 - 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Some rendered walling. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing	Timber picket fencing. Low stone wall.
	Setting, landscaping, streetscape and public realm features	Mature street trees. Davenport square and Anglican Church provide sense of place. Views of significant buildings along Venables Street.

Statement#	Statement
	<p>Wide main street.</p> <p>Shop verandahs provide shelter amenity to pedestrians.</p> <p>Footpath and verge unmade to eastern side of Strathalbyn Road.</p>
Representative Buildings	Identified - refer to SA planning database.

Paddys Hill, Mount Barker Historic Area Statement (MtB13)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	<p>1848.</p> <p>Detached dwellings of early European settlements.</p> <p>A visual landmark of the eastern landscaped boundary of the town.</p>
--------------------------	--

Statement#	Statement
MtB13	Area represents religious beliefs including places of study, worship and burial in a landscaped setting.
	Allotments, subdivision and built form patterns Open landscape. Varying allotment sizes.
	Architectural styles, detailing and built form features Early stone dwellings. Single and double storeyed detached villas dating predominantly from the late 19 th and early 20 th century. Symmetrical frontages. Separate verandahs or as continuation of main roof. Hipped and gable roof forms with ridge typically parallel to the street. Verandahs with bullnose, concave or monopitch form.
	Building height Single storeyed dwellings external wall height varies from 3 to 4 metres. Double storeyed dwellings external wall height varies from 6 to 8 metres.
	Materials Stone external walls. Brick quoins. Corrugated profile sheet roofing. Painted timber window frames and doors. Painted timber verandah posts with some ornate decoration. Brick, render or stone chimneys.
	Fencing Timber post and rail. Timber posts and woven wire mesh.
	Setting, landscaping, streetscape and public realm features Vegetated landscape setting. Mature eucalypts along Paddys Hill Road, Springs Road, Dutton Road, Railway Place and Daddow Road.
	Representative Buildings Identified - refer to SA planning database.

MtB16	Church Street, Hahndorf Historic Area Statement (MtB16)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	<p>From mid to late 19th Century.</p> <p>Buildings and structures dating from the 19th century reflecting early settlement and prosperity post settlement.</p> <p>Predominantly single story, with some double storey detached built forms.</p> <p>Public and religious buildings.</p> <p>Adjacent to the Hahndorf State Heritage Area.</p>	
Allotments, subdivision and built form patterns	<p>Varying allotment sizes and shapes to the main street.</p> <p>Minimal setback from street.</p>	
Architectural styles, detailing and built form features	<p>Compact, intact and rustic collection of small scale, single and double storeyed, detached buildings and structures dating predominantly from the 19th century. Germanic influence style.</p> <p>Symmetrical frontages and separate verandahs.</p> <p>Parapet walls to shop fronts.</p> <p>Parapet walls to end gables.</p> <p>Hipped and gable roof forms.</p> <p>Half hipped (Germanic influence).</p> <p>Verandahs separate or as a continuation of main roof with concave, bullnose or monopitch profile.</p>	
Building height	<p>External wall height varies from 3 to 8 metres.</p>	
Materials	<p>Stone external walls.</p> <p>Rendered external walls.</p> <p>Some half-timbering / fachwerk.</p> <p>Corrugated profile roof sheeting.</p> <p>Brick quoins.</p> <p>Painted timber window frames and doors.</p> <p>Painted timber verandah posts with some ornate decoration.</p> <p>Brick, render or stone chimneys.</p>	
Fencing	<p>Some low timber picket fencing.</p>	
Setting, landscaping, streetscape and public realm features	<p>Simplistic planter boxes. Street furniture unadorned.</p> <p>Sense of place established by mature deciduous street trees.</p>	
Representative Buildings	[Not identified]	

	Auricht Road, Hahndorf Historic Area Statement (MtB17)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	<p>From late 19th and early to late 20th Century residential periods. Adjacent to the Hahndorf State Heritage Area.</p>	

Statement#	Statement	
MtB17	Allotments, subdivision and built form patterns	Transition in allotments from historic main street to adjacent 20 th century residential areas. Historic Strassendorf land division pattern remains evident. Regular and repeated long narrow allotments typically orthogonal to the street. Small setbacks from road.
	Architectural styles, detailing and built form features	Single storey detached dwellings. Brick and stone dwellings and outbuildings. Hipped and gable roof forms. Verandahs separate with bullnose profile or as a continuation of the main roof.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Stone external walls. Brick external walls. Brick quoins. Corrugated profile sheet roofing. Brick, render or stone chimneys.
	Fencing	Low masonry. Timber picket. Hedging to street front.
	Setting, landscaping, streetscape and public realm features	Some street trees. Footpath to eastern side only. Thoroughfare to main road.
	Representative Buildings	<i>[Not identified]</i>

MtB18	Hahndorf Rural Setting Historic Area Statement (MtB18)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From Late 19 th to 20 th century. Rural landscape. Low intensity agricultural and pastoral lands. Adjacent to the Hahndorf State Heritage Area.
	Allotments, subdivision and built form patterns	Open farmland. Allotments of varying sizes. Some Strassendorf and Hufendorf allotments.
	Architectural styles, detailing and built form features	Interwar bungalows. Late 19 th to 20 th century cottages. Small scale, single storeyed detached buildings and structures. Hipped and gable roofs. Separate verandahs with bullnose, concave or monopitch form. Verandahs as a continuation of the main roof.
Building height	External wall height varies from 3 to 4 meters.	
Materials	Dressed stone external walls. Brick external walls. Brick quoins. Corrugated profile roof sheeting.	

Statement#	Statement	
		Brick or render chimneys.
	Fencing	Hedging to street front. Timber post and rail.
	Setting, landscaping, streetscape and public realm features	Rural backdrop to township of Hahndorf. Paddocks. Native vegetation. Informal landscaped appearance.
	Representative Buildings	[Not identified]

Statement#	Statement	
MtB19	Kia-Ora Street, Mount Barker Historic Area Statement (MtB19)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	From early 20th Century to 1950's. Interwar architecture. Small compact dwellings which reflect the continuing prosperity of the town well into the mid-20 th century. Represents a period of housing and streetscaping largely intact. Stone and brick reflective of prominence of masonry and brickworks within the area.
	Allotments, subdivision and built form patterns	Varying allotment sizes orthogonal to the street, becoming deeper towards the creek. Small front setbacks. Reasonably consistent widths to street frontage. Unique no through road.
	Architectural styles, detailing and built form features	Dressed stone and red brick construction. Single storeyed, detached dwellings. Asymmetric frontages.
	Building height	External wall height varies from 3 to 4 metres.
	Materials	Dressed stone and red brick external walls. Brick quoins. Some rendered walling. Corrugated profile roof sheeting. Tiled roofs. Painted timber window frames and doors. Some painted timber verandah posts with ornate decoration. Painted masonry columns and half columns. Brick or render chimneys.
	Fencing	Low masonry. Timber post and woven wire. No fencing.
Setting, landscaping, streetscape and public realm features	Verges and footpath unmade. Compact, residential setting character.

Statement#	Statement	
MtG3	patterns	Allotments along Margaret Street vary in size, however are predominantly regular in shape. Street frontages vary, however, are generally one of two large sizes. Allotment depth is consistent across Margaret Street. Large allotments range in size.
	Architectural styles, detailing and built form features	Commercial/industrial in nature. Several buildings have frontage to Margaret Street and the Railway Lands. Railway station with associated platforms still exists.
	Building height	Varying heights - single up to 3 to 4 storey high buildings dependant on their historical use.
	Materials	Buildings are predominantly constructed from corrugated iron, timber or stone.
	Fencing	Open styles of fencing - for example, timber post and rail; post and wire.
	Setting, landscaping, streetscape and public realm features	Expansive, open nature of the railyards and the remnant buildings and structures associated with its use as a passenger and goods terminal. The commercial and industrial buildings along Margaret Street form a strong industrial streetscape fronting the railway yards. Railway track and other elements including ballast, railway iron fences, telegraph poles, platforms and structures. Use of old railway carriages. Temporary, demountable or movable structures and plantings.
	Representative Buildings	Identified - refer to SA planning database.

St Andrews Historic Area Statement (MtG4)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	Institutional and residential. Development from period of settlement up to and including the 1920s.	
Allotments, subdivision and built form patterns	Generally narrow roads with residential buildings exhibiting minimal street set-backs. Large allotments along Elizabeth Street and Penola Road. Allotment sizes ranging from large to small.	
Architectural styles, detailing and built form features	Significant institutional buildings include the Wesley Church and Hall, both of which are State heritage places, and the St Andrews Church and spire, which is a dominant element of the area.	
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.	
Materials	Construction and materials reflecting traditional period and style.	
Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.	
Setting, landscaping, streetscape and public realm features	Significant Institutional buildings. Many residences are located at the top of the hill, taking advantage of fine views over the city to the south.	
Representative Buildings	Identified - refer to SA planning database.	

Vansittart Park Historic Area Statement (MtG5)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	1880s-1920s.	
Allotments, subdivision and built form patterns	Adjoining the St Andrews Historic Area, the Vansittart Park area contains uniform residential allotments on a grid pattern. There has been a small number of infill type developments in the area to date. However, the area remains predominantly dwellings on large regular shaped allotments. Generally large, consistent frontages. Predominantly large, consistent allotments. The Vansittart Park provides a sporting ground (with associated amenities) and large open garden areas.	
Architectural styles, detailing and built form features	Villa, federation and bungalow style dwellings.	
Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.	
Materials	Construction and materials reflecting traditional period and style.	

Statement#	Statement	
	Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Well landscaped Vansittart Park and the topography of the area adds interest. Streets are not excessively wide by comparison to other areas of Mount Gambier.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement	
MtG6	Wehl Street South Historic Area Statement (MtG6)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1860s- mid 1920s.
	Allotments, subdivision and built form patterns	Wide roads with large, deep allotments, although east-west roads are generally narrow with buildings set close to the street. Side setbacks are in some cases small.
	Architectural styles, detailing and built form features	Diverse dwelling styles. Larger residences predominantly along Wehl Street South. Smaller stone or timber-clad workman’s cottages close to the railway line. Wehl Street Public School.
	Building height	Predominantly single storey, with two storey additions within roof space to rear of buildings.
	Materials	Stone and timber clad. Construction and materials reflecting traditional period and style.
	Fencing	Original fences constructed of Mount Gambier stone, dolomite, scoria, basalt or flint, limestone retaining walls. Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Street set-backs in this area vary considerably, and combined with clusters of historical housing, produce an interesting streetscape. Residential streetscape character, including within commercial areas. Unobtrusive advertising. Front fences and garden landscaping. Car parking located to the rear of buildings.	
Representative Buildings	Identified - refer to SA planning database.	

Historic Areas affecting Rural City of Murray Bridge

Statement#	Statement	
MuBr1	Adelaide Road Pontoon Historic Area Statement (MuBr1)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th Century.
	Allotments, subdivision and built form patterns	Linear road pattern. Buildings square to the street. Moderate to large allotment sizes.
	Architectural styles, detailing and built form features	Varied built form including stone and brick dwellings with verandahs, Victorian dwellings, larger stone and brick cottages with verandahs.
	Building height	Low scale, single storey built form.
	Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
	Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping,	Entrance to the centre of Murray Bridge. Frontages of developments adequately landscaped. Swimming pool complex.	

streetscape and public realm features	
Representative Buildings	Identified - refer to SA planning database.

Mannum Road Historic Area Statement (MuBr2)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Late 19th and early 20th Century.
Allotments, subdivision and built form patterns	Linear road pattern. Buildings square to the street. Moderate to large allotment sizes.
Architectural styles, detailing and built form features	Varied built form including stone and brick dwellings with verandahs, Victorian dwellings, larger stone and brick cottages with verandahs.
Building height	Low scale, single storey built form.
Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Entrance to the centre of Murray Bridge.
Representative Buildings	Identified - refer to SA planning database.

Swanport Road Historic Area Statement (MuBr3)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Includes land between Mary Terrace and Rachel Street where some of the first subdivisions in Murray Bridge occurred in 1873.
Allotments, subdivision and built form patterns	Grid like pattern involving a number of narrow lanes and varying street widths. Consistent setback distances to both the front and side of dwellings.
Architectural styles, detailing and built form features	Dwellings in this locality display a strong repetitive architectural style.
Building height	Low scale, single storey built form.
Materials	Random limestone rubble. Stone and brick. Local limestone. Iron roofs.
Fencing	Front fences forward of the dwelling reflecting the traditional period, style and form of the associated building.
Setting, landscaping, streetscape and public realm features	Entrance to the centre of Murray Bridge. Larger, well established front gardens.
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting Naracoorte Lucindale

Livingston Street, Naracoorte Historic Area Statement (NaLu1)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Statement#	Statement	
NALU1	Eras, themes and context	1870s to 1890s and turn of the 20 th century.
	Allotments, subdivision and built form patterns	Small allotments.
	Architectural styles, detailing and built form features	Single- and double- fronted detached cottages (typically involving two rooms).
	Building height	Single storey.
	Materials	Local stone, fibro-sheet and weatherboard, corrugated iron and patterned sheet metal.
	Fencing	Open fencing predominantly wire and picket style no more than 1.2 metres.
	Setting, landscaping, streetscape and public realm features	Buildings positioned close to street frontages, landscaped front gardens and wide grassed verges.
Representative Buildings	[Not identified]	

Historic Areas affecting City of Norwood, Payneham and St Peters

Statement#	Statement	
NPSP1	College Park Historic Area Statement (NPSP1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Subdivision during the 1870s with dwellings built between 1870s and 1920s. Detached dwellings.
	Allotments, subdivision and built form patterns	Consistent pattern of prestigious single-storey detached dwellings on very large, spacious allotments fronting wide, tree-lined streets. Very low density. Side and rear setbacks providing large separation distances between dwellings.
	Architectural styles, detailing and built form features	Double fronted, symmetrical and asymmetrical dwellings; East Adelaide Investment Company dwellings; Larger villas and mansions; Victorian villas; Edwardian Queen Anne and Art Nouveau. The double fronted, symmetrical and asymmetrical dwellings in the College Park Policy Area are an elegant larger version of the simple colonial cottage with the addition of a projecting wing (in the case of the asymmetrical dwelling), a more elaborate verandah and increased detailing in plaster and render work around openings. The pitch and size of the roof makes this an important design element. The external walls are generally constructed of bluestone or dressed and coursed sandstone. Verandahs along the front elevation are another important element of both the double fronted symmetrical and asymmetrical dwelling.
	Building height	Single storey, two storey in some locations.
	Materials	External walls made of bluestone or dressed and coursed sandstone. Stone, brick and rendered masonry. Traditional colours and materials.
	Fencing	Low, open front fencing (including secondary streets to the main façade of building) associated with the traditional period and style of the building up to 1.2m (masonry), 1.5m (wrought iron, timber and wire) and 2m (masonry pillars) in height, allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other dwellings built during the Victorian period; or timber picket, timber paling or woven crimped wire; or corrugated iron or mini orb within timber framing for Edwardian dwellings. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry. Side fences along street corners continue the detailing of the front fence to the house alignment, solid fencing beyond this point in traditional materials.
	Setting, landscaping, streetscape and public realm features	Dwellings have sizeable setbacks from all boundaries and are typically set in large landscaped grounds with front boundaries defined by fencing of various styles. Open landscape character to front garden, which enhances dwelling and streetscape quality. Wide streets lined with mature trees.
Representative Buildings	Identified - refer to SA planning database.	

	Hackney North Historic Area Statement (NPSP2)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>	

Statement#	Statement	
NPSP2	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Predominantly pre 1920s, some pre 1940s dwellings. Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Small narrow fronted allotments on narrow streets.
	Architectural styles, detailing and built form features	Humble, mainly double fronted (with some single fronted) single storey cottages, in detached, semi-detached and row dwelling configurations.
	Building height	Single storey.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
	Fencing	Low, open front fencing (including secondary streets to the main façade of building) reflecting the traditional period and style of the associated building up to 0.9m in height, allowing views to building. Rear and side fencing behind the alignment of the main dwelling face to 1.8m. Timber picket, timber dowelling, simple masonry and cast iron palisade. Side and rear fences are in traditional materials, such as timber, corrugated iron or well detailed masonry.
	Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets with dwellings built close to street with minimal setbacks and separation distances.
	Representative Buildings	Identified - refer to SA planning database.

NPSP3	Hackney South Historic Area Statement (NPSP3)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	Closely packed arrangement of buildings built close to the street frontage. Mainly small narrow fronted allotments which generally only allow for dwellings with a single room width, rear service lanes. Some sizeable allotments along parts of Osborne Street. Primary dwelling frontages are to streets, not lanes.
	Architectural styles, detailing and built form features	Small, mainly single-fronted dwellings, in detached, semi-detached and row dwelling configurations. Some elevated dwellings along eastern side of Westbury Street. Verandahs along the primary frontage of dwellings. Dwellings simple in structure and plan.
	Building height	Single-storey.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
Fencing	Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m, allowing views to building. Original design and materials, such as timber picket, timber dowelling or simple masonry and cast iron palisade.	
Setting, landscaping, streetscape and public realm features	Consistent pattern of narrow streets and rear service lanes. Rear lanes used for vehicular access and garages. Streets lined with mature exotic street trees. Landscaped gardens to sizeable allotments.	
Representative Buildings	Identified - refer to SA planning database.	

NPSP4	Joslin / Royston Park Historic Area Statement (NPSP4)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
Eras, themes and context	1900s-1930s. Detached dwellings. Joslin/Royston Park Historic Area is divided into two separate locations: the area around First and Second Avenue, north of Lambert Road, in the suburb of Royston Park, and the area centred around Fourth, Fifth and Sixth Avenues in the suburb of Joslin.	
Allotments, subdivision and built form patterns	Regular pattern of large allotments.	

Statement#	Statement	
NPSP4	Architectural styles, detailing and built form features	Single storey detached dwellings. Bungalows. Edwardian (such as Queen Anne) and Federation dwelling styles. Some Tudor style dwellings with a steeper roof pitch, tiled roof and heavy columns.
	Building height	Single-storey, two storeys in some locations.
	Materials	Stone dwelling walls and original joinery.
	Fencing	Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, brush or timber and wire) and 2m (masonry pillars), allowing views to dwelling. Original design and materials, such as timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing for cottages, villas and other Victorian dwellings. Timber picket, timber paling or woven crimped wire, or corrugated iron or mini orb within timber framing for Edwardian dwellings. Timber paling, wire mesh and timber or tube framing, woven crimped wire, or masonry with galvanised steel ribbon for Bungalow and Tudor house styles. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Area characterised by regularity of the wide, tree lined avenues. Landscaped garden setting, particularly in front of dwelling; Streets lined with distinctive street trees.
	Representative Buildings	Identified - refer to SA planning database.

Kensington 1 Historic Area Statement (NPSP5)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	1838-1860; 1861-1880; 1881-1900; 1901-1915; 1916-1939. Residential urban village characterised by buildings, settings street patterns and natural features. Range of dwelling types.	
Allotments, subdivision and built form patterns	Original historic pattern.	
Architectural styles, detailing and built form features	Larger Victorian-style brick and stone buildings, Federation era brick and stone buildings and bungalow-styled buildings of the post-1918 period. Significant corner buildings contribute to the character.	
Building height	Up to two storeys.	
Materials	Pise, stone or brick.	
Fencing	Generally low, reflecting the traditional period, style and form of the associated building.	
Setting, landscaping, streetscape and public realm features	The unique diagonal street pattern of Kensington is an important part of its character.	
Representative Buildings	Identified - refer to SA planning database.	

Kensington 2 Historic Area Statement (NPSP6)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. Eras, themes and context	Dominant and historic institutional buildings of the St Joseph's Convent. Range of dwelling types.	
Allotments, subdivision and built form patterns	Original historic pattern.	
Architectural styles, detailing and built form features	St Joseph's Convent buildings.	
Building height	Up to two storeys.	
Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.	
Fencing	Generally low, reflecting the traditional period, style and	

Statement#	Statement	
		form of the associated building.
	Setting, landscaping, streetscape and public realm features	Car parking and service areas are at the rear of buildings.
	Representative Buildings	<i>[Not identified]</i>
NPSP7	Kent Town 1 Historic Area Statement (NPSP7)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Pre 1890 (Victorian) and 1890-1915 (turn-of-the-century), 1915-1940 (bungalows). Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern with large scale villas. Smaller scale row houses and courtyard-style housing on Little Angas and Little Wakefield Street frontages.
	Architectural styles, detailing and built form features	Large-scale Victorian and turn-of-the-century villas set well back from the street frontage in mature garden settings together with other historic buildings including cottages and bungalows.
	Building height	Up to two storeys.
	Materials	Stone, brick, natural coloured bagged render and/or brick as the main external finish to walls.
Fencing	Generally low, reflecting the traditional period, style and form of the associated building.	
Setting, landscaping, streetscape and public realm features	<i>[Not stated]</i>	
Representative Buildings	<i>[Not identified]</i>	
NPSP8	Kent Town 2 Historic Area Statement (NPSP8)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Pre-1920s. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Smaller scale row houses and courtyard-style housing on Dew Street frontage.
	Architectural styles, detailing and built form features	Double and single-fronted cottages.
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone.
Fencing	Generally low, reflecting the traditional period, style and form of the associated building.	
Setting, landscaping, streetscape and public realm features	Consistency of front set-backs, in particular, the row of double-fronted houses in Grenfell Street.	
Representative Buildings	<i>[Not identified]</i>	
	Marden (Broad Street / Pollock Avenue) Historic Area Statement (NPSP9)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
Eras, themes and context	Small group of dwellings, dating from 1910s.	
	Detached dwellings. Semi-detached dwellings on Broad Street.	

Statement#	Statement	
NPSP9	Allotments, subdivision and built form patterns	Original historic pattern. Detached dwellings of modest proportions, set relatively close to Pollock Avenue. Mix of detached and semi-detached dwellings on Broad Street.
	Architectural styles, detailing and built form features	Detached dwellings of modest proportions. Features such as the typical bull-nose verandah and gable ends, which are elaborated with strapping or finials.
	Building height	Single-storey.
	Materials	Unpainted stone, corrugated iron roofing materials and joinery.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling. Timber picket and paling, woven crimped wire, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
	Setting, landscaping, streetscape and public realm features	Narrow street width, street plantings and footpath treatments of Pollock Avenue.
	Representative Buildings	Identified - refer to SA planning database.

NPSP10	Maylands Historic Area Statement (NPSP10)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 1800s onwards. Detached and semi-detached dwellings.
	Allotments, subdivision and built form patterns	Similar to Stepney area but with greater percentage of larger allotments, with proportionately larger homes. Allotments of generous size. Original historic pattern.
	Architectural styles, detailing and built form features	Double-fronted detached villas and cottages of modest proportions with substantial established gardens. Single-fronted attached dwellings of sandstone and bluestone construction. Remaining corner shop structures. Verandahs along the primary frontage.
	Building height	Single-storey.
	Materials	Sandstone and bluestone.
	Fencing	Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m (masonry) or 1.5m (other materials), allowing views to dwelling. Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber framing. Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.
Setting, landscaping, streetscape and public realm features	Relatively wide streets in the original subdivision layout. Landscaping around a dwelling, particularly in the front garden, is an important design element as it enhances the dwelling and adds to the appearance and quality of the streetscape. Street trees are present in most of the streets and make a solid contribution to the overall character.	
Representative Buildings	Identified - refer to SA planning database.	

NPSP11	Norwood 1 Historic Area Statement (NPSP11)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
Eras, themes and context	Late 19th Century (pre 1920s). Residential. Range of dwelling types.	
Allotments, subdivision and built form patterns	Original historic pattern. Consistent front setback	

Statement#	Statement	
NPSP11		patterns.
	Architectural styles, detailing and built form features	Single-fronted and double-fronted cottages.
	Building height	Up to two storeys.
	Materials	Bluestone, sandstone, pise or brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	<i>[Not stated]</i>
	Representative Buildings	<i>[Not identified]</i>

Norwood 2 Historic Area Statement (NPSP12)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
NPSP12	Eras, themes and context	Late 19th Century and turn-of-the-century. Residential. Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern. Limited front and side setbacks.
	Architectural styles, detailing and built form features	Single-fronted, double-fronted, semi-detached and row cottages.
	Building height	Up to two storeys.
	Materials	Bluestone or sandstone with brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	<i>[Not stated]</i>
	Representative Buildings	<i>[Not identified]</i>

Norwood 3 Historic Area Statement (NPSP13)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
NPSP13	Eras, themes and context	Pre 1890s (Victorian) and turn-of-the-century (pre 1920). Range of dwelling types.
	Allotments, subdivision and built form patterns	Original historic pattern.
	Architectural styles, detailing and built form features	Villas and double-fronted cottages. Prominent key heritage buildings e.g. St Bartholomew's Church.
	Building height	Up to two storeys.
	Materials	Sandstone or bluestone with brick.
	Fencing	Generally low, reflecting the traditional period, style and form of the associated building.
	Setting, landscaping, streetscape and public realm features	Set-back consistently with landscaped frontages.
	Representative Buildings	<i>[Not identified]</i>

Norwood 4 Historic Area Statement (NPSP14)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>

NPSP18	St Peters Historic Area Statement (NPSP18)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1870 - 1930s. Detached and semi-detached dwellings.
	Allotments, subdivision and built form patterns	<p>Mix of close-set, single-fronted cottages on narrow allotments and a range of cottages and villas set on larger allotments with more substantial established gardens, in wide streets, often with rear service lanes. Rear lanes used for vehicular access and garages</p> <p>In College Park and along Fifth and Sixth Avenue - small to medium sized allotments.</p> <p>In this section of First Avenue - modest sized allotments.</p>
	Architectural styles, detailing and built form features	<p>In College Park and along Fifth and Sixth Avenue - mainly single-storey double-fronted villas and detached dwellings of modest proportions with some single-fronted dwellings.</p> <p>In this section of First Avenue - reasonably compact single-fronted, double-fronted, and villa-type dwellings.</p>
	Building height	Single storey.
	Materials	Sandstone and bluestone construction.
	Fencing	<p>Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m (masonry), 1.5m (wrought iron, timber and wire or woven mesh) and 2m (masonry pillars), allowing views to dwelling.</p> <p>Timber picket, timber dowelling, masonry and cast iron palisade, or corrugated iron or mini orb within timber.</p> <p>Side and rear fences in traditional materials such as timber, corrugated iron or well-detailed masonry.</p>
	Setting, landscaping, streetscape and public realm features	<p>In College Park and along Fifth and Sixth Avenue - Reasonably wide streets are characteristic of this area, with significant street planting and fenced front boundaries.</p> <p>Rear vehicle access lanes.</p> <p>Landscaping around dwellings is an important design element.</p> <p>Streets lined with mature exotic street trees.</p>
	Representative Buildings	Identified - refer to SA planning database.

NPSP19	Stepney Historic Area Statement (NPSP19)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1850 - 1890s. Detached, semi-detached and row dwellings.
	Allotments, subdivision and built form patterns	<p>Intricate pattern of development.</p> <p>Dwellings built on small, narrow-fronted allotments, close to the street frontage with minimal setbacks and separation.</p> <p>Primary dwelling frontages to streets, not lanes.</p>
	Architectural styles, detailing and built form features	<p>Single and double fronted single storey cottages, in detached, semi-detached and row dwelling configurations, with some modest villas and bungalows.</p> <p>Dwellings simple in structure and plan.</p>
	Building height	Single storey.
	Materials	Bluestone and sandstone.
	Fencing	<p>Low, open fencing that reflects the period and style of the dwellings. Front fencing (including any secondary street frontage up to the alignment to the main face of the dwelling) generally low in height up to 1.2m, allowing views to dwelling.</p> <p>Timber picket, timber dowelling, masonry and cast iron palisade.</p>
	Setting, landscaping, streetscape and public realm features	<p>Street trees feature to a varying degree due to the species selection and age of planting.</p> <p>Rear lanes used for vehicular access and garages</p>
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Onkaparinga

Onka1	<p>Clarendon Historic Area Statement (Onka1)</p>		
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
	<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
	Eras, themes and context	<p>1840s - 1890s.</p> <p>Early European survey and settlement in the regional areas around Adelaide; Pastoralism, Agriculture, Viticulture, Tertiary Industries, Communications, Road Transport, Water Catchment and Supply, Social Services, Religion, Education, Law and Order, Local Government.</p>	
	Allotments, subdivision and built form patterns	<p>Township allotments set out from the main road (Grants Gully Road) which winds its way along the floor of a valley and Turners Gully Road.</p> <p>Relatively large allotments, typical of a country township. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment.</p> <p>Substantial space between buildings.</p> <p>Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character.</p> <p>Building frontages are parallel to streets becoming more random out from the centre of the township.</p> <p>Dwellings with frontage to Turners Gully Road and/or Clarendon Road sited on the lower slopes of hillsides or within the valley floor.</p>	
	Architectural styles, detailing and built form features	<p>Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences.</p> <p>Agriculture and viticulture related structures such as winery buildings, farmhouses and barns.</p> <p>Public buildings such as police station, courthouse, school, former institute building (hall) with Victorian Gothic and similar styles of the Victorian era. Churches and cemeteries. Hotel, general store and shops. Transport related structures such as bridges.</p> <p>War memorial.</p> <p>Roof types: M - shaped, gable, hipped, concave or straight-pitched veranda, steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods</p> <p>short roof spans</p> <p>Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills</p>	
	Building height	<p>Predominantly single-storey. Single-storey residential buildings with some two-storey or part two-storey dwellings.</p> <p>Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres.</p> <p>Tall single-storey churches and institutional and public buildings that are generally exceptions and landmarks that punctuate the streetscape and stand out because of their difference in scale.</p>	
Materials	<p>Masonry - random rubble, roughly-coursed stone, unpainted local bluestone, sandstone, some with brick or rendered quoin work</p> <p>Roof - slate or corrugated iron</p> <p>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts</p> <p>Consistent with the materials used in the 1840s-1890s buildings within the township.</p> <p>Unobtrusive, natural colours.</p>		
Fencing	<p>Picket fence. Woven wire. Timber post-and-rail or post-and-wire</p> <p>Low (approximately 1.2 metres in height) sandstone rubble. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.</p>		
Setting, landscaping, streetscape and public realm features	<p>Lineal township laid out along a narrow valley floor.</p> <p>Township located within a steeply-sided valley and a hillside, rural setting.</p> <p>Narrow streets.</p> <p>The reservoir and the Onkaparinga River.</p> <p>Mature landscape environment where well-established trees and vegetation reinforce the country township character and emphasise the space between buildings.</p>		

		<p>Village or rural township character.</p> <p>Vistas and views into and out of the township are important.</p>
	Representative Buildings	Identified - refer to SA planning database.

	<p>Kangarilla Historic Area Statement (Onka2)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.</p>
Building height		<p>Predominantly single-storey, some two-storey (but well-modulated). Single-storey has typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger former hotel is a landmark.</p>
Materials		<p>Masonry - limestone, sandstone, weatherboard, some rendered masonry - random rubble.</p> <p>Quoins - rendered, brick.</p> <p>Roof - corrugated iron, slate, dark grey.</p> <p>Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.</p>
Fencing		<p>Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high. Original front fences associated with era and style of building, which maintain views of the building from the public realm. Rear and side boundary fencing often corrugated galvanised iron up to 1.8 metres in height.</p>
Setting, landscaping, streetscape and public realm features		<p>Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas. Informal streetscapes often lined with established trees and shrubs.</p>
Representative Buildings		<p>[Not identified]</p>

Onka6

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	1850s - 1920s. Early European survey and settlement in the regional areas around Adelaide; Agriculture, Tertiary Industries, Communications, Road Transport, Social Services, Religion, Leisure Pursuits, Holidaymaking.
Allotments, subdivision and built form patterns	Village centred on the intersection of Old Coach Road and Port Road. Large allotments perpendicular to the roads. Allotment sizes increase out from the centre of the township, emphasising the semi-rural environment. Substantial space between buildings. Buildings are sited relatively close to front boundaries and each other in the centre of the township but front and side setbacks increase as distance from the town centre increases. This pattern of development contributes to the sense of space and rural/country township character. Building frontages are parallel to streets becoming more random out from the centre of the township. Based on gridiron pattern. Views of the hills to the east down public streets.
Architectural styles, detailing and built form features	Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas, asymmetrical cottages and attached shop-dwellings with Victorian stylistic influences. Hotel, former Temperance Inn, former Institute building (hall) and church are landmarks. Rectilinear plan form. Low-scale. High solid-to-void ratio. Typically two or more pavilions rather than a single mass. Concave, bullnose and straight-pitched verandas on front and sometimes side facades reduce bulk and scale and add visual interest. Lean-to forms are common and break down bulk and scale. Vertical proportions in windows and doors. Fine-grain detail in elements such as plinths, string courses, projecting sills. Roof types: gable, hipped. Steeply-pitched, typically 30 to 40 degrees, reflecting traditional architectural styles and building methods. Short roof spans.
Building height	Predominantly single-storey. Typical proportions of Victorian-era cottages with wall heights of around 3.3 to 3.6 metres and ridge heights of around 5.0 to 5.5 metres. Larger hotel and former school building are landmarks.
Materials	Masonry - limestone, sandstone - random rubble. Quoins - rendered, brick. Roof - corrugated iron, Willunga slate. Timber joinery including window frames, door frames, doors, fascias, bargeboards and veranda posts.
Fencing	Picket. Post-and-rail. Post-and-wire. Hedges. Randomly-laid limestone up to 1.2 metres high.
Setting, landscaping, streetscape and public realm features	Established trees - mature Aleppo Pines, Norfolk Island Pines, Casuarinas.
Representative Buildings	[Not identified]

Willunga Historic Area Statement (Onka7)

The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.

These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.

The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.

Eras, themes and context	Predominantly 1840s - 1900. Early settlement; Agriculture, Slate Quarrying.
Allotments, subdivision and built form patterns	Original subdivision in the late 1830s. Second subdivision of southern part of the township in 1857. Laid out around High Street, the main thoroughfare through the town, which cuts diagonally through the original subdivision. Allotments perpendicular to High Street in centre of township. Grid pattern with allotments perpendicular to streets in southern section of township. Original allotments of around half an acre. Subsequent land division has occurred, but allotments remain relatively large. Early buildings line High street and the road out of Willunga to Aldinga and McLaren Vale.

Statement#	Statement
Onka7	<p>Rectilinear.</p> <p>Buildings aligned parallel to boundaries.</p>
	<p>Architectural styles, detailing and built form features</p> <p>Simple, vernacular cottages. Mid-to-late 1800s stone buildings with Victorian stylistic influences. Double-fronted cottages, villas and asymmetrical cottages with Victorian stylistic influences. Shops and shop/dwellings with Victorian stylistic influences. Churches and cemeteries. Historic Areas affecting Peterborough

PET1	<p>Peterborough Historic Area Statement (Pet1)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Turn of 20 th century. Civic, commercial and retail. Railways.
	Allotments, subdivision and built form patterns	Traditional grid arranged around Main Street and the railway line.
	Architectural styles, detailing and built form features	Along Main Street and within the town centre, commercial buildings with traditional shopfronts, parapets and verandahs. Small, humble workers' accommodation, including single- and double- fronted cottages and row cottages. Villas. Traditional railway architecture including workshops and industrial buildings. Roof pitches between 30-45 degrees.
	Building height	Single storey with the exception of civic and hotel buildings and the Capitol Theatre .
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style not exceeding 1.2m.
	Setting, landscaping, streetscape and public realm features	Along Main Street and within the town centre, consistent setbacks and a strong building line with little interruption. Buildings square to the street. Visibility of the railway line. Dominance of the railways housing and administrative buildings within the railway reserve east of Hurlstone Street. Dominance of railway workshops and industrial buildings at the western end of the railway reserve. Dominance of religious buildings associated with three churches along Kitchener Street. Symmetry given to Main Street by trees where there is no built form. Definition and articulation of four corners created by hotel buildings. Wide streets with stone kerbing. Slate footpaths.
	Representative Buildings	Identified – refer to SA planning database.

PET2	<p>Yongala Township Historic Area Statement (Pet2)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Late 19 th and early 20 th century.
	Allotments, subdivision and built form patterns	Traditional grid land division pattern arranged around Main Street.
	Architectural styles, detailing and built form features	Along Main Street, traditional shopfronts with verandahs.
Building height	Single storey with the exception of the Globe Hotel.	

Statement#	Statement	
	Materials	Local stone, masonry and corrugated iron.
	Fencing	Open fencing of a rural style no more than 1.2m.
	Setting, landscaping, streetscape and public realm features	Silos and the Globe Hotel are landmark features. Consistent building setbacks from street frontages and the central unifying element of the grassed area on Main Street give the area cohesion.
	Representative Buildings	[Not identified]

Historic Areas affecting City of Playford

Play1	One Tree Hill Historic Area Statement (Play1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1860s - Uniting Church & Cemetery, Cottages. 1900s - Institute & War Memorial.
	Allotments, subdivision and built form patterns	Orderly allotment configuration fronting Black Top Road. Varying front setbacks. Generous side setbacks.
	Architectural styles, detailing and built form features	Early symmetrical cottages of low scale and simple form. Institutional/community period buildings featuring simple gable form. Rectilinear plan forms. Moderate degree of modulation and articulation. Steep roof pitches in the order of 30 to 40 degrees (slightly lower on domestic buildings. Short roof spans. Hip roof forms on domestic buildings. Gable roof form on institutional/community buildings. Short straight pitched verandahs on domestic buildings. Vertical proportions in windows and doors.
	Building heights	Low scale single storey domestic buildings. Single storey institutional/community buildings.
	Materials	Consistent with the materials used in the 1860s to 1900s period. Institutional/community buildings featuring local stone face, walls unpainted. Private buildings featuring rendered and painted walls. Corrugated iron roofing. Timber joinery including verandah posts and framing, fascia, barges, window frames, door frames and doors.
	Fencing	Fencing associated with the era and style of the building. Low open style fencing. Low stone fence and iron gate to Uniting Church.
	Setting, landscaping, streetscape and public realm features	Well established streetscape character, with notable landscaping.
	Representative Buildings	[Not identified]

Historic Areas affecting City of Port Adelaide Enfield

	Alberton / Rosewater Historic Area Statement (PADE1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1860 - 1950 built development.
	Allotments, subdivision and built form patterns	Squares linked by wide streets. Modified grid pattern. Reasonably consistent allotment depths. Varied front setbacks.
Architectural styles, detailing and built form features	Wide range of housing styles including villas, bungalows, cottages, terrace and rows.	

Statement#	Statement	
PAdE1	Materials	Materials consistent with the style of building and era of its original construction.
	Building height	Single storey.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with 1920s including capped timber palings, post and wire or woven wire fences.
	Setting, landscaping, streetscape and public realm features	Pockets of important early houses in Queen Street and King Street, dating from the 1860s. Substantial Victorian stone and brick houses grouped around two squares, Company Square and St Patricks Square, with good examples of substantial corner villas. The Alberton station complex is an important feature in the area and contains the earliest railway station in South Australia and shops of a consistent design. The double line of trees along the railway line that divides the area and the established street trees, particularly, Plane trees, Ash trees, Jacarandas, White Cedars and some mature Canary Island Date Palms make an important contribution to the character of the area.
	Representative Buildings	Identified - refer to SA planning database.

PAdE2	Exeter Historic Area Statement (PAdE2)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1860's - 1940's built development.
	Allotments, subdivision and built form patterns	Grid pattern with narrow north-south running streets with the long axes of allotments running east-west. Allotments fronting Harris St, Exmouth Road and Semaphore Road configured with their long axes running north-south so that buildings address those roads. Generally built close to street with small front setbacks.
	Architectural styles, detailing and built form features	Housing styles consisting of cottages, villas, bungalows, terraces and rows.
	Materials	Materials consistent with the style of building and era of its original construction.
	Building height	Predominately single storey but some scattered two storey.
	Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated Victorian and Edwardian houses include pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	The early cottages and neighbourhood shops with verandahs extending over the footpath and the Cooperative Building Society in Denman Street provide a reminder of the local village character of this area, catering for the needs of residents whose main means of transport was walking. A collection of intact early buildings characterised by stone and brick residences, early timber houses and later corrugated iron houses all retaining original detailing. A second small residential pocket on the south side of Semaphore Road which also has a local village character with single storey brick and stone cottages and a two storey hotel and paired terrace.	
Representative Buildings	Identified - refer to SA planning database.	

PAdE3	Semaphore / Largs Historic Area Statement (PAdE3)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1860's - 1940's built development.
	Allotments, subdivision and built form patterns	Grid pattern with predominately east-west running streets with the long axes of allotments running north-south. Allotments fronting the Esplanade and Military Road configured with their long axes running east-west so that buildings address these roads. Consistent front setbacks for each street but setbacks varying between streets. Varied allotment sizes.
	Architectural styles, detailing and built form features	Wide range of housing styles from all periods of development of Semaphore and Largs including villas, bungalows, workers row cottages, terraces, rows, mansions and Tudors. Early timber and masonry houses.
	Building height	Predominately single storey but scattered two storey and a small amount of three storey along parts of the Esplanade frontage.
	Materials	Materials consistent with the style of building and era of its original construction. Timber and masonry housing.
Fencing	Low and/or open consistent with the style and era of construction of the building it is associated with. Fences associated with Victorian and Edwardian	

Statement#	Statement
	houses including pickets, paling, masonry and cast iron and other traditional fence forms. Fences associated with houses from the 1920s including capped timber palings, post and wire or woven wire fences.
Setting, landscaping, streetscape and public realm features	A continuous run of high quality residential buildings set among mature Norfolk Island Pines along the Esplanade. The low scale of the Esplanade set against the open view of the sea opposite contains individual houses of historical and architectural importance built as seaside residences. An important sub-precinct along Military Road running from Fort Glanville through to Largs containing high quality public and private buildings. A concentration of early houses around Newman Street and Blackler Street associated with the development of Semaphore during the 1860s. Pockets of mature street planting providing important settings for these early houses, particularly along the Esplanade, Union Street, Clare Street, Hall Street and others.
Representative Buildings	Identified - refer to SA planning database.

Mainstreet Historic Area Statement (PAde4)	
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
Eras, themes and context	1850's - 1940's built development.
Allotments, subdivision and built form patterns	Focused around Commercial Road, St Vincent Street, Dale Street and Church Place. Allotments configured with their long axes running perpendicular to these roads. Allotments sizes vary to accommodate retail and commercial uses. Commercial buildings generally built to road frontages.
Architectural styles, detailing and built form features	Commercial buildings featuring a fine grain fabric of small scale tenancies with narrow frontages. The extensive use of balconies and verandahs over footpaths.
Building height	Predominately single and two storey with a small number three and four storey buildings to the east of Commercial Road.
Materials	Materials consistent with the style of building and era of its original construction.
Fencing	<i>[Not stated]</i>
Setting, landscaping, streetscape and public realm features	The area is a commercial and retail focus. It acts as a buffer and an approach area to the Port Adelaide State Heritage Area noting that the boundary around the Port Adelaide State Heritage Area is relatively arbitrary and the Main street Policy Area contains some buildings that are of equal significance to buildings within the Port Adelaide State Heritage Area. It features a large number of early buildings, many of which have housed the same continuous functions since the time of their construction. The State Heritage listed St Paul's Church is a prominent building in the area and provides a land mark along a major view corridor from the Nelson St Bridge. Similarly, the State Heritage listed Uniting Church off Commercial Road is an important landmark and southern gateway to this area. The area contains a number of State Heritage places and many Local Heritage places.
Representative Buildings	Identified - refer to SA planning database.

Woolstores Historic Area Statement (PAde5)	
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
Eras, themes and context	1880's - 1940's built development.
Allotments, subdivision and built form patterns	Modified grid pattern with St Vincent Street and Bedford Street providing the main access roads into and out of this area. The southern and western boundaries of the grid are radiused by Brock Street and Barlow Street. The northern boundary is defined by Santo Parade, the northern side of which was previously an extension of Dock 1 and provided the woolstores with convenient access to cargo vessels. Woolstores and commercial buildings generally built to road frontages. Cottages close to and facing the road frontage. Medium to large allotment sizes.
Architectural styles, detailing and built form features	Large purpose designed woolstores and warehouses featuring strong and robust built forms with parapet walls and saw tooth roofs. Simple, single storey workers cottages.
Building height	Large masonry woolstores buildings ranging from single to four storeys. Single storey former workers cottages.
Materials	Masonry and corrugated iron feature strongly and are key defining materials. Materials consistent with the style of building and era of its original construction.
Fencing	<i>[Not stated]</i>
Setting, landscaping, streetscape and public realm features	A key characteristic of this area is the compact group of large, well detailed warehouses associated with the wool export trade and located close to the dockside. The woolstores buildings are highly visible and prominent from eastern approaches into the Port Adelaide Regional Centre, particularly from Perkins Drive. The unimpeded visibility and prominence of these buildings is important. The area also contains a collection of primarily corrugated iron houses, mainly located between Aberdeen and Crozier Streets south of Brock Street. Some are identified as Local Heritage Places, dating from 1900 to 1930.

Statement#	Statement																	
		1920, which served as worker's housing for the nearby woolstores. These surviving houses are a remnant of a more consistent low scale residential area which contrasted visually with the adjacent imposing woolstores.																
	Representative Buildings	Identified - refer to SA planning database.

	Eras, themes and context	Integral part of Crystal Brook Town Centre.
	Allotments, subdivision and built form patterns	Traditional allotment pattern, frontages and widths.
PtPi2	Architectural styles, detailing and built form features	Traditional designs, roof forms and building features such as verandas, awnings and balconies.
	Building height	Predominantly single storey with two storey structures in suitable locations.
	Materials	Original or otherwise complementary materials, colours and finishes.
	Fencing	Front fences and gates associated with traditional period, style and form of the building, up to 1.2 m in height.
	Setting, landscaping, streetscape and public realm features	The distinctive historic character is created and enhanced by the interaction between built form, spaces, plantings and general street pattern within the area.
	Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Prospect

Pr1	Fitzroy Terrace Historic Area Statement (Pr1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Late 19th and Early 20th century mansion style housing.
	Allotments, subdivision and built form patterns	Very large spacious allotments with wide frontages. Sizable setbacks from all boundaries with sizable spaces between buildings. The established pattern of buildings sited away from allotment boundaries makes a significant contribution to the character.
	Architectural styles, detailing and built form features	Very large mansion style dwellings. Additions to the rear or side of dwellings. Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs and building placement on allotments.
	Building height	Up to 2 storeys.
	Materials	Variety of materials and colour finishes with additional detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high. Fencing that associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial well landscaped gardens with front yards that complement the style of the dwelling. Landscaping around dwellings. The spacious streetscape character of Fitzroy Terrace is created by the large allotments on which have been built a range of equally large residences. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.

Pr2	Clifton Street Historic Area Statement (Pr2)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Late 1870s, late 19th speculative housing by local builder James Trevail for middle class home buyers.
	Allotments, subdivision and built form patterns	Original subdivisions of 1881, 1882 and larger allotments of 1894-95 at western end of street (known as Prospect View at the time of sale). Consistent, large front setbacks. Large and small asymmetrical side setbacks to dwellings. The set-back and pattern of coverage creates a notable streetscape with vistas and views towards the west.
	Architectural styles, detailing and built form features	Consistent front verandahs with highly decorative cast iron and timber trim, hipped and gabled pitched roofs and brick chimneys. 1880s-1890s residential designs along Clifton Street reflecting speculative subdivision. Double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography to the west.
	Building height	Single storey, moderate residential scale. Essentially single storey residences which take advantage of the sloping topography to the west.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls.
	Fencing	Low open style to 1.2 metres high with mainly masonry and iron materials.
	Setting, landscaping, streetscape and public realm features	Homogenous streetscape of houses and associated buildings. Substantial well landscaped gardens with front yards that complement the style of the dwelling. Narrow verge with mature street trees. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	Identified - refer to SA planning database.

	<p>Flora Terrace Historic Area Statement (Pr5)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>
--	---

Statement#	Statement	
Pr5	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Late 19th and early 20th centuries residential. Focus of commemoration of war service, civic activities and important sporting events.
	Allotments, subdivision and built form patterns	Regular subdivision pattern. Three separate land divisions between 1892 and 1923 - part of the Oxford subdivision of 1892 on south side of the Terrace with, part of St John's Wood South subdivision in 1909 on north side with larger allotments of and part of a 1923 division of the eastern end to the Memorial Gardens. Consistent setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Range of designs with range homogeneity derived from decorative front facades (detailing around windows, doors verandahs & gables), pitched roofs, brick chimneys & front verandahs. Houses display style, form and detail of the relevant periods of historic development - 1892 to the 1920s.
	Building height	Single storey and large residential scale.
	Materials	Face stone and brick walls and corrugated iron or terra cotta roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Substantial front gardens. Very leafy streetscape. Civic and residential character. Strong visual axis between the Town Hall and the Memorial Gates to Prospect Oval. Garages and carports are designed and sited to be subordinate to the main dwelling.
Representative Buildings	Identified - refer to SA planning database.	

Pr6	Martin Avenue Historic Area Statement (Pr6)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	Inter-War residential.
	Allotments, subdivision and built form patterns	Large allotments. Regular generous front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Mix of bungalows, 'gentleman's residence' and Tudor homes. Range of designs with homogeneity derived from decorative front facades, pitched roofs, brick chimneys & front verandahs. Additions to the side and rear of dwellings.
	Building height	Single to two storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.
	Materials	Face stone and brick walls and terracotta tiled roofs, original finishes.
	Fencing	Low open style to 1.2 metres high. Fences comprising low masonry plinth with regularly spaced columns and iron above to a medium height.
Setting, landscaping, streetscape and public realm features	Large, well landscaped front yards as an extension of a green and leafy streetscape with mature canopy over grassed verges. Street trees and wide grassed verges combine with the generous setbacks to contribute to the spacious appearance of the public realm. Garages and carports are designed and sited to be subordinate to the main dwelling.	
Representative Buildings	Identified - refer to SA planning database.	

	North Ovingham Historic Area Statement (Pr7)	
The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.		
These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.		
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		

Statement#	Statement	
Pr7	Eras, themes and context	Late 19th Century housing. 1877 - 1879.
	Allotments, subdivision and built form patterns	Small allotments subdivided in 1877 - 1879. Double fronted, narrow, deep allotments between Toronto Street and Cotton Street. Small setbacks from all boundaries with compact spaces between buildings.
	Architectural styles, detailing and built form features	Coherent pattern of small cottages with common features including pitched roofs, brick chimneys & front verandahs. Primarily double fronted cottages with central gable feature and front steps to raised finished floor levels to respond to the falling topography on individual allotments from east to west. Small symmetrically fronted or attached stone houses remain in Toronto Street and larger examples of similar style fronting Churchill Road.
	Building height	Single storey and small residential scale.
	Materials	Stone walls and steps facing stone and brick houses and attached cottages with verandahs, corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high associated with the design of the dwelling and allows gardens to spill onto the street.
	Setting, landscaping, streetscape and public realm features	Small front yards and limited space between buildings. Public realm characterised by narrow street and verge and moderate canopy cover from semi-mature street trees. Mature gardens which spill onto the street, pleasant green streetscape. Intimate, small residential pocket. Where present, garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	<i>[Not identified]</i>
Pr8	<p>Prospect Lanes Historic Area Statement (Pr8)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Reflects substantial areas of Prospect that were developed during the turn of the century (1880s to early 1900s) and constructing cottages and villa homes on higher areas overlooking Churchill Road and beyond.
	Allotments, subdivision and built form patterns	Regular subdivision pattern with consistent large frontages and site areas. The series of laneways that link the allotments are distinctive features within the sub division. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Cottages and villa homes on higher areas overlooking Churchill Road and beyond. Housing in the area displays a consistency of character reflecting the styles of domestic architecture at the turn of the century. Houses incorporate concave or bull-nosed verandahs and other typical detail and generally comprise face stone front walls, with brick or rendered quoins, and window and door dressings.
	Building height	Single storey.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings. Rear lane access, with primary streets having no access or access which has been designed and located to be subordinate to the main dwelling.
Representative Buildings	<i>[Not identified]</i>	
	<p>Highbury Historic Area Statement (Pr9)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1882 subdivision. Turn of the century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments, subdivision and built form patterns	Regular subdivision pattern with consistent large frontages and site areas. Regular moderate front setbacks. Large and small asymmetrical side setbacks to dwellings.

Statement#	Statement	
Pr9	Architectural styles, detailing and built form features	Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs. Characteristic design features such as bull-nosed verandahs, brick quoining, and stone front walls.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high, providing visibility to landscaped front yards and dwellings.
	Setting, landscaping, streetscape and public realm features	Well landscaped front yards as an extension of a green leafy streetscape. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	[Not identified]

Pr10	Ballville/Gloucester Historic Area Statement (Pr10)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Subdivided in 1878 by Henry Ball. Turn of century residential development. The area is characterised by primarily detached housing reflecting styles of domestic architecture at the turn of the century.
	Allotments, subdivision and built form patterns	Original subdivision with modest allotments with large frontages. Consistent moderate street setbacks. Large and small asymmetrical side setbacks to dwellings.
	Architectural styles, detailing and built form features	Primarily detached housing reflecting styles of domestic architecture at the turn of the century. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
	Building height	Single storey and moderate residential scale.
	Materials	Stone walls and limited external colour palette with detailing around windows, doors and edges of walls. Corrugated iron roofs.
	Fencing	Low open style to 1.2 metres high. Fencing associated with the period and style of the dwelling.
	Setting, landscaping, streetscape and public realm features	Limited landscaping and dominant built form from small front yards and narrow road verges. Gloucester Street has greener front yards and public realm. St Cuthbert’s Anglican Church and its adjacent manse are prominent landmarks. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	[Not identified]

Pr11	Medindie Gardens Historic Area Statement (Pr11)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Inter-War period housing. The area is predominated by bungalows to the east of Corbin Road and Tudor-style houses to the west. The majority of the original dwellings constructed prior to 1930 remain intact, with additions occurring over time either within the roof space or to the rear and side.
	Allotments, subdivision and built form patterns	Regular subdivision pattern of generously sized allotments and wide frontages. Consistent large front and side setbacks. The area retains its original subdivision pattern, with regular sized allotments supporting residential development at a low density.
	Architectural styles, detailing and built form features	Predominantly bungalows to the east of Corbin Road and Tudor-style houses to the west. Homogeneity derived from front facades with detailing around windows/doors/verandahs & gables, pitched roofs, brick chimneys & front verandahs.
	Building height	Single storey and large residential scale. Two storey additions are within the roof space or to rear of buildings.
	Materials	Stone and brick walls and limited external colour palette with detailing (including glazed bricks) around windows, doors and edges of walls and corrugated iron or terra cotta roofs. Consistent use of materials including rock faced stone and masonry, face red brick, terracotta roof tiles or corrugated iron, glazed bricks for trim and other details and materials typical of the housing of the Inter-War Period.
Fencing	Low open style (to 1.2 metres high). Fencing associated with the period and style of the dwelling.	

Statement#	Statement	
	Setting, landscaping, streetscape and public realm features	Large well landscaped front yards and tree lined streets above grassed verges. Minimal driveway and hard-surfaced areas. Consistent pattern of prestigious single storey detached dwellings on generous allotments fronting tree-lined street. Spacious and open feel. Garages and carports are designed and sited to be subordinate to the main dwelling.
	Representative Buildings	[Not identified]

Historic Areas affecting Robe

RO1		
<p>Robe Historic Area Statement (Ro1)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	19 th century and early decades of 20 th century.	Shipping port, communication and administration township servicing pastoral development of the South East.
Allotments, subdivision and built form patterns	Topography shapes the setting of Robe and land division pattern. Royal Circus is a low knoll. It is a commemorative landmarks and a distinct road feature. There is a legible connection between Royal Circus, the sea wall / jetty abutment, the Customs House and the Post and Telegraph Office. Main Road, Victoria Street and Mundy Street form the main line of road to the port and the main street. The traditional street grid pattern extends either side of Victoria Street, to the coastal fore-dune and across the ridge to the south which overlooks and forms the backdrop to the township.	Most of the original large square allotments have been subdivided but the pattern of historic buildings remains legible.
Architectural styles, detailing and built form features	Traditional stone commercial buildings with shopfronts, parapets and verandahs within the town centre. The variety rather than the consistency of traditional building forms is a distinct characteristic of Robe. Small workers' cottages on large allotments, often with low walls, hipped roofs spanning one or two rooms, casement windows and lime-washed or natural stone walls. Heritage listed community buildings (the primary school, churches and the Institute) are on prominent sites and remain as strong landmarks. Heritage-listed government buildings (the Post and Telegraph Office, Customs House and Court House) dominate Royal Circus. Massive stone chimneys are a characteristic feature of the historic buildings. Stone outbuildings are visible from public streets. Roof pitches between 25-35 degrees. Roofs with a high degree of articulation, steep pitches and small spans, provide a unique roofscape across Robe to Guichen Bay. Older buildings have casement windows. Later buildings have double-hung timber sash windows.	
Building height	Two storey buildings along small section of Smillie Street, and hotels. Their built form combines double and single storey elements and verandahs, articulating their bulk and scale. Adjacent buildings differ in style, creating a varied rather than a consistent skyline. Other historic buildings generally single storey, with small span hipped roofs. Building floor levels are close to, step with or are built into, the slope of the land.	
Materials	Local stone, limestone, rendered and bagged masonry with painted or lime wash finish. Painted timber weatherboard, painted timber joinery, trims, verandahs, barges and fascias. Galvanised and painted corrugated iron roofing. Some examples of slate and traditional flat metal roof tiles. Driveway materials are neutral in colour and pattern with natural finishes.	
Fencing	Local stone, hardwood palings and pickets, hardwood and woven wire, brush with round hardwood posts and hedges not exceeding 1.2m.	
Setting, landscaping, streetscape and public realm features	Views and vistas of the entrance to the town centre along Main Road past Lake Fellmongery and Lake Charra. Views of the foreshore area adjacent Town Beach and streetscapes of historic buildings of Smillie Street and Mundy Terrace. Views across the area illustrate the importance of native vegetation and the distinct character of the roof designs of historic buildings. Historic buildings square to and often close to street alignments, particularly on Smillie Street. Minimal breaks between buildings except where access to the rear of a site is provided. Streets, verges and reserves in the public realm characterised by Lakestone kerbing, limestone cuttings, landmark trees (Norfolk Island Pines in particular) and native vegetation. Important public open space reserves that frame the township at Lannum Reserve, the Institute / Town Beach Foreshore, Royal Circus and the southern edge of Lake Butler. Each has a distinct landscape structure, planting character and historic quality.

Eras, themes and context	1910-1930.	
Allotments, subdivision and built form	Traditional grid.	

Statement#	Statement
TAT1	patterns Large allotments.
	Architectural styles, detailing and built form features Federation-style houses with asymmetrical plans and multiple decorative gables. California bungalows with veranda pylons and gables extending to the veranda perimeter. Low-pitched roofs.
	Building height Single storey.
	Materials Rock-faced sandstone walls and terracotta tiled roofs.
	Fencing No fencing or open front fencing no more than 1.2m.
	Setting, landscaping, streetscape and public realm features Rural setting. Landscaping surrounding dwellings.
	Representative Buildings Identified – refer to SA planning database.

Historic Areas affecting City of Tea Tree Gully

Tea Tree Gully Township Historic Area Statement (TTG1)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	The village core of Tea Tree Gully. Mid to late 19th Century to early 20th Century.
Allotments, subdivision and built form patterns	Traditional subdivision layout focussed on North East Road as the major approach route to the township in both directions. Allotments are varied in size and shape. Regular moderate front setbacks and small setbacks from side boundaries. Generally consistent siting and space between buildings. Sites address North East Road.
Architectural styles, detailing and built form features	Colonial style flat facades articulated with post-supported verandas. Symmetrical designs with simple footprints. Roof forms are generally hipped or gable roofs with pitches between 30-40 degrees. A mix of buildings including detached dwellings, churches, row shops, a war memorial, former police station, institute building, hotel, former bakehouses, flour mill and winery. Tea Tree Gully museum and former council chambers building as State Heritage Places. Historic homestead relics and a stone retaining wall in Pine Park.
Building Height	Single storey, with the exception of the Old Flour Mill and Tea Tree Gully Museum.
Materials	A combination of sandstone and bluestone construction with corners and window and door reveals formed with quoin work. Generally, all dwellings include corrugated roofs in galvanised or light to mid-tone greys, green or red. Unpainted stone / brick. Modern dwellings are consistent with the above materials, but also include a combination of raw brick, painted brick and rendered brick in natural, earthy colours. Timber windows.
Fencing	Low, open fencing forward of the building line to height of 900mm. Associated with the traditional period, style and form of building. Hedges, timber picket, post and rail with woven wire, paling or railing, stone, rendered brick or block.
Setting, landscaping, streetscape and public realm features	<p>Undulating and natural setting with minimal cut and fill, and extensive planting and landscaping.</p> <p>The Township provides for a visual transition between the rural landscape of the hills to the east and the suburban plains to the west.</p> <p>Angove’s tower and cellar are recognised as landmark buildings and are important elements of the western gateway, including vistas of the tower.</p> <p>The North East Road entrance to Anstey Hill Recreation Park is also an important gateway and features historic building relics that line the entrance walk inside the park.</p> <p>The communal focal point is Haines Memorial Park, which features a European landscape theme surrounded by native street tree planting which illustrates the history of European settlement. Views to and from Haines Memorial park.</p> <p>Strong landscape setting dominated by undulating topography. Significant stands of native trees and intensively landscaped watercourse of Tea Tree Creek</p> <p>Discreet, low scale advertising comprising typefaces, colours, sizes and forms associated with the clear and simple styles used on the 19th and early 20th centuries, generally not illuminated.</p>
Representative Buildings	Identified - refer to SA planning database.

Historic Areas affecting City of Unley

Centres Conservation - Goodwood, King William and Fullarton Roads Historic Area Statement (Un1)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and	1880 to 1940’s built development.

Statement#	Statement	
Un1	context	
	Allotments, subdivision and built form patterns	<p>Goodwood Road - prominent original imposing buildings, homogeneous historic nature and intrinsic features formed by the close-knit development to the street alignment, open balconies and verandahs extending over the footpath.</p> <p>King William Road - early era buildings and quaint unique close-knit character formed by the parade of buildings of narrow fronted shops to the street alignment, with simple continuous series of ornate parapet facades and verandahs over the footpath and some open balconies above.</p> <p>Fullarton Road - significant and early era residential forms of buildings with appropriate setbacks, low-key commercial uses adaptation and substantial landscaped frontages north of Cheltenham Street and small scale simple straight facade shopfronts to south.</p> <p>Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks and spacing between buildings and garden landscape setting.</p>
	Architectural styles, detailing and built form features	Victorian. Turn-of-Century. Inter-War. Complementary main street shopfronts, parapet walls and verandahs over footpaths and residential forms.
	Building height	Maximum two storey street presentation.
	Fencing	Fencing forward of the front façade of the building on Fullarton Road, of a form associated with the building and generally of low masonry pier and plinth, cast iron, brush, timber or similar nature.
	Setting, landscaping, streetscape and public realm features	<p>Limited street trees, except Fullarton Road with dominant, well-established street trees.</p> <p>Goodwood Road - early commercial centre from the late nineteenth century comprising large imposing buildings, including landmark two-storey State Heritage Place, two-storey Local Heritage Place and Church buildings, and smaller narrow fronted premises.</p> <p>King William Road - early commercial centre from the late nineteenth century comprising some larger buildings and primarily small narrow fronted premises.</p> <p>Fullarton Road - residential buildings, some converted to community and commercial uses, and low-key, well landscaped gardens and State Heritage significant mansion 'Hughes Estate'.</p>
	Representative Buildings	Identified - refer to SA planning database.

Residential Compact Goodwood Estate Historic Area Statement (Un2)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	1870 to 1900 built development.	
Allotments, subdivision and built form patterns	Simple grid layout pattern, with longitudinal axis perpendicular to narrow roads. Regular modest allotments and wide site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.	
Architectural styles, detailing and built form features	Victorian double fronted, symmetrical and asymmetrical cottages. Complementary Victorian corner shops that are landmarks and features of the area. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.	
Building height	Wall Height in the order of 3.5 metres. Total Roof Height in the order of 5.7 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs in the order of 2.1 metre fascia height and 3.0 metre pitching height.	
Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated Iron roof cladding.	
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); Hedges, with or without fencing.	
Setting, landscaping, streetscape and public realm features	Compact streetscape character, simple grid of short and narrow streets, narrow verges, modest street trees. Goodwood Estate of 1875 a rectangular section of 30 acres (12.1 hectares) with regular layout of standard modest properties, some local corner shops, adjacent to facilities and services along Goodwood Road and the notable bisection in north by tramway corridor.	
Representative Buildings	Identified - refer to SA planning database.

Residential Grand Unley Park Heywood Estate Historic Area Statement (Un9)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	1860 to 1940's built development.
Allotments, subdivision and built form patterns	Regular, very generous allotments and site frontages. Prevailing rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and grand garden landscape setting.
Architectural styles, detailing and built form features	Victorian Villas and Mansions. Turn-of-the-Century Villas and Mansions. Inter-War period Bungalows, particularly Gentleman's Bungalows. Tudor, particularly Gentleman's Tudors. Old English, Georgian Revival and other International Styles. Individualised by original architectural inspirations. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
Building height	Grand built scale and form of existing historic buildings.
Materials	Consistent with the materials typically associated with the style and era of the dwelling. For example (but not limited to): stone with brick or rendered embellishments, iron roof and timber joinery for Victorian and Turn-of-the-Century; stone with brick embellishments, tiled roof and timber joinery for Bungalows; brick with rendered embellishments, tiled roof and timber joinery and gable details for Tudors, brick or render with restrained detailing, flat roof forms and timber, steel and/or concrete features for International Styles.
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
Setting, landscaping, streetscape and public realm features	Wide streets and verges. Avenues of substantial street trees. Expansive allotments, street frontages with substantial well landscaped gardens including trees. Heywood Park a key feature at junction of key axis of King William Road and Northgate Street.

Residential Grand Myrtle Bank Historic Area Statement (Un10)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	1880 to 1940 built development.
Allotments, subdivision and built form patterns	Generous, wide, long street. Regular, very generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century grand villas. Inter-War era, primarily Bungalow but also Tudor, Art Deco, Mediterranean and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence.

Statement#	Statement	
Un10		in the streetscape.
	Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Grand streetscape character. Generous wide street. Wide verges. Large street trees.

Residential Spacious Millswood Page Estate Historic Area Statement (Un11)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Un11	Eras, themes and context	1900 to 1930's built development.
	Allotments, subdivision and built form patterns	Basic grid street layout around the central recreation feature of Goodwood Oval, but with long curvilinear and some truncated streets around the bisecting train lines previously laid in the 1870's. Spacious streetscape character of long, short and curved, wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century villa styles. Primarily distinctive Inter-War period bungalows, art deco, Tudor and complementary later styles. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees.- Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, barges and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Corrugated Iron roof cladding. Tiled roof cladding on later style buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Un13	<p>Residential Spacious Unley and Malvern Trimmer Estate Historic Area Statement (Un13)</p>	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>	
	<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>	
	<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1880 to 1920 built development.
	Allotments, subdivision and built form patterns	Spacious streetscape character of regular grid layout (with axial views focussed on the central oval feature) of wide, tree-lined streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century villas (asymmetrical and symmetrical), double-fronted cottages and limited complementary, Inter-war era, styles. More affluent, original owners developed some larger, amalgamated allotments in the southern areas of Malvern establishing grander residences and gardens. Hipped and gable roof forms, roof louvres, chimneys, open bullnose, concave or straight-pitch verandahs, feature ornamentation (plasterwork and ironwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Wall Height in the order of 3.6 metres. Total Roof Height in the order of 5.6 metres; and Roof Pitch in the order of 27 degrees and 35 degrees. Verandahs, on earlier styles in the order of 2.1 metre fascia height and 3.0 metre pitching height, and on later styles incorporated as part of principle building main roof extension.
Materials	Sandstone. Bluestone. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.	
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.	
Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid layout of wide tree-lined streets, with axial views along wide, tree-lined Cambridge Terrace and Oxford Street focussed on the central Unley Oval feature. Large front gardens. Wide verges. Large street trees.

Statement#	Statement	
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.
	Representative Buildings	<i>[Not identified]</i>

Un18	Residential Spacious Millswood (South) Historic Area Statement (Un18)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1880 to 1940 built development.
	Allotments, subdivision and built form patterns	Simple grid layout pattern of wider streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.
	Architectural styles, detailing and built form features	Victorian and Turn-of-the-Century double-fronted cottages and villas. Inter-War era housing, primarily bungalow but also Tudor, art deco and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.
	Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.
	Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.

Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.
	Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Open, see-through and maintaining an open streetscape presence of the associated building, including typical styles comprising: Timber picket, dowel or paling with top rail; Corrugated iron or mini orb or steel strap panels within timber framing and posts; Woven crimped wire, wire mesh on timber or galvanised steel tube framing; Simple masonry plinth (500mm) and widely spaced minimum numbers of piers with decorative see-through iron palisade or steel bar inserts; Stone, brick and/or stucco masonry low in height with wrought iron or steel bar inserts (typically geometric pattern); hedges, with or without fencing.
	Setting, landscaping, streetscape and public realm features	Spacious streetscape character. Regular grid of wide streets. Wide verges. Large street trees.

Residential Spacious Unley Park (West) Historic Area Statement (Un24)		
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p>		
<p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p>		
<p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>		
Eras, themes and context	1900 to 1940 built development.	
Allotments, subdivision and built form patterns	Simple grid layout pattern of wider streets. Generous allotments and site frontages. Prevailing and coherent rhythm of building siting, street setbacks, side boundary setbacks, spacing between buildings and garden landscape setting.	
Architectural styles, detailing and built form features	Turn-of-the-Century double-fronted cottages and villas. Inter-War era housing, primarily bungalow but also Tudor, art deco and complementary styles. Hipped and gable roof forms, chimneys, open verandahs, feature ornamentation (plasterwork, ironwork and timberwork), lattice work and associated front fences. Carports, garages and side additions are separate and recessed from the main building and façade, and are a minor, unobtrusive presence in the streetscape.	
Building height	Consistent and recognisable pattern of traditional building proportions including wall heights and widths of facades, and roof height, volumes and shapes, and verandahs associated with the identified architectural styles.	
Materials	Sandstone. Bluestone. Brick, including glazed brick, and stucco painted finishes. Rendered masonry. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Brick quoins, occasionally rendered, around windows and doors. Brick or rendered string courses and plinths. Corrugated iron roof cladding. Tiled roof cladding on some post 1900s buildings.	
Fencing	Typical of the historic character of the area, street and architectural style and materials of the associated building. Where forward of the front façade of the principle building, low in height, typically less than 1.0 metre but up to 1.2 metres. Larger sites and of more than 16 metres street frontage may include vertical elements up to 1.8 metres in total height. Historic Areas affecting City of Victor Harbor

Victor Harbor Town Centre Historic Area Statement (ViH1)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	<p>1870s to 1890s era, a period of early development in Victor Harbor.</p> <p>1920s to 1930s when Victor Harbor experienced a boom period as a holiday destination.</p>
Allotments, subdivision and built form patterns	<p>Mostly grid pattern.</p> <p>The intersections of Ocean Street and Coral Street, Coral Street and Flinders Parade and the termination of the Railway Terrace at Warland Reserve are key elements of urban space within the area. No or minimal front and side setbacks.</p>
Architectural styles, detailing and built form features	<p>Commercial premises in Ocean Street, institutional buildings in Coral Street and those supporting facilities associated with the terminus of the railway line along Railway Terrace.</p> <p>Late 1800s era shops (some with Inter-war additions), dwellings, shop/dwellings, town hall, institute/library, hotels, former banks, railway buildings and associated infrastructure. Victorian stylistic influences.</p> <p>Inter-War commercial and public buildings, some with Art-Deco and some with Stripped Classical stylistic influences.</p> <p>Low scale and simple form.</p> <p>Rectilinear plan form with steeply-pitched roof forms (typically 35 to 40 degrees) on 1800s and early 1900s era buildings, also comprising low-pitched roofs behind parapets on Inter-War buildings, reflecting traditional architectural styles and building methods. Short roof spans, minimising roof bulk. Concave, bullnose and straight-pitched verandahs on front and sometimes side facades reduce building bulk and scale and add visual interest. Lean-to forms are also common. Fine-grain detail in elements such as plinths, string courses, projecting sills. High solid to void ratio. Vertical proportions in windows and doors.</p>
Building height	Prevailing one to two storeys. One or two three storey buildings on Coral Street and Flinders Parade.
Materials	Limestone walls, some rendered masonry. Red brick or rendered quoin work and detail. Timber joinery including window frames, door frames, doors, fascias, bargeboards and verandah posts. Corrugated iron or corrugated steel roofing. Variation in materials which assists in breaking down bulk and scale, adding visual interest.
Fencing	Some timber picket fencing and corrugated iron fencing.
Setting, landscaping, streetscape and public realm features	Commercial properties provide the main built form and are characteristically single or two-storey buildings aligning with the street boundary. Typically buildings are symmetrical in design with parapets, verandas and balconies over the footpath to further define the pedestrian nature of the area. The railway corridor with its associated buildings and infrastructure is a prominent landscape element.

Historic Areas affecting Wakefield

Edith Terrace / Wallace Street, Balaklava Historic Area Statement (WakR1)	
<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
Eras, themes and context	1875-1930.
Allotments, subdivision and built form patterns	[Not stated]

Statement#	Statement	
WAKR1	Architectural styles, detailing and built form features	Face stone walls dressed with quoins; stuccoed raised parapets and stucco 'neoclassical' styled decoration/ elements to commercial premises. Framed shopfront windows and doors. Steeply pitched roof forms. Verandahs provided over footpaths.
	Building height	Single storey.
	Materials	Local stone, masonry, stucco, red brick quoins, corrugated iron, timber framed windows and doors and brick chimneys.
	Fencing	[Not stated]
	Setting, landscaping, streetscape and public realm features	Remnant 'Silent Cop' in intersection of two streets, locating the commercial centre of the town. Buildings square to and consistently set back from the street, creating a strong building line with little interruption. Minimal breaks between buildings except where access to the rear of a site is provided.
	Representative Buildings	[Not identified]

WAKR2	Scotland Street, Balaklava Historic Area Statement (WakR2)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1875-1915.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Villas, symmetrical and projecting gable front facades, face stone walls with quoins, vertically proportioned double-hung windows and doors and projecting gables with half-timbered facing, steeply pitched roofs with chimneys and bullnose verandahs.
	Building height	Single storey buildings.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fencing not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Dwellings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

WAKR3	Humphrey / Baker Streets, Balaklava Historic Area Statement (WakR3)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	1875-1915
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages with symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, steeply pitched gable or hipped roofs, masonry parapets to side-gable roofs, chimneys and bullnose verandahs and brick chimneys.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
	Fencing	Timber and wire fences not exceeding 1.2m to Scotland Street and corrugated iron fencing to other boundaries.
Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.	
Representative Buildings	[Not identified]	

Statement#	Statement	
WAKR4	Fisher / Charles Streets, Balaklava Historic Area Statement (WakR4)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1875-1925.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages and villas with projecting gable front or symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, projecting gables with half-timbered facing, steeply pitched gable or hipped roofs, chimneys and bullnose and sloping verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.	
Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.	
Representative Buildings	[Not identified]	

WAKR5	Ralli / John Streets, Balaklava Historic Area Statement (WakR5)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1905-1925.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Cottages and villas. Projecting gable front and symmetrical facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors and projecting gables with half-timbered facing, steeply pitched gable and hipped roofs, chimneys and bullnose and sloping verandahs.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.	
Setting, landscaping, streetscape and public realm features	[Not stated]	
Representative Buildings	[Not identified]	

WAKR6	Burney Street, Blyth (WakR6)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.		
Eras, themes and context	1875-1930.	
Allotments, subdivision and built form patterns	[Not stated]	
Architectural styles, detailing and built form	Villas with projecting gable front and symmetrical facades, face stone walls with quoins to openings and corners, vertically

Architectural styles, detailing and built form features	Gable roofed shops with parapets, framed windows and re-entrant doorways to streets and verandahs overhanging footpaths. Symmetrical fronted and projecting gable fronted dwellings with face stone walls, vertically proportioned double-hung doors and windows, quoins, steeply pitched gabled, or half-gabled hipped roofs, chimneys and bullnose and simple timber-framed front verandahs.	

Statement#	Statement	
	Building height	Single storey.
	Materials	Local stone, masonry, corrugated iron, timber windows and doors, brick quoins and chimneys, timber verandah posts.
	Fences	Timber and wire fences to Main Street not exceeding 1.2m and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on sites. Buildings sited close and square to streets. Consistent front and side setbacks. Landscaping comprising trees.
	Representative Buildings	[Not identified]

Statement#	Statement	
WAKR14	Edward Street, Port Wakefield Historic Area Statement (WakR14)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850-1920. Civic, commercial and retail main street. Railways.
	Allotments, subdivision and built form patterns	Wide allotments.
	Architectural styles, detailing and built form features	Cottages, railway cottages, row dwellings, symmetrical fronted and projecting gable fronted dwellings and shops. Gable roofed structures, with parapets to the street and framed windows and re-entrant doorways. Steeply pitched gabled and hipped roofs with bullnose front verandahs and chimneys.
	Building height	Single storey.
	Materials	Local stone, masonry, red quoins, corrugated iron, timber-framed windows and doors (particularly on shopfronts) and brick chimneys,
Fences	Timber and wire fences to Main Street and corrugated iron fencing to other boundaries. Front fences no more than 1.2 metres.	
Setting, landscaping, streetscape and public realm features	Buildings sited close and square to the street.	
Representative Buildings	[Not identified]	

Statement#	Statement	
WAKR15	Cooper / Mine Streets, Port Wakefield Historic Areas Statement (WakR15)	
	The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.	
	These attributes have been identified in the below table. In some cases, State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.	
	The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.	
	Eras, themes and context	1850-1920.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Detached and attached cottages with symmetrical front facades, face stone walls with quoins, vertically proportioned double-hung windows and entry doors, exposed parapets, steeply pitched hipped roofs (some with half-gable ends), chimneys, bullnose and sloping low verandahs. Dwelling form typically incorporates two rooms with additional rooms to the rear under a lean-to roof but often stone in construction.
	Building height	Single storey.
	Materials	Local stone, masonry, red brick quoins, corrugated iron, timber-framed windows and doors.
Fencing	Timber and wire fences not exceeding 1.2m to street frontages and corrugated iron fencing to other boundaries.	
Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.

Statement#	Statement	
WAKR18	Eras, themes and context	1910-1920.
	Allotments, subdivision and built form patterns	[Not stated]
	Architectural styles, detailing and built form features	Dwellings with face stone walls with quoins or horizontal timber planking, vertically proportioned double-hung timber windows and timber entry doors, steeply pitched gable or half-gabled hipped roofs with chimneys and both integrated and separated front verandahs and porches.
	Building height	Single storey.
	Materials	Local stone, masonry, horizontal timber planking, red brick quoins, corrugated iron, timber-framed windows and doors and brick chimneys.
	Fencing	Timber and wire fences not exceeding 1.2m to Main Street and corrugated iron fencing to other boundaries.
	Setting, landscaping, streetscape and public realm features	Buildings sited centrally on allotments with consistent front and side setbacks.
	Representative Buildings	[Not identified]

Historic Areas affecting Town of Walkerville

Historic Areas affecting Town of Walkerville		
Walk1	Church Terrace Locality Historic Area Statement (Walk1)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s.
	Allotments, subdivision and built form patterns	Very-low density and low-density residential development, with predominantly detached dwellings on wide allotments. Detached dwellings on hammerhead allotments or group dwellings with shared access at the rear with wide street frontage. Very large allotments fronting Church Terrace and St Andrews Street, slightly smaller allotments within the remaining parts of the area.
	Architectural styles, detailing and built form features	Built form is varied, covering a range of architectural periods including early stone villas and brick cottages such as those in the Lansdowne Terrace, together with Victorian and Edwardian architecture and later bungalows and Tudor houses. This historic character has been partially eroded through the development of semi-detached dwellings and other dwellings of uncomplimentary design and siting, reducing the areas available for landscaping to along the front and side of dwellings.
	Building height	Generally single storey. Two storey additions to the rear of buildings or within the roof space and on larger sites with setbacks.
	Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
	Fencing	Examples of original fencing with bluestone plinths and cast iron fence railings above remains. Low front fencing which provides some visibility to the historic built form, although brush fencing or solid pillars and plinths with open style inserts and gates appears in some locations.
	Setting, landscaping, streetscape and public realm features	Vegetation in private yards contributes positively to the overall visual amenity and street tree planting which includes Jacarandas, Golden Rain and Ash trees, particularly in Church Terrace and Devonshire Street also contributes positively to residential amenity.
	Representative Buildings	Identified - refer to SA planning database.

Walk2	Medindie Historic Area Statement (Walk2)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Very-low and low density residential. 19th Century and early 20th Century.
	Allotments, subdivision and built form patterns	Predominantly detached dwellings on large, wide allotments. Allotment sizes and building setbacks vary throughout the policy area, although there are patterns established in individual streets.
Architectural styles, detailing and built form features	Range of architectural styles and dwelling types from the late 19th Century and early 20th Century periods including early Victorian, high Victorian, Edwardian, Classic Revival and large bungalows, all set within large landscaped garden settings that enhance the presentation of the dwellings.	

Statement#	Statement	
	Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space with single storey appearance at the street. Two storey dwellings found on Robe Terrace and on larger sites with setbacks.
	Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. Consistent early stone and brick dwellings on large sites with wide frontages to public roads.
	Fencing	There is a distinctive lack of high, solid fencing and/or the use of open design of large gates to access long driveways has enabled the principal elevation of the historic homes and landscaped grounds to be visible from the public roads.
	Setting, landscaping, streetscape and public realm features	Reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Low-density residential development, with predominantly detached dwellings on allotments that are generous in width. Regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary. Formal avenues and regular spacing of street trees along road verges also make a positive contribution to the amenity of the area.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement	
Walk3	Walkerville Terrace Historic Area Statement (Walk3)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Low-density residential development with predominantly detached dwellings. 19th Century and early 20th Century.
	Allotments, subdivision and built form patterns	Closely sited pattern of development, small allotments with narrow-to-medium frontages and intact historic character throughout the majority of the streets. Large frontages to Church Terrace (northern side) and Stephen Terrace, slightly smaller frontages elsewhere.
	Architectural styles, detailing and built form features	Range of architectural styles and dwelling types from the late 19th Century and early 20th Century. Existing dwellings are typically double or single fronted cottages, with simple detailing and modest sized rooms.
	Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
	Materials	Residences within this area vary in material application. Residences were constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework. The locality exhibits consistent early stone and brick dwellings on large sites with wide frontages to public roads.
	Fencing	Low front fencing, such as picket fencing, or no front fencing at all. High solid fencing up to 2 metres in height on Stephen Terrace.
	Setting, landscaping, streetscape and public realm features	The locality exhibits regular spacing between residential buildings that is primarily achieved through consistent setbacks from each side boundary.
	Representative Buildings	Identified - refer to SA planning database.

Statement#	Statement	
Walk4	Gilberton North Historic Area Statement (Walk4)	
	<p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	Various eras of development that map out the developmental progress of the Walkerville Township, from the late 1870s to late 1920s. Proximity to Walkerville Terrace generally dictates more modest dwellings while grander architecturally designed residences exist on Walkerville Hill, capitalising on views to the Adelaide Hills.
	Allotments, subdivision and built form patterns	Predominantly low density detached dwellings on wide allotments of a range of sizes.
	Architectural styles, detailing and built form features	Mixture of architectural styles from turn of the century to early 1900s. Established character of large detached dwellings on spacious allotments, well setback from all allotment boundaries. Pitched roofs and articulated roof forms are an important characteristic of the area.
	Building height	Predominantly single storey. Two storey additions to the rear of buildings or within the roof space.
	Materials	Residences within this area vary in material application. Residences mostly constructed in locally sourced sandstone or bluestone, corrugated galvanised iron roofs and verandahs with cast iron lacework.
	Fencing	Front boundary fencing is open in design (including gates) with solid components limited to the base and pillars so as to provide views of the principle

Statement#	Statement
	dwelling facade. Traditional materials, heights and designs.
Setting, landscaping, streetscape and public realm features	There is a reasonably well established pattern of development, with regular spacing between buildings, front setbacks and roof pitches. Large street trees and generous garden settings visible from the primary street frontage.
Representative Buildings	Identified - refer to SA planning database.

Ya1	<p>Rapid Bay Historic Area Statement (Ya1)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	<p>Rapid Bay is historically significant because of its connection with the first mainland landing by Colonel Light and his survey team in 1836 and has very strong connections and cultural significance for Aboriginal descendants being a popular fishing and summer occupation site, burial ground and Tjilbruke Dreaming site.</p> <p>1948-1949 (School added in 1950). Encompasses housing established by BHP as part of mining/quarrying operations to the west as well as historic buildings and items at the southern end of the town.</p> <p>Rapid Bay's built character and landscape setting reflects the influence of BHP's extractive industry, which was established during the 1940s with the establishment of a limestone quarry, crushers and loading jetty. Houses were built for employees. At the peak of construction homes were built for BHP by Fricker Bros using local stone and Wattle Flat bricks. A further 16 houses were built during 1949/50 on the eastern side of the township and the primary school officially opened in 1950. BHP stopped operations in June, 1962, and sold houses on the eastern side of Rapid Bay for private ownership. Adelaide Brighton Cement recommenced quarry operations in 1982, providing local jobs and stone products for the Highways Department, local councils and private contractors amounting to 12,000 tonnes annually. The operations have resulted in moving the shore line westward, as 30% of screenings were deposited in the area. Consequently the setting of the township with company housing divided by the Yattogolonga Creek and school oval, has a unique landscape setting and character.</p>
	Allotments, subdivision and built form patterns	<p>Rapid Bay has two residential enclaves which are divided by Yattogolonga River and the town oval. The western section of the town is laid out around the main entrance road and comprises eighteen houses, a former general store and meeting hall. These are without individual subdivision allotments.</p> <p>The eastern section includes fifteen houses either side of Cygnet Place and the primary school. They are constructed on allotments of approximately the same size and are set back the same distance from the road. Allotment sizes provide narrower frontages at the end of the cul-de-sac.</p>
	Architectural styles, detailing and built form features	<p>Semi bungalow in design with painted hipped corrugated roofs, simple and return verandahs, windows surrounds comprising painted concrete lintels and window sills. The 15 houses in Cygnet Place were designed using one of six house plans prepared by BHP Limited. They are either five or six room dwellings and some have sleep-outs attached.</p> <p>On the western side, company dwellings range from simple detached, hipped or gable roof designs to a row of larger stone and brick houses with expansive verandahs facing the sea and overlooking the coastal area.</p>
	Building height	All buildings in the township are of single storey, low scale character on generous allotments.
	Materials	Materials used in housing construction include varying combinations of red brick, concrete brick and stone or limestone.
	Fencing	There is a row of low rendered walls along the front of one group of allotments in Cygnet Place which overlook the sea, but all other allotments have wire mesh front fences and corrugated iron side and rear fences.
	Setting, landscaping, streetscape and public realm features	<p>The streets are well treed, and although Norfolk Island pines are not the only species, they are the most dominant. The extension of the main entrance road which leads through the western residential area and then branches off towards the quarry is divided by a wide median strip in which Norfolk Island pines and pyramid trees have been planted alternately. About a third of the way along this street a road branches off towards the beach to provide access to the jetty, the foreshore caravan park and camping area and the eastern residential area. Trees have been planted along all these routes and the embankments along the roads have been planted with shrubs, flowers and ground cover.</p> <p>The mouth of the Yattogolonga River, which is located near the junction of these three routes, is shallow and filled with reeds. The jetty and the quarry works dominate the western end of the beach.</p>
	Representative Buildings	<i>[Not identified]</i>

Ya2	<p>Randalsea Historic Area Statement (Ya2)</p> <p>The Historic Area Overlay identifies localities that comprise characteristics of an identifiable historic, economic and / or social theme of recognised importance. They can comprise land divisions, development patterns, built form characteristics and natural features that provide a legible connection to the historic development of a locality.</p> <p>These attributes have been identified in the below table. In some cases State and / or Local Heritage Places within the locality contribute to the attributes of an Historic Area.</p> <p>The preparation of an Historic Impact Statement can assist in determining potential additional attributes of an Historic Area where these are not stated in the below table.</p>	
	Eras, themes and context	<p>Established during the first phase of settlement (1836-1861). A sharp distinction is evident between the unformed groupings of buildings set within the township proper, and the bare hillsides surrounding the town.</p> <p>Randalsea comprises a small rural village founded in the 1836-1861 settlement period of SA around two industries- a steam mill and sawmilling. The historic significance of the village lies in the integrity, age and condition of the original buildings and landscape setting. The settlement's corner setting in Second Valley has been described as 'aesthetically one of the most pleasing heritage environments in South Australia'.</p>
	Allotments, subdivision and built form patterns	Historic division pattern is maintained around the intersection of Main South Road and Finniss Vale Drive. A range of allotments of various configurations and sizes east and west of Main South Road.
	Architectural styles, detailing and built form features	A compact group of small scale, single storey cottages and buildings with randomly aligned frontages to the original road (Gamlen Place), with Randall's cottage and Palm House a former boarding house located west at a distance from the group. The Institute building, school house, school, and Florence's Guest House are higher set on the southern side of Finniss Vale Road. Leonard's Mill, with ancillary buildings is a visually dominant building on the eastern side of Main South Road. The former Mill is State Heritage listed.
	Building height	Predominantly single storey heights, in small scale buildings. The State Heritage listed Leonard's Mill provides a dominant element on the south-eastern

Statement#	Statement
	side of Main South Road opposite Gamlen Place. Palm House presents a single storey appearance to Finnis Vale Drive but is two storey given the building is cut into the side of the slope that falls away from the road to the creek like north of the road.
Materials	Dominant materials include stone walling, timber fenestration and entrances, slate flooring and corrugated iron roofing. More recent materials include colorbond roofing, mini-orb iron sheeting, brick and rendered surfaces. Evidence of early gum slab construction noted in outbuilding.
Fencing	Minimal fencing retaining an open feel to the shared spatial arrangements of buildings and gardens. A section of existing stone walling on the southern side of the road intersection and some post and wire fencing maintains the informal and open spatial character of the village.
Setting, landscaping, streetscape and public realm features	Randalsea is nestled at the bottom of the Parananacooka River at its junction with a smaller tributary. A scattered collection of buildings are located along the valley floor, with trees and grazing land rising steeply behind to the ridge lines which form a contrasting rural backdrop. The public realm includes a creek side reserve and higher level park with walkway in the vicinity of a fenced War Memorial set higher than the Finnis Vale Road.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development is located and designed to avoid potential impacts on historic shipwrecks and historic relics.	DTS/DPF 1.1 Development involving impact to the surface or subsoil of land or sea/river floor is not located: (a) seaward of the mean high water mark or (b) within 15m landward of the banks of the River Murray.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that may involve impact to the surface or subsoil of land or the floor of a sea, lake or river.	Minister responsible for the administration of the <i>Historic Shipwrecks Act 1981</i> .	To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.	Development of a class to which Schedule 9 clause 3 item 5 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Planning and Design Code - 26 August - Version 2021-12
 Development that may involve impact to the surface or subsoil of land or sea floor, where located partly or fully within the 'adjacent area' of a historic shipwreck or historic relic within the meaning of the *Underwater Cultural Heritage Act 2018* (Commonwealth) as shown on the Historic Shipwrecks Overlay.

Commonwealth Minister responsible for the administration of the *Underwater Cultural Heritage Act 2018* (Commonwealth).

To provide expert assessment and direction to the relevant authority on the potential impacts of development on, or in proximity to, historic shipwrecks or relics protected under the relevant Act.

Development of a class to which Schedule 9 clause 3 item 6 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development of sensitive receivers in a manner that mitigates potential adverse environmental and amenity impacts generated by the lawful operation of neighbouring and proximate land uses.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Sensitive receivers are carefully sited and designed to mitigate adverse impacts of hazards, noise, dust, odour, light spill or other emissions from existing legally operating land uses through design techniques such as: <ul style="list-style-type: none"> (a) locating residential accommodation the greatest distance practicable from the source of the impacts (b) locating buildings containing non-sensitive receivers between the source of the impacts and sensitive receivers (c) placing rooms more sensitive to air, noise and odour impacts (e.g. bedrooms) further away from the source of the impacts (d) providing private or common open space adjacent a building elevation that shields the space from the source of the impacts. 	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

Key Outback and Rural Routes Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Safe and efficient movement of vehicle and freight traffic on Key Outback and Rural Routes.
DO 2	Provision of safe and efficient vehicular access to and from Key Outback and Rural Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
PO 1.1	DTS/DPF 1.1

Planning and Design Code - 26 August - Version 2021.12
 Access is designed to allow safe entry and exit to and from a site to meet the needs of development, and minimise traffic flow interference associated with access movements along adjacent State maintained roads.

Access points:

- (a) are designed to accommodate the largest vehicles expected to access the site in accordance with all of the following:
 - (i) the entry and exit movements:
 - A. are left turns only
 - or
 - B. will comprise no greater than 5 right turn vehicle entry movements per hour
 - (ii) access to and from the site is in a forward direction, with on-site manoeuvring available through circulation around the site requiring no more than a 3-point turn
 - (iii) vehicles can cross the property boundary at an angle between 70 and 90 degrees
 - (iv) access to and from the site can occur wholly within the kerbside lane of the road
- (b) where the access point services or is intended to service a single dwelling, have a width of no more than 4m and no less than 3m (measured at the site boundary)
- (c) where the access point services or is intended to service development other than a single dwelling:
 - (i) at least 6m (measured at the site boundary) where vehicles 12.5m or less in length are expected to access the site
 - (ii) at least 8m (measured at the site boundary) where vehicles over 12.5m in length are expected to access the site
- (d) are located 10m or more from any roadside infrastructure or trees.

Access - On-Site Queuing

PO 2.1
 Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues are contained fully within the boundaries of the development site to minimise interruption of the functional performance of the road and maintain safe vehicle movements.

DTS/DPF 2.1
 An access point in accordance with one of the following:

- (a) it is expected to service vehicles no greater than 12.5m in length and there are no internal intersections, car parking spaces, car park isles or any internal obstructions within 20m of the access point (measured from the site boundary into the site)
- (b) it is expected to service a single dwelling and there are no internal driveway intersections, car parking spaces or gates within 6m of the access point (measured from the site boundary into the site).

Access - Existing Access Points

PO 3.1
 Existing access points are designed to accommodate the type and volume of traffic likely to be generated by development.

DTS/DPF 3.1
 An existing access point satisfied (a) or (b):

- (a) it will not service, or is not intended to service, more than 6 dwellings
- (b) it will not service or is not intended to service:
 - (i) an increase in traffic that is greater than 150% of the traffic volumes using the existing access prior to the development or 60 vehicles per day (whichever is the lesser)
 - or
 - (ii) a larger class of vehicle expected to access the site using the existing access.

Access - Location (Spacing)

PO 4.1
 New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1
 A new access point satisfies (a) or (b):

- (a) it is not located on a section of road affected by double barrier lines between either edge of the access point
- (b) it is at least the following distance from a public road junction or railway, or terminating / merging lane or another access point:
 - (i) 110 km/h road - 325m
 - (ii) 100 km/h road - 280m
 - (iii) 90 km/h road - 240m
 - (iv) 80 km/h road - 200m
 - (v) 70 km/h road - 165m
 - (vi) 60 km/h road - 135m
 - (vii) 50km/h or less road - 105m.

Access - Location (Sight Lines)

PO 5.1
 Access points are located and designed to accommodate sight lines that enable drivers to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1
 Lines of sight to and from a new access point for drivers approaching and exiting the site of the development (measured at a height of 1.1m above the surface of the road) are unobstructed in accordance with the following distances:

- (a) 110 km/h road - 325m
- (b) 100 km/h road - 280m
- (c) 90 km/h road - 240m
- (d) 80 km/h road - 200m
- (e) 70 km/h road - 165m

- (f) 60 km/h road - 135m
- (g) 50km/h or less road - 105m.

Access - Mud and Debris

<p>PO 6.1</p> <p>Access points are constructed to minimise mud or other debris being carried or transferred onto roads to ensure safe road operating conditions.</p>	<p>DTS/DPF 6.1</p> <p>An access point satisfies (a), (b) or (c):</p> <ul style="list-style-type: none"> (a) it intersects with an unsealed length of a State Maintained Road (b) it will service a single dwelling (c) it is spray sealed from the edge of the seal on the State Maintained Road for a minimum of 10m or to the property boundary (whichever is closer).
--	---

Access - Stormwater

<p>PO 7.1</p> <p>Access points are designed to minimise negative impact on roadside drainage of water.</p>	<p>DTS/DPF 7.1</p> <p>Development does not:</p> <ul style="list-style-type: none"> (a) decrease the capacity of an existing drainage point (b) restrict or prevent the flow of stormwater to an existing drainage point and system.
--	---

Public Road Junctions

<p>PO 8.1</p> <p>New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road.</p>	<p>DTS/DPF 8.1</p> <p>Development does not comprise any of the following:</p> <ul style="list-style-type: none"> (a) creating a new junction with a public road (b) opening an unmade public road junction (c) modifying an existing public road junction.
---	---

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:</p> <ul style="list-style-type: none"> (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). 	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Key Railway Crossings Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Safe, efficient and uninterrupted operation of key railway crossings.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome

Deemed-to-Satisfy Criteria / Designated Performance Feature

Access, Design and Function

PO 1.1	DTS/DPF 1.1
--------	-------------

- (a) 110 km/h road - 190m
- (b) 100 km/h road - 165m
- (c) 90 km/h road - 140m
- (d) 80 km/h road - 110m
- (e) 70 km/h road - 90m
- (f) 60 km/h road - 70m
- (g) 50km/h or less road - 50m

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Limited Dwelling Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Establishment of additional dwellings in primary production areas is limited to avoid undermining primary production.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Development does not result in the establishment of an additional dwelling.	DTS/DPF 1.1 A new dwelling replaces an existing dwelling within the same allotment.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Limited Land Division Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	The long term use of land for primary production is maintained by minimising fragmentation through division of land.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Land division does not result in the creation of an additional allotment.	DTS/DPF 1.1 No additional allotments are created.
PO 1.2	DTS/DPF 1.2

Planning and Design Code - 26 August - Version 2021.12
 Land division involving boundary realignments occurs only where the number of resulting allotments with a site area less than that specified in the relevant Zone is not greater than the number that existed prior to the realignment.

None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Local Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development maintains the heritage and cultural values of Local Heritage Places through conservation, ongoing use and adaptive reuse.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3 Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the Local Heritage Place.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials and colours are either consistent with or complement the heritage values of the Local Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary or secondary street boundaries and the façade of a Local Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a Local Heritage Place retains features contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the subject building and are sited to be unobtrusive, not conceal or obstruct heritage elements and detailing, or dominate the Local Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of Local Heritage Places to support their retention in a manner that respects and references the original use of the Local Heritage Place.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the Local Heritage Place.	DTS/DPF 3.1 None are applicable.

PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line and does not dominate the Local Heritage Place or its setting.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed to complement the Local Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or its setting.	DTS/DPF 3.3 None are applicable.
PO 3.4 Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the Local Heritage Place.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the Local Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the Local Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues are retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 Local Heritage Places are not demolished, destroyed or removed in total or in part unless: (a) the portion of the Local Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural integrity or condition of the Local Heritage Place represents an unacceptable risk to public or private safety and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.
PO 6.2 The demolition, destruction or removal of a building, portion of a building or other feature or attribute is appropriate where it does not contribute to the heritage values of the Local Heritage Place.	DTS/DPF 6.2 None are applicable.
Conservation Works	
PO 7.1 Conservation works to the exterior of a Local Heritage Place (and other features identified in the extent of listing) match original materials to be repaired and utilise traditional work methods.	DTS/DPF 7.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Major Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Major Urban Transport Routes.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
<p>PO 1.1</p> <p>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State Maintained Roads.</p>	<p>DTS/DPF 1.1</p> <p>An access point satisfies (a), (b) or (c):</p> <ul style="list-style-type: none"> (a) where servicing a single (1) residential dwelling / residential allotment: <ul style="list-style-type: none"> (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) have a width of between 3m and 4m (measured at the site boundary). (b) where the development will result in 2 and up to 6 dwellings: <ul style="list-style-type: none"> (i) it will not result in more than one access point servicing the development site (ii) entry and exit movements are left turn only (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees; (v) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (vi) have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site). (c) where the development will result in over 7 dwellings, or is a non-residential land use: <ul style="list-style-type: none"> (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length of 6.4m or less (vi) have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m (vii) have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m (viii) provides for simultaneous two-way vehicle movements at the access: <ul style="list-style-type: none"> A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road and B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.
Access - On-Site Queuing	
<p>PO 2.1</p> <p>Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption of the functional performance of the road and maintain safe vehicle movements.</p>	<p>DTS/DPF 2.1</p> <p>An access point in accordance with one of the following:</p> <ul style="list-style-type: none"> (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram: <div data-bbox="646 1552 922 1809" style="text-align: center;"> </div> (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and: <ul style="list-style-type: none"> (i) is expected to be serviced by vehicles with a length no greater than 6.4m (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site). (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day and: <ul style="list-style-type: none"> (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) (iii) any termination of, or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the largest vehicle expected on site from the access (measured from the site boundary into the site)

shown in the following diagram:

Access – Location (Spacing) - Existing Access Points

PO 3.1
Existing access points designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1
An existing access point satisfies (a), (b) or (c):

- (a) it will not service, or is not intended to service, more than 6 dwellings
- (b) it is not located on a Controlled Access Road and will not service development that will result in a larger class of vehicle expected to access the site using the existing access
- (c) it is not located on a Controlled Access Road and development constitutes:
 - (i) change of use between an office less than 500m² gross leasable floor area and a consulting room less than 500m² gross leasable floor area or vice versa
 - (ii) change in use from a shop to an office, consulting room or personal or domestic services establishment
 - (iii) change of use from a consulting room or office less than 250m² gross leasable floor area to shop less than 250m² gross leasable floor area
 - (iv) change of use from a shop less than 500m² gross leasable floor area to a warehouse less than 500m² gross leasable floor area
 - (v) an office or consulting room with a gross leasable floor area less than 500m².

Access – Location (Spacing) – New Access Points

PO 4.1
New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1
A new access point satisfies (a), (b) or (c):

- (a) where a development site is intended to serve between 1 and 6 dwellings and has frontage to a local road (not being a Controlled Access Road) with a speed environment of 60km/h or less, the new access point is provided on the local road and located a minimum of 6.0m from the tangent point as shown in the following diagram:

The diagram shows a road with a curve. Tangent points (TP) are marked on the road. A 6m distance is indicated from each TP to the start of the curve. Prohibited locations are marked with 'X' and 'X1'. A 90-degree angle is shown between a road and a median opening. Distances of 6m are marked from the road to the prohibited locations. A note below the diagram states: 'TP = Tangent point'. A larger note explains: 'The points marked X1 and X are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension X1-X extends to Point X1.'

- (b) where the development site is intended to serve between 1 and 6 dwellings and access from a local road (being a road that is not a State Maintained Road) is not available, the new access:
 - (i) is not located on a Controlled Access Road
 - (ii) is not located on a section of road affected by double barrier lines
 - (iii) will be on a road with a speed environment of 70km/h or less
 - (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
 - (v) located minimum of 6m from a median opening or pedestrian crossing.
- (c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	40m	123m
70 km/h	55m	151m
80 km/h	70m	181m
90 km/h	90m	214m
100 km/h	110m	248m
110 km/h	135m	285m

Access - Location (Sight Lines)

Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

An access point satisfies (a) or (b):

- (a) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access Point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	40m	73m
50 km/h	55m	97m
60 km/h	73m	123m
70 km/h	92m	151m
80 km/h	114m	181m
90 km/h	139m	214m
100 km/h	165m	248m
110km/h	193m	285m

- (b) pedestrian sightlines in accordance with the following diagram:

Access - Mud and Debris

PO 6.1
Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1
Where the road has an unsealed shoulder and the road is not kerbed the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer)

Access - Stormwater

PO 7.1
Access points designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1
Development does not:
(a) decrease the capacity of an existing drainage point
(b) restrict or prevent the flow of stormwater to an existing drainage point and system.

Building on Road Reserve

PO 8.1
Buildings or structures that encroach onto, above or below road reserves designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1
No encroachment of buildings or structures onto, above or below the road reserve.

Public Road Junctions

PO 9.1
New junctions with public roads (including the opening of unmade public road junctions) or modifications to existing road junctions located and designed to ensure safe and efficient road operating conditions are maintained on the State Maintained Road.

DTS/DPF 9.1
Development does not comprise any of the following:
(a) creating a new junction with a public road
(b) opening an unmade public road junction
(c) modifying an existing public road junction.

Corner Cut-Offs

PO 10.1
Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to

DTS/DPF 10.1
Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road: <ul style="list-style-type: none"> (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). 	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Marine Parks (Managed Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Marine habitats and biodiversity are protected through limiting development to coastal infrastructure (jetties, marinas, pontoons), aquaculture, tourism, recreation and renewable energy facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development avoids or minimises harm to marine habitats, biodiversity or the functioning of ecosystems.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Marine Parks (Restricted Use) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	High value marine habitats and biological diversity are protected.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development is limited to that required to support the ongoing operation of ports and harbours.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Mount Lofty Ranges Water Supply Catchment (Area 1) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from primary reservoirs or diversion weir catchments from the Mount Lofty Ranges.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
PO 1.1 Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 1.2 Development does not involve any one or combination of the following: (a) aquaculture involving husbandry or supplementary feeding in a water flow through system (b) dairy except if a replacement dairy (c) organic waste processing facility (d) fuel depot (e) horticulture involving only market gardening or commercial turf growing (f) intensive animal husbandry (g) landfill (h) retail fuel outlet (i) special industry (j) stock sales yard (k) stock slaughter works (l) timber preservation works (m) waste recycling, storage or treatment facility (n) wrecking yard.
Wastewater	
PO 2.1 Development that generates trade or industrial wastewater is designed to ensure wastewater disposal avoids adverse water quality impacts on the quality of water draining into primary public water supply reservoirs and weirs.	DTS/DPF 2.1 Development that generates trade or industrial wastewater is connected to a: (a) sewer or community wastewater management system with sufficient hydraulic and treatment capacity to accept the inflow, or (b) wastewater holding tank which has storage capacity of more than four days total flow during peak operations and is contained within an impervious, bunded area with a total liquid holding capacity of more than 120 percent of the total holding tank capacity, prior to transporting for off-site disposal.
PO 2.2	DTS/DPF 2.2

Planning and Design Code - 26 August - Version 2021.12
 Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within primary reservoir and weir catchment areas.

Development, including alterations and additions, in combination with existing built form and activities within an allotment:

- (a) does not generate a combined total of more than 900 litres of wastewater per day, and
- (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards

or is otherwise connected to a sewerage or community wastewater management system.

PO 2.3
 Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.

DTS/DPF 2.3
 Development results in:

- (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards

or

- (a) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.

PO 2.4
 Surface and groundwater protected from wastewater discharge pollution.

DTS/DPF 2.4
 All components of an effluent disposal area are:

- (a) set back 50 metres or more from a watercourse
- (b) set back 100 metres or more from a public water supply reservoir
- (c) located on land with a slope no greater than 1-in-5 (20%)
- (d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table
- (e) above the 10% AEP flood level.

Stormwater

PO 3.1
 Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.

DTS/DPF 3.1
 None are applicable.

PO 3.2
 Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.

DTS/DPF 3.2
 None are applicable.

PO 3.3
 Polluted stormwater is treated prior to discharge from the site.

DTS/DPF 3.3
 None are applicable.

PO 3.4
 Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.

DTS/DPF 3.4
 Development includes:

- (a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings or
- (b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m².

PO 3.5
 Stormwater from dwelling additions captured to protect water quality.

DTS/DPF 3.5
 Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.

PO 3.6
 Stormwater from shops and tourist accommodation is managed to protect water quality.

DTS/DPF 3.6
 Shops and tourist accommodation satisfy all the following:

- (a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores
- (b) are located 100m or more from public water supply reservoirs and diversion weirs
- (c) are located on land with a slope not exceeding 20%
- (d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L
- (e) includes swales that divert clean stormwater away from areas where it could be polluted.

PO 3.7
 Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.

DTS/DPF 3.7
 Horse keeping and low intensity animal husbandry satisfy all the following:

- (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores
- (b) is located on land with a slope not exceeding 10%
- (c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L
- (d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.

PO 3.8
 Stormwater from horticulture is managed to protect water quality.

DTS/DPF 3.8
 Horticulture satisfies all the following :

	<ul style="list-style-type: none"> (a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) is located on land with a slope not exceeding 10% (d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.
<p>P0 3.9</p> <p>Stormwater from excavated and filled areas is managed to protect water quality.</p>	<p>DTS/DPF 3.9</p> <p>Excavation and/or filling satisfy all the following:</p> <ul style="list-style-type: none"> (a) is located 50m or more from watercourses (b) is located 100m or more from public water supply reservoirs and diversion weirs (c) does not involve excavation exceeding a vertical height of 0.75m (d) does not involve filling exceeding a vertical height of 0.75m (e) does not involve a total combined excavation and filling vertical height of 1.5m.
Landscapes and Natural Features	
<p>P0 4.1</p> <p>Development minimises the need to modify landscapes and natural features.</p>	<p>DTS/DPF 4.1</p> <p>None are applicable.</p>
Land Division	
<p>P0 5.1</p> <p>Land division does not result in an increased risk of pollution to surface or underground water.</p>	<p>DTS/DPF 5.1</p> <p>Land division does not create additional allotments and satisfies (a) and/or (b):</p> <ul style="list-style-type: none"> (a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures (b) is for realignment of allotment boundaries to improve management of the land for primary production and/or conservation of natural features.
<p>P0 5.2</p> <p>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.</p>	<p>DTS/DPF 5.2</p> <p>None are applicable.</p>

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Any of the following classes of development that are not connected (or not proposed to be connected) to a community wastewater management system or sewerage infrastructure:</p> <ul style="list-style-type: none"> (a) land division creating one or more additional allotments, either partly or wholly within the area of the overlay (b) function centre with more than 75 seats for customer dining purposes (c) restaurant with more than 40 seats for customer dining purposes (d) restaurant with more than 30 seats for customer dining purposes in association with a cellar door (e) dwelling where a habitable dwelling or tourist accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a dwelling or tourist accommodation on the same allotment) (f) tourist accommodation where a habitable dwelling or tourist accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation on the same allotment) (g) workers' accommodation where a habitable dwelling or tourist accommodation already exists on the same allotment (including where a valid planning authorisation exists to erect a habitable dwelling or tourist accommodation on the same allotment) (h) any other development that generates human wastewater from a peak loading capacity of more than 40 persons (or more than 6,000 litres/day). 	<p>Environment Protection Authority.</p>	<p>To provide expert technical assessment and direction to the relevant authority on whether a proposed development will have a neutral or beneficial impact on water quality.</p>	<p>Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>
<p>Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter (EPA Licence)</p>			
<p>Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period more than 2.5 ML of wastewater (EPA Licence required at more than 5ML)</p>			

Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding

Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units (EPA Licence required at 650 or more standard pig units)

Dairies - carrying on of a dairy with a total processing capacity exceeding 100 milking animals at any one time.

Mount Lofty Ranges Water Supply Catchment (Area 2) Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Safeguard Greater Adelaide's public water supply by ensuring development has a neutral or beneficial effect on the quality of water harvested from secondary reservoirs or diversion weir catchments from the Mount Lofty Ranges.
------	---

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Quality	
<p>PO 1.1</p> <p>Development results in a neutral or beneficial effect on the quality of water draining from the site to maintain and enhance the role of the catchment as a water supply.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Development does not include land uses that have the potential to cause adverse impacts on the quality of water draining into secondary public water supply reservoirs and weirs.</p>	<p>DTS/DPF 1.2</p> <p>Development does not involve any one or combination of the following:</p> <ul style="list-style-type: none"> (a) landfill (b) special industry.
Wastewater	
<p>PO 2.1</p> <p>Development that generates human wastewater, including alterations and additions, are established at an intensity and in a manner to minimise potential adverse impact on water quality within secondary reservoir and weir catchment areas.</p>	<p>DTS/DPF 2.1</p> <p>Development including alterations and additions, in combination with existing built form and activities within an allotment:</p> <ul style="list-style-type: none"> (a) do not generate a combined total of more than 1500 litres of wastewater per day and (b) will be connected to the same on-site wastewater system that is compliant with relevant South Australian standards <p>or is otherwise connected to a sewer or community wastewater management system.</p>
<p>PO 2.2</p> <p>Dairy development is of a scale and design that will avoid adverse water quality impacts.</p>	<p>DTS/DPF 2.2</p> <p>Dairy development satisfies all of the following:</p> <ul style="list-style-type: none"> (a) is located at least 100 metres from any watercourse, dam, bore or well (b) is connected to a wastewater management system that is located 200 metres from any watercourse, dam, bore or well and is designed and constructed to avoid leakage to groundwater or overflow under extreme rainfall conditions (c) treated wastewater irrigation areas: <ul style="list-style-type: none"> (i) have a slope of less than 1-in-5 (20 percent) (ii) are greater than 100 metres from any watercourse, dam, bore or well <p>are suitable to provide for seasonal wastewater irrigation without causing pollution of surface or groundwater.</p>
<p>PO 2.3</p> <p>Development that generates trade or industrial wastewater is of a scale and design to ensure wastewater is managed to avoid adverse water quality impacts is of a scale and design that will avoid adverse water quality impacts.</p>	<p>DTS/DPF 2.3</p> <p>Development that generates trade or industrial wastewater with a peak biological oxygen demand (BOD) of greater than 100 milligrams per litre satisfies the following:</p> <ul style="list-style-type: none"> (a) disposes of all wastewater to a sewerage or community wastewater management system,

	<p>or</p> <p>(b) operates at a scale that generates less than 5 million litres of wastewater per year, and</p> <p>(i) is located greater than 300 metres from a watercourse, dam, bore or well, except where a spill retention basin is constructed, in which case, the minimum setback to a watercourse, dam, bore or well is 50 metres, and</p> <p>(ii) a development that incorporates a spill retention basin(s) for the purpose of reducing the setback to a watercourse, dam, bore or well, has basins designed and located:</p> <p>A. to minimise the risk of spills entering a downgradient watercourse, dam, bore of well</p> <p>B. in close proximity to wine making, wine storage and wastewater treatment facilities</p> <p>C. to capture 120% of the maximum aggregate volume of liquid raw materials, product and untreated wastewater which can be contained or produced at any one time during the peak of operation</p> <p>D. to be impervious; and</p> <p>E. to minimise the interception of any natural or artificial stormwater flow.</p>
<p>PO 2.4</p> <p>Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.</p>	<p>DTS/DPF 2.4</p> <p>Development results in:</p> <p>(a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards</p> <p>or</p> <p>(b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards.</p>
<p>PO 2.5</p> <p>Surface and groundwater protected from wastewater discharge pollution.</p>	<p>DTS/DPF 2.5</p> <p>All components of an effluent disposal area are:</p> <p>(a) setback 50 metres or more from a watercourse</p> <p>(b) setback 100 metres or more from a public water supply reservoir</p> <p>(c) located on land with a slope no greater than 1-in-5 (20%)</p> <p>(d) located on land with 1.2m or more depth to bedrock or a seasonal or permanent water table</p> <p>(e) above the 10% AEP flood level.</p>
Stormwater	
<p>PO 3.1</p> <p>Post-development peak stormwater discharge quantities and rates do not exceed pre-development quantities and rates to maintain water quality leaving the site.</p>	<p>DTS/DPF 3.1</p> <p>None are applicable.</p>
<p>PO 3.2</p> <p>Stormwater run-off from areas not likely to be subject to pollution diverted away from areas that could cause pollution.</p>	<p>DTS/DPF 3.2</p> <p>None are applicable.</p>
<p>PO 3.3</p> <p>Polluted stormwater is treated prior to discharge from the site.</p>	<p>DTS/DPF 3.3</p> <p>None are applicable.</p>
<p>PO 3.4</p> <p>Stormwater from carports, verandahs, outbuildings and agricultural buildings captured to protect water quality.</p>	<p>DTS/DPF 3.4</p> <p>Development includes:</p> <p>(a) rainwater tanks with a minimum capacity of 1,000L connected to carports, verandahs and outbuildings</p> <p>or</p> <p>(b) rainwater tanks with a minimum capacity of 4,500L connected to agricultural buildings exceeding 100m².</p>
<p>PO 3.5</p> <p>Stormwater from dwelling additions captured to protect water quality.</p>	<p>DTS/DPF 3.5</p> <p>Dwelling additions are connected to a rainwater tank with a minimum capacity of 1,000L.</p>
<p>PO 3.6</p> <p>Stormwater from shops and tourist accommodation is managed to protect water quality.</p>	<p>DTS/DPF 3.6</p> <p>Shops and tourist accommodation satisfy all the following:</p> <p>(a) are located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</p> <p>(b) are located 100m or more from public water supply reservoirs and diversion weirs</p> <p>(c) are located on land with a slope not exceeding 20%</p> <p>(d) includes buildings connected to rainwater tanks with a minimum capacity of 1,000L</p> <p>(e) includes swales that divert clean stormwater away from areas where it could be polluted.</p>
<p>PO 3.7</p> <p>Stormwater from horse keeping and low intensity animal husbandry is managed to protect water quality.</p>	<p>DTS/DPF 3.7</p> <p>Horse keeping and low intensity animal husbandry satisfy all the following:</p> <p>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging</p>

	<p>bores</p> <p>(b) is located on land with a slope not exceeding 10%</p> <p>(c) includes stables, shelters or other roofed structures connected to rainwater tanks with a minimum capacity of 1,000L</p> <p>(d) includes swales that divert clean stormwater away from areas (including yards, manure storage areas, and watering points) within which it could be polluted.</p>
<p>PO 3.8</p> <p>Stormwater from horticulture is managed to protect water quality.</p>	<p>DTS/DPF 3.8</p> <p>Horticulture satisfies all the following:</p> <p>(a) is located 50m or more from watercourses, wetlands, land prone to waterlogging and bores</p> <p>(b) is located 100m or more from public water supply reservoirs and diversion weirs</p> <p>(c) is located on land with a slope not exceeding 10%</p> <p>(d) includes swales or other structures that divert clean stormwater away from areas (including plant growing areas, chemical storage areas and plant waste storage areas) within which it could be polluted.</p>
<p>PO 3.9</p> <p>Stormwater from excavated and filled areas is managed to protect water quality.</p>	<p>DTS/DPF 3.9</p> <p>Excavation and/or filling satisfy all the following:</p> <p>(a) is located 50m or more from watercourses</p> <p>(b) is located 100m or more from public water supply reservoirs and diversion weirs</p> <p>(c) does not involve excavation exceeding a vertical height of 0.75m</p> <p>(d) does not involve filling exceeding a vertical height of 0.75m</p> <p>(e) does not involve a total combined excavation and filling vertical height of 1.5m.</p>
Landscapes and Natural Features	
<p>PO 4.1</p> <p>Development minimises the need to modify landscapes and natural features.</p>	<p>DTS/DPF 4.1</p> <p>None are applicable.</p>
Land Division	
<p>PO 5.1</p> <p>Land division does not result in an increased risk of pollution to surface or underground water.</p>	<p>DTS/DPF 5.1</p> <p>Land division does not create additional allotments and satisfies (a) and/or (b):</p> <p>(a) is for realignment of allotment boundaries to correct an anomaly in the placement of those boundaries with respect to the location of existing buildings or structures or</p> <p>(b) is for realignment of allotment boundaries in order to improve management of the land for primary production and/or conservation of natural features.</p>
<p>PO 5.2</p> <p>Realignment of allotment boundaries does not create development potential for a dwelling and associated onsite wastewater management system where no such potential currently exists.</p>	<p>DTS/DPF 5.2</p> <p>None are applicable.</p>

Procedural Matters (PM)

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Non-Stop Corridors Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of non-stop corridors, where free-flowing traffic movement is prioritised.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Non-Stop Corridor Overlay	
PO 1.1 The safety, efficiency and functional performance of non-stop corridors is maintained.	DTS/DPF 1.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a Non-Stop Corridor Road or within 25 metres of an intersection with any such road:</p> <ul style="list-style-type: none"> (a) creation of a new access or junction (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority) (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority). 	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
<p>Except where all of the relevant deemed-to-satisfy criteria are met, an advertisement or advertising hoarding that is on a Non-Stop Corridor Road or is on land abutting a Non-Stop Corridor Road and:</p> <ul style="list-style-type: none"> (a) is within 100m of an on or off ramp to a Non-Stop Corridor Road as shown in the Non-Stop Corridors Overlay and (b) will: <ul style="list-style-type: none"> (i) be internally illuminated or (ii) incorporate a moving or changing display or message 	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

(iii) incorporate a flashing light.

Prescribed Surface Water Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Sustainable water use in prescribed surface water areas that maintains the health and natural flow paths of watercourses.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry <p>have a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.</p>	<p>DTS/DPF 1.2</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts surface water flowing over land.	Relevant authority under the <i>Landscape South Australia Act 2019</i> that would, if it were not for the operation of section 106(1)(e) of that Act, have the authority under that Act to grant or refuse a permit to undertake the subject development.	To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources in accordance with the provisions of the relevant water allocation plan or regional landscape plan or equivalent.	Development of a class to which Schedule 9 clause 3 item 12 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
<p>Any of the following classes of development that require or may require water to be taken over and above any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i></p> <ul style="list-style-type: none"> (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry. 	The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i> .	To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably and maintains the health and natural flow paths of water resources.	Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i> .			

Prescribed Watercourses Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Prescribed watercourses are protected by ensuring the taking of water from such watercourses is avoided or is undertaken in a sustainable manner that maintains the health and natural flow paths of the watercourses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry <p>has a lawful, sustainable and reliable water supply that does not place undue strain on prescribed watercourses.</p>	<p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.
<p>PO 1.2</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing in a prescribed watercourse is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment as well as downstream users.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>

<p>PO 1.1</p> <p>All development, but in particular involving any of the following:</p> <ul style="list-style-type: none"> (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed wells areas.</p>	<p>DTS/DPF 1.1</p> <p>Development satisfies either of the following:</p> <ul style="list-style-type: none"> (a) the applicant has a current water licence in which sufficient spare capacity exists to accommodate the water needs of the proposed use or (b) the proposal does not involve the taking of water for which a licence would be required under the <i>Landscape South Australia Act 2019</i>.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Any of the following classes of development that require or may require water to be taken in addition to any allocation that has already been granted under the <i>Landscape South Australia Act 2019</i>:</p> <ul style="list-style-type: none"> (a) horticulture (b) activities requiring irrigation (c) aquaculture (d) industry (e) intensive animal husbandry (f) commercial forestry. 	<p>The Chief Executive of the Department of the Minister responsible for the administration of the <i>Landscape South Australia Act 2019</i>.</p>	<p>To provide expert technical assessment and direction to the relevant authority on the taking of water to ensure development is undertaken sustainably.</p>	<p>Development of a class to which Schedule 9 clause 3 item 13 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>
<p>Commercial forestry that requires a forest water licence under Part 8 Division 6 of the <i>Landscape South Australia Act 2019</i>.</p>			

Ramsar Wetlands Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection and restoration of Ramsar wetlands.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
<p>PO 1.1</p> <p>Development provides for the restoration and/or sustainable management of wetlands habitat.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Development does not lead to significant negative impacts on Ramsar wetland habitat and its carbon capture and storage potential.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
<p>PO 1.3</p> <p>Development adjacent to Ramsar wetlands maintains or establishes landform and vegetated corridor links between Ramsar areas where possible.</p>	<p>DTS/DPF 1.3</p> <p>None are applicable.</p>
<p>PO 1.4</p> <p>Development is not detrimental to the hydrological regime of Ramsar wetlands taking into account the effects of climate change on rainfall and air temperature, including:</p> <ul style="list-style-type: none"> (a) a change in volume, timing, duration and frequency of ground and surface water flows to and within the wetland (b) a change in the level of salinity, pollutants, nutrients or water temperature. 	<p>DTS/DPF 1.4</p> <p>None are applicable.</p>

PO 1.5 Development is designed to minimise the cumulative impacts on Ramsar wetlands from jetties, vegetation clearance and dredging.	DTS/DPF 1.5 None are applicable.
PO 1.6 Development does not result in the disruption of the breeding, feeding, migration or resting behaviour of an ecologically significant proportion of the population of a migratory or resident species.	DTS/DPF 1.6 None are applicable.
Land Division	
PO 2.1 Land division supports the management or improvement of the natural environment and does not result in any additional allotments within a Ramsar wetland.	DTS/DPF 2.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Regulated and Significant Tree Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation of regulated and significant trees to provide aesthetic and environmental benefits and mitigate tree loss.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Tree Retention and Health	
PO 1.1 Regulated trees are retained where they: (a) make an important visual contribution to local character and amenity (b) are indigenous to the local area and listed under the <i>National Parks and Wildlife Act 1972</i> as a rare or endangered native species and / or (c) provide an important habitat for native fauna.	DTS/DPF 1.1 None are applicable.
PO 1.2 Significant trees are retained where they: (a) make an important contribution to the character or amenity of the local area (b) are indigenous to the local area and are listed under the <i>National Parks and Wildlife Act 1972</i> as a rare or endangered native species (c) represent an important habitat for native fauna (d) are part of a wildlife corridor of a remnant area of native vegetation (e) are important to the maintenance of biodiversity in the local environment and / or (f) form a notable visual element to the landscape of the local area.	DTS/DPF 1.2 None are applicable.
PO 1.3 A tree damaging activity not in connection with other development satisfies (a) and (b): (a) tree damaging activity is only undertaken to: (i) remove a diseased tree where its life expectancy is short (ii) mitigate an unacceptable risk to public or private safety due to limb drop or the like (iii) rectify or prevent extensive damage to a building of value as comprising any of the following: A. a Local Heritage Place B. a State Heritage Place C. a substantial building of value	DTS/DPF 1.3 None are applicable.

and there is no reasonable alternative to rectify or prevent such damage other than to undertake a tree damaging activity

<p>(iv) reduce an unacceptable hazard associated with a tree within 20m of an existing residential, tourist accommodation or other habitable building from bushfire</p> <p>(v) treat disease or otherwise in the general interests of the health of the tree and / or</p> <p>(vi) maintain the aesthetic appearance and structural integrity of the tree</p> <p>(b) in relation to a significant tree, tree-damaging activity is avoided unless all reasonable remedial treatments and measures have been determined to be ineffective.</p>

<p>PO 1.4</p> <p>A tree-damaging activity in connection with other development satisfies all the following:</p> <p>(a) it accommodates the reasonable development of land in accordance with the relevant zone or subzone where such development might not otherwise be possible</p> <p>(b) in the case of a significant tree, all reasonable development options and design solutions have been considered to prevent substantial tree-damaging activity occurring.</p>
--

<p>DTS/DPF 1.4</p> <p>None are applicable.</p>
--

Ground work affecting trees

<p>PO 2.1</p> <p>Regulated and significant trees, including their root systems, are not unduly compromised by excavation and / or filling of land, or the sealing of surfaces within the vicinity of the tree to support their retention and health.</p>
--

<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
--

Land Division

<p>PO 3.1</p> <p>Land division results in an allotment configuration that enables its subsequent development and the retention of regulated and significant trees as far as is reasonably practicable.</p>
--

<p>DTS/DPF 3.1</p> <p>Land division where:</p> <p>(a) there are no regulated or significant trees located within or adjacent to the plan of division or</p> <p>(b) the application demonstrates that an area exists to accommodate subsequent development of proposed allotments after an allowance has been made for a tree protection zone around any regulated tree within and adjacent to the plan of division.</p>

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Resource Extraction Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of current and future state significant resource extraction activities by ensuring development has regard to potential environmental and amenity impacts generated by the lawful operation of proximate mines and quarries.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Protection of Strategic Resources	
<p>PO 1.1</p> <p>Long-term availability of and ability to extract resources is maintained by ensuring development involving sensitive receivers is:</p> <p>(a) located away from areas which may be subject to unacceptable noise, dust or vibration emissions generated by current or future resource extraction activities or</p> <p>(b) able to adequately mitigate impacts of noise, dust or vibration emissions through design techniques such as:</p> <p>(i) locating residential accommodation the greatest distance practicable from</p>	<p>DTS/DPF 1.1</p> <p>Development does not incorporate:</p> <p>(a) a sensitive receiver or</p> <p>(b) alterations or additions to a sensitive receiver which increase the floor area of such buildings by 10% or more or</p> <p>(c) land division for the purposes of accommodating a sensitive receiver.</p>

<p>(ii) placing buildings containing non-sensitive receivers between the resource extraction activity and sensitive receivers</p> <p>(iii) placing rooms more sensitive to air, noise and vibration impacts (e.g. bedrooms) further away from the resource extraction activity</p> <p>(iv) providing private or common open space adjacent a building facade that shields the space from impacts of the resource extraction activity.</p>

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Where located within the area of the Resource Extraction Zone, all forms of development except:</p> <p>(a) where the development is deemed-to-satisfy or</p> <p>(b) where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral or</p> <p>(c) any of the following classes of development</p> <ul style="list-style-type: none"> (i) agricultural building (ii) land division for the purpose of a boundary realignment where no additional allotments are created (iii) farming (iv) fence (v) horse keeping (vi) horticulture (vii) mushroom production (viii) protective tree netting structure. 	Minister responsible for administering the Mining Acts.	To provide expert assessment and direction to the relevant authority on the potential for development to adversely impact upon the lawful continued operation of resource extraction operations.	Development of a class to which Schedule 9 clause 3 item 14 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
<p>Where located outside of the Resource Extraction Zone, the following forms of development (including land division creating additional allotments for such uses and alterations and additions which increase the floor area of buildings accommodating the following by 10% or more):</p> <ul style="list-style-type: none"> (a) dwelling (b) residential flat building (c) tourist accommodation (d) boarding home (e) dormitory style accommodation (f) workers' accommodation (g) student accommodation (h) pre-school (i) educational establishment (j) retirement facility (k) supported accommodation (l) residential park (m) hospital. 			

River Murray Flood Plain Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Conservation and protection of water quality and the riverine environment, provision for environmental water flows, the protection of life and property against flood risk, and recognition of the riverine environment as an important ecological, tourist and recreational resource.
DO 2	Development for the purpose of recreation (e.g. landings, jetties, houseboat moorings) water extraction, wetland management and irrigation management (e.g. channel, pumping stand, flood gate).

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
----------------------------	--

Wastewater										
<p>PO 1.1</p> <p>Wastewater management systems result in a neutral or beneficial effect on the quality of water draining from the site.</p>	<p>DTS/DPF 1.1</p> <p>Development results in:</p> <ul style="list-style-type: none"> (a) a building or land use that is currently connected to an existing on-site wastewater system that is non-compliant with relevant South Australian standards being connected to a new or upgraded system that complies with such standards or (b) an existing on-site wastewater system being decommissioned and wastewater being disposed of to a sewer or community wastewater management system that complies with relevant South Australian standards. 									
Dredging										
<p>PO 2.1</p> <p>Development is designed and sited in a manner that limits the need for dredging.</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>									
Land Division										
<p>PO 3.1</p> <p>Land division does not lead to intensification of development.</p>	<p>DTS/DPF 3.1</p> <p>Land division is:</p> <ul style="list-style-type: none"> (a) limited to the creation of a public road or a public reserve or (b) for adjustment of allotment boundaries to remove an anomaly in the current boundaries with respect to the location of existing buildings or structures and does not result in an additional allotment. 									
<p>PO 3.2</p> <p>Boundary realignment for residential purposes preserves the integrity of public waterfront reserves.</p>	<p>DTS/DPF 3.2</p> <p>Boundary realignment for residential purposes:</p> <ul style="list-style-type: none"> (a) locates any new roads on the landward side of an existing dwelling (rather than between an existing dwelling and the public waterfront reserve) (b) provides a reserve 50m or more in width above pool level along the water frontage. 									
Built Form and Character										
<p>PO 4.1</p> <p>Buildings and structures are sited and designed to be unobtrusive when viewed from the River Murray and nearby public roads.</p>	<p>DTS/DPF 4.1</p> <p>Buildings / structures:</p> <ul style="list-style-type: none"> (a) do not exceed one building level in height (excluding elevation to minimise the potential for personal or property damage as a result of a flood) (b) have no floor level elevated 2.5m or more above ground level (c) are not closer than 50m to the waterfront (d) have associated electricity and telecommunications lines installed underground (e) in relation to outbuildings and agricultural buildings clad in sheet metal - are pre-colour treated or painted in a non-reflective colour. 									
<p>PO 4.2</p> <p>Outbuildings designed and sited to minimise their visibility from the waterfront and do not dominate the appearance of public places.</p>	<p>DTS/DPF 4.2</p> <p>None are applicable.</p>									
<p>PO 4.3</p> <p>Development setback from canals to establish a consistent character along a river front.</p>	<p>DTS/DPF 4.3</p> <p>None are applicable.</p>									
<p>PO 4.4</p> <p>Limited use of retaining walls in the 1956 River Murray Flood Plain and in highly visible locations that can be viewed from public roads or the main channel of the River Murray to maintain the natural amenity and character along the river.</p>	<p>DTS/DPF 4.4</p> <p>A retaining wall for one or more of the following purposes:</p> <ul style="list-style-type: none"> (a) for the repair or replacement of a lawful retaining wall (b) to provide safe public access to the waterfront on public land (c) to protect structures and buildings of historic significance (d) to protect waterfront vegetation (e) is ancillary to a dwelling and will provide safe access to the waterfront from that dwelling (f) to protect a dwelling from material risk presented by erosion. 									
Flood Resilience

<p>PO 5.5</p> <p>Fencing does not impede floodwaters and fluctuating pool levels.</p>	<p>DTS/DPF 5.5</p> <p>Fencing is of an open design such as post and wire strand construction.</p>
Environmental Protection	
<p>PO 6.1</p> <p>Adverse impacts on the natural features and stability of the waterfront are minimised.</p>	<p>DTS/DPF 6.1</p> <p>None are applicable.</p>
<p>PO 6.2</p> <p>Development incorporates buffer areas to protect the river and associated natural features such as wetlands and native vegetation.</p>	<p>DTS/DPF 6.2</p> <p>None are applicable.</p>
<p>PO 6.3</p> <p>Modification to the natural landform, including land reclamation, is avoided or minimised to prevent impacts on natural features, natural flow paths, floodwaters and the stability of the waterfront.</p>	<p>DTS/DPF 6.3</p> <p>None are applicable.</p>
<p>PO 6.4</p> <p>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are sited and designed to prevent environmental harm.</p>	<p>DTS/DPF 6.4</p> <p>Fuel storage facilities and areas, including areas for the storage of mobile fuel trailers, are located:</p> <ul style="list-style-type: none"> (a) outside the 1956 River Murray Flood Plain (b) wholly within a bund that has storage capacity of 133% or more of the volume of the largest fuel storage tank.
<p>PO 6.5</p> <p>Facilities for the collection of effluent from moored vessels are sited and designed to prevent environmental harm.</p>	<p>DTS/DPF 6.5</p> <p>None are applicable.</p>
Access	
<p>PO 7.1</p> <p>Waterfront reserve areas between buildings and the water are maximised to preserve the amenity of view corridors along the riverine environment.</p>	<p>DTS/DPF 7.1</p> <p>None are applicable.</p>
<p>PO 7.2</p> <p>Public access routes to waterfront reserves are provided and maintained.</p>	<p>DTS/DPF 7.2</p> <p>None are applicable.</p>
<p>PO 7.3</p> <p>Driveways, access tracks and parking areas are designed and constructed to minimise excavation and filling.</p>	<p>DTS/DPF 7.3</p> <p>No more than 100mm excavation and 100mm of fill is required in association with the construction of a driveway, access track or parking area.</p>
River Structures	
<p>PO 8.1</p> <p>River structures are located where they do not cause a hazard to safe navigation.</p>	<p>DTS/DPF 8.1</p> <p>River structures are located:</p> <ul style="list-style-type: none"> (a) wholly outside navigation channels as defined by navigational signs (b) 100m or more from either side of a ferry crossing (c) 150m or more from a lock.
<p>PO 8.2</p> <p>River structures are located where they do not cause a hazard to a designated recreation area for water skiing and swimming.</p>	<p>DTS/DPF 8.2</p> <p>River structures are located wholly outside designated recreation areas for water skiing and swimming.</p>
<p>PO 8.3</p> <p>Proliferation of water pumps is avoided to limit impact on the riverine environment.</p>	<p>DTS/DPF 8.3</p> <p>None are applicable.</p>
<p>PO 8.4</p> <p>Water pumping infrastructure is designed and constructed to limit impact on the riverine environment.</p>	<p>DTS/DPF 8.4</p> <p>Water pumping infrastructure is designed and constructed in accordance with Figure 1.</p>
<p>PO 8.5</p>	<p>DTS/DPF 8.5</p>

Proliferation of jetties and floating pontoons is avoided to minimise impact on the riverine environment.

Jetties and floating pontoons are:

- (a) ancillary to a dwelling
- (b) limited to one jetty or floating pontoon per dwelling
- (c) located on the same allotment as the associated dwelling or
- (d) are separated from the allotment (or lease site) accommodating the associated dwelling by a public reserve or a public road (but not both) or
- (e) are for the repair, maintenance or replacement of an existing licensed river structure.

PO 8.6
Jetties and floating pontoons are designed and constructed to limit impact on the riverine environment.

DTS/DPF 8.6

Jetties and floating pontoons:

- (a) extend not more than 8m into the river measured from the riverbank at normal pool level
- (b) have a width of not more than 1.4m in the case of a jetty (or gangway width in the case of a floating pontoon)
- (c) in the case of floating pontoons, do not exceed the dimensions 3m by 6m
- (d) maintain a minimum of 3m between river structures including other jetties and pontoons.

PO 8.7
A proliferation of boat ramps is avoided to minimise impact on the riverine environment.

DTS/DPF 8.7

The repair, maintenance or replacement of an existing licensed boat ramp.

PO 8.8
On-river mooring facilities are developed only where:

- (a) the mooring facility will not result in a mooring capacity exceeding one vessel per allotment
- (b) where the allotment has a direct frontage to the river (or is only separated by a public road or public reserve, but not both) and the allotment contains an existing dwelling
- (c) the width of the river is greater than 100m at normal pool level.

DTS/DPF 8.8

None are applicable.

PO 8.9
Mooring for vessels are located to avoid interfering with the operation or function of a ferry crossing, lock or major pumping station.

DTS/DPF 8.9

Mooring for vessels not located within:

- (a) 100m of either side of a ferry crossing
- (b) 150m of a lock
- (c) 400m of a major pumping station.

PO 8.10
Development of structures designed for the mooring of more than one vessel are located off-channel in a marina.

DTS/DPF 8.10

None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral:</p> <ul style="list-style-type: none"> (a) development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) horticulture (c) activities requiring irrigation, other than irrigation used for domestic purposes (d) aquaculture (e) industry (f) intensive animal husbandry (g) horse keeping (h) commercial forestry (i) development that is within the ambit of clause 7 of Schedule 3 of the <i>Planning, Development and Infrastructure (General) Regulations 2017</i> (j) the construction of a building, or the undertaking of an act or activity specified in clause 3 of Schedule 3 of the <i>Planning, Development and Infrastructure (General) Regulations 2017</i>, other than where the development:- <ul style="list-style-type: none"> (i) is the construction of a fence not exceeding 2m in height or (ii) is the construction of a carport, verandah, balcony, porch or other similar structure or (iii) is the construction of an agricultural building, enclosed shed, garage or similar outbuilding- <ul style="list-style-type: none"> A. that is ancillary to an existing building 	<p>Minister responsible for administration of the <i>River Murray Act 2003</i>.</p>	<p>To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality, and cultural heritage.</p>	<p>Development of a class to which Schedule 9 clause 3 item 15 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

<p>Planning and Design Code - 26 August - Version 2021.12</p> <p>B. that will not have a total floor area of more than 100m²</p> <p>C. that is located outside the 1956 River Murray Flood Plain or will have on opposite sides either removable panels or at least 2 doors so as not to impede flood waters</p> <p>D. that will not be located closer to the River Murray than an existing dwelling</p> <p>or</p> <p>(iv) comprises an alteration or extension of an existing dwelling that in the opinion of the relevant authority is minor and where any extension of the dwelling will not result in a part of the dwelling being closer to the River Murray</p> <p>or</p> <p>(v) is the construction of an aboveground or inflatable swimming pool, or a spa pool, or an in-ground swimming pool located outside the 1956 River Murray Flood Plain</p> <p>(k) land division classified as restricted by the Planning and Design Code</p> <p>(l) land division that results in:</p> <p>(i) 4 or more additional allotments</p> <p>(ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment)</p> <p>or</p> <p>(iii) a mix of 4 or more additional allotments and separate grants of occupancy</p> <p>(m) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system</p> <p>(n) alteration of the boundaries of an allotment so as to result in:</p> <p>(i) the allotment having a frontage to a part of the River Murray system</p> <p>or</p> <p>(ii) the allotment having an increase in its frontage to a part of the River Murray system.</p>			
---	--	--	--

<p>Development that generates human wastewater from a peak loading capacity of more than 40 persons or more than 6000 litres/day and is not connected to a community wastewater management system or sewerage infrastructure.</p> <p>Any pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for 5 or more vessels at any 1 time</p> <p>Vessel refuelling facility</p> <p>Vessel sewage pump-out facility.</p> <p>Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period more than 200 tonnes of organic waste or matter. (EPA Licence)</p> <p>Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater.</p> <p>(EPA Licence required at more than 5 ML)</p> <p>Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p> <p>Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)</p> <p>Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.</p>	<p>Environment Protection Authority</p>	<p>To provide expert assessment and direction to the relevant authority on potential impacts to water quality in the River Murray system from pollutants discharged into any waters or onto land in a place that is reasonably likely to impact the quality of drinking water.</p>	<p>Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Sustainable water use and conservation of riverine environments within the River Murray Tributaries area.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
<p>PO 1.1</p> <p>Development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert surface water flowing over land is undertaken in a manner that maintains the quality and quantity of flows required to meet the needs of the environment and downstream users.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>All development, but in particular development involving any of the following:</p> <ul style="list-style-type: none"> (a) activities requiring irrigation (b) aquaculture (c) commercial forestry (d) horticulture (e) industry (f) intensive animal husbandry <p>has a lawful, sustainable and reliable water supply that does not place undue strain on water resources in prescribed surface water areas.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
Land Division	
<p>PO 2.1</p> <p>Land division does not lead to the intensification of development to a level that would have a negative impact on the health or natural flow paths of the River Murray Tributaries.</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
<p>PO 2.2</p> <p>Land division, including boundary realignment, preserves the integrity of the public waterfront of the River Murray system by limiting the number of allotments having a frontage (or extent of frontage) to that system.</p>	<p>DTS/DPF 2.2</p> <p>Land division does not result in any of the following:</p> <ul style="list-style-type: none"> (a) an increase in allotments having a frontage to a part of the River Murray system (b) an increase in the frontage of an allotment or allotments to a part of the River Murray system.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Any of the following classes of development, except where the development is, in the opinion of the relevant authority, minor in nature and would not warrant a referral when considering the purpose of the referral:</p> <ul style="list-style-type: none"> (a) development that comprises the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water flowing in a watercourse or surface water flowing over land (b) horticulture (c) activities requiring irrigation, other than irrigation used for domestic purposes (d) aquaculture (e) intensive animal husbandry (f) horse keeping (g) commercial forestry (h) land division classified as <i>restricted</i> by the Planning and Design Code (i) land division that results in: <ul style="list-style-type: none"> (i) 4 or more additional allotments or (ii) 4 or more additional grants of occupancy (by the conferral or exercise of a right to occupy part only of an allotment) or 	<p>Minister responsible for the administration of the <i>River Murray Act 2003</i>.</p>	<p>To provide expert assessment and direction to the relevant authority on potential impacts from development on the health of the River Murray system, its natural flow regime (including floodwaters), water quality and cultural heritage.</p>	<p>Development of a class to which Schedule 9 clause 3 item 16 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.</p>

Planning and Design Code - 26 August - Version 2021.12
(iii) a mix of 4 or more additional allotments and separate grants of occupancy

- (j) land division that involves the creation of a new allotment or grant of occupancy where any part of the boundary of the new allotment or occupancy will have a frontage to a part of the River Murray system
- (k) alteration of the boundaries of an existing allotment so as to result in:
 - (i) the allotment having a frontage to a part of the River Murray system or
 - (ii) the allotment having an increase in its frontage to a part of the River Murray system.

Scenic Quality Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development complements natural and rural character, and areas of scenic value.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Land uses that complement and enhance the natural and rural character.	DTS/DPF 1.1 None are applicable.
Built Form and Character	
PO 2.1 Development is carefully sited and designed to: <ul style="list-style-type: none"> (a) complement rural or natural character (b) minimise disruption to natural landform (c) integrate existing natural environmental features (d) minimise impacts on scenic features (e) be low-scale (f) be visually unobtrusive and blend in with the surrounding area 	DTS/DPF 2.1 None are applicable.
Landscaping	
PO 3.1 Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.	DTS/DPF 3.1 Landscaping plantings exclusively constitute locally indigenous plant species.
Earthworks	
PO 4.1 Excavation and filling of land is limited to that required to reduce the visual prominence of buildings and make provision for water storage facilities to maintain natural landforms and landscapes.	DTS/DPF 4.1 Excavation and/or filling is associated with a building or water storage facility and satisfies all of the following: <ul style="list-style-type: none"> (a) does not involve excavation exceeding a vertical height of 750mm (b) does not involve filling exceeding a vertical height of 750mm (c) does not involve a total combined excavation and filling vertical height of 1.5m (d) any scree slope is covered in topsoil and landscaped.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Interface Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	The prevention of the establishment of new, and intensification of sensitive receivers to mitigate community exposure to potential adverse hazards and environmental and amenity impacts generated by the lawful operation of proximate significant activities.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
<p>PO 1.1</p> <p>Intensification of sensitive uses and / or sensitive receivers is not undertaken to avoid increasing resident or community exposure to potential adverse hazards or emissions unless:</p> <p>(a) each source of adverse hazard or emission has ceased operation</p> <p style="text-align: center;">or</p> <p>(b) it can be demonstrated that the site of the proposed development is not unreasonably impacted by the hazard or emissions from a relevant source, including as a result of environmental or operational improvements that have been or will be made to reduce the hazard or emissions from each source to an acceptable level.</p>	<p>DTS/DPF 1.1</p> <p>Development does not comprise a sensitive use and / or sensitive receiver unless:</p> <p>(a) it is a replacement dwelling where the total floor area is no greater than the existing or previous dwelling</p> <p>(b) each source of hazard and /or emissions has ceased to operate or has been superseded by another use such that it cannot be revived.</p>
<p>PO 1.2</p> <p>Alterations and additions to sensitive receivers support ongoing activity without leading to an increase in resident or community exposure to unacceptable levels of hazard, noise, dust, odour or other emissions.</p>	<p>DTS/DPF 1.2</p> <p>Alterations and additions where:</p> <p>(a) associated with a dwelling, do not increase the total floor area by more than 10% taking into account any previous alteration or addition</p> <p>(b) associated with any other sensitive receivers, do not increase the on-site capacity of the service or facility.</p>

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Significant Landscape Protection Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Conservation of the natural and rural character and scenic and cultural qualities of significant landscapes.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
<p>PO 1.1</p> <p>Land use intensity is restrained to conserve and enhance natural and rural character.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Development inconsistent with conserving significant natural and rural landscapes is not undertaken.</p>	<p>DTS/DPF 1.2</p> <p>Development does not include any of the following (or any combination of any of the following):</p> <p>(a) renewable energy facility (other than roof mounted solar photovoltaic panels)</p> <p>(b) large-scale industry, storage, distribution, warehousing</p> <p>(c) intensive animal husbandry.</p>
Built Form and Character	
<p>PO 2.1</p> <p>Development is carefully sited and designed to:</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>

Planning and Design Code - 26 August - Version 2021.12

- (a) complement rural or natural character
- (b) minimise disruption to natural landform
- (c) integrate existing natural environmental features, including native vegetation
- (d) minimise impacts on wildlife habitat
- (e) be low-scale
- (f) be visually unobtrusive and blend in with the surrounding area
- (g) be located below ridge lines.

PO 2.2

Buildings and structures are limited to those that:

- (a) are ancillary, adjacent to, and of the same or lesser scale as existing buildings
- (b) support desired outcomes of the relevant zone or subzone
- (c) are used for the ancillary sale of produce associated with a pastoral or rural activity
- (d) are in the form of high-quality, nature-based tourist accommodation
- (e) are for rainwater storage
- (f) are for research or education purposes
- (g) support conservation or the interpretation of the environment or cultural features.

DTS/DPF 2.2

None are applicable.

Landscaping

PO 3.1

Landscaping comprises locally indigenous species to enhance landscape quality and habitat restoration.

DTS/DPF 3.1

Landscaping plantings exclusively constitute locally indigenous plant species.

Earthworks

PO 4.1

Excavation and filling of land is limited to that associated with:

- (a) minimising the visual impact of buildings
- (b) construction of water storage facilities.

DTS/DPF 4.1

Excavation and/or filling meets the following:

- (a) it is in connection with a building or water storage facility
- (b) does not involve excavation exceeding a vertical height of 0.75m
- (c) does not involve filling exceeding a vertical height of 0.75m
- (d) does not involve a total combined excavation and filling vertical height of 1.5m
- (e) any scree slope is covered in topsoil and landscaped with locally indigenous plant species.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

State Heritage Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development maintains the heritage and cultural values of State Heritage Areas through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993.
Note	Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the Heritage Places Act 1993 can be found here

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures that are visible from the public realm are consistent with the heritage values and characteristics of the State Heritage Area.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is consistent with the prevailing building and ceiling heights in the State Heritage Area.	DTS/DPF 1.2 None are applicable.

<p>PO 1.3 Design and architectural detailing of street facing buildings is consistent with the prevailing characteristics expressed in the State Heritage Area.</p>	<p>DTS/DPF 1.3 None are applicable.</p>
<p>PO 1.4 Development is consistent with the prevailing front and side boundary setback pattern in the State Heritage Area.</p>	<p>DTS/DPF 1.4 None are applicable.</p>
<p>PO 1.5 Materials are consistent with or complement those within the State Heritage Area.</p>	<p>DTS/DPF 1.5 None are applicable.</p>
<p>Alterations and Additions</p>	
<p>PO 2.1 Alterations and additions complement the subject building and are sited to ensure they do not dominate the primary façade or streetscape and employ a contextual design approach.</p>	<p>DTS/DPF 2.1 None are applicable.</p>
<p>PO 2.2 Adaptive reuse and revitalisation of heritage buildings and places to support their retention in a manner that respects and references the heritage values of the State Heritage Area.</p>	<p>DTS/DPF 2.2 None are applicable.</p>
<p>Ancillary Development</p>	
<p>PO 3.1 Ancillary development, including carports, outbuildings and garages, complements the heritage values of the State Heritage Area.</p>	<p>DTS/DPF 3.1 None are applicable.</p>
<p>PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the principal building(s).</p>	<p>DTS/DPF 3.2 None are applicable.</p>
<p>PO 3.3 Advertising and advertising hoardings are designed to complement the State Heritage Area, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting of the State Heritage Area.</p>	<p>DTS/DPF 3.3 None are applicable</p>
<p>PO 3.4 Fencing and gates are consistent with the heritage values of the State Heritage Area.</p>	<p>DTS/DPF 3.4 None are applicable.</p>
<p>Land Division</p>	
<p>PO 4.1 Land division creates allotments that:</p> <ul style="list-style-type: none"> (a) are compatible with the surrounding pattern of subdivision of the State Heritage Area (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Area. 	<p>DTS/DPF 4.1 None are applicable.</p>
<p>Landscape Context and Streetscape Amenity</p>	
<p>PO 5.1 Street trees, kerbing, footpaths and other features that contribute to the historic value of the State Heritage Area are maintained unless:</p> <ul style="list-style-type: none"> (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short. 	<p>DTS/DPF 5.1 None are applicable.</p>
<p>Demolition</p>	
<p>PO 6.1 Buildings and other features of identified heritage value within a State Heritage Area are not demolished, destroyed or removed in total or in part unless:</p> <ul style="list-style-type: none"> (a) the portion of any building or other feature is determined to not contribute to the heritage value of the State Heritage Area or (b) the structural condition of the building represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair. 	<p>DTS/DPF 6.1 None are applicable.</p>
<p>Conservation Works</p>	
<p>PO 7.1 Conservation works to the exterior of buildings and other features of identified heritage value match original materials to be repaired and utilise traditional work methods.</p>	<p>DTS/DPF 7.1 Conservation works involving:</p> <ul style="list-style-type: none"> (a) replacement of roof materials, guttering or downpipes with the same or substantially the same materials and detailing (b) replacement of timber building elements (structural or decorative) with the same or substantially the same material, dimension and detailing; or brick and stone repair/ repointing to match original.

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where:</p> <ul style="list-style-type: none"> (a) the development is to be undertaken in accordance with a Heritage Agreement under the Heritage Places Act 1993 or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral <p>any of the following classes of development:</p> <ul style="list-style-type: none"> (a) demolition of external building fabric and other features of identified heritage value within the State Heritage Area (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare within the State Heritage Area (c) alterations or additions to buildings and other features of identified heritage value that: <ul style="list-style-type: none"> (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area or (iii) involve substantive physical impact to the fabric of significant buildings (d) new buildings that: <ul style="list-style-type: none"> (i) are visible from a public street, road or thoroughfare within the State Heritage Area or (ii) are visually dominant within the State Heritage Area (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare within the State Heritage Area (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare within the State Heritage Area (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance within the State Heritage Area. 	Minister responsible for the administration of the <i>Heritage Places Act 1993</i> .	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Areas.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Heritage Place Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the <i>Heritage Places Act 1993</i> .

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Built Form	
PO 1.1 The form of new buildings and structures maintains the heritage values of the State Heritage Place.	DTS/DPF 1.1 None are applicable.
PO 1.2 Massing, scale and siting of development maintains the heritage values of the State Heritage Place.	DTS/DPF 1.2 None are applicable.
PO 1.3	DTS/DPF 1.3

Design and architectural detailing (including but not limited to roof pitch and form, openings, chimneys and verandahs) maintains the heritage values of the State Heritage Place.	None are applicable.
PO 1.4 Development is consistent with boundary setbacks and setting.	DTS/DPF 1.4 None are applicable.
PO 1.5 Materials and colours are either consistent with or complement the heritage values of the State Heritage Place.	DTS/DPF 1.5 None are applicable.
PO 1.6 New buildings and structures are not placed or erected between the primary and secondary street boundaries and the façade of a State Heritage Place.	DTS/DPF 1.6 None are applicable.
PO 1.7 Development of a State Heritage Place retains elements contributing to its heritage value.	DTS/DPF 1.7 None are applicable.
Alterations and Additions	
PO 2.1 Alterations and additions complement the State Heritage Place and are sited to be unobtrusive, not conceal or obstruct heritage features and detailing, or dominate the State Heritage Place or its setting.	DTS/DPF 2.1 None are applicable.
PO 2.2 Adaptive reuse and revitalisation of State Heritage Places to support their retention in a manner that respects and references the original use of the State Heritage Place.	DTS/DPF 2.2 None are applicable.
Ancillary Development	
PO 3.1 Ancillary development, including carports, outbuildings and garages, complement the heritage values of the State Heritage Place.	DTS/DPF 3.1 None are applicable.
PO 3.2 Ancillary development, including carports, outbuildings and garages, is located behind the building line of the State Heritage Place.	DTS/DPF 3.2 None are applicable.
PO 3.3 Advertising and advertising hoardings are designed and located to complement the State Heritage Place, be unobtrusive, be below the parapet line, not conceal or obstruct heritage elements and detailing, or dominate the building or the setting.	DTS/DPF 3.3 None are applicable.
PO 3.4 Fencing and gates closer to a street boundary (other than a laneway) than the street elevation of the associated building are consistent with the traditional period, style and form of the State Heritage Place.	DTS/DPF 3.4 None are applicable.
Land Division	
PO 4.1 Land division creates allotments that: (a) maintain the heritage values of the State Heritage Place, including setting (b) are of a dimension to accommodate new development that reinforces and is compatible with the heritage values of the State Heritage Place.	DTS/DPF 4.1 None are applicable.
Landscape Context and Streetscape Amenity	
PO 5.1 Individually heritage listed trees, parks, historic gardens and memorial avenues retained unless: (a) trees / plantings are, or have the potential to be, a danger to life or property or (b) trees / plantings are significantly diseased and their life expectancy is short.	DTS/DPF 5.1 None are applicable.
Demolition	
PO 6.1 State Heritage Places are not demolished, destroyed or removed in total or in part unless either of the following apply: (a) the portion of the State Heritage Place to be demolished, destroyed or removed is excluded from the extent of listing that is of heritage value or (b) the structural condition of the State Heritage Place represents an unacceptable risk to public or private safety and results from actions and unforeseen events beyond the control of the owner and is irredeemably beyond repair.	DTS/DPF 6.1 None are applicable.
Conservation Works	
PO 7.1 Conservation works to the exterior and interior of a State Heritage Place and other features of	DTS/DPF 7.1 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where:</p> <ul style="list-style-type: none"> (a) the development is to be undertaken in accordance with a Heritage Agreement under the <i>Heritage Places Act 1993</i> or (b) the development is, in the opinion of the relevant authority, minor in nature or like for like maintenance and would not warrant a referral when considering the purpose of the referral <p>any of the following classes of development:</p> <ul style="list-style-type: none"> (a) demolition of internal or external significant building fabric (b) freestanding advertisements, signs and associated structures that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (c) alterations or additions to buildings that: <ul style="list-style-type: none"> (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of a State Heritage Place or (iii) involve substantive physical impact to the fabric of significant buildings; (d) new buildings that: <ul style="list-style-type: none"> (i) are visible from a public street, road or thoroughfare that abuts the State Heritage Place or (ii) may materially affect the context of the State Heritage Place (e) conservation repair works that are not representative of 'like for like' maintenance (f) solar panels that are visible from a public street, road or thoroughfare that abuts the State Heritage Place (g) land division (h) the removal, alteration or installation of fencing where visible from a public street, road or thoroughfare that abuts the State Heritage Place (i) the removal of an individual tree or a tree within a garden or park of identified heritage significance. 	Minister responsible for the administration of the <i>Heritage Places Act 1993</i> .	To provide expert assessment and direction to the relevant authority on the potential impacts of development on State Heritage Places.	Development of a class to which Schedule 9 clause 3 item 17 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

State Significant Native Vegetation Areas Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protect, retain and restore significant areas of native vegetation.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Environmental Protection	
PO 1.1 Development enhances biodiversity and habitat values through revegetation and avoiding native vegetation clearance except to promote an appreciation and awareness of wildlife areas, including visitor parking and amenities, or for the administration and management of a reserve or park established for the protection and conservation of wildlife.	DTS/DPF 1.1 An application is accompanied by either (a) or (b): <ul style="list-style-type: none"> (a) a declaration stating that the proposal will not, or would not, involve clearance of native vegetation under the <i>Native Vegetation Act 1991</i>, including any clearance that may occur: <ul style="list-style-type: none"> (i) in connection with a relevant access point and / or driveway (ii) within 10m of a building (other than a residential building or tourist accommodation) (iii) within 20m of a dwelling or addition to an existing dwelling for fire prevention and control

(iv) within 50m of residential or tourist accommodation in connection with a requirement under a relevant overlay to establish an asset protection zone in a bushfire prone area

(b) a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* that confirms that the clearance is categorised as 'Level 1 clearance'.

Land division

PO 2.1
Land division that contributes to the conservation, protection and enhancement of native vegetation.

DTS/DPF 2.1
Land division satisfies one of the following:

(a) to create a public road or a public reserve where the application is accompanied by a report prepared in accordance with Regulation 18(2)(a) of the *Native Vegetation Regulations 2017* in which the extent of native vegetation clearance proposed to be undertaken in connection with the division is categorised as 'Level 1 clearance'

(b) to realign allotment boundaries to incorporate land into a park or reserve established under the *National Parks and Wildlife Act 1972*.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>The following classes of development:</p> <p>(a) land division where a report prepared in accordance with Regulation 18(2)(a) of the <i>Native Vegetation Regulations 2017</i> in connection with a development application categorises the clearance, or potential clearance, as 'Level 2 clearance', 'Level 3 clearance' or 'Level 4 clearance'</p> <p>(b) all other classes of development other than where DTS/DPF 1.1(a) is achieved.</p>	Native Vegetation Council	To provide expert assessment and direction to the relevant authority on the potential impacts of development on native vegetation.	Development of a class to which Schedule 9 clause 3 item 11 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Stormwater Management Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Development incorporates water sensitive urban design techniques to capture and re-use stormwater.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature						
<p>PO 1.1</p> <p>Residential development is designed to capture and re-use stormwater to:</p> <p>(a) maximise conservation of water resources</p> <p>(b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded</p> <p>(c) manage stormwater runoff quality.</p>	<p>DTS/DPF 1.1</p> <p>Residential development comprising detached, semi-detached or row dwellings, or less than 5 group dwellings or dwellings within a residential flat building:</p> <p>(a) includes rainwater tank storage:</p> <p>(i) connected to at least:</p> <p>A. in relation to a detached dwelling (not in a battle-axe arrangement), semi-detached dwelling or row dwelling, 60% of the roof area</p> <p>B. in all other cases, 80% of the roof area</p> <p>(ii) connected to either a toilet, laundry cold water outlets or hot water service for sites less than 200m²</p> <p>(iii) connected to one toilet and either the laundry cold water outlets or hot water service for sites of 200m² or greater</p> <p>(iv) with a minimum total capacity in accordance with Table 1</p> <p>(v) where detention is required, includes a 20-25 mm diameter slow release orifice at the bottom of the detention component of the tank</p> <p>(b) incorporates dwelling roof area comprising at least 80% of the site's impervious area</p> <p>Table 1: Rainwater Tank</p> <table border="1"> <thead> <tr> <th>Site size (m²)</th> <th>Minimum retention volume (Litres)</th> <th>Minimum detention volume (Litres)</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Site size (m ²)	Minimum retention volume (Litres)	Minimum detention volume (Litres)			
Site size (m ²)	Minimum retention volume (Litres)	Minimum detention volume (Litres)

None	None	None	None

Traffic Generating Development Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes and Major Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from urban transport routes and major urban transport routes.

Performance Outcomes (PO) and Deemed to Satisfy (DTS) / Designated Performance Feature (DPF) Criteria

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Traffic Generating Development	
<p>PO 1.1</p> <p>Development designed to minimise its potential impact on the safety, efficiency and functional performance of the State Maintained Road network.</p>	<p>DTS/DPF 1.1</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> (a) land division creating 50 or more additional allotments (b) commercial development with a gross floor area of 10,000m2 or more (c) retail development with a gross floor area of 2,000m2 or more (d) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (e) industry with a gross floor area of 20,000m2 or more (f) educational facilities with a capacity of 250 students or more.
<p>PO 1.2</p> <p>Access points sited and designed to accommodate the type and volume of traffic likely to be generated by development.</p>	<p>DTS/DPF 1.2</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> (a) land division creating 50 or more additional allotments (b) commercial development with a gross floor area of 10,000m2 or more (c) retail development with a gross floor area of 2,000m2 or more (d) a warehouse or transport depot with a gross leasable floor area of 8,000m2 or more (e) industry with a gross floor area of 20,000m2 or more (f) educational facilities with a capacity of 250 students or more.
<p>PO 1.3</p> <p>Sufficient accessible on-site queuing provided to meet the needs of the development so that queues do not impact on the State Maintained Road network.</p>	<p>DTS/DPF 1.3</p> <p>Access is obtained directly from a State Maintained Road where it involves any of the following types of development:</p> <ul style="list-style-type: none"> (a) land division creating 50 or more additional allotments (b) commercial development with a gross floor area of 10,000m2 or more (c) retail development with a gross floor area of 2,000m2 or more

- (d) a warehouse or transport depot with a gross leasable floor area of 8,000m² or more
- (e) industry with a gross floor area of 20,000m² or more
- (f) educational facilities with a capacity of 250 students or more.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
<p>Except where all of the relevant deemed-to-satisfy criteria are met, any of the following classes of development that are proposed within 250m of a State Maintained Road:</p> <ul style="list-style-type: none"> (a) land division creating 50 or more additional allotments (b) commercial development with a gross floor area of 10,000m² or more (c) retail development with a gross floor area of 2,000m² or more (d) a warehouse or transport depot with a gross leasable floor area of 8,000m² or more (e) industry with a gross floor area of 20,000m² or more (f) educational facilities with a capacity of 250 students or more. 	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 7 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.

Urban Transport Routes Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safe and efficient operation of Urban Transport Routes for all road users.
DO 2	Provision of safe and efficient access to and from Urban Transport Routes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Access - Safe Entry and Exit (Traffic Flow)	
<p>PO 1.1</p> <p>Access is designed to allow safe entry and exit to and from a site to meet the needs of development and minimise traffic flow interference associated with access movements along adjacent State maintained roads.</p>	<p>DTS/DPF 1.1</p> <p>An access point satisfies (a), (b) or (c):</p> <ul style="list-style-type: none"> (a) where servicing a single (1) dwelling / residential allotment: <ul style="list-style-type: none"> (i) it will not result in more than one access point (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 3m and 4m (measured at the site boundary) (b) where the development will result in 2 and up to 6 dwellings: <ul style="list-style-type: none"> (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site in a forward direction (iii) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (iv) passenger vehicles (with a length up to 5.2m) can enter and exit the site wholly within the kerbside lane of the road (v) it will have a width of between 5.8m to 6m (measured at the site boundary) and an access depth of 6m (measured from the site boundary into the site) (c) where the development will result in 7 or more dwellings, or is a non-residential land use: <ul style="list-style-type: none"> (i) it will not result in more than one access point servicing the development site (ii) vehicles can enter and exit the site using left turn only movements (iii) vehicles can enter and exit the site in a forward direction (iv) vehicles can cross the property boundary at an angle between 70 degrees and 90 degrees (v) it will have a width of between 6m and 7m (measured at the site boundary), where the development is expected to accommodate vehicles with a length up to 6m

- 6.4m or less
- (vi) it will have a width of between 6m and 9m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 6.4m to 8.8m
- (vii) it will have a width of between 9m and 12m (measured at the site boundary), where the development is expected to accommodate vehicles with a length from 8.8m to 12.5m
- (viii) provides for simultaneous two-way vehicle movements at the access:
 - A. with entry and exit movements for vehicles with a length up to 5.2m vehicles being fully within the kerbside lane of the road
 - and
 - B. with entry movements of 8.8m vehicles (where relevant) being fully within the kerbside lane of the road and the exit movements of 8.8m vehicles do not cross the centreline of the road.

Access - On-Site Queuing

PO 2.1
Sufficient accessible on-site queuing adjacent to access points is provided to meet the needs of development so that all vehicle queues can be contained fully within the boundaries of the development site, to minimise interruption on the functional performance of the road and maintain safe vehicle movements.

DTS/DPF 2.1
An access point in accordance with one of the following:

- (a) will not service, or is not intended to service, more than 6 dwellings and there are no internal driveways, intersections, car parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site) as shown in the following diagram:

- (b) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
 - (i) is expected to be serviced by vehicles with a length no greater than 6.4m
 - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
- (c) will service, or is intended to service, development that will generate less than 60 vehicle movements per day, and:
 - (i) is expected to be serviced by vehicles with a length greater than a 6.4m small rigid vehicle
 - (ii) there are no internal driveways, intersections, parking spaces or gates within 6.0m of the access point (measured from the site boundary into the site)
 - (iii) any termination of or change in priority of movement within the main car park aisle is located far enough into the site so that the largest vehicle expected on-site can store fully within the site before being required to stop
 - (iv) all parking or manoeuvring areas for commercial vehicles are located a minimum of 12m or the length of the longest vehicle expected on site from the access (measured from the site boundary into the site) as shown in the following diagram:

Access - (Location Spacing) - Existing Access Point

PO 3.1
Existing access points are designed to accommodate the type and volume of traffic likely to be generated by the development.

DTS/DPF 3.1
An existing access point satisfies (a), (b) or (c):

- (a) it will not service, or is not intended to service, more than 6 dwellings
- (b) it is not located on a Controlled Access Road and will not service development that will result in (b) a larger class of vehicle expected to access the site using the existing access
- (c) is not located on a Controlled Access Road and development constitutes:
 - (i) a change of use between an office <500m² gross leasable floor area and a consulting room <500m² gross leasable floor area or vice versa
 - (ii) a change in use from a shop to an office, consulting room or personal or domestic services establishment
 - (iii) a change of use from a consulting room or office <250m² gross leasable floor area to a shop

- (iv) area to shop <250m² gross leasable floor area
- (v) a change of use from a shop <500m² gross leasable floor area to a warehouse <500m² gross leasable floor area
- (v) an office or consulting room with a <500m² gross leasable floor area.

Access – Location (Spacing) – New Access Points

PO 4.1
New access points are spaced apart from any existing access point or public road junction to manage impediments to traffic flow and maintain safe and efficient operating conditions on the road.

DTS/DPF 4.1
A new access point satisfies (a), (b) or (c):

- (a) where a development site is intended to serve between 1 and 6 dwellings and has frontage to a local road (not being a Controlled Access Road) with a speed environment of 60km/h or less, the new access point is provided on the local road and located a minimum of 6.0m from the tangent point as shown in the following diagram:

NOTE:
The points marked X₁ and X₂ are respectively at the median end on a divided road and at the intersection of the main road centre-line and the extensions of the side road property lines shown as dotted lines, on an undivided road. On a divided road, dimension Y-Y extends to Point Y₁.

- (b) where the development site is intended to serve between 1 and 6 dwellings and access from a local road (being a road that is not a State Maintained Road) is not available, the new access:
 - (i) is not located on a Controlled Access Road
 - (ii) is not located on a section of road affected by double barrier lines
 - (iii) will be on a road with a speed environment of 70km/h or less
 - (iv) is located outside of the bold lines on the diagram shown in the diagram following part (a)
 - (v) located minimum of 6m from a median opening or pedestrian crossing
- (c) where DTS/DPF 4.1 part (a) and (b) do not apply and access from an alternative local road at least 25m from the State Maintained Road is not available, and the access is not located on a Controlled Access Road, the new access is separated in accordance with the following:

Speed Limit	Separation between access points	Separation from public road junctions and merging/terminating lanes
50 km/h or less	No spacing requirement	20m
60 km/h	30m	73m
70 km/h	40m	92m
80 km/h	50m	114m
90 km/h	65m	139m
100 km/h	80m	165m
110 km/h	100m	193m

Access - Location (Sight Lines)

PO 5.1
Access points are located and designed to accommodate sight lines that enable drivers and pedestrians to navigate potential conflict points with roads in a controlled and safe manner.

DTS/DPF 5.1
An access point satisfies (a) or (b):

- (a) drivers approaching or exiting an access point have an unobstructed line of sight in accordance with the following (measured at a height of 1.1m above the surface of the road):

Speed Limit	Access point serving 1-6 dwellings	Access point serving all other development
40 km/h or less	40m	73m
50 km/h	55m	97m
60 km/h	73m	123m
70 km/h	92m	151m
80 km/h	114m	181m
90 km/h	139m	214m
100 km/h	165m	248m
110km/h	193m	285m

(b) pedestrian sightlines in accordance with the following diagram:

Access – Mud and Debris

PO 6.1
Access points constructed to minimise mud or other debris being carried or transferred onto the road to ensure safe road operating conditions.

DTS/DPF 6.1
Where the road has an unsealed shoulder and the road is not kerbed, the access way is sealed from the edge of seal on the road for a minimum of 10m or to the property boundary (whichever is closer).

Access - Stormwater

PO 7.1
Access points are designed to minimise negative impact on roadside drainage of water.

DTS/DPF 7.1
Development does not:
(a) decrease the capacity of an existing drainage point
(b) restrict or prevent the flow of stormwater through an existing drainage point and system.

Building on Road Reserve

PO 8.1
Buildings or structures that encroach onto, above or below road reserves are designed and sited to minimise impact on safe movements by all road users.

DTS/DPF 8.1
Buildings or structures are not located on, above or below the road reserve.

Public Road Junctions

PO 9.1
New junctions with a public road (including the opening of unmade public road junctions) or modifications to existing road junctions are located and designed to ensure safe operating conditions are maintained on the State Maintained Road.

DTS/DPF 9.1
Development does not comprise any of the following:
(a) creating a new junction with a public road
(b) opening an unmade public road junction
(c) modifying an existing public road junction.

Corner Cut-Offs

PO 10.1
Development is located and designed to maintain sightlines for drivers turning into and out of public road junctions to contribute to driver safety.

DTS/DPF 10.1
Development does not involve building work, or building work is located wholly outside the land shown as 'Corner Cut-Off Area' in the following diagram:

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Except where all of the relevant deemed-to-satisfy criteria are met, development (including the division of land) that involves any of the following to/on a State Maintained Road or within 25 metres of an intersection with any such road:	Commissioner of Highways.	To provide expert technical assessment and direction to the Relevant Authority on the safe and efficient operation and management of all roads relevant to the Commissioner of Highways as described in the Planning and Design Code.	Development of a class to which Schedule 9 clause 3 item 4389

- (a) creation of a new access or junction
- (b) alterations to an existing access or public road junction (except where deemed to be minor in the opinion of the relevant authority)
- (c) development that changes the nature of vehicular movements or increase the number or frequency of movements through an existing access (except where deemed to be minor in the opinion of the relevant authority).

Urban Tree Canopy Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1 Residential development preserves and enhances urban tree canopy through the planting of new trees and retention of existing mature trees where practicable.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome

PO 1.1

Trees are planted or retained to contribute to an urban tree canopy.

Deemed-to-Satisfy Criteria / Designated Performance Feature

DTS/DPF 1.1

Tree planting is provided in accordance with the following:

Site size per dwelling (m ²)	Tree size* and number required per dwelling
<450	1 small tree
450-800	1 medium tree or 2 small trees
>800	1 large tree or 2 medium trees or 4 small trees

*refer Table 1 Tree Size

Table 1 Tree Size			
Tree size	Mature height (minimum)	Mature spread (minimum)	Soil area around tree within development site (minimum)
Small	4 m	2m	10m ² and min. dimension of 1.5m
Medium	6 m	4 m	30m ² and min. dimension of 2m
Large	12 m	8m	60m ² and min. dimension of 4m

The discount in Column D of Table 2 discounts the number of trees required to be planted in DTS/DPF 1.1 where existing tree(s) are retained on the subject land that meet the criteria in Columns A, B and C of Table 2, and are not a species identified in Regulation 3F(4)(b) of the Planning Development and Infrastructure (General) Regulations 2017.

Table 2 Tree Discounts			
Retained tree height (Column A)	Retained tree spread (Column B)	Retained soil area around tree within development site (Column C)	Discount applied (Column D)
4-6m	2-4m	10m ² and min. dimension of 1.5m	2 small trees (or 1 medium tree)
6-12m	4-8m	30m ² and min. dimension of 3m	2 medium trees (or 4 small trees)
>12m	>8m	60m ² and min. dimension of 6m	2 large trees (or 4 medium trees, or 8 small trees)

Note: In order to satisfy DTS/DPF 1.1, payment may be made in accordance with a relevant off-set scheme established by the Minister under section 197 of the Planning, Development and Infrastructure (General) Regulations 2017.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Water Protection Area Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Safeguard South Australia's public water supplies and ecologically significant areas by protecting regionally and locally significant surface and underground water resources in Water Protection Areas from pollution. This includes considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use	
PO 1.1 Development with potential to expose the water supply role of the Water Protection Area to significant adverse water quality risk is avoided to maintain the long term function of the Water Protection Area.	DTS/DPF 1.1 Development does not involve any one or combination of the following: (a) fuel depot (b) intensive animal husbandry (c) special industry (d) stock slaughter works (e) timber preservation works.
Groundwater	
PO 2.1 Groundwater resources are protected from pollution by ensuring development does not: (a) generate or dispose of waste in a manner that would pollute water resources (b) involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a risk to water supplies.	DTS/DPF 2.1 None are applicable.
PO 2.2 Groundwater catchment and recharge characteristics are safeguarded by ensuring development: (a) retains and protects areas of native vegetation (b) does not inhibit the potential of an aquifer to recharge.	DTS/DPF 2.2 None are applicable.
Farming and Horticulture	
PO 3.1 Farming or horticulture operations occur only where: (a) the activity will not result in any increase in the salinity levels of groundwater (b) the land and soil structure is capable of supporting the proposed activity and the likelihood of soil erosion is minimised (c) the depth to the water table is greater than 2 metres from the ground.	DTS/DPF 3.1 None are applicable.
Irrigation	
PO 4.1 Irrigated areas are sited to ensure they: (a) avoid any land prone to waterlogging or subject to flooding through irrigation (b) avoid the risk of the water table falling or rising significantly as a result of irrigation practices (c) do not increase the salinity levels of groundwater	DTS/DPF 4.1 None are applicable.

(d) minimise the risk of polluting surface and groundwater resources where wastewater is used to irrigate the land.	
Wastewater	
PO 5.1 Wastewater-generating development utilises existing communal wastewater management infrastructure to avoid on-site disposal.	DTS/DPF 5.1 Development (including land division) that generates wastewater is connected to sewerage or community wastewater management systems with sufficient hydraulic capacity to accept the inflow.
PO 5.2 Development that generates wastewater which cannot be disposed of via sewerage or community wastewater management systems, is designed and of a scale that will enable on-site wastewater treatment and disposal in accordance with relevant health and environmental requirements.	DTS/DPF 5.2 On-site wastewater treatment systems comply with: (a) the 'On-site Wastewater Systems Code' or (b) AS/NZS 1547: On-site domestic wastewater management and the South Australian amendments to AS/NSZ 1547 as outlined in section 9.2 of the 'On-site Wastewater Systems Code'.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
Composting works (excluding a prescribed approved activity) - being a depot, facility or works with the capacity to treat, during a 12 month period, more than 200 tonnes of organic waste or matter. (EPA Licence)	Environment Protection Authority.	To provide expert Technical assessment and direction to the Relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.	Development of a class to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
Wastewater treatment works - being sewage treatment works, a community wastewater management system, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period, more than 2.5ML of wastewater. (EPA Licence required at more than 5 ML)			
Feedlots - being carrying on an operation for holding in confined yard or area and feeding principally by mechanical means or by hand not less than an average of 200 cattle (EPA Licence) or 1,600 sheep or goats per day over any period of 12 months, but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.			
Piggeries - being the conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of 130 or more standard pig units. (EPA licence required at 650 or more standard pig units)			
Dairies - being the carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time.			

Water Resources Overlay

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Protection of the quality of surface waters considering adverse water quality impacts associated with projected reductions in rainfall and warmer air temperatures as a result of climate change.
DO 2	Maintain the conveyance function and natural flow paths of watercourses to assist in the management of flood waters and stormwater runoff.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Water Catchment	
PO 1.1 Watercourses and their beds, banks, wetlands and floodplains (1% AEP flood extent) are not	DTS/DPF 1.1 None are applicable.

Planning and Design Code - 26 August - Version 2021.12
 damaged or modified and are retained in their natural state, except where modification is required for essential access or maintenance purposes.

PO 1.2 Development avoids interfering with the existing hydrology or water regime of swamps and wetlands other than to improve the existing conditions to enhance environmental values.	DTS/DPF 1.2 None are applicable.
PO 1.3 Wetlands and low-lying areas providing habitat for native flora and fauna are not drained, except temporarily for essential management purposes to enhance environmental values.	DTS/DPF 1.3 None are applicable.
PO 1.4 Watercourses, areas of remnant native vegetation, or areas prone to erosion that are capable of natural regeneration are fenced off to limit stock access.	DTS/DPF 1.4 None are applicable.
PO 1.5 Development that increases surface water run-off includes a suitably sized strip of vegetated land on each side of a watercourse to filter runoff to: (a) reduce the impacts on native aquatic ecosystems (b) minimise soil loss eroding into the watercourse.	DTS/DPF 1.5 A strip of land 20m or more wide measured from the top of existing banks on each side of the watercourse is free from development, livestock use and revegetated with locally indigenous vegetation.
PO 1.6 Development resulting in the depositing or placing of an object or solid material in a watercourse or lake occurs only where it involves any of the following: (a) the construction of an erosion control structure (b) devices or structures used to extract or regulate water flowing in a watercourse (c) devices used for scientific purposes (d) the rehabilitation of watercourses.	DTS/DPF 1.6 None are applicable.
PO 1.7 Watercourses, floodplains (1% AEP flood extent) and wetlands protected and enhanced by retaining and protecting existing native vegetation.	DTS/DPF 1.7 None are applicable.
PO 1.8 Watercourses, floodplains (1% AEP flood extent) and wetlands are protected and enhanced by stabilising watercourse banks and reducing sediments and nutrients entering the watercourse.	DTS/DPF 1.8 None are applicable.
PO 1.9 Dams, water tanks and diversion drains are located and constructed to maintain the quality and quantity of flows required to meet environmental and downstream needs.	DTS/DPF 1.9 None are applicable.

Procedural Matters (PM) - Referrals

The following table identifies classes of development / activities that require referral in this Overlay and the applicable referral body. It sets out the purpose of the referral as well as the relevant statutory reference from Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017.

Class of Development / Activity	Referral Body	Purpose of Referral	Statutory Reference
None	None	None	None

Part 4 - General Development Policies

Advertisements

Assessment Provisions (AP)

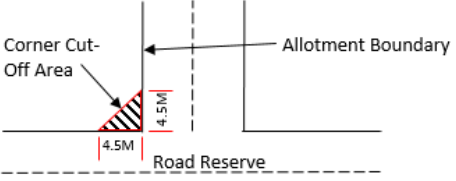

Desired Outcome (DO)

Desired Outcome	
DO 1	Advertisements and advertising hoardings are appropriate to context, efficient and effective in communicating with the public, limited in number to avoid clutter, and do not create hazard.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
---------------------	---

<p>PO 1.1</p> <p>Advertisements are compatible and integrated with the design of the building and/or land they are located on.</p>	<p>DTS/DPF 1.1</p> <p>Advertisements attached to a building satisfy all of the following:</p> <ul style="list-style-type: none"> (a) are not located in a Neighbourhood-type zone (b) where they are flush with a wall: <ul style="list-style-type: none"> (i) if located at canopy level, are in the form of a fascia sign (ii) if located above canopy level: <ul style="list-style-type: none"> A. do not have any part rising above parapet height B. are not attached to the roof of the building (c) where they are not flush with a wall: <ul style="list-style-type: none"> (i) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (ii) if attached to a two-storey building: <ul style="list-style-type: none"> A. has no part located above the finished floor level of the second storey of the building B. does not protrude beyond the outer limits of any verandah structure below C. does not have a sign face that exceeds 1m² per side. (d) if located below canopy level, are flush with a wall (e) if located at canopy level, are in the form of a fascia sign (f) if located above a canopy: <ul style="list-style-type: none"> (i) are flush with a wall (ii) do not have any part rising above parapet height (iii) are not attached to the roof of the building. (g) if attached to a verandah, no part of the advertisement protrudes beyond the outer limits of the verandah structure (h) if attached to a two-storey building, have no part located above the finished floor level of the second storey of the building (i) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.
<p>PO 1.2</p> <p>Advertising hoardings do not disfigure the appearance of the land upon which they are situated or the character of the locality.</p>	<p>DTS/DPF 1.2</p> <p>Where development comprises an advertising hoarding, the supporting structure is:</p> <ul style="list-style-type: none"> (a) concealed by the associated advertisement and decorative detailing or (b) not visible from an adjacent public street or thoroughfare, other than a support structure in the form of a single or dual post design.
<p>PO 1.3</p> <p>Advertising does not encroach on public land or the land of an adjacent allotment.</p>	<p>DTS/DPF 1.3</p> <p>Advertisements and/or advertising hoardings are contained within the boundaries of the site.</p>
<p>PO 1.4</p> <p>Where possible, advertisements on public land are integrated with existing structures and infrastructure.</p>	<p>DTS/DPF 1.4</p> <p>Advertisements on public land that meet at least one of the following:</p> <ul style="list-style-type: none"> (a) achieves Advertisements DTS/DPF 1.1 (b) are integrated with a bus shelter.
<p>PO 1.5</p> <p>Advertisements and/or advertising hoardings are of a scale and size appropriate to the character of the locality.</p>	<p>DTS/DPF 1.5</p> <p>None are applicable.</p>
<p>Proliferation of Advertisements</p>	
<p>PO 2.1</p> <p>Proliferation of advertisements is minimised to avoid visual clutter and untidiness.</p>	<p>DTS/DPF 2.1</p> <p>No more than one freestanding advertisement is displayed per occupancy.</p>
<p>PO 2.2</p> <p>Multiple business or activity advertisements are co-located and coordinated to avoid visual clutter and untidiness.</p>	<p>DTS/DPF 2.2</p> <p>Advertising of a multiple business or activity complex is located on a single advertisement fixture or structure.</p>
<p>PO 2.3</p> <p>Proliferation of advertisements attached to buildings is minimised to avoid visual clutter and untidiness.</p>	<p>DTS/DPF 2.3</p> <p>Advertisements satisfy all of the following:</p> <ul style="list-style-type: none"> (a) are attached to a building (b) other than in a Neighbourhood-type zone, where they are flush with a wall, cover no more than 15% of the building facade to which they are attached (c) do not result in more than one sign per occupancy that is not flush with a wall.
<p>Advertising Content</p>	
<p>PO 3.1</p> <p>Advertisements are limited to information relating to the lawful use of land they are located on to assist in the ready identification of the activity or activities on the land and avoid unrelated content that contributes to visual clutter and untidiness.</p>	<p>DTS/DPF 3.1</p> <p>Advertisements contain information limited to a lawful existing or proposed activity or activities on the same site as the advertisement.</p>

Amenity Impacts	
PO 4.1 Light spill from advertisement illumination does not unreasonably compromise the amenity of sensitive receivers.	DTS/DPF 4.1 Advertisements do not incorporate any illumination.
Safety	
PO 5.1 Advertisements and/or advertising hoardings erected on a verandah or projecting from a building wall are designed and located to allow for safe and convenient pedestrian access.	DTS/DPF 5.1 Advertisements have a minimum clearance of 2.5m between the top of the footpath and base of the underside of the sign.
PO 5.2 Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.	DTS/DPF 5.2 No advertisement illumination is proposed.
PO 5.3 Advertisements and/or advertising hoardings do not create a hazard to drivers by: (a) being liable to interpretation by drivers as an official traffic sign or signal (b) obscuring or impairing drivers' view of official traffic signs or signals (c) obscuring or impairing drivers' view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings.	DTS/DPF 5.3 Advertisements satisfy all of the following: (a) are not located in a public road or rail reserve (b) are located wholly outside the land shown as 'Corner Cut-Off Area' in the following  diagram
PO 5.4 Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.	DTS/DPF 5.4 Advertisements and/or advertising hoardings are not located along or adjacent to a road having a speed limit of 80km/h or more.
PO 5.5 Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users.	DTS/DPF 5.5 Where the advertisement or advertising hoarding is: (a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb (b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal (c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal: (a) 110 km/h road - 14m (b) 100 km/h road - 13m (c) 90 km/h road - 10m (d) 70 or 80 km/h road - 8.5m.
PO 5.6 Advertising near signalised intersections does not cause unreasonable distraction to road users through illumination, flashing lights, or moving or changing displays or messages.	DTS/DPF 5.6 Advertising: (a) is not illuminated (b) does not incorporate a moving or changing display or message (c) does not incorporate a flashing light(s).

Animal Keeping and Horse Keeping

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Animals are kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises their adverse effects on the environment, local amenity and surrounding development.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
---------------------	---

PO 1.1 Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.	DTS/DPF 1.1 None are applicable.
PO 1.2 Animal keeping and horse keeping is located and managed to minimise the potential transmission of disease to other operations where animals are kept.	DTS/DPF 1.2 None are applicable.
Horse Keeping	
PO 2.1 Water from stable wash-down areas is directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.	DTS/DPF 2.1 None are applicable.
PO 2.2 Stables, horse shelters or associated yards are sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.	DTS/DPF 2.2 Stables, horse shelters and associated yards are sited in accordance with all of the following: (a) 30m or more from any sensitive receivers (existing or approved) on land in other ownership (b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.
PO 2.3 All areas accessible to horses are separated from septic tank effluent disposal areas to protect the integrity of that system. Stable flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 2.3 Septic tank effluent disposal areas are enclosed with a horse-proof barrier such as a fence to exclude horses from this area.
PO 2.4 To minimise environmental harm and adverse impacts on water resources, stables, horse shelters and associated yards are appropriately set back from a watercourse.	DTS/DPF 2.4 Stables, horse shelters and associated yards are set back 50m or more from a watercourse.
PO 2.5 Stables, horse shelters and associated yards are located on slopes that are stable to minimise the risk of soil erosion and water runoff.	DTS/DPF 2.5 Stables, horse shelters and associated yards are not located on land with a slope greater than 10% (1-in-10).
Kennels	
PO 3.1 Kennel flooring is constructed with an impervious material to facilitate regular cleaning.	DTS/DPF 3.1 The floors of kennels satisfy all of the following: (a) are constructed of impervious concrete (b) are designed to be self-draining when washed down.
PO 3.2 Kennels and exercise yards are designed and sited to minimise noise nuisance to neighbours through measures such as: (a) adopting appropriate separation distances (b) orientating openings away from sensitive receivers.	DTS/DPF 3.2 Kennels are sited 500m or more from the nearest sensitive receiver on land in other ownership.
PO 3.3 Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.	DTS/DPF 3.3 Kennels are sited in association with a permanent dwelling on the land.
Wastes	
PO 4.1 Storage of manure, used litter and other wastes (other than wastewater lagoons) is designed, constructed and managed to minimise attracting and harbouring vermin.	DTS/DPF 4.1 None are applicable.
PO 4.2 Facilities for the storage of manure, used litter and other wastes (other than wastewater lagoons) are located to minimise the potential for polluting water resources.	DTS/DPF 4.2 Waste storage facilities (other than wastewater lagoons) are located outside the 1% AEP flood event areas.

Aquaculture

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Aquaculture facilities are developed in an ecologically, economically and socially sustainable manner to support an equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land-based Aquaculture	
<p>PO 1.1</p> <p>Land-based aquaculture and associated components are sited and designed to mitigate adverse impacts on nearby sensitive receivers.</p>	<p>DTS/DPF 1.1</p> <p>Land-based aquaculture and associated components are located to satisfy all of the following:</p> <ul style="list-style-type: none"> (a) 200m or more from a sensitive receiver in other ownership (b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers.
<p>PO 1.2</p> <p>Land-based aquaculture and associated components are sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
<p>PO 1.3</p> <p>Land-based aquaculture and associated components are sited and designed to prevent pond leakage that would pollute groundwater.</p>	<p>DTS/DPF 1.3</p> <p>None are applicable.</p>
<p>PO 1.4</p> <p>Land-based aquaculture and associated components are sited and designed to prevent farmed species escaping and entering into any waters.</p>	<p>DTS/DPF 1.4</p> <p>None are applicable.</p>
<p>PO 1.5</p> <p>Land-based aquaculture and associated components, including intake and discharge pipes, are designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment.</p>	<p>DTS/DPF 1.5</p> <p>None are applicable.</p>
<p>PO 1.6</p> <p>Pipe inlets and outlets associated with land-based aquaculture are sited and designed to minimise the risk of disease transmission.</p>	<p>DTS/DPF 1.6</p> <p>None are applicable.</p>
<p>PO 1.7</p> <p>Storage areas associated with aquaculture activity are integrated with the use of the land and sited and designed to minimise their visual impact on the surrounding environment.</p>	<p>DTS/DPF 1.7</p> <p>None are applicable.</p>
Marine Based Aquaculture	
<p>PO 2.1</p> <p>Marine aquaculture is sited and designed to minimise its adverse impacts on sensitive ecological areas including:</p> <ul style="list-style-type: none"> (a) creeks and estuaries (b) wetlands (c) significant seagrass and mangrove communities (d) marine habitats and ecosystems. 	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
<p>PO 2.2</p> <p>Marine aquaculture is sited in areas with adequate water current to disperse sediments and dissolve particulate wastes to prevent the build-up of waste that may cause environmental harm.</p>	<p>DTS/DPF 2.2</p> <p>None are applicable.</p>
<p>PO 2.3</p> <p>Marine aquaculture is designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.</p>	<p>DTS/DPF 2.3</p> <p>None are applicable.</p>
<p>PO 2.4</p> <p>Marine aquaculture (other than inter-tidal aquaculture) is located an appropriate distance seaward of the high water mark.</p>	<p>DTS/DPF 2.4</p> <p>Marine aquaculture development is located 100m or more seaward of the high water mark.</p>
<p>PO 2.5</p> <p>Marine aquaculture is sited and designed to not obstruct or interfere with:</p> <ul style="list-style-type: none"> (a) areas of high public use (b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports (c) areas of outstanding visual or environmental value (d) areas of high tourism value (e) areas of important regional or state economic activity, including commercial ports, wharfs and jetties (f) the operation of infrastructure facilities including inlet and outlet pipes associated with the desalination of sea water. 	<p>DTS/DPF 2.5</p> <p>None are applicable.</p>
<p>PO 2.6</p>	<p>DTS/DPF 2.6</p>

Marine aquaculture is sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.	None are applicable.
<p>PO 2.7</p> <p>Marine aquaculture is designed to be as unobtrusive as practicable by incorporating measures such as:</p> <ul style="list-style-type: none"> (a) using feed hoppers painted in subdued colours and suspending them as close as possible to the surface of the water (b) positioning structures to protrude the minimum distance practicable above the surface of the water (c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons (d) positioning racks, floats and other farm structures in unobtrusive locations landward from the shoreline. 	<p>DTS/DPF 2.7</p> <p>None are applicable.</p>
<p>PO 2.8</p> <p>Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible to minimise environmental and amenity impacts.</p>	<p>DTS/DPF 2.8</p> <p>None are applicable.</p>
<p>PO 2.9</p> <p>Access, launching and maintenance facilities are developed as common user facilities and are co-located where practicable to mitigate adverse impacts on coastal areas.</p>	<p>DTS/DPF 2.9</p> <p>None are applicable.</p>
<p>PO 2.10</p> <p>Marine aquaculture is sited to minimise potential impacts on, and to protect the integrity of, reserves under the <i>National Parks and Wildlife Act 1972</i>.</p>	<p>DTS/DPF 2.10</p> <p>Marine aquaculture is located 1000m or more seaward of the boundary of any reserve under the <i>National Parks and Wildlife Act 1972</i>.</p>
<p>PO 2.11</p> <p>Onshore storage, cooling and processing facilities do not impair the coastline and its visual amenity by:</p> <ul style="list-style-type: none"> (a) being sited, designed, landscaped and of a scale to reduce the overall bulk and appearance of buildings and complement the coastal landscape (b) making provision for appropriately sited and designed vehicular access arrangements, including using existing vehicular access arrangements as far as practicable (c) incorporating appropriate waste treatment and disposal. 	<p>DTS/DPF 2.11</p> <p>None are applicable.</p>
Navigation and Safety	
<p>PO 3.1</p> <p>Marine aquaculture sites are suitably marked to maintain navigational safety.</p>	<p>DTS/DPF 3.1</p> <p>None are applicable.</p>
<p>PO 3.2</p> <p>Marine aquaculture is sited to provide adequate separation between farms for safe navigation.</p>	<p>DTS/DPF 3.2</p> <p>None are applicable.</p>
Environmental Management	
<p>PO 4.1</p> <p>Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.</p>	<p>DTS/DPF 4.1</p> <p>None are applicable.</p>
<p>PO 4.2</p> <p>Marine aquaculture is designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.</p>	<p>DTS/DPF 4.2</p> <p>None are applicable.</p>
<p>PO 4.3</p> <p>Marine aquaculture provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.</p>	<p>DTS/DPF 4.3</p> <p>None are applicable.</p>
<p>PO 4.4</p> <p>Aquaculture operations incorporate measures for the removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste to prevent pollution of waters, wetlands, or the nearby coastline.</p>	<p>DTS/DPF 4.4</p> <p>None are applicable.</p>

Beverage Production in Rural Areas

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Odour and Noise	
PO 1.1 Beverage production activities are designed and sited to minimise odour impacts on rural amenity.	DTS/DPF 1.1 None are applicable.
PO 1.2 Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.	DTS/DPF 1.2 None are applicable.
PO 1.3 Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings to improve the visual appearance within a locality and manage noise associated with these activities.	DTS/DPF 1.3 None are applicable.
PO 1.4 Breweries are designed to minimise odours emitted during boiling and fermentation stages of production.	DTS/DPF 1.4 Brew kettles are fitted with a vapour condenser.
PO 1.5 Beverage production solid wastes are stored in a manner that minimises odour impacts on sensitive receivers in other ownership.	DTS/DPF 1.5 Solid waste from beverage production is collected and stored in sealed containers and removed from the site within 48 hours.
Water Quality	
PO 2.1 Beverage production wastewater management systems (including wastewater irrigation) are set back from watercourses to minimise adverse impacts on water resources.	DTS/DPF 2.1 Wastewater management systems are set back 50m or more from the banks of watercourses and bores.
PO 2.2 The storage or disposal of chemicals or hazardous substances is undertaken in a manner to prevent pollution of water resources.	DTS/DPF 2.2 None are applicable.
PO 2.3 Stormwater runoff from areas that may cause contamination due to beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system to manage potential environmental impacts.	DTS/DPF 2.3 None are applicable.
PO 2.4 Stormwater runoff from areas unlikely to cause contamination by beverage production and associated activities (such as roof catchments and clean hard-paved surfaces) is diverted away from beverage production areas and wastewater management systems.	DTS/DPF 2.4 None are applicable.
Wastewater Irrigation	
PO 3.1 Beverage production wastewater irrigation systems are designed and located to not contaminate soil and surface and ground water resources or damage crops.	DTS/DPF 3.1 None are applicable.
PO 3.2 Beverage production wastewater irrigation systems are designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.	DTS/DPF 3.2 Beverage production wastewater is not irrigated within 50m of any dwelling in other ownership.
PO 3.3 Beverage production wastewater is not irrigated onto areas that pose an undue risk to the environment or amenity such as: <ul style="list-style-type: none"> (a) waterlogged areas (b) land within 50m of a creek, swamp or domestic or stock water bore (c) land subject to flooding (d) steeply sloping land (e) rocky or highly permeable soil overlaying an unconfined aquifer. 	DTS/DPF 3.3 None are applicable.

Bulk Handling and Storage Facilities

Assessment Provisions (AP)

Desired Outcome

DO 1	Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities are designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Bulk handling and storage facilities are sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.	DTS/DPF 1.1 Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing) meet the following minimum separation distances from sensitive receivers: <ul style="list-style-type: none"> (a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals), where the handling of these materials into or from vessels does not exceed 100 tonnes per day: 300m or more from residential premises not associated with the facility (b) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility: 300m or more from residential premises not associated with the facility (c) bulk petroleum storage involving individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1,000 cubic metres: 500m or more (d) coal handling with: <ul style="list-style-type: none"> a. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more b. capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes: 1000m or more.
Buffers and Landscaping	
PO 2.1 Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages to enhance the appearance of land and buildings from public thoroughfares.	DTS/DPF 2.1 None are applicable.
PO 2.2 Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.	DTS/DPF 2.2 None are applicable.
Access and Parking	
PO 3.1 Roadways and vehicle parking areas associated with bulk handling and storage facilities are designed and surfaced to control dust emissions and prevent drag out of material from the site.	DTS/DPF 3.1 Roadways and vehicle parking areas are sealed with an all-weather surface.
Slipways, Wharves and Pontoons	
PO 4.1 Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.	DTS/DPF 4.1 None are applicable.

Clearance from Overhead Powerlines

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
PO 1.1 Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.	DTS/DPF 1.1 One of the following is satisfied: <ul style="list-style-type: none"> (a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the Resource Management Act 1991.

Design

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	<p>Development is:</p> <ul style="list-style-type: none"> (a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributes to the character of the immediate area (b) durable - fit for purpose, adaptable and long lasting (c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors (d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All development	
External Appearance	
PO 1.1 Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).	DTS/DPF 1.1 None are applicable.
PO 1.2 Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.	DTS/DPF 1.2 None are applicable.
PO 1.3 Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Plant, exhaust and intake vents and other technical equipment is integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: <ul style="list-style-type: none"> (a) positioning plant and equipment in unobtrusive locations viewed from public roads and spaces (b) screening rooftop plant and equipment from view (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses. 	DTS/DPF 1.4 Development does not incorporate any structures that protrude beyond the roofline.
PO 1.5 The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.	DTS/DPF 1.5 None are applicable.
Safety	
PO 2.1 Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is designed to differentiate public, communal and private areas.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.	DTS/DPF 2.3 None are applicable.
PO 2.4	DTS/DPF 2.4

<p>Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.</p>	<p>None are applicable.</p>
<p>PO 2.5 Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.</p>	<p>DTS/DPF 2.5 None are applicable.</p>
<p>Landscaping</p>	
<p>PO 3.1 Soft landscaping and tree planting is incorporated to:</p> <ul style="list-style-type: none"> (a) minimise heat absorption and reflection (b) maximise shade and shelter (c) maximise stormwater infiltration (d) enhance the appearance of land and streetscapes (e) contribute to biodiversity. 	<p>DTS/DPF 3.1 None are applicable.</p>
<p>PO 3.2 Soft landscaping and tree planting maximises the use of locally indigenous plant species, incorporates plant species best suited to current and future climate conditions and avoids pest plant and weed species.</p>	<p>DTS/DPF 3.2 None are applicable.</p>
<p>Environmental Performance</p>	
<p>PO 4.1 Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.</p>	<p>DTS/DPF 4.1 None are applicable.</p>
<p>PO 4.2 Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.</p>	<p>DTS/DPF 4.2 None are applicable.</p>
<p>PO 4.3 Buildings incorporate climate-responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.</p>	<p>DTS/DPF 4.3 None are applicable.</p>
<p>Water Sensitive Design</p>	
<p>PO 5.1 Development is sited and designed to maintain natural hydrological systems without negatively impacting:</p> <ul style="list-style-type: none"> (a) the quantity and quality of surface water and groundwater (b) the depth and directional flow of surface water and groundwater (c) the quality and function of natural springs. 	<p>DTS/DPF 5.1 None are applicable.</p>
<p>On-site Waste Treatment Systems</p>	
<p>PO 6.1 Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.</p>	<p>DTS/DPF 6.1 Effluent disposal drainage areas do not:</p> <ul style="list-style-type: none"> (a) encroach within an area used as private open space or result in less private open space than that specified in Design Table 1 - Private Open Space (b) use an area also used as a driveway (c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
<p>Carparking Appearance</p>	
<p>PO 7.1 Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on the streetscapes through techniques such as:</p> <ul style="list-style-type: none"> (a) limiting protrusion above finished ground level (b) screening through appropriate planting, fencing and mounding (c) limiting the width of openings and integrating them into the building structure. 	<p>DTS/DPF 7.1 None are applicable.</p>
<p>PO 7.2 Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.</p>	<p>DTS/DPF 7.2 None are applicable.</p>
<p>PO 7.3 Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.</p>	<p>DTS/DPF 7.3 None are applicable.</p>

Planning and Design Code - 26 August - Version 2021.12	
PO 7.4 Street level vehicle parking areas incorporate tree planting to provide shade and reduce solar heat absorption and reflection.	DTS/DPF 7.4 None are applicable.
PO 7.5 Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.	DTS/DPF 7.5 None are applicable.
PO 7.6 Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.	DTS/DPF 7.6 None are applicable.
PO 7.7 Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.	DTS/DPF 7.7 None are applicable.
Earthworks and sloping land	
PO 8.1 Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.	DTS/DPF 8.1 Development does not involve any of the following: (a) excavation exceeding a vertical height of 1m (b) filling exceeding a vertical height of 1m (c) a total combined excavation and filling vertical height of 2m or more.
PO 8.2 Driveways and access tracks are designed and constructed to allow safe and convenient access on sloping land (with a gradient exceeding 1 in 8).	DTS/DPF 8.2 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b): (a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway (b) are constructed with an all-weather trafficable surface.
PO 8.3 Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8): (a) do not contribute to the instability of embankments and cuttings (b) provide level transition areas for the safe movement of people and goods to and from the development (c) are designed to integrate with the natural topography of the land.	DTS/DPF 8.3 None are applicable.
PO 8.4 Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on-site drainage systems to minimise erosion.	DTS/DPF 8.4 None are applicable.
PO 8.5 Development does not occur on land at risk of landslip nor increases the potential for landslip or land surface instability.	DTS/DPF 8.5 None are applicable.
Fences and Walls	
PO 9.1 Fences, walls and retaining walls are of sufficient height to maintain privacy and security without unreasonably impacting the visual amenity and adjoining land's access to sunlight or the amenity of public places.	DTS/DPF 9.1 None are applicable.
PO 9.2 Landscaping incorporated on the low side of retaining walls is visible from public roads and public open space to minimise visual impacts.	DTS/DPF 9.2 A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.
Overlooking / Visual Privacy (in building 3 storeys or less)	
PO 10.1 Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses.	DTS/DPF 10.1 Upper level windows facing side or rear boundaries shared with a residential allotment/site satisfy one of the following: (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm (b) have sill heights greater than or equal to 1.5m above finished floor level (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.
PO 10.2 Development mitigates direct overlooking from balconies, terraces and decks to habitable rooms and private open space of adjoining residential uses.	DTS/DPF 10.2 One of the following is satisfied:

- (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or
- (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:
 - (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or
 - (ii) 1.7m above finished floor level in all other cases

All Residential development

Front elevations and passive surveillance

<p>PO 11.1</p> <p>Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.</p>	<p>DTS/DPF 11.1</p> <p>Each dwelling with a frontage to a public street:</p> <ul style="list-style-type: none"> (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least 2m² facing the primary street.
---	--

<p>PO 11.2</p> <p>Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.</p>	<p>DTS/DPF 11.2</p> <p>Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.</p>
---	--

Outlook and amenity

<p>PO 12.1</p> <p>Living rooms have an external outlook to provide a high standard of amenity for occupants.</p>	<p>DTS/DPF 12.1</p> <p>A living room of a dwelling incorporates a window with an outlook towards the street frontage or private open space, public open space, or waterfront areas.</p>
--	---

<p>PO 12.2</p> <p>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.</p>	<p>DTS/DPF 12.2</p> <p>None are applicable.</p>
---	---

Ancillary Development

<p>PO 13.1</p> <p>Residential ancillary buildings and structures are sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.</p>	<p>DTS/DPF 13.1</p> <p>Ancillary buildings:</p> <ul style="list-style-type: none"> (a) are ancillary to a dwelling erected on the same site (b) have a floor area not exceeding 60m² (c) are not constructed, added to or altered so that any part is situated: <ul style="list-style-type: none"> (i) in front of any part of the building line of the dwelling to which it is ancillary or (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads) (d) in the case of a garage or carport, the garage or carport: <ul style="list-style-type: none"> (i) is set back at least 5.5m from the boundary of the primary street (ii) when facing a primary street or secondary street, has a total door / opening not exceeding: <ul style="list-style-type: none"> A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless: <ul style="list-style-type: none"> (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure (h) have a wall height or post height not exceeding 3m above natural ground level (i) have a roof height where no part of the roof is more than 5m above the natural ground level (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less: <ul style="list-style-type: none"> (i) a total area as determined by the following table:
--	--

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m ²)	Minimum percentage of site
<150	10%
150-200	15%

201-450	20%
>450	25%

(ii) the amount of existing soft landscaping prior to the development occurring.

PO 13.2
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision or car parking requirements and do not result in over-development of the site.

DTS/DPF 13.2
Ancillary buildings and structures do not result in:
(a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
(b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 13.3
Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa is positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 13.3
The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:
(a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment
or
(b) located at least 12m from the nearest habitable room located on an adjoining allotment.

Garage appearance

PO 14.1
Garaging is designed to not detract from the streetscape or appearance of a dwelling.

DTS/DPF 14.1
Garages and carports facing a street:
(a) are situated so that no part of the garage or carport is in front of any part of the building line of the dwelling
(b) are set back at least 5.5m from the boundary of the primary street
(c) have a garage door / opening not exceeding 7m in width
(d) have a garage door /opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street.

Massing

PO 15.1
The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.

DTS/DPF 15.1
None are applicable

Dwelling additions

PO 16.1
Dwelling additions are sited and designed to not detract from the streetscape or amenity of adjoining properties and do not impede on-site functional requirements.

DTS / DPF 16.1
Dwelling additions:
(a) are not constructed, added to or altered so that any part is situated closer to a public street
(b) do not result in:
(i) excavation exceeding a vertical height of 1m
(ii) filling exceeding a vertical height of 1m
(iii) a total combined excavation and filling vertical height of 2m or more
(iv) less Private Open Space than specified in Design Table 1 - Private Open Space
(v) less on-site parking than specified in Transport Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas
(vi) upper level windows facing side or rear boundaries unless:
A. they are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm
or
B. have sill heights greater than or equal to 1.5m above finished floor level
or
C. incorporate screening to a height of 1.5m above finished floor level
(vii) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:
A. 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land
B. 1.7m above finished floor level in all other cases.

Private Open Space

PO 17.1
Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.

DTS/DPF 17.1
Private open space is provided in accordance with Design Table 1 - Private Open Space.

<p>PO 18.1</p> <p>Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.</p>	<p>DTS/DPF 18.1</p> <p>Residential development creating a common driveway / access that services 5 or more dwellings achieves the following stormwater runoff outcomes:</p> <ul style="list-style-type: none"> (a) 80 per cent reduction in average annual total suspended solids (b) 60 per cent reduction in average annual total phosphorus (c) 45 per cent reduction in average annual total nitrogen.
<p>PO 18.2</p> <p>Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.</p>	<p>DTS/DPF 18.2</p> <p>Development creating a common driveway / access that services 5 or more dwellings:</p> <ul style="list-style-type: none"> (a) maintains the pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 18.1% AEP 30-minute storm and the stormwater runoff time to peak is not increased or captures and retains the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for an 18.1% AEP 30-minute storm; and (b) manages site generated stormwater runoff up to and including the 1% AEP flood event to avoid flooding of buildings.
<p>Car parking, access and manoeuvrability</p>	
<p>PO 19.1</p> <p>Enclosed parking spaces are of a size and dimensions to be functional, accessible and convenient.</p>	<p>DTS/DPF 19.1</p> <p>Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area):</p> <ul style="list-style-type: none"> (a) single width car parking spaces: <ul style="list-style-type: none"> (i) a minimum length of 5.4m per space (ii) a minimum width of 3.0m (iii) a minimum garage door width of 2.4m (b) double width car parking spaces (side by side): <ul style="list-style-type: none"> (i) a minimum length of 5.4m (ii) a minimum width of 5.4m (iii) minimum garage door width of 2.4m per space.
<p>PO 19.2</p> <p>Uncovered parking spaces are of a size and dimensions to be functional, accessible and convenient.</p>	<p>DTS/DPF 19.2</p> <p>Uncovered car parking spaces have:</p> <ul style="list-style-type: none"> (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m
<p>PO 19.3</p> <p>Driveways are located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages, domestic waste collection and on-street parking.</p>	<p>DTS/DPF 19.3</p> <p>Driveways and access points on sites with a frontage to a public road of 10m or less have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site.</p>
<p>PO 19.4</p> <p>Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.</p>	<p>DTS/DPF 19.4</p> <p>Vehicle access to designated car parking spaces satisfy (a) or (b):</p> <ul style="list-style-type: none"> (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed: <ul style="list-style-type: none"> (i) is set back 6m or more from the tangent point of an intersection of 2 or more roads (ii) is set back outside of the marked lines or infrastructure dedicating a pedestrian crossing (iii) does not involve the removal, relocation or damage to of mature street trees, street furniture or utility infrastructure services.
<p>PO 19.5</p> <p>Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.</p>	<p>DTS/DPF 19.5</p> <p>Driveways are designed and sited so that:</p> <ul style="list-style-type: none"> (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport is not steeper than 1:4 on average (b) they are aligned relative to the street boundary so that there is no more than a 20 degree deviation from 90 degrees between the centreline of any dedicated car parking space to which it provides access (measured from the front of that space) and the street boundary (c) if located to provide access from an alley, lane or right of way - the alley, land or right of way is at least 6.2m wide along the boundary of the allotment / site
<p>PO 19.6</p> <p>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.</p>	<p>DTS/DPF 19.6</p> <p>Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:</p>

- (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number)
- (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly
- (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

Waste storage

PO 20.1
Provision is made for the adequate and convenient storage of waste bins in a location screened from public view.

DTS/DPF 20.1
None are applicable.

Design of Transportable Dwellings

PO 21.1
The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.

DTS/DPF 21.1
Buildings satisfy (a) or (b):

- (a) are not transportable
or
- (b) the sub-floor space between the building and ground level is clad in a material and finish consistent with the building.

Group dwelling, residential flat buildings and battle-axe development

Amenity

PO 22.1
Dwellings are of a suitable size to accommodate a layout that is well organised and provides a high standard of amenity for occupants.

DTS/DPF 22.1
Dwellings have a minimum internal floor area in accordance with the following table:

Number of bedrooms	Minimum internal floor area
Studio	35m ²
1 bedroom	50m ²
2 bedroom	65m ²
3+ bedrooms	80m ² and any dwelling over 3 bedrooms provides an additional 15m ² for every additional bedroom

PO 22.2
The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

DTS/DPF 22.2
None are applicable.

PO 22.3
Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.

DTS/DPF 22.3
None are applicable.

PO 22.4
Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.

DTS/DPF 22.4
Dwelling sites/allotments are not in the form of a battle-axe arrangement.

Communal Open Space

PO 23.1
Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.

DTS/DPF 23.1
None are applicable.

PO 23.2
Communal open space is of sufficient size and dimensions to cater for group recreation.

DTS/DPF 23.2
Communal open space incorporates a minimum dimension of 5 metres.

PO 23.3
Communal open space is designed and sited to:

- (a) be conveniently accessed by the dwellings which it services
- (b) have regard to acoustic, safety, security and wind effects.

DTS/DPF 23.3
None are applicable.

PO 23.4
Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.

DTS/DPF 23.4
None are applicable.

PO 23.5
Communal open space is designed and sited to:

- (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings
- (b) in relation to ground floor communal space, be overlooked by habitable rooms to

DTS/DPF 23.5
None are applicable.

Carparking, access and manoeuvrability	
<p>PO 24.1</p> <p>Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.</p>	<p>DTS/DPF 24.1</p> <p>Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:</p> <ul style="list-style-type: none"> (a) minimum 0.33 on-street car parks per proposed dwellings (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
<p>PO 24.2</p> <p>The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.</p>	<p>DTS/DPF 24.2</p> <p>Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.</p>
<p>PO 24.3</p> <p>Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.</p>	<p>DTS/DPF 24.3</p> <p>Driveways that service more than 1 dwelling or a dwelling on a battle-axe site:</p> <ul style="list-style-type: none"> (a) have a minimum width of 3m (b) for driveways servicing more than 3 dwellings: <ul style="list-style-type: none"> (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.
<p>PO 24.4</p> <p>Residential driveways in a battle-axe configuration are designed to allow safe and convenient movement.</p>	<p>DTS/DPF 24.4</p> <p>Where in a battle-axe configuration, a driveway servicing one dwelling has a minimum width of 3m.</p>
<p>PO 24.5</p> <p>Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.</p>	<p>DTS/DPF 24.5</p> <p>Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.</p>
<p>PO 24.6</p> <p>Dwellings are adequately separated from common driveways and manoeuvring areas.</p>	<p>DTS/DPF 24.6</p> <p>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.</p>
Soft Landscaping	
<p>PO 25.1</p> <p>Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.</p>	<p>DTS/DPF 25.1</p> <p>Other than where located directly in front of a garage or a building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.</p>
<p>PO 25.2</p> <p>Soft landscaping is provided that improves the appearance of common driveways.</p>	<p>DTS/DPF 25.2</p> <p>Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).</p>
Site Facilities / Waste Storage	
<p>PO 26.1</p> <p>Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.</p>	<p>DTS/DPF 26.1</p> <p>None are applicable.</p>
<p>PO 26.2</p> <p>Provision is made for suitable external clothes drying facilities.</p>	<p>DTS/DPF 26.2</p> <p>None are applicable.</p>
<p>PO 26.3</p> <p>Provision is made for suitable household waste and recyclable material storage facilities which are:</p> <ul style="list-style-type: none"> (a) located away, or screened, from public view, and (b) conveniently located in proximity to dwellings and the waste collection point. 	<p>DTS/DPF 26.3</p> <p>None are applicable.</p>
<p>PO 26.4</p> <p>Waste and recyclable material storage areas are located away from dwellings.</p>	<p>DTS/DPF 26.4</p> <p>Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.</p>
<p>PO 26.5</p> <p>Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.</p>	<p>DTS/DPF 26.5</p> <p>None are applicable.</p>
<p>PO 26.6</p>	<p>DTS/DPF 26.6</p>

Planning and Design Code - 26 August - Version 2021.12
 Services including gas and water meters are conveniently located and screened from public view.

None are applicable.

Supported accommodation and retirement facilities

Siting and Configuration

PO 27.1 Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.	DTS/DPF 27.1 None are applicable.
--	--------------------------------------

Movement and Access

PO 28.1 Development is designed to support safe and convenient access and movement for residents by providing: (a) ground-level access or lifted access to all units (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places (c) car parks with gradients no steeper than 1-in-40 and of sufficient area to provide for wheelchair manoeuvrability (d) kerb ramps at pedestrian crossing points.	DTS/DPF 28.1 None are applicable.
--	--------------------------------------

Communal Open Space

PO 29.1 Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.	DTS/DPF 29.1 None are applicable.
--	--------------------------------------

PO 29.2 Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.	DTS/DPF 29.2 None are applicable.
---	--------------------------------------

PO 29.3 Communal open space is of sufficient size and dimensions to cater for group recreation.	DTS/DPF 29.3 Communal open space incorporates a minimum dimension of 5 metres.
--	---

PO 29.4 Communal open space is designed and sited to: (a) be conveniently accessed by the dwellings which it services (b) have regard to acoustic, safety, security and wind effects.	DTS/DPF 29.4 None are applicable.
--	--------------------------------------

PO 29.5 Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.	DTS/DPF 29.5 None are applicable.
--	--------------------------------------

PO 29.6 Communal open space is designed and sited to: (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.	DTS/DPF 29.6 None are applicable.
--	--------------------------------------

Site Facilities / Waste Storage

PO 30.1 Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.	DTS/DPF 30.1 None are applicable.
---	--------------------------------------

PO 30.2 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.	DTS/DPF 30.2 None are applicable.
---	--------------------------------------

PO 30.3 Provision is made for suitable external clothes drying facilities.	DTS/DPF 28.3 None are applicable.
---	--------------------------------------

PO 30.4 Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view.	DTS/DPF 30.4 None are applicable.
--	--------------------------------------

PO 30.5 Waste and recyclable material storage areas are located away from dwellings.	DTS/DPF 30.5 Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.
---	---

PO 30.6 Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.	DTS/DPF 30.6 None are applicable.
--	--------------------------------------

PO 30.7 Services including gas and water meters are conveniently located and screened from public view.	DTS/DPF 30.7 None are applicable.
All non-residential development	
Water Sensitive Design	
PO 31.1 Development likely to result in significant risk of export of litter, oil or grease includes stormwater management systems designed to minimise pollutants entering stormwater.	DTS/DPF 31.1 None are applicable.
PO 31.2 Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state.	DTS/DPF 31.2 None are applicable.
Wash-down and Waste Loading and Unloading	
PO 32.1 Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, vessels, plant or equipment are: (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off (b) paved with an impervious material to facilitate wastewater collection (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area (d) designed to drain wastewater to either: (i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme or (ii) a holding tank and its subsequent removal off-site on a regular basis.	DTS/DPF 32.1 None are applicable.

Table 1 - Private Open Space

Dwelling Type	Minimum Rate
Dwelling (at ground level)	Total private open space area: (a) Site area <301m ² : 24m ² located behind the building line. (b) Site area ≥ 301m ² : 60m ² located behind the building line. Minimum directly accessible from a living room: 16m ² / with a minimum dimension 3m.
Dwelling (above ground level)	Studio (no separate bedroom): 4m ² with a minimum dimension 1.8m One bedroom: 8m ² with a minimum dimension 2.1m Two bedroom dwelling: 11m ² with a minimum dimension 2.4m Three + bedroom dwelling: 15m ² with a minimum dimension 2.6m
Cabin or caravan (permanently fixed to the ground) in a residential park or a caravan and tourist park	Total area: 16m ² , which may be used as second car parking space, provided on each site intended for residential occupation.

Design in Urban Areas

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is: (a) contextual - by considering, recognising and carefully responding to its natural surroundings or built environment and positively contributing to the character of the locality (b) durable - fit for purpose, adaptable and long lasting (c) inclusive - by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access and promoting the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors (d) sustainable - by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
All Development	
External Appearance	
PO 1.1 Buildings reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).	DTS/DPF 1.1 None are applicable.
PO 1.2 Where zero or minor setbacks are desirable, development provides shelter over footpaths (in the form of verandahs, awnings, canopies and the like, with adequate lighting) to positively contribute to the walkability, comfort and safety of the public realm.	DTS/DPF 1.2 None are applicable.
PO 1.3 Building elevations facing the primary street (other than ancillary buildings) are designed and detailed to convey purpose, identify main access points and complement the streetscape.	DTS/DPF 1.3 None are applicable.
PO 1.4 Plant, exhaust and intake vents and other technical equipment are integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by: <ul style="list-style-type: none"> (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces (b) screening rooftop plant and equipment from view (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses. 	DTS/DPF 1.4 Development does not incorporate any structures that protrude beyond the roofline.
PO 1.5 The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form), taking into account the form of development contemplated in the relevant zone.	DTS/DPF 1.5 None are applicable.
Safety	
PO 2.1 Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.	DTS/DPF 2.1 None are applicable.
PO 2.2 Development is designed to differentiate public, communal and private areas.	DTS/DPF 2.2 None are applicable.
PO 2.3 Buildings are designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.	DTS/DPF 2.3 None are applicable.
PO 2.4 Development at street level is designed to maximise opportunities for passive surveillance of the adjacent public realm.	DTS/DPF 2.4 None are applicable.
PO 2.5 Common areas and entry points of buildings (such as the foyer areas of residential buildings) and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.	DTS/DPF 2.5 None are applicable.
Landscaping	
PO 3.1 Soft landscaping and tree planting are incorporated to: <ul style="list-style-type: none"> (a) minimise heat absorption and reflection (b) maximise shade and shelter (c) maximise stormwater infiltration (d) enhance the appearance of land and streetscapes. 	DTS/DPF 3.1 None are applicable.
Environmental Performance	
PO 4.1 Buildings are sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.	DTS/DPF 4.1 None are applicable.
PO 4.2 Buildings are sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and	DTS/DPF 4.2 None are applicable.

<p>PO 4.3</p> <p>Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.</p>	<p>DTS/DPF 4.3</p> <p>None are applicable.</p>
<p>Water Sensitive Design</p>	
<p>PO 5.1</p> <p>Development is sited and designed to maintain natural hydrological systems without negatively impacting:</p> <ul style="list-style-type: none"> (a) the quantity and quality of surface water and groundwater (b) the depth and directional flow of surface water and groundwater (c) the quality and function of natural springs. 	<p>DTS/DPF 5.1</p> <p>None are applicable.</p>
<p>On-site Waste Treatment Systems</p>	
<p>PO 6.1</p> <p>Dedicated on-site effluent disposal areas do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.</p>	<p>DTS/DPF 6.1</p> <p>Effluent disposal drainage areas do not:</p> <ul style="list-style-type: none"> (a) encroach within an area used as private open space or result in less private open space than that specified in Design in Urban Areas Table 1 - Private Open Space (b) use an area also used as a driveway (c) encroach within an area used for on-site car parking or result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.
<p>Car parking appearance</p>	
<p>PO 7.1</p> <p>Development facing the street is designed to minimise the negative impacts of any semi-basement and undercroft car parking on streetscapes through techniques such as:</p> <ul style="list-style-type: none"> (a) limiting protrusion above finished ground level (b) screening through appropriate planting, fencing and mounding (c) limiting the width of openings and integrating them into the building structure. 	<p>DTS/DPF 7.1</p> <p>None are applicable.</p>
<p>PO 7.2</p> <p>Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced and the like.</p>	<p>DTS/DPF 7.2</p> <p>None are applicable.</p>
<p>PO 7.3</p> <p>Safe, legible, direct and accessible pedestrian connections are provided between parking areas and the development.</p>	<p>DTS/DPF 7.3</p> <p>None are applicable.</p>
<p>PO 7.4</p> <p>Street-level vehicle parking areas incorporate tree planting to provide shade, reduce solar heat absorption and reflection.</p>	<p>DTS/DPF 7.4</p> <p>Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.</p>
<p>PO 7.5</p> <p>Street level parking areas incorporate soft landscaping to improve visual appearance when viewed from within the site and from public places.</p>	<p>DTS/DPF 7.5</p> <p>Vehicle parking areas comprising 10 or more car parking spaces include soft landscaping with a minimum dimension of:</p> <ul style="list-style-type: none"> (a) 1m along all public road frontages and allotment boundaries (b) 1m between double rows of car parking spaces.
<p>PO 7.6</p> <p>Vehicle parking areas and associated driveways are landscaped to provide shade and positively contribute to amenity.</p>	<p>DTS/DPF 7.6</p> <p>None are applicable.</p>
<p>PO 7.7</p> <p>Vehicle parking areas and access ways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with soft landscaping.</p>	<p>DTS/DPF 7.7</p> <p>None are applicable.</p>
<p>Earthworks and sloping land</p>	
<p>PO 8.1</p> <p>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.</p>	<p>DTS/DPF 8.1</p> <p>Development does not involve any of the following:</p> <ul style="list-style-type: none"> (a) excavation exceeding a vertical height of 1m (b) filling exceeding a vertical height of 1m (c) a total combined excavation and filling vertical height of 2m or more.
<p>PO 8.2</p> <p>Driveways and access tracks designed and constructed to allow safe and convenient access on sloping land.</p>	<p>DTS/DPF 8.2</p> <p>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8) satisfy (a) and (b):</p>

	<ul style="list-style-type: none"> (a) do not have a gradient exceeding 25% (1-in-4) at any point along the driveway (b) are constructed with an all-weather trafficable surface.
<p>PO 8.3</p> <p>Driveways and access tracks on sloping land (with a gradient exceeding 1 in 8):</p> <ul style="list-style-type: none"> (a) do not contribute to the instability of embankments and cuttings (b) provide level transition areas for the safe movement of people and goods to and from the development (c) are designed to integrate with the natural topography of the land. 	<p>DTS/DPF 8.3</p> <p>None are applicable.</p>
<p>PO 8.4</p> <p>Development on sloping land (with a gradient exceeding 1 in 8) avoids the alteration of natural drainage lines and includes on site drainage systems to minimise erosion.</p>	<p>DTS/DPF 8.4</p> <p>None are applicable.</p>
<p>PO 8.5</p> <p>Development does not occur on land at risk of landslip or increase the potential for landslip or land surface instability.</p>	<p>DTS/DPF 8.5</p> <p>None are applicable.</p>
Fences and walls	
<p>PO 9.1</p> <p>Fences, walls and retaining walls of sufficient height maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight or the amenity of public places.</p>	<p>DTS/DPF 9.1</p> <p>None are applicable.</p>
<p>PO 9.2</p> <p>Landscaping is incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.</p>	<p>DTS/DPF 9.2</p> <p>A vegetated landscaped strip 1m wide or more is provided against the low side of a retaining wall.</p>
Overlooking / Visual Privacy (low rise buildings)	
<p>PO 10.1</p> <p>Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses in neighbourhood-type zones.</p>	<p>DTS/DPF 10.1</p> <p>Upper level windows facing side or rear boundaries shared with a residential use in a neighbourhood-type zone:</p> <ul style="list-style-type: none"> (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 125mm (b) have sill heights greater than or equal to 1.5m above finished floor level (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5 m above the finished floor level.
<p>PO 10.2</p> <p>Development mitigates direct overlooking from balconies to habitable rooms and private open space of adjoining residential uses in neighbourhood type zones.</p>	<p>DTS/DPF 10.2</p> <p>One of the following is satisfied:</p> <ul style="list-style-type: none"> (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of: <ul style="list-style-type: none"> (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or (ii) 1.7m above finished floor level in all other cases
Site Facilities / Waste Storage (excluding low rise residential development)	
<p>PO 11.1</p> <p>Development provides a dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection.</p>	<p>DTS/DPF 11.1</p> <p>None are applicable.</p>
<p>PO 11.2</p> <p>Communal waste storage and collection areas are located, enclosed and designed to be screened from view from the public domain, open space and dwellings.</p>	<p>DTS/DPF 11.2</p> <p>None are applicable.</p>
<p>PO 11.3</p> <p>Communal waste storage and collection areas are designed to be well ventilated and located away from habitable rooms.</p>	<p>DTS/DPF 11.3</p> <p>None are applicable.</p>
<p>PO 11.4</p> <p>Communal waste storage and collection areas are designed to allow waste and recycling collection vehicles to enter and leave the site without reversing.</p>	<p>DTS/DPF 11.4</p> <p>None are applicable.</p>
<p>PO 11.5</p> <p>For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate.</p>	<p>DTS/DPF 11.5</p> <p>None are applicable.</p>
All Development - Medium and High Rise	
External Appearance	
<p>PO 12.1</p> <p>Buildings positively contribute to the character of the local area by responding to local context.</p>	<p>DTS/DPF 12.1</p> <p>None are applicable.</p>

<p>PO 12.2 Architectural detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale.</p>	<p>DTS/DPF 12.2 None are applicable.</p>
<p>PO 12.3 Buildings are designed to reduce visual mass by breaking up building elevations into distinct elements.</p>	<p>DTS/DPF 12.3 None are applicable.</p>
<p>PO 12.4 Boundary walls visible from public land include visually interesting treatments to break up large blank elevations.</p>	<p>DTS/DPF 12.4 None are applicable.</p>
<p>PO 12.5 External materials and finishes are durable and age well to minimise ongoing maintenance requirements.</p>	<p>DTS/DPF 12.5 Buildings utilise a combination of the following external materials and finishes: (a) masonry (b) natural stone (c) pre-finished materials that minimise staining, discolouring or deterioration.</p>
<p>PO 12.6 Street-facing building elevations are designed to provide attractive, high quality and pedestrian-friendly street frontages.</p>	<p>DTS/DPF 12.6 Building street frontages incorporate: (a) active uses such as shops or offices (b) prominent entry areas for multi-storey buildings (where it is a common entry) (c) habitable rooms of dwellings (d) areas of communal public realm with public art or the like, where consistent with the zone and/or subzone provisions.</p>
<p>PO 12.7 Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character.</p>	<p>DTS/DPF 12.7 Entrances to multi-storey buildings are: (a) oriented towards the street (b) clearly visible and easily identifiable from the street and vehicle parking areas (c) designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses (d) designed to provide shelter, a sense of personal address and transitional space around the entry (e) located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors (f) designed to avoid the creation of potential areas of entrapment.</p>
<p>PO 12.8 Building services, plant and mechanical equipment are screened from the public realm.</p>	<p>DTS/DPF 12.8 None are applicable.</p>

Landscaping

<p>PO 13.1 Development facing a street provides a well landscaped area that contains a deep soil space to accommodate a tree of a species and size adequate to provide shade, contribute to tree canopy targets and soften the appearance of buildings.</p>	<p>DTS/DPF 13.1 Buildings provide a 4m by 4m deep soil space in front of the building that accommodates a medium to large tree, except where no building setback from front property boundaries is desired.</p>																								
<p>PO 13.2 Deep soil zones are provided to retain existing vegetation or provide areas that can accommodate new deep root vegetation, including tall trees with large canopies to provide shade and soften the appearance of multi-storey buildings.</p>	<p>DTS/DPF 13.2 Multi-storey development provides deep soil zones and incorporates trees at not less than the following rates, except in a location or zone where full site coverage is desired.</p> <table border="1" data-bbox="802 1541 1552 1888"> <thead> <tr> <th>Site area</th> <th>Minimum deep soil area</th> <th>Minimum dimension</th> <th>Tree / deep soil zones</th> </tr> </thead> <tbody> <tr> <td><300 m²</td> <td>10 m²</td> <td>1.5m</td> <td>1 small tree / 10 m²</td> </tr> <tr> <td>300-1500 m²</td> <td>7% site area</td> <td>3m</td> <td>1 medium tree / 30 m²</td> </tr> <tr> <td>>1500 m²</td> <td>7% site area</td> <td>6m</td> <td>1 large or medium tree / 60 m²</td> </tr> </tbody> </table> <p>Tree size and site area definitions</p> <table border="1" data-bbox="802 1928 1552 2190"> <tbody> <tr> <td>Small tree</td> <td>4-6m mature height and 2-4m canopy spread</td> </tr> <tr> <td>Medium tree</td> <td>6-12m mature height and 4-8m canopy spread</td> </tr> <tr> <td>Large tree</td> <td>12m mature height and >8m canopy spread</td> </tr> <tr> <td>Site area</td> <td>The total area for development site, not average area per dwelling</td> </tr> </tbody> </table>	Site area	Minimum deep soil area	Minimum dimension	Tree / deep soil zones	<300 m ²	10 m ²	1.5m	1 small tree / 10 m ²	300-1500 m ²	7% site area	3m	1 medium tree / 30 m ²	>1500 m ²	7% site area	6m	1 large or medium tree / 60 m ²	Small tree	4-6m mature height and 2-4m canopy spread	Medium tree	6-12m mature height and 4-8m canopy spread	Large tree	12m mature height and >8m canopy spread	Site area	The total area for development site, not average area per dwelling

<p>Planning and Design Code - 26 August - Version 2021.12 PO 13.3</p> <p>Deep soil zones with access to natural light are provided to assist in maintaining vegetation health.</p>	<p>DTS/DPF 13.3</p> <p>None are applicable.</p>
<p>PO 13.4</p> <p>Unless separated by a public road or reserve, development sites adjacent to any zone that has a primary purpose of accommodating low-rise residential development incorporate a deep soil zone along the common boundary to enable medium to large trees to be retained or established to assist in screening new buildings of 3 or more building levels in height.</p>	<p>DTS/DPF 13.4</p> <p>Building elements of 3 or more building levels in height are set back at least 6m from a zone boundary in which a deep soil zone area is incorporated.</p>
<p>Environmental</p>	
<p>PO 14.1</p> <p>Development minimises detrimental micro-climatic impacts on adjacent land and buildings.</p>	<p>DTS/DPF 14.1</p> <p>None are applicable.</p>
<p>PO 14.2</p> <p>Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting and use, green walls and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells.</p>	<p>DTS/DPF 14.2</p> <p>None are applicable.</p>
<p>PO 14.3</p> <p>Development of 5 or more building levels, or 21m or more in height (as measured from natural ground level and excluding roof-mounted mechanical plant and equipment) is designed to minimise the impacts of wind through measures such as:</p> <ul style="list-style-type: none"> (a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street (b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas (c) the placement of buildings and use of setbacks to deflect the wind at ground level (d) avoiding tall shear elevations that create windy conditions at street level. 	<p>DTS/DPF 14.3</p> <p>None are applicable.</p>
<p>Car Parking</p>	
<p>PO 15.1</p> <p>Multi-level vehicle parking structures are designed to contribute to active street frontages and complement neighbouring buildings.</p>	<p>DTS/DPF 15.1</p> <p>Multi-level vehicle parking structures within buildings:</p> <ul style="list-style-type: none"> (a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages (b) incorporate facade treatments in building elevations facing along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings.
<p>PO 15.2</p> <p>Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale.</p>	<p>DTS/DPF 15.2</p> <p>None are applicable.</p>
<p>Overlooking/Visual Privacy</p>	
<p>PO 16.1</p> <p>Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent residential uses in neighbourhood-type zones through measures such as:</p> <ul style="list-style-type: none"> (a) appropriate site layout and building orientation (b) off-setting the location of balconies and windows of habitable rooms or areas with those of other buildings so that views are oblique rather than direct to avoid direct line of sight (c) building setbacks from boundaries (including building boundary to boundary where appropriate) that interrupt views or that provide a spatial separation between balconies or windows of habitable rooms (d) screening devices that are integrated into the building design and have minimal negative effect on residents' or neighbours' amenity. 	<p>DTS/DPF 16.1</p> <p>None are applicable.</p>
<p>All residential development</p>	
<p>Front elevations and passive surveillance</p>	
<p>PO 17.1</p> <p>Dwellings incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.</p>	<p>DTS/DPF 17.1</p> <p>Each dwelling with a frontage to a public street:</p> <ul style="list-style-type: none"> (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least 2m² facing the primary street.
<p>PO 17.2</p> <p>Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.</p>	<p>DTS/DPF 17.2</p> <p>Dwellings with a frontage to a public street have an entry door visible from the primary street boundary.</p>
<p>Outlook and Amenity</p>	
<p>PO 18.1</p> <p>Living rooms have an external outlook to provide a high standard of amenity for occupants.</p>	<p>DTS/DPF 18.1</p> <p>A living room of a dwelling incorporates a window with an external outlook of the street</p>

PO 18.2
Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

DTS/DPF 18.2
None are applicable.

Ancillary Development

PO 19.1
Residential ancillary buildings are sited and designed to not detract from the streetscape or appearance of primary residential buildings on the site or neighbouring properties.

DTS/DPF 19.1
Ancillary buildings:

- (a) are ancillary to a dwelling erected on the same site
- (b) have a floor area not exceeding 60m²
- (c) are not constructed, added to or altered so that any part is situated:
 - (i) in front of any part of the building line of the dwelling to which it is ancillary or
 - (ii) within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (d) in the case of a garage or carport, the garage or carport:
 - (i) is set back at least 5.5m from the boundary of the primary street
 - (ii) when facing a primary street or secondary street, has a total door / opening not exceeding:
 - A. for dwellings of single building level - 7m in width or 50% of the site frontage, whichever is the lesser
 - B. for dwellings comprising two or more building levels at the building line fronting the same public street - 7m in width
- (e) if situated on a boundary (not being a boundary with a primary street or secondary street), do not exceed a length of 11.5m unless:
 - (i) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary and
 - (ii) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (f) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary will not exceed 45% of the length of that boundary
- (g) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or about the proposed wall or structure
- (h) have a wall height or post height not exceeding 3m above natural ground level
- (i) have a roof height where no part of the roof is more than 5m above the natural ground level
- (j) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour
- (k) retains a total area of soft landscaping in accordance with (i) or (ii), whichever is less:
 - (i) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m ²)	Minimum percentage of site
<150	10%
150-200	15%
201-450	20%
>450	25%
 - (ii) the amount of existing soft landscaping prior to the development occurring.

PO 19.2
Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

DTS/DPF 19.2
Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 - Private Open Space
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas.

PO 19.3
Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

DTS/DPF 19.3
The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

<p>PO 20.1</p> <p>Garaging is designed to not detract from the streetscape or appearance of a dwelling.</p>	<p>DTS/DPF 20.1</p> <p>Garages and carports facing a street:</p> <ul style="list-style-type: none"> (a) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling (b) are set back at least 5.5m from the boundary of the primary street (c) have a garage door / opening width not exceeding 7m (d) have a garage door / opening width not exceeding 50% of the site frontage unless the dwelling has two or more building levels at the building line fronting the same public street.
---	--

<p>PO 20.2</p> <p>Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and the appearance of common driveway areas.</p>	<p>DTS/DPF 20.2</p> <p>Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway:</p> <ul style="list-style-type: none"> (a) a minimum of 30% of the building wall is set back an additional 300mm from the building line (b) a porch or portico projects at least 1m from the building wall (c) a balcony projects from the building wall (d) a verandah projects at least 1m from the building wall (e) eaves of a minimum 400mm width extend along the width of the front elevation (f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm (g) a minimum of two different materials or finishes are incorporated on the walls of the front building elevation, with a maximum of 80% of the building elevation in a single material or finish.
---	--

<p>PO 20.3</p> <p>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.</p>	<p>DTS/DPF 20.3</p> <p>None are applicable</p>
---	--

Private Open Space

<p>PO 21.1</p> <p>Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.</p>	<p>DTS/DPF 21.1</p> <p>Private open space is provided in accordance with Design in Urban Areas Table 1 - Private Open Space.</p>
<p>PO 21.2</p> <p>Private open space is positioned to provide convenient access from internal living areas.</p>	<p>DTS/DPF 21.2</p> <p>Private open space is directly accessible from a habitable room.</p>

Landscaping

<p>PO 22.1</p> <p>Soft landscaping is incorporated into development to:</p> <ul style="list-style-type: none"> (a) minimise heat absorption and reflection (b) contribute shade and shelter (c) provide for stormwater infiltration and biodiversity (d) enhance the appearance of land and streetscapes. 	<p>DTS/DPF 22.1</p> <p>Residential development incorporates soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b):</p> <ul style="list-style-type: none"> (a) a total area as determined by the following table: <table border="1" data-bbox="863 1532 1554 1845"> <thead> <tr> <th>Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m²)</th> <th>Minimum percentage of site</th> </tr> </thead> <tbody> <tr> <td><150</td> <td>10%</td> </tr> <tr> <td>150-200</td> <td>15%</td> </tr> <tr> <td>>200-450</td> <td>20%</td> </tr> <tr> <td>>450</td> <td>25%</td> </tr> </tbody> </table> <ul style="list-style-type: none"> (b) at least 30% of any land between the primary street boundary and the primary building line. Car parking, access and manoeuvrability

<p>PO 23.1</p> <p>Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.</p>	<p>DTS/DPF 23.1</p> <p>Residential car parking spaces enclosed by fencing, walls or other structures have the following internal dimensions (separate from any waste storage area):</p> <ul style="list-style-type: none"> (a) single width car parking spaces: <ul style="list-style-type: none"> (i) a minimum length of 5.4m per space (ii) a minimum width of 3.0m (iii) a minimum garage door width of 2.4m
--	---

	<p>(b) double width car parking spaces (side by side):</p> <ul style="list-style-type: none"> (i) a minimum length of 5.4m (ii) a minimum width of 5.4m (iii) minimum garage door width of 2.4m per space.
<p>PO 23.2 Uncovered car parking space are of dimensions to be functional, accessible and convenient.</p>	<p>DTS/DPF 23.2 Uncovered car parking spaces have:</p> <ul style="list-style-type: none"> (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m.
<p>PO 23.3 Driveways and access points are located and designed to facilitate safe access and egress while maximising land available for street tree planting, domestic waste collection, landscaped street frontages and on-street parking.</p>	<p>DTS/DPF 23.3 Driveways and access points satisfy (a) or (b):</p> <ul style="list-style-type: none"> (a) sites with a frontage to a public road of 10m or less, have a width between 3.0 and 3.2 metres measured at the property boundary and are the only access point provided on the site (b) sites with a frontage to a public road greater than 10m: <ul style="list-style-type: none"> (i) have a maximum width of 5m measured at the property boundary and are the only access point provided on the site; (ii) have a width between 3.0 metres and 3.2 metres measured at the property boundary and no more than two access points are provided on site, separated by no less than 1m.
<p>PO 23.4 Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.</p>	<p>DTS/DPF 23.4 Vehicle access to designated car parking spaces satisfy (a) or (b):</p> <ul style="list-style-type: none"> (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: <ul style="list-style-type: none"> (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.
<p>PO 23.5 Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.</p>	<p>DTS/DPF 23.5 Driveways are designed and sited so that:</p> <ul style="list-style-type: none"> (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport is not steeper than 1-in-4 on average (b) they are aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of any dedicated car parking space to which it provides access (measured from the front of that space) and the road boundary. (c) if located so as to provide access from an alley, lane or right of way - the alley, lane or right or way is at least 6.2m wide along the boundary of the allotment / site
<p>PO 23.6 Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.</p>	<p>DTS/DPF 23.6 Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:</p> <ul style="list-style-type: none"> (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.

Waste storage

<p>PO 24.1 Provision is made for the convenient storage of waste bins in a location screened from public view.</p>	<p>DTS/DPF 24.1 Where dwellings abut both side boundaries a waste bin storage area is provided behind the building line of each dwelling that:</p> <ul style="list-style-type: none"> (a) has a minimum area of 2m² with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space); and (b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street.
--	--

Design of Transportable Buildings

<p>PO 25.1 The sub-floor space beneath transportable buildings is enclosed to give the appearance of a permanent structure.</p>	<p>DTS/DPF 25.1 Buildings satisfy (a) or (b):</p> <ul style="list-style-type: none"> (a) are not transportable (b) the sub-floor space between the building and ground level is clad in a material and
---	--

Residential Development - Medium and High Rise (including serviced apartments)

Outlook and Visual Privacy

<p>PO 26.1</p> <p>Ground level dwellings have a satisfactory short range visual outlook to public, communal or private open space.</p>	<p>DTS/DPF 26.1</p> <p>Buildings:</p> <ul style="list-style-type: none"> (a) provide a habitable room at ground or first level with a window facing toward the street (b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage.
<p>PO 26.2</p> <p>The visual privacy of ground level dwellings within multi-level buildings is protected.</p>	<p>DTS/DPF 26.2</p> <p>The finished floor level of ground level dwellings in multi-storey developments is raised by up to 1.2m.</p>

Private Open Space

<p>PO 27.1</p> <p>Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.</p>	<p>DTS/DPF 27.1</p> <p>Private open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space.</p>
---	---

Residential amenity in multi-level buildings

<p>PO 28.1</p> <p>Residential accommodation within multi-level buildings have habitable rooms, windows and balconies designed and positioned to be separated from those of other dwellings and accommodation to provide visual and acoustic privacy and allow for natural ventilation and the infiltration of daylight into interior and outdoor spaces.</p>	<p>DTS/DPF 28.1</p> <p>Habitable rooms and balconies of independent dwellings and accommodation are separated by at least 6m from one another where there is a direct line of sight between them and 3m or more from a side or rear property boundary.</p>
<p>PO 28.2</p> <p>Balconies are designed, positioned and integrated into the overall architectural form and detail of the development to:</p> <ul style="list-style-type: none"> (a) respond to daylight, wind, and acoustic conditions to maximise comfort and provide visual privacy (b) allow views and casual surveillance of the street while providing for safety and visual privacy of nearby living spaces and private outdoor areas. 	<p>DTS/DPF 28.2</p> <p>Balconies utilise one or a combination of the following design elements:</p> <ul style="list-style-type: none"> (a) sun screens (b) pergolas (c) louvres (d) green facades (e) openable walls.
<p>PO 28.3</p> <p>Balconies are of sufficient size and depth to accommodate outdoor seating and promote indoor / outdoor living.</p>	<p>DTS/DPF 28.3</p> <p>Balconies open directly from a habitable room and incorporate a minimum dimension of 2m.</p>
<p>PO 28.4</p> <p>Dwellings are provided with sufficient space for storage to meet likely occupant needs.</p>	<p>DTS/DPF 28.4</p> <p>Dwellings (not including student accommodation or serviced apartments) are provided with storage at the following rates with at least 50% or more of the storage volume to be provided within the dwelling:</p> <ul style="list-style-type: none"> (a) studio: not less than 6m³ (b) 1 bedroom dwelling / apartment: not less than 8m³ (c) 2 bedroom dwelling / apartment: not less than 10m³ (d) 3+ bedroom dwelling / apartment: not less than 12m³.
<p>PO 28.5</p> <p>Dwellings that use light wells for access to daylight, outlook and ventilation for habitable rooms, are designed to ensure a reasonable living amenity is provided.</p>	<p>DTS/DPF 28.5</p> <p>Light wells:</p> <ul style="list-style-type: none"> (a) are not used as the primary source of outlook for living rooms (b) up to 18m in height have a minimum horizontal dimension of 3m, or 6m if overlooked by bedrooms (c) above 18m in height have a minimum horizontal dimension of 6m, or 9m if overlooked by bedrooms.
<p>PO 28.6</p> <p>Attached or abutting dwellings are designed to minimise the transmission of sound between dwellings and, in particular, to protect bedrooms from possible noise intrusions.</p>	<p>DTS/DPF 28.6</p> <p>None are applicable.</p>
<p>PO 28.7</p> <p>Dwellings are designed so that internal structural columns correspond with the position of internal walls to ensure that the space within the dwelling/apartment is useable.</p>	<p>DTS/DPF 28.7</p> <p>None are applicable.</p>

Dwelling Configuration

<p>PO 29.1</p> <p>Buildings containing in excess of 10 dwellings provide a variety of dwelling sizes and a range in the number of bedrooms per dwelling to contribute to housing diversity.</p>	<p>DTS/DPF 29.1</p> <p>Buildings containing in excess of 10 dwellings provide at least one of each of the following:</p> <ul style="list-style-type: none"> (a) studio (where there is no separate bedroom) (b) 1 bedroom dwelling / apartment with a floor area of at least 50m² (c) 2 bedroom dwelling / apartment with a floor area of at least 65m² (d) 3+ bedroom dwelling / apartment with a floor area of at least 80m², and any dwelling over 3 bedrooms provides an additional 15m² for every additional bedroom.
---	--

Dwellings located on the ground floor of multi-level buildings with 3 or more bedrooms have the windows of their habitable rooms overlooking internal courtyard space or other public space, where possible.

DTS/DPF 29.2

None are applicable.

Common Areas

PO 30.1

The size of lifts, lobbies and corridors is sufficient to accommodate movement of bicycles, strollers, mobility aids and visitor waiting areas.

DTS/DPF 30.1

Common corridor or circulation areas:

- (a) have a minimum ceiling height of 2.7m
- (b) provide access to no more than 8 dwellings
- (c) incorporate a wider section at apartment entries where the corridors exceed 12m in length from a core.

Group Dwellings, Residential Flat Buildings and Battle axe Development

Amenity

PO 31.1

Dwellings are of a suitable size to provide a high standard of amenity for occupants.

DTS/DPF 31.1

Dwellings have a minimum internal floor area in accordance with the following table:

Number of bedrooms	Minimum internal floor area
Studio	35m ²
1 bedroom	50m ²
2 bedroom	65m ²
3+ bedrooms	80m ² and any dwelling over 3 bedrooms provides an additional 15m ² for every additional bedroom

PO 31.2

The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

DTS/DPF 31.2

None are applicable.

PO 31.3

Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards adjoining properties.

DTS/DPF 31.3

None are applicable.

PO 31.4

Battle-axe development is appropriately sited and designed to respond to the existing neighbourhood context.

DTS/DPF 31.4

Dwelling sites/allotments are not in the form of a battle-axe arrangement.

Communal Open Space

PO 32.1

Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.

DTS/DPF 32.1

None are applicable.

PO 32.2

Communal open space is of sufficient size and dimensions to cater for group recreation.

DTS/DPF 32.2

Communal open space incorporates a minimum dimension of 5 metres.

PO 32.3

Communal open space is designed and sited to:

- (a) be conveniently accessed by the dwellings which it services
- (b) have regard to acoustic, safety, security and wind effects.

DTS/DPF 32.3

None are applicable.

PO 32.4

Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.

DTS/DPF 32.4

None are applicable.

PO 32.5

Communal open space is designed and sited to:

- (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings
- (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.

DTS/DPF 32.5

None are applicable.

Car parking, access and manoeuvrability

PO 33.1

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking.

DTS/DPF 33.1

Where on-street parking is available directly adjacent the site, on-street parking is retained adjacent the subject site in accordance with the following requirements:

- (a) minimum 0.33 on-street car parks per proposed dwelling (rounded up to the nearest whole number)
- (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly

Planning and Design Code - 26 August - Version 2021.12	(c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
PO 33.2 The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.	DTS/DPF 33.2 Access to group dwellings or dwellings within a residential flat building is provided via a single common driveway.
PO 33.3 Residential driveways that service more than one dwelling are designed to allow safe and convenient movement.	DTS/DPF 33.3 Driveways that service more than 1 dwelling or a dwelling on a battle-axe site: (a) have a minimum width of 3m (b) for driveways servicing more than 3 dwellings: (i) have a width of 5.5m or more and a length of 6m or more at the kerb of the primary street (ii) where the driveway length exceeds 30m, incorporate a passing point at least every 30 metres with a minimum width of 5.5m and a minimum length of 6m.
PO 33.4 Residential driveways that service more than one dwelling or a dwelling on a battle-axe site are designed to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 33.4 Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre.
PO 33.5 Dwellings are adequately separated from common driveways and manoeuvring areas.	DTS/DPF 33.5 Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.
Soft landscaping	
PO 34.1 Soft landscaping is provided between dwellings and common driveways to improve the outlook for occupants and appearance of common areas.	DTS/DPF 34.1 Other than where located directly in front of a garage or building entry, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.
PO 34.2 Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.	DTS/DPF 34.2 Battle-axe or common driveways satisfy (a) and (b): (a) are constructed of a minimum of 50% permeable or porous material (b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).
Site Facilities / Waste Storage	
PO 35.1 Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.	DTS/DPF 35.1 None are applicable.
PO 35.2 Provision is made for suitable external clothes drying facilities.	DTS/DPF 35.2 None are applicable.
PO 35.3 Provision is made for suitable household waste and recyclable material storage facilities which are: (a) located away, or screened, from public view, and (b) conveniently located in proximity to dwellings and the waste collection point.	DTS/DPF 35.3 None are applicable.
PO 35.4 Waste and recyclable material storage areas are located away from dwellings.	DTS/DPF 35.4 Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.
PO 35.5 Where waste bins cannot be conveniently collected from the street, provision is made for on-site waste collection, designed to accommodate the safe and convenient access, egress and movement of waste collection vehicles.	DTS/DPF 35.5 None are applicable.
PO 35.6 Services including gas and water meters are conveniently located and screened from public view.	DTS/DPF 35.6 None are applicable.
Water sensitive urban design	
PO 36.1 Residential development creating a common driveway / access includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 36.1 None are applicable.
PO 36.2	DTS/DPF 36.2

Residential development creating a common driveway / access includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.

None are applicable.

Supported Accommodation and retirement facilities

Siting, Configuration and Design

PO 37.1
Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.

DTS/DPF 37.1
None are applicable.

PO 37.2
Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place.

DTS/DPF 37.2
None are applicable.

Movement and Access

PO 38.1
Development is designed to support safe and convenient access and movement for residents by providing:

- (a) ground-level access or lifted access to all units
- (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places
- (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability
- (d) kerb ramps at pedestrian crossing points.

DTS/DPF 38.1
None are applicable.

Communal Open Space

PO 39.1
Development is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors.

DTS/DPF 39.1
None are applicable.

PO 39.2
Private open space provision may be substituted for communal open space which is designed and sited to meet the recreation and amenity needs of residents.

DTS/DPF 39.2
None are applicable.

PO 39.3
Communal open space is of sufficient size and dimensions to cater for group recreation.

DTS/DPF 39.3
Communal open space incorporates a minimum dimension of 5 metres.

PO 39.4
Communal open space is designed and sited to:

- (a) be conveniently accessed by the dwellings which it services
- (b) have regard to acoustic, safety, security and wind effects.

DTS/DPF 39.4
None are applicable.

PO 39.5
Communal open space contains landscaping and facilities that are functional, attractive and encourage recreational use.

DTS/DPF 39.5
None are applicable.

PO 39.6
Communal open space is designed and sited to:

- (a) in relation to rooftop or elevated gardens, minimise overlooking into habitable room windows or onto the useable private open space of other dwellings
- (b) in relation to ground floor communal space, be overlooked by habitable rooms to facilitate passive surveillance.

DTS/DPF 39.6
None are applicable.

Site Facilities / Waste Storage

PO 40.1
Development is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric-powered vehicles.

DTS/DPF 40.1
None are applicable.

PO 40.2
Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS/DPF 40.2
None are applicable.

PO 40.3
Provision is made for suitable external clothes drying facilities.

DTS/DPF 40.3
None are applicable.

PO 40.4
Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view.

DTS/DPF 40.4
None are applicable.

PO 40.5
Waste and recyclable material storage areas are located away from dwellings.

DTS/DPF 40.5
Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

<p>PO 40.6</p> <p>Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.</p>	<p>DTS/DPF 40.6</p> <p>None are applicable.</p>
<p>PO 40.7</p> <p>Services, including gas and water meters, are conveniently located and screened from public view.</p>	<p>DTS/DPF 40.7</p> <p>None are applicable.</p>
<p>Student Accommodation</p>	
<p>PO 41.1</p> <p>Student accommodation is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of student life and promote social interaction.</p>	<p>DTS/DPF 41.1</p> <p>Student accommodation provides:</p> <ul style="list-style-type: none"> (a) a range of living options to meet a variety of accommodation needs, such as one-bedroom, two-bedroom and disability access units (b) common or shared facilities to enable a more efficient use of space, including: <ul style="list-style-type: none"> (i) shared cooking, laundry and external drying facilities (ii) internal and external communal and private open space provided in accordance with Design in Urban Areas Table 1 - Private Open Space (iii) common storage facilities at the rate of 8m³ for every 2 dwellings or students (iv) common on-site parking in accordance with Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas (v) bicycle parking at the rate of one space for every 2 students.
<p>PO 41.2</p> <p>Student accommodation is designed to provide easy adaptation of the building to accommodate an alternative use of the building in the event it is no longer required for student housing.</p>	<p>DTS/DPF 41.2</p> <p>None are applicable.</p>
<p>All non-residential development</p>	
<p>Water Sensitive Design</p>	
<p>PO 42.1</p> <p>Development likely to result in risk of export of sediment, suspended solids, organic matter, nutrients, oil and grease include stormwater management systems designed to minimise pollutants entering stormwater.</p>	<p>DTS/DPF 42.1</p> <p>None are applicable.</p>
<p>PO 42.2</p> <p>Water discharged from a development site is of a physical, chemical and biological condition equivalent to or better than its pre-developed state.</p>	<p>DTS/DPF 42.2</p> <p>None are applicable.</p>
<p>PO 42.3</p> <p>Development includes stormwater management systems to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that development does not increase peak flows in downstream systems.</p>	<p>DTS/DPF 42.3</p> <p>None are applicable.</p>
<p>Wash-down and Waste Loading and Unloading</p>	
<p>PO 43.1</p> <p>Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment are:</p> <ul style="list-style-type: none"> (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off (b) paved with an impervious material to facilitate wastewater collection (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area (d) are designed to drain wastewater to either: <ul style="list-style-type: none"> (i) a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme or (ii) a holding tank and its subsequent removal off-site on a regular basis. 	<p>DTS/DPF 43.1</p> <p>None are applicable.</p>
<p>Laneway Development</p>	
<p>Infrastructure and Access</p>	
<p>PO 44.1</p> <p>Development with a primary street comprising a laneway, alley, lane, right of way or similar minor thoroughfare only occurs where:</p> <ul style="list-style-type: none"> (a) existing utility infrastructure and services are capable of accommodating the development (b) the primary street can support access by emergency and regular service vehicles (such as waste collection) (c) it does not require the provision or upgrading of infrastructure on public land (such as footpaths and stormwater management systems) 	<p>DTS/DPF 44.1</p> <p>Development with a primary street frontage that is not an alley, lane, right of way or similar public thoroughfare.</p>

- (d) safety of pedestrians or vehicle movement is maintained
- (e) any necessary grade transition is accommodated within the site of the development to support an appropriate development intensity and orderly development of land fronting minor thoroughfares.

Table 1 - Private Open Space

Dwelling Type	Dwelling / Site Configuration	Minimum Rate
Dwelling (at ground level, other than a residential flat building that includes above ground dwellings)		Total private open space area: (a) Site area <301m ² : 24m ² located behind the building line. (b) Site area ≥ 301m ² : 60m ² located behind the building line. Minimum directly accessible from a living room: 16m ² / with a minimum dimension 3m.
Cabin or caravan (permanently fixed to the ground) in a residential park or caravan and tourist park		Total area: 16m ² , which may be uses as second car parking space, provided on each site intended for residential occupation.
Dwelling in a residential flat building or mixed use building which incorporate above ground level dwellings	Dwellings at ground level:	15m ² / minimum dimension 3m
	Dwellings above ground level:	
	Studio (no separate bedroom)	4m ² / minimum dimension 1.8m
	One bedroom dwelling	8m ² / minimum dimension 2.1m
	Two bedroom dwelling	11m ² / minimum dimension 2.4m
	Three + bedroom dwelling	15 m ² / minimum dimension 2.6m

Forestry

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Commercial forestry is designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
PO 1.1 Commercial forestry plantations are established where there is no detrimental effect on the physical environment or scenic quality of the rural landscape.	DTS/DPF 1.1 None are applicable.
PO 1.2 Commercial forestry plantations are established on slopes that are stable to minimise the risk of soil erosion.	DTS/DPF 1.2 Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5).
PO 1.3 Commercial forestry plantations and operations associated with their establishment, management and harvesting are appropriately set back from any sensitive receiver to minimise fire risk and noise disturbance.	DTS/DPF 1.3 Commercial forestry plantations and operations associated with their establishment, management and harvesting are set back 50m or more from any sensitive receiver.
PO 1.4 Commercial forestry plantations are separated from reserves gazetted under the <i>National Parks and Wildlife Act 1972</i> and/or <i>Wilderness Protection Act 1992</i> to minimise fire risk and potential for weed infestation.	DTS/DPF 1.4 Commercial forestry plantations and operations associated with their establishment, management and harvesting are set back 50m or more from a reserve gazetted under the <i>National Parks and Wildlife Act 1972</i> and/or <i>Wilderness Protection Act 1992</i> .

Water Protection

<p>PO 2.1</p> <p>Commercial forestry plantations incorporate artificial drainage lines (i.e. culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water flows onto or from plantation areas.</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>																					
<p>PO 2.2</p> <p>Appropriate siting, layout and design measures are adopted to minimise the impact of commercial forestry plantations on surface water resources.</p>	<p>DTS/DPF 2.2</p> <p>Commercial forestry plantations:</p> <ul style="list-style-type: none"> (a) do not involve cultivation (excluding spot cultivation) in drainage lines (b) are set back 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland or sinkhole (with direct connection to an aquifer) (c) are set back 10m or more from the banks of any first or second order watercourse or sinkhole (with no direct connection to an aquifer). 																					
<p>Fire Management</p>																						
<p>PO 3.1</p> <p>Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements.</p>	<p>DTS/DPF 3.1</p> <p>Commercial forestry plantations provide:</p> <ul style="list-style-type: none"> (a) 7m or more wide external boundary firebreaks for plantations of 40ha or less (b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha (c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater. 																					
<p>PO 3.2</p> <p>Commercial forestry plantations incorporate appropriate fire management access tracks.</p>	<p>DTS/DPF 3.2</p> <p>Commercial forestry plantation fire management access tracks:</p> <ul style="list-style-type: none"> (a) are incorporated within all firebreaks (b) are 7m or more wide with a vertical clearance of 4m or more (c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles (d) partition the plantation into units of 40ha or less in area. 																					
<p>Power-line Clearances</p>																						
<p>PO 4.1</p> <p>Commercial forestry plantations achieve and maintain appropriate clearances from aboveground powerlines.</p>	<p>DTS/DPF 4.1</p> <p>Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table:</p> <table border="1" data-bbox="802 1122 1552 1630"> <thead> <tr> <th data-bbox="802 1122 1098 1240">Voltage of transmission line</th> <th data-bbox="1098 1122 1238 1240">Tower or Pole</th> <th data-bbox="1238 1122 1552 1240">Minimum horizontal clearance distance between plantings and transmission lines</th> </tr> </thead> <tbody> <tr> <td data-bbox="802 1240 1098 1305">500 kV</td> <td data-bbox="1098 1240 1238 1305">Tower</td> <td data-bbox="1238 1240 1552 1305">38m</td> </tr> <tr> <td data-bbox="802 1305 1098 1370">275 kV</td> <td data-bbox="1098 1305 1238 1370">Tower</td> <td data-bbox="1238 1305 1552 1370">25m</td> </tr> <tr> <td data-bbox="802 1370 1098 1435">132 kV</td> <td data-bbox="1098 1370 1238 1435">Tower</td> <td data-bbox="1238 1370 1552 1435">30m</td> </tr> <tr> <td data-bbox="802 1435 1098 1500">132 kV</td> <td data-bbox="1098 1435 1238 1500">Pole</td> <td data-bbox="1238 1435 1552 1500">20m</td> </tr> <tr> <td data-bbox="802 1500 1098 1565">66 kV</td> <td data-bbox="1098 1500 1238 1565">Pole</td> <td data-bbox="1238 1500 1552 1565">20m</td> </tr> <tr> <td data-bbox="802 1565 1098 1630">Less than 66 kV</td> <td data-bbox="1098 1565 1238 1630">Pole</td> <td data-bbox="1238 1565 1552 1630">20m</td> </tr> </tbody> </table>	Voltage of transmission line	Tower or Pole	Minimum horizontal clearance distance between plantings and transmission lines	500 kV	Tower	38m	275 kV	Tower	25m	132 kV	Tower	30m	132 kV	Pole	20m	66 kV	Pole	20m	Less than 66 kV	Pole	20m

Housing Renewal

Assessment Provisions (AP)

Desired Outcome (DO)

<p>Desired Outcome</p>	
<p>DO 1</p>	<p>Renewed residential environments replace older social housing and provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area.</p>

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

<p>Performance Outcome</p>	<p>Deemed-to-Satisfy Criteria / Designated</p>
-----------------------------------	---

Land Use and Intensity	
<p>PO 1.1</p> <p>Residential development provides a range of housing choices.</p>	<p>DTS/DPF 1.1</p> <p>Development comprises one or more of the following:</p> <ul style="list-style-type: none"> (a) detached dwellings (b) semi-detached dwellings (c) row dwellings (d) group dwellings (e) residential flat buildings.
<p>PO 1.2</p> <p>Medium-density housing options or higher are located in close proximity to public transit, open space and/or activity centres.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
Building Height	
<p>PO 2.1</p> <p>Buildings generally do not exceed 3 building levels unless in locations close to public transport, centres and/or open space.</p>	<p>DTS/DPF 2.1</p> <p>Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m (not including a gable end).</p>
<p>PO 2.2</p> <p>Medium or high rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 building levels transition down in scale and height towards the boundary of that zone, other than where it is a street boundary.</p>	<p>DTS/DPF 2.2</p> <p>None are applicable.</p>
Primary Street Setback	
<p>PO 3.1</p> <p>Buildings are set back from the primary street boundary to contribute to an attractive streetscape character.</p>	<p>DTS/DPF 3.1</p> <p>Buildings are no closer to the primary street (excluding any balcony, verandah, porch, awning or similar structure) than 3m.</p>
Secondary Street Setback	
<p>PO 4.1</p> <p>Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character.</p>	<p>DTS/DPF 4.1</p> <p>Buildings are set back at least 900mm from the boundary of the allotment with a secondary street frontage.</p>
Boundary Walls	
<p>PO 5.1</p> <p>Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation.</p>	<p>DTS/DPF 5.1</p> <p>Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and satisfy (a) or (b):</p> <ul style="list-style-type: none"> (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height (b) do not: <ul style="list-style-type: none"> (i) exceed 3.2m in height from the lower of the natural or finished ground level (ii) exceed 11.5m in length (iii) when combined with other walls on the boundary of the subject development site, a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
<p>PO 5.2</p> <p>Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.</p>	<p>DTS/DPF 5.2</p> <p>Dwellings in a semi-detached or row arrangement are set back 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage.</p>
Side Boundary Setback	
<p>PO 6.1</p> <p>Buildings are set back from side boundaries to provide:</p> <ul style="list-style-type: none"> (a) separation between dwellings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours. 	<p>DTS/DPF 6.1</p> <p>Other than walls located on a side boundary, buildings are set back from side boundaries:</p> <ul style="list-style-type: none"> (a) at least 900mm where the wall height is up to 3m (b) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m (c) at least 1.9m plus 1/3 of the wall height above 3m for walls facing a southern side boundary.
Rear Boundary Setback	
<p>PO 7.1</p> <p>Buildings are set back from rear boundaries to provide:</p> <ul style="list-style-type: none"> (a) separation between dwellings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours (c) private open space 	<p>DTS/DPF 7.1</p> <p>Dwellings are set back from the rear boundary:</p> <ul style="list-style-type: none"> (a) 3m or more for the first building level (b) 5m or more for any subsequent building level.

Buildings elevation design

<p>PO 8.1</p> <p>Dwelling elevations facing public streets and common driveways make a positive contribution to the streetscape and common driveway areas.</p>	<p>DTS/DPF 8.1</p> <p>Each dwelling includes at least 3 of the following design features within the building elevation facing a primary street, and at least 2 of the following design features within the building elevation facing any other public road (other than a laneway) or a common driveway:</p> <ul style="list-style-type: none"> (a) a minimum of 30% of the building elevation is set back an additional 300mm from the building line (b) a porch or portico projects at least 1m from the building elevation (c) a balcony projects from the building elevation (d) a verandah projects at least 1m from the building elevation (e) eaves of a minimum 400mm width extend along the width of the front elevation (f) a minimum 30% of the width of the upper level projects forward from the lower level primary building line by at least 300mm. (g) a minimum of two different materials or finishes are incorporated on the walls of the building elevation, with a maximum of 80% of the building elevation in a single material or finish.
<p>PO 8.2</p> <p>Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.</p>	<p>DTS/DPF 8.2</p> <p>Each dwelling with a frontage to a public street:</p> <ul style="list-style-type: none"> (a) includes at least one window facing the primary street from a habitable room that has a minimum internal room dimension of 2.4m (b) has an aggregate window area of at least 2m² facing the primary street
<p>PO 8.3</p> <p>The visual mass of larger buildings is reduced when viewed from adjoining allotments or public streets.</p>	<p>DTS/DPF 8.3</p> <p>None are applicable.</p>
<p>PO 8.4</p> <p>Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression.</p>	<p>DTS/DPF 8.4</p> <p>None are applicable.</p>
<p>PO 8.5</p> <p>Entrances to multi-storey buildings are:</p> <ul style="list-style-type: none"> (a) oriented towards the street (b) visible and easily identifiable from the street (c) designed to include a common mail box structure. 	<p>DTS/DPF 8.5</p> <p>None are applicable.</p>

Outlook and amenity

<p>PO 9.1</p> <p>Living rooms have an external outlook to provide a high standard of amenity for occupants.</p>	<p>DTS/DPF 9.1</p> <p>A living room of a dwelling incorporates a window with an external outlook towards the street frontage or private open space.</p>
<p>PO 9.2</p> <p>Bedrooms are separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.</p>	<p>DTS/DPF 9.2</p> <p>None are applicable.</p>

Private Open Space

<p>PO 10.1</p> <p>Dwellings are provided with suitable sized areas of usable private open space to meet the needs of occupants.</p>	<p>DTS/DPF 10.1</p> <p>Private open space is provided in accordance with the following table:</p>		
	Dwelling Type	Dwelling / Site Configuration	Minimum Rate
	Dwelling (at ground level)		Total area: 24m ² located behind the building line Minimum adjacent to a living room: 16m ² with a minimum dimension 3m
	Dwelling (above ground level)	Studio	4m ² / minimum dimension 1.8m
		One bedroom dwelling	8m ² / minimum dimension 2.1m
Two bedroom dwelling		11m ² / minimum dimension 2.4m	

<p>PO 10.2</p>	<p>DTS/DPF 10.2</p>
----------------	---------------------

Private open space positioned to provide convenient access from internal living areas.

At least 50% of the required area of private open space is accessible from a habitable room.

PO 10.3
Private open space is positioned and designed to:

- (a) provide useable outdoor space that suits the needs of occupants;
- (b) take advantage of desirable orientation and vistas; and
- (c) adequately define public and private space.

DTS/DPF 10.3
None are applicable.

Visual privacy

PO 11.1
Development mitigates direct overlooking from upper level windows to habitable rooms and private open spaces of adjoining residential uses.

DTS/DPF 11.1
Upper level windows facing side or rear boundaries shared with another residential allotment/site satisfy one of the following:

- (a) are permanently obscured to a height of 1.5m above finished floor level and are fixed or not capable of being opened more than 200mm
- (b) have sill heights greater than or equal to 1.5m above finished floor level
- (c) incorporate screening with a maximum of 25% openings, permanently fixed no more than 500mm from the window surface and sited adjacent to any part of the window less than 1.5m above the finished floor.

PO 11.2
Development mitigates direct overlooking from upper level balconies and terraces to habitable rooms and private open space of adjoining residential uses.

DTS/DPF 11.2
One of the following is satisfied:

- (a) the longest side of the balcony or terrace will face a public road, public road reserve or public reserve that is at least 15m wide in all places faced by the balcony or terrace or
- (b) all sides of balconies or terraces on upper building levels are permanently obscured by screening with a maximum 25% transparency/openings fixed to a minimum height of:
 - (i) 1.5m above finished floor level where the balcony is located at least 15 metres from the nearest habitable window of a dwelling on adjacent land or
 - (ii) 1.7m above finished floor level in all other cases

Landscaping

PO 12.1
Soft landscaping is incorporated into development to:

- (a) minimise heat absorption and reflection
- (b) maximise shade and shelter
- (c) maximise stormwater infiltration and biodiversity
- (d) enhance the appearance of land and streetscapes.

DTS/DPF 12.1
Residential development incorporates pervious areas for soft landscaping with a minimum dimension of 700mm provided in accordance with (a) and (b):

- (a) a total area as determined by the following table:

Dwelling site area (or in the case of residential flat building or group dwelling(s), average site area) (m ²)	Minimum percentage of site
<150	10%
<200	15%
200-450	20%
>450	25%

- (b) at least 30% of land between the road boundary and the building line.

Water Sensitive Design

PO 13.1
Residential development is designed to capture and use stormwater to:

- (a) maximise efficient use of water resources
- (b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded
- (c) manage runoff quality to maintain, as close as practical, pre-development conditions.

DTS/DPF 13.1
None are applicable.

Car Parking

PO 14.1
On-site car parking is provided to meet the anticipated demand of residents, with less on-site parking in areas in close proximity to public transport.

DTS/DPF 14.1
On-site car parking is provided at the following rates per dwelling:

- (a) 2 or fewer bedrooms - 1 car parking space
- (b) 3 or more bedrooms - 2 car parking spaces.

PO 14.2
Enclosed car parking spaces are of dimensions to be functional, accessible and convenient.

DTS/DPF 14.2
Residential parking spaces enclosed by fencing, walls or other obstructions with the following internal dimensions (separate from any waste storage area):

- (a) single parking spaces:
 - (i) a minimum length of 5.4m
 - (ii) a minimum width of 3.0m
 - (iii) a minimum garage door width of 2.4m
- (b) double parking spaces (side by side):
 - (i) a minimum length of 5.4m
 - (ii) a minimum width of 5.5m

	(iii) minimum garage door width of 2.4m per space.
PO 14.3 Uncovered car parking spaces are of dimensions to be functional, accessible and convenient.	DTS/DPF 14.3 Uncovered car parking spaces have: (a) a minimum length of 5.4m (b) a minimum width of 2.4m (c) a minimum width between the centre line of the space and any fence, wall or other obstruction of 1.5m.
PO 14.4 Residential flat buildings and group dwelling developments provide sufficient on-site visitor car parking to cater for anticipated demand.	DTS/DPF 14.4 Visitor car parking for group and residential flat buildings incorporating 4 or more dwellings is provided on-site at a minimum ratio of 0.25 car parking spaces per dwelling.
PO 14.5 Residential flat buildings provide dedicated areas for bicycle parking.	DTS/DPF 14.5 Residential flat buildings provide one bicycle parking space per dwelling.
Overshadowing	
PO 15.1 Development minimises overshadowing of the private open spaces of adjoining land by ensuring that ground level open space associated with residential buildings receive direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June.	DTS/DPF 15.1 None are applicable.
Waste	
PO 16.1 Provision is made for the convenient storage of waste bins in a location screened from public view.	DTS/DPF 16.1 A waste bin storage area is provided behind the primary building line that: (a) has a minimum area of 2m ² with a minimum dimension of 900mm (separate from any designated car parking spaces or private open space); and (b) has a continuous unobstructed path of travel (excluding moveable objects like gates, vehicles and roller doors) with a minimum width of 800mm between the waste bin storage area and the street.
PO 16.2 Residential flat buildings provide a dedicated area for the on-site storage of waste which is: (a) easily and safely accessible for residents and for collection vehicles (b) screened from adjoining land and public roads (c) of sufficient dimensions to be able to accommodate the waste storage needs of the development considering the intensity and nature of the development and the frequency of collection.	DTS/DPF 16.2 None are applicable.
Vehicle Access	
PO 17.1 Driveways are located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.	DTS/DPF 17.1 None are applicable.
PO 17.2 Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.	DTS/DPF 17.2 Vehicle access to designated car parking spaces satisfy (a) or (b): (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.
PO 17.3 Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.	DTS/DPF 17.3 Driveways are designed and sited so that: (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport is not more than 1-in-4 on average (b) they are aligned relative to the street so that there is no more than a 20 degree deviation from 90 degrees between the centreline of any dedicated car parking space to which it provides access (measured from the front of that space) and the road boundary. (c) if located so as to provide access from an alley, lane or right of way - the alley, lane or right of way is at least 6.2m wide along the boundary of the allotment / site.
PO 17.4 Driveways and access points are designed and distributed to optimise the provision of on-street parking.	DTS/DPF 17.4 Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:

	<ol style="list-style-type: none"> 1. minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) 2. Minimum car park length of 5.4m where a vehicle can enter or exit a space directly 3. minimum car park length of 6m for an intermediate space located between two other parking spaces.
<p>PO 17.5</p> <p>Residential driveways that service more than one dwelling of a dimension to allow safe and convenient movement.</p>	<p>DTS/DPF 17.5</p> <p>Where on-street parking is available abutting the site's street frontage, on-street parking is retained in accordance with the following requirements:</p> <ol style="list-style-type: none"> (a) minimum 0.33 on-street spaces per dwelling on the site (rounded up to the nearest whole number) (b) minimum car park length of 5.4m where a vehicle can enter or exit a space directly (c) minimum carpark length of 6m for an intermediate space located between two other parking spaces or to an end obstruction where the parking is indented.
<p>PO 17.6</p> <p>Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site and manoeuvre within the site in a safe and convenient manner.</p>	<p>DTS/DPF 17.6</p> <p>Driveways providing access to more than one dwelling, or a dwelling on a battle-axe site, allow a B85 passenger vehicle to enter and exit the garages or parking spaces in no more than a three-point turn manoeuvre</p>
<p>PO 17.7</p> <p>Dwellings are adequately separated from common driveways and manoeuvring areas.</p>	<p>DTS/DPF 17.7</p> <p>Dwelling walls with entry doors or ground level habitable room windows are set back at least 1.5m from any driveway or area designated for the movement and manoeuvring of vehicles.</p>
Storage	
<p>PO 18.1</p> <p>Dwellings are provided with sufficient and accessible space for storage to meet likely occupant needs.</p>	<p>DTS/DPF 18.1</p> <p>Dwellings are provided with storage at the following rates and 50% or more of the storage volume is provided within the dwelling:</p> <ol style="list-style-type: none"> (a) studio: not less than 6m³ (b) 1 bedroom dwelling / apartment: not less than 8m³ (c) 2 bedroom dwelling / apartment: not less than 10m³ (d) 3+ bedroom dwelling / apartment: not less than 12m³.
Earthworks	
<p>PO 19.1</p> <p>Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.</p>	<p>DTS/DPF 19.1</p> <p>The development does not involve:</p> <ol style="list-style-type: none"> (a) excavation exceeding a vertical height of 1m or (b) filling exceeding a vertical height of 1m or (c) a total combined excavation and filling vertical height exceeding 2m.
Service connections and infrastructure	
<p>PO 20.1</p> <p>Dwellings are provided with appropriate service connections and infrastructure.</p>	<p>DTS/DPF 20.1</p> <p>The site and building:</p> <ol style="list-style-type: none"> (a) have the ability to be connected to a permanent potable water supply (b) have the ability to be connected to a sewerage system, or a wastewater system approved under the <i>South Australian Public Health Act 2011</i> (c) have the ability to be connected to electricity supply (d) have the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes (e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the <i>Electricity Act 1996</i>.
Site contamination	
<p>PO 21.1</p> <p>Land that is suitable for sensitive land uses to provide a safe environment.</p>	<p>DTS/DPF 21.1</p> <p>Development satisfies (a), (b), (c) or (d):</p> <ol style="list-style-type: none"> (a) does not involve a change in the use of land (b) involves a change in the use of land that does not constitute a change to a <u>more sensitive use</u> (c) involves a change in the use of land to a <u>more sensitive use</u> on land at which <u>site contamination</u> does not exist (as demonstrated in a <u>site contamination declaration form</u>) (d) involves a change in the use of land to a <u>more sensitive use</u> on land at which <u>site contamination</u> exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following: <ol style="list-style-type: none"> (i) a <u>site contamination audit report</u> has been prepared under Part 10A of the <i>Environment Protection Act 1993</i> in relation to the land within the previous 5 years which states that <ol style="list-style-type: none"> A. <u>site contamination</u> does not exist (or no longer exists) at the land or B. the land is suitable for the proposed use or range of uses (without the need for any further <u>remediation</u>) or C. where <u>remediation</u> is, or remains, necessary for the proposed use

range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development)

and
(ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form).

Infrastructure and Renewable Energy Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and manages adverse visual impacts on natural and rural landscapes and residential amenity.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
PO 1.1 Development is located and designed to minimise hazard or nuisance to adjacent development and land uses.	DTS/DPF 1.1 None are applicable.
Visual Amenity	
PO 2.1 The visual impact of above-ground infrastructure networks and services (excluding high voltage transmission lines), renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development is minimised from townships, scenic routes and public roads by: (a) utilising features of the natural landscape to obscure views where practicable (b) siting development below ridgelines where practicable (c) avoiding visually sensitive and significant landscapes (d) using materials and finishes with low-reflectivity and colours that complement the surroundings (e) using existing vegetation to screen buildings (f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating or zoned to primarily accommodate sensitive receivers.	DTS/DPF 2.1 None are applicable.
PO 2.2 Pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land.	DTS/DPF 2.2 None are applicable.
PO 2.3 Surfaces exposed by earthworks associated with the installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land.	DTS/DPF 2.3 None are applicable.
Rehabilitation	
PO 3.1 Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors.	DTS/DPF 3.1 None are applicable.
Hazard Management	
PO 4.1 Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips.	DTS/DPF 4.1 None are applicable.
PO 4.2 Facilities for energy generation, power storage and transmission are separated as far as practicable from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.	DTS/DPF 4.2 None are applicable.

<p>PO 4.3</p> <p>Bushfire hazard risk is minimised for renewable energy facilities by providing appropriate access tracks, safety equipment and water tanks and establishing cleared areas around substations, battery storage and operations compounds.</p>	<p>DTS/DPF 4.3</p> <p>None are applicable.</p>
<p>Electricity Infrastructure and Battery Storage Facilities</p>	
<p>PO 5.1</p> <p>Electricity infrastructure is located to minimise visual impacts through techniques including:</p> <ul style="list-style-type: none"> (a) siting utilities and services: <ul style="list-style-type: none"> (i) on areas already cleared of native vegetation (ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity (b) grouping utility buildings and structures with non-residential development, where practicable. 	<p>DTS/DPF 5.1</p> <p>None are applicable.</p>
<p>PO 5.2</p> <p>Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to 33kV.</p>	<p>DTS/DPF 5.2</p> <p>None are applicable.</p>
<p>PO 5.3</p> <p>Battery storage facilities are co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts.</p>	<p>DTS/DPF 5.3</p> <p>None are applicable.</p>
<p>Telecommunication Facilities</p>	
<p>PO 6.1</p> <p>The proliferation of telecommunications facilities in the form of towers/monopoles in any one locality is managed, where technically feasible, by co-locating a facility with other communications facilities to mitigate impacts from clutter on visual amenity.</p>	<p>DTS/DPF 6.1</p> <p>None are applicable.</p>
<p>PO 6.2</p> <p>Telecommunications antennae are located as close as practicable to support structures to manage overall bulk and mitigate impacts on visual amenity.</p>	<p>DTS/DPF 6.2</p> <p>None are applicable.</p>
<p>PO 6.3</p> <p>Telecommunications facilities, particularly towers/monopoles, are located and sized to mitigate visual impacts by the following methods:</p> <ul style="list-style-type: none"> (a) where technically feasible, incorporating the facility within an existing structure that may serve another purpose <p>or all of the following:</p> <ul style="list-style-type: none"> (b) using existing buildings and landscape features to obscure or interrupt views of a facility from nearby public roads, residential areas and places of high public amenity to the extent practical without unduly hindering the effective provision of telecommunications services (c) using materials and finishes that complement the environment (d) screening using landscaping and vegetation, particularly for equipment shelters and huts. 	<p>DTS/DPF 6.3</p> <p>None are applicable.</p>
<p>Renewable Energy Facilities</p>	
<p>PO 7.1</p> <p>Renewable energy facilities are located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure.</p>	<p>DTS/DPF 7.1</p> <p>None are applicable.</p>
<p>Renewable Energy Facilities (Wind Farm)</p>	
<p>PO 8.1</p> <p>Visual impact of wind turbine generators on the amenity of residential and tourist development is reduced through appropriate separation.</p>	<p>DTS/DPF 8.1</p> <p>Wind turbine generators are:</p> <ul style="list-style-type: none"> (a) set back at least 2000m from the base of a turbine to any of the following zones: <ul style="list-style-type: none"> (i) Rural Settlement Zone (ii) Township Zone (iii) Rural Living Zone (iv) Rural Neighbourhood Zone <p>with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine).</p> <ul style="list-style-type: none"> (b) set back at least 1500m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation
<p>PO 8.2</p> <p>The visual impact of wind turbine generators on natural landscapes is managed by:</p> <ul style="list-style-type: none"> (a) designing wind turbine generators to be uniform in colour, size and shape 	<p>DTS/DPF 8.2</p> <p>None are applicable.</p>

<p>(b) coordinating blade rotation and direction</p> <p>(c) mounting wind turbine generators on tubular towers as opposed to lattice towers.</p>																																				
<p>PO 8.3</p> <p>Wind turbine generators and ancillary development minimise potential for bird and bat strike.</p>	<p>DTS/DPF 8.3</p> <p>None are applicable.</p>																																			
<p>PO 8.4</p> <p>Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations.</p>	<p>DTS/DPF 8.4</p> <p>No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable.</p>																																			
<p>PO 8.5</p> <p>Meteorological masts and guidewires are identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes.</p>	<p>DTS/DPF 8.5</p> <p>None are applicable.</p>																																			
<p>Renewable Energy Facilities (Solar Power)</p>																																				
<p>PO 9.1</p> <p>Ground mounted solar power facilities generating 5MW or more are not located on land requiring the clearance of areas of intact native vegetation or on land of high environmental, scenic or cultural value.</p>	<p>DTS/DPF 9.1</p> <p>None are applicable.</p>																																			
<p>PO 9.2</p> <p>Ground mounted solar power facilities allow for movement of wildlife by:</p> <p>(a) incorporating wildlife corridors and habitat refuges</p> <p>(b) avoiding the use of extensive security or perimeter fencing or incorporating fencing that enables the passage of small animals without unreasonably compromising the security of the facility.</p>	<p>DTS/DPF 9.2</p> <p>None are applicable.</p>																																			
<p>PO 9.3</p> <p>Amenity impacts of solar power facilities are minimised through separation from conservation areas and sensitive receivers in other ownership.</p>	<p>DTS/DPF 9.3</p> <p>Ground mounted solar power facilities are set back from land boundaries, conservation areas and relevant zones in accordance with the following criteria:</p> <table border="1" data-bbox="805 929 1548 1467"> <thead> <tr> <th>Generation Capacity</th> <th>Approximate size of array</th> <th>Setback from adjoining land boundary</th> <th>Setback from conservation areas</th> <th>Setback from Township, Rural Settlement, Rural Neighbourhood and Rural Living Zones¹</th> </tr> </thead> <tbody> <tr> <td>50MW></td> <td>80ha+</td> <td>30m</td> <td>500m</td> <td>2km</td> </tr> <tr> <td>10MW<50MW</td> <td>16ha-<80ha</td> <td>25m</td> <td>500m</td> <td>1.5km</td> </tr> <tr> <td>5MW<10MW</td> <td>8ha to <16ha</td> <td>20m</td> <td>500m</td> <td>1km</td> </tr> <tr> <td>1MW<5MW</td> <td>1.6ha to <8ha</td> <td>15m</td> <td>500m</td> <td>500m</td> </tr> <tr> <td>100kW<1MW</td> <td>0.5ha<1.6ha</td> <td>10m</td> <td>500m</td> <td>100m</td> </tr> <tr> <td><100kW</td> <td><0.5ha</td> <td>5m</td> <td>500m</td> <td>25m</td> </tr> </tbody> </table> <p>Notes:</p> <p>1. <p>PO 9.4</p> <p>Ground mounted solar power facilities incorporate landscaping within setbacks from adjacent road frontages and boundaries of adjacent allotments accommodating non-host dwellings, where balanced with infrastructure access and bushfire safety considerations.</p>	<p>DTS/DPF 9.4</p> <p>None are applicable.</p>																																			
<p>Hydropower / Pumped Hydropower Facilities</p>																																				
<p>PO 10.1</p> <p>Hydropower / pumped hydropower facility storage is designed and operated to minimise the risk of storage dam failure.</p>	<p>DTS/DPF 10.1</p> <p>None are applicable.</p>																																			
<p>PO 10.2</p> <p>Hydropower / pumped hydropower facility storage is designed and operated to minimise water loss through increased evaporation or system leakage, with the incorporation of appropriate liners, dam covers, operational measures or detection systems.</p>	<p>DTS/DPF 10.2</p> <p>None are applicable.</p>																																			
<p>PO 10.3</p> <p>Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future.</p>	<p>DTS/DPF 10.3</p> <p>None are applicable.</p>																																			

PO 11.1 Development is connected to an appropriate water supply to meet the ongoing requirements of the intended use.	DTS/DPF 11.1 Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development.
PO 11.2 Dwellings are connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided.	DTS/DPF 11.2 A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is: (a) exclusively for domestic use (b) connected to the roof drainage system of the dwelling.
Wastewater Services	
PO 12.1 Development is connected to an approved common wastewater disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the ongoing requirements of the intended use in accordance with the following: (a) it is wholly located and contained within the allotment of the development it will service (b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes, disposal systems are included to minimise the risk of pollution to those water resources (c) septic tank effluent drainage fields and other wastewater disposal areas are located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm.	DTS/DPF 12.1 Development is connected, or will be connected, to an approved common wastewater disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead capable of being serviced by an on-site waste water treatment system in accordance with the following: (a) the system is wholly located and contained within the allotment of development it will service; and (b) the system will comply with the requirements of the South Australian Public Health Act 2011.
PO 12.2 Effluent drainage fields and other wastewater disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.	DTS/DPF 12.2 Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.
Temporary Facilities	
PO 13.1 In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter.	DTS/DPF 13.1 A waste collection and disposal service is used to dispose of the volume of waste at the rate it is generated.
PO 13.2 Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact.	DTS/DPF 13.2 None are applicable.

Intensive Animal Husbandry and Dairies

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers and in a manner that minimises their adverse effects on amenity and the environment.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting and Design	
PO 1.1 Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality.	DTS/DPF 1.1 None are applicable.
PO 1.2 Intensive animal husbandry, dairies and associated activities are sited, designed, constructed and managed to prevent the potential transmission of disease to other operations where animals are kept.	DTS/DPF 1.2 None are applicable.
PO 1.3	DTS/DPF 1.3

Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.	None are applicable.
PO 1.4 Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas are sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.	DTS/DPF 1.4 Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities are located 500m or more from the nearest sensitive receiver in other ownership.
PO 1.5 Lagoons for the storage or treatment of milking shed effluent is adequately separated from roads to minimise impacts from odour on the general public.	DTS/DPF 1.5 Lagoons for the storage or treatment of milking shed effluent are set back 20m or more from public roads.
Waste	
PO 2.1 Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to: (a) avoid attracting and harbouring vermin (b) avoid polluting water resources (c) be located outside 1% AEP flood event areas.	DTS/DPF 2.1 None are applicable.
Soil and Water Protection	
PO 3.1 To avoid environmental harm and adverse effects on water resources, intensive animal husbandry operations are appropriately set back from: (a) public water supply reservoirs (b) major watercourses (third order or higher stream) (c) any other watercourse, bore or well used for domestic or stock water supplies.	DTS/DPF 3.1 Intensive animal husbandry operations are set back: (a) 800m or more from a public water supply reservoir (b) 200m or more from a major watercourse (third order or higher stream) (c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies.
PO 3.2 Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities that: (a) have sufficient capacity to hold effluent and runoff from the operations on site (b) ensure effluent does not infiltrate and pollute groundwater, soil or other water resources.	DTS/DPF 3.2 None are applicable.

Interface between Land Uses

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Development is located and designed to mitigate adverse effects on or from neighbouring and proximate land uses.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature	
General Land Use Compatibility		
PO 1.1 Sensitive receivers are designed and sited to protect residents and occupants from adverse impacts generated by lawfully existing land uses (or lawfully approved land uses) and land uses desired in the zone.	DTS/DPF 1.1 None are applicable.	
PO 1.2 Development adjacent to a site containing a sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers is designed to minimise adverse impacts.	DTS/DPF 1.2 None are applicable.	
Hours of Operation		
PO 2.1 Non-residential development does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) or an adjacent zone primarily for sensitive receivers through its hours of operation having regard to:	DTS/DPF 2.1 Development operating within the following hours:	
	Class of Development	Hours of operation

Planning and Design Code - 26 August - Version 2021.12 (a) the nature of the development (b) measures to mitigate off-site impacts (c) the extent to which the development is desired in the zone (d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land.	Consulting room	7am to 9pm, Monday to Friday 8am to 5pm, Saturday
	Office	7am to 9pm, Monday to Friday 8am to 5pm, Saturday
	Shop, other than any one or combination of the following: (a) restaurant (b) cellar door in the Productive Rural Landscape Zone, Rural Zone or Rural Horticulture Zone	7am to 9pm, Monday to Friday 8am to 5pm, Saturday and Sunday

Overshadowing

PO 3.1 Overshadowing of habitable room windows of adjacent residential land uses in: a. a neighbourhood-type zone is minimised to maintain access to direct winter sunlight b. other zones is managed to enable access to direct winter sunlight.	DTS/DPF 3.1 North-facing windows of habitable rooms of adjacent residential land uses in a neighbourhood-type zone receive at least 3 hours of direct sunlight between 9.00am and 3.00pm on 21 June.
PO 3.2 Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses in: a. a neighbourhood type zone is minimised to maintain access to direct winter sunlight b. other zones is managed to enable access to direct winter sunlight.	DTS/DPF 3.2 Development maintains 2 hours of direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in a neighbourhood-type zone in accordance with the following: a. for ground level private open space, the smaller of the following: i. half the existing ground level open space or ii. 35m ² of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m) b. for ground level communal open space, at least half of the existing ground level open space.
PO 3.3 Development does not unduly reduce the generating capacity of adjacent rooftop solar energy facilities taking into account: (a) the form of development contemplated in the zone (b) the orientation of the solar energy facilities (c) the extent to which the solar energy facilities are already overshadowed.	DTS/DPF 3.3 None are applicable.
PO 3.4 Development that incorporates moving parts, including windmills and wind farms, are located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker.	DTS/DPF 3.4 None are applicable.

Activities Generating Noise or Vibration

PO 4.1 Development that emits noise (other than music) does not unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.1 Noise that affects sensitive receivers achieves the relevant Environment Protection (Noise) Policy criteria.
PO 4.2 Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers (or lawfully approved sensitive receivers) and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including: (a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers (b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers (c) housing plant and equipment within an enclosed structure or acoustic enclosure (d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone.	DTS/DPF 4.2 None are applicable.
PO 4.3 Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa are positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.3 The pump and/or filtration system ancillary to a dwelling erected on the same site is: (a) enclosed in a solid acoustic structure located at least 5m from the nearest habitable room located on an adjoining allotment or

	(b) located at least 12m from the nearest habitable room located on an adjoining allotment.				
PO 4.4 External noise into bedrooms is minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment.	DTS/DPF 4.4 Adjacent land is used for residential purposes.				
PO 4.5 Outdoor areas associated with licensed premises (such as beer gardens or dining areas) are designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 4.5 None are applicable.				
PO 4.6 Development incorporating music achieves suitable acoustic amenity when measured at the boundary of an adjacent sensitive receiver (or lawfully approved sensitive receiver) or zone primarily intended to accommodate sensitive receivers.	DTS/DPF 4.6 Development incorporating music includes noise attenuation measures that will achieve the following noise levels: <table border="1" data-bbox="802 472 1517 656"> <thead> <tr> <th>Assessment location</th> <th>Music noise level</th> </tr> </thead> <tbody> <tr> <td>Externally at the nearest existing or envisaged noise sensitive location</td> <td>Less than 8dB above the level of background noise (L_{90,15min}) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB)</td> </tr> </tbody> </table>	Assessment location	Music noise level	Externally at the nearest existing or envisaged noise sensitive location	Less than 8dB above the level of background noise (L _{90,15min}) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB)
Assessment location	Music noise level				
Externally at the nearest existing or envisaged noise sensitive location	Less than 8dB above the level of background noise (L _{90,15min}) in any octave band of the sound spectrum (LOCT10,15 < LOCT90,15 + 8dB)				
Air Quality					
PO 5.1 Development with the potential to emit harmful or nuisance-generating air pollution incorporates air pollution control measures to prevent harm to human health or unreasonably impact the amenity of sensitive receivers (or lawfully approved sensitive receivers) within the locality and zones primarily intended to accommodate sensitive receivers.	DTS/DPF 5.1 None are applicable.				
PO 5.2 Development that includes chimneys or exhaust flues (including cafes, restaurants and fast food outlets) is designed to minimise nuisance or adverse health impacts to sensitive receivers (or lawfully approved sensitive receivers) by: (a) incorporating appropriate treatment technology before exhaust emissions are released (b) locating and designing chimneys or exhaust flues to maximise the dispersion of exhaust emissions, taking into account the location of sensitive receivers.	DTS/DPF 5.2 None are applicable.				
Light Spill					
PO 6.1 External lighting is positioned and designed to not cause unreasonable light spill impact on adjacent sensitive receivers (or lawfully approved sensitive receivers).	DTS/DPF 6.1 None are applicable.				
PO 6.2 External lighting is not hazardous to motorists and cyclists.	DTS/DPF 6.2 None are applicable.				
Solar Reflectivity / Glare					
PO 7.1 Development is designed and comprised of materials and finishes that do not unreasonably cause a distraction to adjacent road users and pedestrian areas or unreasonably cause heat loading and micro-climatic impacts on adjacent buildings and land uses as a result of reflective solar glare.	DTS/DPF 7.1 None are applicable.				
Electrical Interference					
PO 8.1 Development in rural and remote areas does not unreasonably diminish or result in the loss of existing communication services due to electrical interference.	DTS/DPF 8.1 The building or structure: (a) is no greater than 10m in height, measured from existing ground level or (b) is not within a line of sight between a fixed transmitter and fixed receiver (antenna) other than where an alternative service is available via a different fixed transmitter or cable.				
Interface with Rural Activities					
PO 9.1 Sensitive receivers are located and designed to mitigate impacts from lawfully existing horticultural and farming activities (or lawfully approved horticultural and farming activities), including spray drift and noise and do not prejudice the continued operation of these activities.	DTS/DPF 9.1 None are applicable.				
PO 9.2 Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing intensive animal husbandry activities and do not prejudice the continued operation of these activities.	DTS/DPF 9.2 None are applicable.				
PO 9.3	DTS/DPF 9.3				

<p>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing land-based aquaculture activities and do not prejudice the continued operation of these activities.</p>	<p>Sensitive receivers are located at least 200m from the boundary of a site used for land-based aquaculture and associated components in other ownership.</p>
<p>PO 9.4</p> <p>Sensitive receivers are located and designed to mitigate potential impacts from lawfully existing dairies including associated wastewater lagoons and liquid/solid waste storage and disposal facilities and do not prejudice the continued operation of these activities.</p>	<p>DTS/DPF 9.4</p> <p>Sensitive receivers are sited at least 500m from the boundary of a site used for a dairy and associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities in other ownership.</p>
<p>PO 9.5</p> <p>Sensitive receivers are located and designed to mitigate the potential impacts from lawfully existing facilities used for the handling, transportation and storage of bulk commodities (recognising the potential for extended hours of operation) and do not prejudice the continued operation of these activities.</p>	<p>DTS/DPF 9.5</p> <p>Sensitive receivers are located away from the boundary of a site used for the handling, transportation and/or storage of bulk commodities in other ownership in accordance with the following:</p> <ul style="list-style-type: none"> (a) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility (b) 300m or more, where it involves the handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility (including sea-port grain terminals) where the handling of these materials into or from vessels does not exceed 100 tonnes per day (c) 500m or more, where it involves the storage of bulk petroleum in individual containers with a capacity up to 200 litres and a total on-site storage capacity not exceeding 1000 cubic metres (d) 500m or more, where it involves the handling of coal with a capacity up to 1 tonne per day or a storage capacity up to 50 tonnes (e) 1000m or more, where it involves the handling of coal with a capacity exceeding 1 tonne per day but not exceeding 100 tonnes per day or a storage capacity exceeding 50 tonnes but not exceeding 5000 tonnes.
<p>PO 9.6</p> <p>Setbacks and vegetation plantings along allotment boundaries should be incorporated to mitigate the potential impacts of spray drift and other impacts associated with agricultural and horticultural activities.</p>	<p>DTS/DPF 9.6</p> <p>None are applicable.</p>
<p>PO 9.7</p> <p>Urban development does not prejudice existing agricultural and horticultural activities through appropriate separation and design techniques.</p>	<p>DTS/DPF 9.7</p> <p>None are applicable.</p>
<p>Interface with Mines and Quarries (Rural and Remote Areas)</p>	
<p>PO 10.1</p> <p>Sensitive receivers are separated from existing mines to minimise the adverse impacts from noise, dust and vibration.</p>	<p>DTS/DPF 10.1</p> <p>Sensitive receivers are located no closer than 500m from the boundary of a Mining Production Tenement under the <i>Mining Act 1971</i>.</p>

Land Division

Assessment Provisions (AP)

Desired Outcome (DO)

<p>Desired Outcome</p>	
<p>DO 1</p>	<p>Land division:</p> <ul style="list-style-type: none"> (a) creates allotments with the appropriate dimensions and shape for their intended use (b) allows efficient provision of new infrastructure and the optimum use of underutilised infrastructure (c) integrates and allocates adequate and suitable land for the preservation of site features of value, including significant vegetation, watercourses, water bodies and other environmental features (d) facilitates solar access through allotment orientation (e) creates a compact urban form that supports active travel, walkability and the use of public transport (f) avoids areas of high natural hazard risk.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

<p>Performance Outcome</p>	<p>Deemed-to-Satisfy Criteria / Designated Performance Feature</p>
<p>All land division</p>	
<p>Allotment configuration</p>	
<p>PO 1.1</p> <p>Land division creates allotments suitable for their intended use.</p>	<p>DTS/DPF 1.1</p> <p>Division of land satisfies (a) or (b):</p> <ul style="list-style-type: none"> (a) reflects the site boundaries illustrated and approved in an operative or existing development authorisation for residential development under the <i>Development Act 1993</i> or <i>Planning, Development and Infrastructure Act 2016</i> where the allotments are used or are proposed to be used solely for residential purposes (b) is proposed as part of a combined land division application with deemed-to-satisfy

PO 1.2 Land division considers the physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.	DTS/DPF 1.2 None are applicable.
Design and Layout	
PO 2.1 Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls.	DTS/DPF 2.1 None are applicable.
PO 2.2 Land division enables the appropriate management of interface impacts between potentially conflicting land uses and/or zones.	DTS/DPF 2.2 None are applicable.
PO 2.3 Land division maximises the number of allotments that face public open space and public streets.	DTS/DPF 2.3 None are applicable.
PO 2.4 Land division is integrated with site features, adjacent land uses, the existing transport network and available infrastructure.	DTS/DPF 2.4 None are applicable.
PO 2.5 Development and infrastructure is provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.	DTS/DPF 2.5 None are applicable.
PO 2.6 Land division results in watercourses being retained within open space and development taking place on land not subject to flooding.	DTS/DPF 2.6 None are applicable.
PO 2.7 Land division results in legible street patterns connected to the surrounding street network.	DTS/DPF 2.7 None are applicable.
PO 2.8 Land division is designed to preserve existing vegetation of value including native vegetation and regulated and significant trees.	DTS/DPF 2.8 None are applicable.
Roads and Access	
PO 3.1 Land division provides allotments with access to an all-weather public road.	DTS/DPF 3.1 None are applicable.
PO 3.2 Street patterns and intersections are designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.	DTS/DPF 3.2 None are applicable.
PO 3.3 Land division does not impede access to publicly owned open space and/or recreation facilities.	DTS/DPF 3.3 None are applicable.
PO 3.4 Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles and allow for the efficient movement of service and emergency vehicles.	DTS/DPF 3.4 None are applicable.
PO 3.5 Road reserves are designed to accommodate pedestrian and cycling infrastructure, street tree planting, landscaping and street furniture.	DTS/DPF 3.5 None are applicable.
PO 3.6 Road reserves accommodate stormwater drainage and public utilities.	DTS/DPF 3.6 None are applicable.
PO 3.7 Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.	DTS/DPF 3.7 None are applicable.
PO 3.8 Street patterns and intersections are designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.	DTS/DPF 3.8 None are applicable.
PO 3.9 Roads, open space and thoroughfares provide safe and convenient linkages to the surrounding open space and transport network.	DTS/DPF 3.9 None are applicable.
PO 3.10	DTS/DPF 3.10

Public streets are designed to enable tree planting to provide shade and enhance the amenity of streetscapes.	None are applicable.
PO 3.11 Local streets are designed to create low-speed environments that are safe for cyclists and pedestrians.	DTS/DPF 3.11 None are applicable.
Infrastructure	
PO 4.1 Land division incorporates public utility services within road reserves or dedicated easements.	DTS/DPF 4.1 None are applicable.
PO 4.2 Waste water, sewage and other effluent is capable of being disposed of from each allotment without risk to public health or the environment.	DTS/DPF 4.2 Each allotment can be connected to: (a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotment or (b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards.
PO 4.3 Septic tank effluent drainage fields and other waste water disposal areas are maintained to ensure the effective operation of waste systems and minimise risks to human health and the environment.	DTS/DPF 4.3 Development is not built on, or encroaches within, an area that is or will be, required for a sewerage system or waste control system.
PO 4.4 Constructed wetland systems, including associated detention and retention basins, are sited and designed to ensure public health and safety is protected, including by minimising potential public health risks arising from the breeding of mosquitoes.	DTS/DPF 4.4 None are applicable.
PO 4.5 Constructed wetland systems, including associated detention and retention basins, are sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.	DTS/DPF 4.5 None are applicable.
PO 4.6 Constructed wetland systems, including associated detention and retention basins, are sited and designed to function as a landscape feature.	DTS/DPF 4.6 None are applicable.
Minor Land Division (Under 20 Allotments)	
Open Space	
PO 5.1 Land division proposing an additional allotment under 1 hectare provides or supports the provision of open space.	DTS/DPF 5.1 None are applicable.
Solar Orientation	
PO 6.1 Land division for residential purposes facilitates solar access through allotment orientation.	DTS/DPF 6.1 None are applicable.
Water Sensitive Design	
PO 7.1 Land division creating a new road or common driveway includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 7.1 None are applicable.
PO 7.2 Land division designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 7.2 None are applicable.
Battle-Axe Development	
PO 8.1 Battle-axe development appropriately responds to the existing neighbourhood context.	DTS/DPF 8.1 Allotments are not in the form of a battle-axe arrangement.
PO 8.2 Battle-axe development designed to allow safe and convenient movement.	DTS/DPF 8.2 The handle of a battle-axe development: (a) has a minimum width of 4m or (b) where more than 3 allotments are proposed, a minimum width of 5.5m.
PO 8.3 Battle-axe allotments and/or common land are of a suitable size and dimension to allow passenger vehicles to enter and exit and manoeuvre within the site in a safe and convenient manner.	DTS/DPF 8.3 Battle-axe development allows a B85 passenger vehicle to enter and exit parking spaces in no more than a three-point turn manoeuvre.

Battle-axe or common driveways incorporate landscaping and permeability to improve appearance and assist in stormwater management.

DTS/DPF 8.4

Battle-axe or common driveways satisfy (a) and (b):

- (a) are constructed of a minimum of 50% permeable or porous material
- (b) where the driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point).

Major Land Division (20+ Allotments)

Open Space

PO 9.1 Land division allocates or retains evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.	DTS/DPF 9.1 None are applicable.
PO 9.2 Land allocated for open space is suitable for its intended active and passive recreational use considering gradient and potential for inundation.	DTS/DPF 9.2 None are applicable.
PO 9.3 Land allocated for active recreation has dimensions capable of accommodating a range of active recreational activities.	DTS/DPF 9.3 None are applicable.

Water Sensitive Design

PO 10.1 Land division creating 20 or more residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 10.1 None are applicable.
PO 10.2 Land division creating 20 or more non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure that the development does not increase the peak flows in downstream systems.	DTS/DPF 10.2 None are applicable.
PO 10.3 Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.	DTS/DPF 10.3 None are applicable.

Solar Orientation

PO 11.1 Land division creating 20 or more allotments for residential purposes facilitates solar access through allotment orientation and allotment dimensions.	DTS/DPF 11.1 None are applicable.
---	--------------------------------------

Marinas and On-Water Structures

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Marinas and on-water structures are located and designed to minimise the impairment of commercial, recreational and navigational activities and adverse impacts on the environment.
------	---

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome

Deemed-to-Satisfy Criteria / Designated Performance Feature

Navigation and Safety

PO 1.1 Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas.	DTS/DPF 1.1 None are applicable.
PO 1.2 The operation of wharves is not impaired by marinas and on-water structures.	DTS/DPF 1.2 None are applicable.
PO 1.3	DTS/DPF 1.3

Planning and Design Code - 26 August - Version 2021.12
 Navigation and access channels are not impaired by marinas and on-water structures.

None are applicable.

PO 1.4 Commercial shipping lanes are not impaired by marinas and on-water structures.	DTS/DPF 1.4 Marinas and on-water structures are set back 250m or more from commercial shipping lanes.
PO 1.5 Marinas and on-water structures are located to avoid interfering with the operation or function of a water supply pumping station.	DTS/DPF 1.5 On-water structures are set back: (a) 3km or more from upstream water supply pumping station take-off points (b) 500m or more from downstream water supply pumping station take-off points.
PO 1.6 Maintenance of on-water infrastructure, including revetment walls, is not impaired by marinas and on-water structures.	DTS/DPF 1.6 None are applicable.
Environmental Protection	
PO 2.1 Development is sited and designed to facilitate water circulation and exchange.	DTS/DPF 2.1 None are applicable.

Open Space and Recreation

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO 1	Pleasant, functional and accessible open space and recreation facilities are provided at State, regional, district, neighbourhood and local levels for active and passive recreation, biodiversity, community health, urban cooling, tree canopy cover, visual amenity, gathering spaces, wildlife and waterway corridors, and a range of other functions and at a range of sizes that reflect the purpose of that open space.
------	--

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Recreation facilities are compatible with surrounding land uses and activities.	DTS/DPF 1.1 None are applicable.
PO 1.2 Open space areas include natural or landscaped areas using locally indigenous plant species and large trees.	DTS/DPF 1.2 None are applicable.
Design and Siting	
PO 2.1 Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility.	DTS/DPF 2.1 None are applicable.
PO 2.2 Open space and recreation facilities incorporate park furniture, shaded areas and resting places.	DTS/DPF 2.2 None are applicable.
PO 2.3 Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities.	DTS/DPF 2.3 None are applicable.
Pedestrians and Cyclists	
PO 3.1 Open space incorporates: (a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes; (b) safe crossing points where pedestrian routes intersect the road network; (c) easily identified access points.	DTS/DPF 3.1 None are applicable.
Usability	
PO 4.1 Land allocated for open space is suitable for its intended active and passive recreational use taking into consideration its gradient and potential for inundation.	DTS/DPF 4.1 None are applicable.

PO 5.1 Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible.	DTS/DPF 5.1 None are applicable.
PO 5.2 Play equipment is located to maximise opportunities for passive surveillance.	DTS/DPF 5.2 None are applicable.
PO 5.3 Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park.	DTS/DPF 5.3 None are applicable.
PO 5.4 Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment.	DTS/DPF 5.4 None are applicable.
PO 5.5 Adequate lighting is provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities.	DTS/DPF 5.5 None are applicable.
PO 5.6 Pedestrian and bicycle movement after dark is focused along clearly defined, adequately lit routes with observable entries and exits.	DTS/DPF 5.6 None are applicable.
Signage	
PO 6.1 Signage is provided at entrances to and within the open space and recreation facilities to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like.	DTS/DPF 6.1 None are applicable.
Buildings and Structures	
PO 7.1 Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive.	DTS/DPF 7.1 None are applicable.
PO 7.2 Buildings and structures in open space areas are clustered where practical to ensure that the majority of the site remains open.	DTS/DPF 7.2 None are applicable.
PO 7.3 Development in open space is constructed to minimise the extent of impervious surfaces.	DTS/DPF 7.3 None are applicable.
PO 7.4 Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve.	DTS/DPF 7.4 None are applicable.
Landscaping	
PO 8.1 Open space and recreation facilities provide for the planting and retention of large trees and vegetation.	DTS/DPF 8.1 None are applicable.
PO 8.2 Landscaping in open space and recreation facilities provides shade and windbreaks: (a) along cyclist and pedestrian routes; (b) around picnic and barbecue areas; (c) in car parking areas.	DTS/DPF 8.2 None are applicable.
PO 8.3 Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity.	DTS/DPF 8.3 None are applicable.
PO 8.4 Landscaping including trees and other vegetation passively watered with local rainfall run-off, where practicable.	DTS/DPF 8.4 None are applicable.

Out of Activity Centre Development

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome

DO1 | The role of Activity Centres in contributing to the form and pattern of development and enabling equitable and convenient access to a range of shopping, administrative, 4443

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>Non-residential development outside Activity Centres of a scale and type that does not diminish the role of Activity Centres:</p> <ul style="list-style-type: none"> (a) as primary locations for shopping, administrative, cultural, entertainment and community services (b) as a focus for regular social and business gatherings (c) in contributing to or maintaining a pattern of development that supports equitable community access to services and facilities. 	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Out-of-activity centre non-residential development complements Activity Centres through the provision of services and facilities:</p> <ul style="list-style-type: none"> (a) that support the needs of local residents and workers, particularly in underserved locations (b) at the edge of Activities Centres where they cannot readily be accommodated within an existing Activity Centre to expand the range of services on offer and support the role of the Activity Centre. 	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>

Resource Extraction

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Resource extraction activities are developed in a manner that minimises human and environmental impacts.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
<p>PO 1.1</p> <p>Resource extraction activities minimise landscape damage outside of those areas unavoidably disturbed to access and exploit a resource and provide for the progressive reclamation and betterment of disturbed areas.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Resource extraction activities avoid damage to cultural sites or artefacts.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
Water Quality	
<p>PO 2.1</p> <p>Stormwater and/or wastewater from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on site.</p>	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
Separation Treatments, Buffers and Landscaping	
<p>PO 3.1</p> <p>Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation.</p>	<p>DTS/DPF 3.1</p> <p>None are applicable.</p>
<p>PO 3.2</p> <p>Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding.</p>	<p>DTS/DPF 3.2</p> <p>None are applicable.</p>

Site Contamination

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Ensure land is suitable for the proposed use in circumstances where it is, or may have been, subject to site contamination.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>Ensure land is suitable for use when land use changes to a more sensitive use.</p>	<p>DTS/DPF 1.1</p> <p>Development satisfies (a), (b), (c) or (d):</p> <ul style="list-style-type: none"> (a) does not involve a change in the use of land (b) involves a change in the use of land that does not constitute a change to a more sensitive use (c) involves a change in the use of land to a more sensitive use on land at which site contamination is unlikely to exist (as demonstrated in a site contamination declaration form) (d) involves a change in the use of land to a more sensitive use on land at which site contamination exists, or may exist (as demonstrated in a site contamination declaration form), and satisfies both of the following: <ul style="list-style-type: none"> (i) a site contamination audit report has been prepared under Part 10A of the <i>Environment Protection Act 1993</i> in relation to the land within the previous 5 years which states that- <ul style="list-style-type: none"> A. site contamination does not exist (or no longer exists) at the land or B. the land is suitable for the proposed use or range of uses (without the need for any further remediation) or C. where remediation is, or remains, necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented in association with the development) and (ii) no other class 1 activity or class 2 activity has taken place at the land since the preparation of the site contamination audit report (as demonstrated in a site contamination declaration form).

Tourism Development

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Tourism development is built in locations that cater to the needs of visitors and positively contributes to South Australia's visitor economy.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
General	
<p>PO 1.1</p> <p>Tourism development complements and contributes to local, natural, cultural or historical context where:</p> <ul style="list-style-type: none"> (a) it supports immersive natural experiences (b) it showcases South Australia's landscapes and produce (c) its events and functions are connected to local food, wine and nature. 	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) is clustered to minimise environmental and contextual impact.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
Caravan and Tourist Parks	
<p>PO 2.1</p>	<p>DTS/DPF 2.1</p>

Potential conflicts between long-term residents and short-term tourists are minimised through suitable siting and design measures.	None are applicable.
PO 2.2 Occupants are provided privacy and amenity through landscaping and fencing.	DTS/DPF 2.2 None are applicable.
PO 2.3 Communal open space and centrally located recreation facilities are provided for guests and visitors.	DTS/DPF 2.3 12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation.
PO 2.4 Perimeter landscaping is used to enhance the amenity of the locality.	DTS/DPF 2.4 None are applicable.
PO 2.5 Amenity blocks (showers, toilets, laundry and kitchen facilities) are sufficient to serve the full occupancy of the development.	DTS/DPF 2.5 None are applicable.
PO 2.6 Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverine locations.	DTS/DPF 2.6 None are applicable.
Tourist accommodation in areas constituted under the National Parks and Wildlife Act 1972	
PO 3.1 Tourist accommodation avoids delicate or environmentally sensitive areas such as sand dunes, cliff tops, estuaries, wetlands or substantially intact strata of native vegetation (including regenerated areas of native vegetation lost through bushfire).	DTS/DPF 3.1 None are applicable.
PO 3.2 Tourist accommodation is sited and designed in a manner that is subservient to the natural environment and where adverse impacts on natural features, landscapes, habitats and cultural assets are avoided.	DTS/DPF 3.2 None are applicable.
PO 3.3 Tourist accommodation and recreational facilities, including associated access ways and ancillary structures, are located on cleared (other than where cleared as a result of bushfire) or degraded areas or where environmental improvements can be achieved.	DTS/DPF 3.3 None are applicable.
PO 3.4 Tourist accommodation is designed to prevent conversion to private dwellings through: (a) comprising a minimum of 10 accommodation units (b) clustering separated individual accommodation units (c) being of a size unsuitable for a private dwelling (d) ensuring functional areas that are generally associated with a private dwelling such as kitchens and laundries are excluded from, or physically separated from individual accommodation units, or are of a size unsuitable for a private dwelling.	DTS/DPF 3.4 None are applicable.

Transport, Access and Parking

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Movement Systems	
PO 1.1 Development is integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system.	DTS/DPF 1.1 None are applicable.
PO 1.2 Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers.	DTS/DPF 1.2 None are applicable.

<p>PO 1.3 Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict.</p>	<p>DTS/DPF 1.3 None are applicable.</p>
<p>PO 1.4 Development is sited and designed so that loading, unloading and turning of all traffic avoids interrupting the operation of and queuing on public roads and pedestrian paths.</p>	<p>DTS/DPF 1.4 All vehicle manoeuvring occurs onsite.</p>
<p>Sightlines</p>	
<p>PO 2.1 Sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians are maintained or enhanced to ensure safety for all road users and pedestrians.</p>	<p>DTS/DPF 2.1 None are applicable.</p>
<p>PO 2.2 Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians.</p>	<p>DTS/DPF 2.2 None are applicable.</p>
<p>Vehicle Access</p>	
<p>PO 3.1 Safe and convenient access minimises impact or interruption on the operation of public roads.</p>	<p>DTS/DPF 3.1 The access is: (a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land or (b) not located within 6m of an intersection of 2 or more roads or a pedestrian activated crossing.</p>
<p>PO 3.2 Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.</p>	<p>DTS/DPF 3.2 None are applicable.</p>
<p>PO 3.3 Access points are sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use.</p>	<p>DTS/DPF 3.3 None are applicable.</p>
<p>PO 3.4 Access points are sited and designed to minimise any adverse impacts on neighbouring properties.</p>	<p>DTS/DPF 3.4 None are applicable.</p>
<p>PO 3.5 Access points are located so as not to interfere with street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets.</p>	<p>DTS/DPF 3.5 Vehicle access to designated car parking spaces satisfy (a) or (b): (a) is provided via a lawfully existing or authorised access point or an access point for which consent has been granted as part of an application for the division of land (b) where newly proposed, is set back: (i) 0.5m or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner (ii) 2m or more from the base of the trunk of a street tree unless consent is provided from the tree owner for a lesser distance (iii) 6m or more from the tangent point of an intersection of 2 or more roads (iv) outside of the marked lines or infrastructure dedicating a pedestrian crossing.</p>
<p>PO 3.6 Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate).</p>	<p>DTS/DPF 3.6 Driveways and access points: (a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided (b) for sites with a frontage to a public road greater than 20m: (i) a single access point no greater than 6m in width is provided or (ii) not more than two access points with a width of 3.5m each are provided.</p>
<p>PO 3.7 Access points are appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation.</p>	<p>DTS/DPF 3.7 Development does not involve a new or modified access or cause an increase in traffic through an existing access that is located within the following distance from a railway crossing: (a) 80 km/h road - 110m (b) 70 km/h road - 90m (c) 60 km/h road - 70m (d) 50km/h or less road - 50m.</p>
<p>PO 3.8 Driveways, access points, access tracks and parking areas are designed and constructed to</p>	<p>DTS/DPF 3.8 None are applicable.</p>

allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

PO 3.9	DTS/DPF 3.9
Development is designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads.	None are applicable.
Access for People with Disabilities	
PO 4.1	DTS/DPF 4.1
Development is sited and designed to provide safe, dignified and convenient access for people with a disability.	None are applicable.
Vehicle Parking Rates	
PO 5.1	DTS/DPF 5.1
Sufficient on-site vehicle parking and specifically marked accessible car parking places are provided to meet the needs of the development or land use having regard to factors that may support a reduced on-site rate such as:	Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using one of the following, whichever is relevant:
<ul style="list-style-type: none"> (a) availability of on-street car parking (b) shared use of other parking areas (c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site, the provision of vehicle parking may be shared (d) the adaptive reuse of a State or Local Heritage Place. 	<ul style="list-style-type: none"> (a) Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements (b) Transport, Access and Parking Table 2 - Off-Street Vehicle Parking Requirements in Designated Areas (c) if located in an area where a lawfully established carparking fund operates, the number of spaces calculated under (a) or (b) less the number of spaces offset by contribution to the fund.
Vehicle Parking Areas	
PO 6.1	DTS/DPF 6.1
Vehicle parking areas are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another.	Movement between vehicle parking areas within the site can occur without the need to use a public road.
PO 6.2	DTS/DPF 6.2
Vehicle parking areas are appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.	None are applicable.
PO 6.3	DTS/DPF 6.3
Vehicle parking areas are designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points.	None are applicable.
PO 6.4	DTS/DPF 6.4
Pedestrian linkages between parking areas and the development are provided and are safe and convenient.	None are applicable.
PO 6.5	DTS/DPF 6.5
Vehicle parking areas that are likely to be used during non-daylight hours are provided with sufficient lighting to entry and exit points to ensure clear visibility to users.	None are applicable.
PO 6.6	DTS/DPF 6.6
Loading areas and designated parking spaces for service vehicles are provided within the boundary of the site.	Loading areas and designated parking spaces are wholly located within the site.
PO 6.7	DTS/DPF 6.7
On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times.	None are applicable.
Undercroft and Below Ground Garaging and Parking of Vehicles	
PO 7.1	DTS/DPF 7.1
Undercroft and below ground garaging of vehicles is designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles.	None are applicable.
Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks	
PO 8.1	DTS/DPF 8.1
Internal road and vehicle parking areas are surfaced to prevent dust becoming a nuisance to park residents and occupants.	None are applicable.
PO 8.2	DTS/DPF 8.2
Traffic circulation and movement within the park is pedestrian friendly and promotes low speed vehicle movement.	None are applicable.
Bicycle Parking in Designated Areas	
PO 9.1	DTS/DPF 9.1
The provision of adequately sized on-site bicycle parking facilities encourages cycling as an active transport mode.	Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle

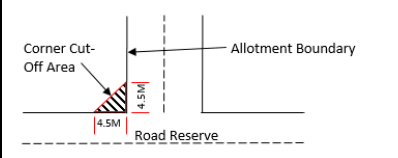

Planning and Design Code - 26 August - Version 2021.12	Parking Requirements.
<p>PO 9.2</p> <p>Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and deters property theft.</p>	<p>DTS/DPF 9.2</p> <p>None are applicable.</p>
<p>PO 9.3</p> <p>Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the facilities to encourage cycling as a mode of journey-to-work transport.</p>	<p>DTS/DPF 9.3</p> <p>None are applicable.</p>
Corner Cut-Offs	
<p>PO 10.1</p> <p>Development is located and designed to ensure drivers can safely turn into and out of public road junctions.</p>	<p>DTS/DPF 10.1</p> <p>Development does not involve building work, or building work is located wholly outside the land shown as Corner Cut-Off Area in the following diagram:</p> 

Table 1 - General Off-Street Car Parking Requirements

The following parking rates apply and if located in an area where a lawfully established carparking fund operates, the number of spaces is reduced by an amount equal to the number of spaces offset by contribution to the fund.

Class of Development	Car Parking Rate (unless varied by Table 2 onwards)
Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.	
Residential Development	
Detached Dwelling	<p>Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p>
Group Dwelling	<p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p> <p>0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.</p>
Residential Flat Building	<p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p> <p>0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.</p>
Row Dwelling where vehicle access is from the primary street	<p>Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p>
Row Dwelling where vehicle access is not from the primary street (i.e. rear-loaded)	<p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p>
Semi-Detached Dwelling	<p>Dwelling with 1 bedroom (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 2 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling, 1 of which is to be covered.</p>
Aged / Supported Accommodation	
Retirement village	<p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.</p> <p>0.2 spaces per dwelling for visitor parking.</p>
Supported accommodation	0.3 spaces per bed.
Residential Development (Other)	
Ancillary accommodation	No additional requirements beyond those associated with the main dwelling.

Residential park	<p>Dwelling with 1 or 2 bedrooms (including rooms capable of being used as a bedroom) - 1 space per dwelling.</p> <p>Dwelling with 3 or more bedrooms (including rooms capable of being used as a bedroom) - 2 spaces per dwelling.</p> <p>0.2 spaces per dwelling for visitor parking.</p>
Student accommodation	0.3 spaces per bed.
Workers' accommodation	0.5 spaces per bed plus 0.2 spaces per bed for visitor parking.
Tourist	
Caravan park / tourist park	<p>Parks with 100 sites or less - a minimum of 1 space per 10 sites to be used for accommodation.</p> <p>Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation.</p> <p>A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin.</p>
Tourist accommodation	1 car parking space per accommodation unit / guest room.
Commercial Uses	
Auction room/ depot	1 space per 100m ² of building floor area plus an additional 2 spaces.
Automotive collision repair	3 spaces per service bay.
Call centre	8 spaces per 100m ² of gross leasable floor area.
Motor repair station	3 spaces per service bay.
Office	4 spaces per 100m ² of gross leasable floor area.
Retail fuel outlet	3 spaces per 100m ² gross leasable floor area.
Service trade premises	<p>2.5 spaces per 100m² of gross leasable floor area</p> <p>1 space per 100m² of outdoor area used for display purposes.</p>
Shop (no commercial kitchen)	<p>5.5 spaces per 100m² of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p> <p>5 spaces per 100m² of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p>
Shop (in the form of a bulky goods outlet)	2.5 spaces per 100m ² of gross leasable floor area.
Shop (in the form of a restaurant or involving a commercial kitchen)	<p>Premises with a dine-in service only (which may include a take-away component with no drive-through) - 0.4 spaces per seat.</p> <p>Premises with take-away service but with no seats - 12 spaces per 100m² of total floor area plus a drive-through queue capacity of ten vehicles measured from the pick-up point.</p> <p>Premises with a dine-in and drive-through take-away service - 0.3 spaces per seat plus a drive through queue capacity of 10 vehicles measured from the pick-up point.</p>
Community and Civic Uses	
Childcare centre	0.25 spaces per child
Library	4 spaces per 100m ² of total floor area.
Community facility	10 spaces per 100m ² of total floor area.
Hall / meeting hall	0.2 spaces per seat.
Place of worship	1 space for every 3 visitor seats.
Pre-school	1 per employee plus 0.25 per child (drop off/pick up bays)
Educational establishment	For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.

For a secondary school - 1.1 per full time equivalent employee plus 0.1 spaces per student for a pickup/set down area either on-site or on the public realm within 300m of the site.

For a tertiary institution - 0.4 per student based on the maximum number of students on the site at any time.

Health Related Uses

Hospital
4.5 spaces per bed for a public hospital.

1.5 spaces per bed for a private hospital.

Consulting room
4 spaces per consulting room excluding ancillary facilities.

Recreational and Entertainment Uses

Cinema complex
0.2 spaces per seat.

Concert hall / theatre
0.2 spaces per seat.

Hotel
1 space for every 2m² of total floor area in a public bar plus 1 space for every 6m² of total floor area available to the public in a lounge, beer garden plus 1 space per 2 gaming machines, plus 1 space per 3 seats in a restaurant.

Indoor recreation facility
6.5 spaces per 100m² of total floor area for a Fitness Centre
4.5 spaces per 100m² of total floor area for all other Indoor recreation facilities.

Industry/Employment Uses

Fuel depot
1.5 spaces per 100m² total floor area
1 spaces per 100m² of outdoor area used for fuel depot activity purposes.

Industry
1.5 spaces per 100m² of total floor area.

Store
0.5 spaces per 100m² of total floor area.

Timber yard
1.5 spaces per 100m² of total floor area
1 space per 100m² of outdoor area used for display purposes.

Warehouse
0.5 spaces per 100m² total floor area.

Other Uses

Funeral Parlour
1 space per 5 seats in the chapel plus 1 space for each vehicle operated by the parlour.

Radio or Television Station
5 spaces per 100m² of total building floor area.

Table 2 - Off-Street Car Parking Requirements in Designated Areas

The following parking rates apply in any zone, subzone or other area described in the 'Designated Areas' column subject to the following:

- (a) the location of the development is unable to satisfy the requirements of Table 2 – Criteria (other than where a location is exempted from the application of those criteria) or
- (b) the development satisfies Table 2 – Criteria (or is exempt from those criteria) and is located in an area where a lawfully established carparking fund operates, in which case the number of spaces are reduced by an amount equal to the number of spaces offset by contribution to the fund.

Class of Development	Car Parking Rate		Designated Areas
	Minimum number of spaces	Maximum number of spaces	
Development generally			
All classes of development	No minimum.	No maximum except in the Primary Pedestrian Area identified in the Primary Pedestrian Area Concept Plan, where the maximum is: 1 space for each dwelling with a total floor area less than 75 square metres	Capital City Zone City Main Street Zone City Riverbank Zone Adelaide Park Lands Zone

		<p>2 spaces for each dwelling with a total floor area between 75 square metres and 150 square metres</p> <p>3 spaces for each dwelling with a total floor area greater than 150 square metres.</p> <p>Residential flat building or Residential component of a multi-storey building: 1 visitor space for each 6 dwellings.</p>	<p>Business Neighbourhood Zone (within the City of Adelaide)</p> <p>The St Andrews Hospital Precinct Subzone and Women's and Children's Hospital Precinct Subzone of the Community Facilities Zone</p>
Non-residential development			
Non-residential development excluding tourist accommodation	3 spaces per 100m ² of gross leasable floor area.	5 spaces per 100m ² of gross leasable floor area.	<p>City Living Zone</p> <p>Urban Corridor (Boulevard) Zone</p> <p>Urban Corridor (Business) Zone</p> <p>Urban Corridor (Living) Zone</p> <p>Urban Corridor (Main Street) Zone</p> <p>Urban Neighbourhood Zone</p>
Non-residential development excluding tourist accommodation	3 spaces per 100m ² of gross leasable floor area.	6 spaces per 100m ² of gross leasable floor area.	<p>Strategic Innovation Zone</p> <p>Suburban Activity Centre Zone</p> <p>Suburban Business Zone</p> <p>Business Neighbourhood Zone</p> <p>Suburban Main Street Zone</p> <p>Urban Activity Centre Zone</p>
Tourist accommodation	1 space for every 4 bedrooms up to 100 bedrooms plus 1 space for every 5 bedrooms over 100 bedrooms	1 space per 2 bedrooms up to 100 bedrooms and 1 space per 4 bedrooms over 100 bedrooms	<p>City Living Zone</p> <p>Urban Activity Centre Zone</p> <p>Urban Corridor (Boulevard) Zone</p> <p>Urban Corridor (Business) Zone</p> <p>Urban Corridor (Living) Zone</p> <p>Urban Corridor (Main Street) Zone</p> <p>Urban Neighbourhood Zone</p>
Residential development			
Residential component of a multi-storey building	<p>Dwelling with no separate bedroom -0.25 spaces per dwelling</p> <p>1 bedroom dwelling - 0.75 spaces per dwelling</p> <p>2 bedroom dwelling - 1 space per dwelling</p> <p>3 or more bedroom dwelling - 1.25 spaces per dwelling</p> <p>0.25 spaces per dwelling for visitor parking.</p>	None specified.	<p>City Living Zone</p> <p>Strategic Innovation Zone</p> <p>Urban Activity Centre Zone</p> <p>Urban Corridor (Boulevard) Zone</p> <p>Urban Corridor (Business) Zone</p> <p>Urban Corridor (Living) Zone</p> <p>Urban Corridor (Main Street) Zone</p> <p>Urban Neighbourhood Zone</p>
Residential flat building	<p>Dwelling with no separate bedroom -0.25 spaces per dwelling</p> <p>1 bedroom dwelling - 0.75 spaces per dwelling</p> <p>2 bedroom dwelling - 1 space per dwelling</p> <p>3 or more bedroom dwelling - 1.25 spaces per dwelling</p> <p>0.25 spaces per dwelling for visitor parking.</p>	None specified.	<p>City Living Zone</p> <p>Urban Activity Centre Zone</p> <p>Urban Corridor (Boulevard) Zone</p> <p>Urban Corridor (Business) Zone</p> <p>Urban Corridor (Living) Zone</p> <p>Urban Corridor (Main Street) Zone</p> <p>Urban Neighbourhood Zone</p>

Table 2 - Criteria:

The following criteria are used in conjunction with Table 2. The 'Exception' column identifies locations where the criteria do not apply and the car parking rates in Table 2 are applicable.

Criteria	Exceptions
----------	------------

The designated area is wholly located within Metropolitan Adelaide and any part of the development site satisfies one or more of the following:

- (a) is within 200 metres of any section of road reserve along which a bus service operates as a high frequency public transit service⁽²⁾
- (b) is within 400 metres of a bus interchange⁽¹⁾
- (c) is within 400 metres of an O-Bahn interchange⁽¹⁾
- (d) is within 400 metres of a passenger rail station⁽¹⁾
- (e) is within 400 metres of a passenger tram station⁽¹⁾
- (f) is within 400 metres of the Adelaide Parklands.

- (a) All zones in the City of Adelaide
- (b) Strategic Innovation Zone in the following locations:
 - (i) City of Burnside
 - (ii) City of Marion
 - (iii) City of Mitcham
- (c) Urban Corridor (Boulevard) Zone
- (d) Urban Corridor (Business) Zone
- (e) Urban Corridor (Living) Zone
- (f) Urban Corridor (Main Street) Zone
- (g) Urban Neighbourhood Zone

[NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles. (2) A high frequency public transit service is a route serviced every 15 minutes between 7.30am and 6.30pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10pm.]

Table 3 - Off-Street Bicycle Parking Requirements

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

Class of Development	Bicycle Parking Rate
	Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type.
Consulting Room	1 space per 20 employees plus 1 space per 20 consulting rooms for customers.
Educational establishment	For a secondary school - 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors. For tertiary education - 1 space per 20 employees plus 1 space per 10 full time students.
Hospital	1 space per 15 beds plus 1 space per 30 beds for visitors.
Indoor recreation facility	1 space per 4 employees plus 1 space per 200m ² of gross leasable floor area for visitors.
Licensed Premises	1 per 20 employees, plus 1 per 60 square metres total floor area, plus 1 per 40 square metres of bar floor area, plus 1 per 120 square metres lounge and beer garden floor area, plus 1 per 60 square metres dining floor area, plus 1 per 40 square metres gaming room floor area.
Office	1 space for every 200m ² of gross leasable floor area plus 2 spaces plus 1 space per 1000m ² of gross leasable floor area for visitors.
Pre-school	1 space per 20 full time employees plus 1 space per 40 full time children.
Recreation area	1 per 1500 spectator seats for employees plus 1 per 250 visitor and customers.
Residential flat building	Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors.
Residential component of a multi-storey building	Within the City of Adelaide 1 for every dwelling for residents with a total floor area less than 150 square metres, 2 for every dwelling for residents with a total floor area greater than 150 square metres, plus 1 for every 10 dwellings for visitors, and in all other cases 1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors.
Shop	1 space for every 300m ² of gross leasable floor area plus 1 space for every 600m ² of gross leasable floor area for customers.
Tourist accommodation	1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors.

Schedule to Table 3

Designated Area	Relevant part of the State
	The bicycle parking rate applies to a designated area located in a relevant part of the State described below.

Waste Treatment and Management Facilities

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Mitigation of the potential environmental and amenity impacts of waste treatment and management facilities.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Siting	
<p>PO 1.1</p> <p>Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
Soil and Water Protection	
<p>PO 2.1</p> <p>Soil, groundwater and surface water are protected from contamination from waste treatment and management facilities through measures such as:</p> <ul style="list-style-type: none"> (a) containing potential groundwater and surface water contaminants within waste operations areas (b) diverting clean stormwater away from waste operations areas and potentially contaminated areas (c) providing a leachate barrier between waste operations areas and underlying soil and groundwater. 	<p>DTS/DPF 2.1</p> <p>None are applicable.</p>
<p>PO 2.2</p> <p>Wastewater lagoons are set back from watercourses to minimise environmental harm and adverse effects on water resources.</p>	<p>DTS/DPF 2.2</p> <p>Wastewater lagoons are set back 50m or more from watercourse banks.</p>
<p>PO 2.3</p> <p>Wastewater lagoons are designed and sited to:</p> <ul style="list-style-type: none"> (a) avoid intersecting underground waters; (b) avoid inundation by flood waters; (c) ensure lagoon contents do not overflow; (d) include a liner designed to prevent leakage. 	<p>DTS/DPF 2.3</p> <p>None are applicable.</p>
<p>PO 2.4</p> <p>Waste operations areas of landfills and organic waste processing facilities are set back from watercourses to minimise adverse impacts on water resources.</p>	<p>DTS/DPF 2.4</p> <p>Waste operations areas are set back 100m or more from watercourse banks.</p>
Amenity	
<p>PO 3.1</p> <p>Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity.</p>	<p>DTS/DPF 3.1</p> <p>None are applicable.</p>
<p>PO 3.2</p> <p>Access routes to waste treatment and management facilities via residential streets is avoided.</p>	<p>DTS/DPF 3.2</p> <p>None are applicable.</p>
<p>PO 3.3</p> <p>Litter control measures minimise the incidence of windblown litter.</p>	<p>DTS/DPF 3.3</p> <p>None are applicable.</p>

PO 3.4 Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation.	DTS/DPF 3.4 None are applicable.
Access	
PO 4.1 Traffic circulation movements within any waste treatment or management site are designed to enable vehicles to enter and exit the site in a forward direction.	DTS/DPF 4.1 None are applicable.
PO 4.2 Suitable access for emergency vehicles is provided to and within waste treatment or management sites.	DTS/DPF 4.2 None are applicable.
Fencing and Security	
PO 5.1 Security fencing provided around waste treatment and management facilities prevents unauthorised access to operations and potential hazard to the public.	DTS/DPF 5.1 Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site.
Landfill	
PO 6.1 Landfill gas emissions are managed in an environmentally acceptable manner.	DTS/DPF 6.1 None are applicable.
PO 6.2 Landfill facilities are separated from areas of environmental significance and land used for public recreation and enjoyment.	DTS/DPF 6.2 Landfill facilities are set back 250m or more from a public open space reserve, forest reserve, national park or Conservation Zone.
PO 6.3 Landfill facilities are located on land that is not subject to land slip.	DTS/DPF 6.3 None are applicable.
PO 6.4 Landfill facilities are separated from areas subject to flooding.	DTS/DPF 6.4 Landfill facilities are set back 500m or more from land inundated in a 1% AEP flood event.
Organic Waste Processing Facilities	
PO 7.1 Organic waste processing facilities are separated from the coast to avoid potential environment harm.	DTS/DPF 7.1 Organic waste processing facilities are set back 500m or more from the coastal high water mark.
PO 7.2 Organic waste processing facilities are located on land where the engineered liner and underlying seasonal water table cannot intersect.	DTS/DPF 7.2 None are applicable.
PO 7.3 Organic waste processing facilities are sited away from areas of environmental significance and land used for public recreation and enjoyment.	DTS/DPF 7.3 Organic waste processing facilities are set back 250m or more from a public open space reserve, forest reserve, national park or a Conservation Zone.
PO 7.4 Organic waste processing facilities are located on land that is not subject to land slip.	DTS/DPF 7.4 None are applicable.
PO 7.5 Organic waste processing facilities separated from areas subject to flooding.	DTS/DPF 7.5 Organic waste processing facilities are set back 500m or more from land inundated in a 1% AEP flood event.
Major Wastewater Treatment Facilities	
PO 8.1 Major wastewater treatment and disposal systems, including lagoons, are designed to minimise potential adverse odour impacts on sensitive receivers, minimise public and environmental health risks and protect water quality.	DTS/DPF 8.1 None are applicable.
PO 8.2 Artificial wetland systems for the storage of treated wastewater are designed and sited to minimise potential public health risks arising from the breeding of mosquitoes.	DTS/DPF 8.2 None are applicable.

Workers' accommodation and Settlements

Assessment Provisions (AP)

Desired Outcome (DO)

Desired Outcome	
DO 1	Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
<p>PO 1.1</p> <p>Workers' accommodation and settlements are obscured from scenic routes, tourist destinations and areas of conservation significance or otherwise designed to complement the surrounding landscape.</p>	<p>DTS/DPF 1.1</p> <p>None are applicable.</p>
<p>PO 1.2</p> <p>Workers' accommodation and settlements are sited and designed to minimise nuisance impacts on the amenity of adjacent users of land.</p>	<p>DTS/DPF 1.2</p> <p>None are applicable.</p>
<p>PO 1.3</p> <p>Workers' accommodation and settlements are built with materials and colours that blend with the landscape.</p>	<p>DTS/DPF 1.3</p> <p>None are applicable.</p>
<p>PO 1.4</p> <p>Workers' accommodation and settlements are supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers.</p>	<p>DTS/DPF 1.4</p> <p>None are applicable.</p>

Part 5 - Specified matters and areas identified under the Act and Regulations

The *Planning, Development and Infrastructure Act 2016* and the *Planning, Development and Infrastructure (General) Regulations 2017* allow the Planning and Design Code to specify matters and identify areas for certain purposes. Column A identifies the purpose of a specified matter or identified area and Column B identifies the relevant matter or zone, subzone or overlay in the Planning and Design Code or other area identified for that purpose, including limits to the extent of an identified area.

Where the extent of an identified area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

Table 1 - Specified matters and areas identified under the Planning, Development and Infrastructure (General) Regulations 2017

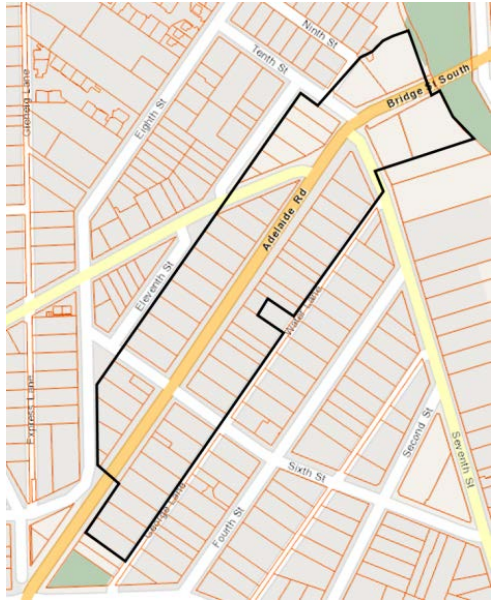

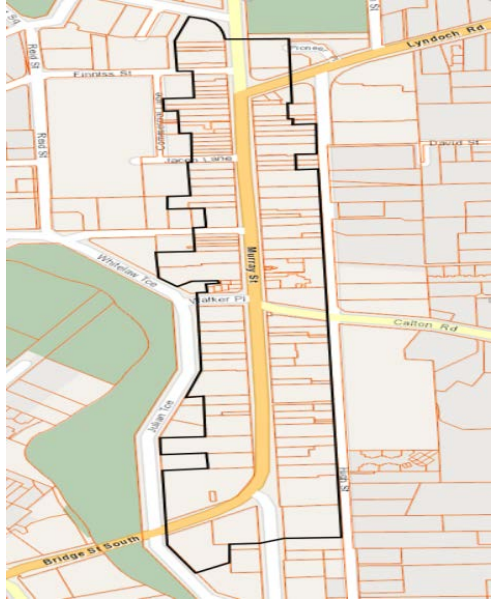

Introduction (Column A)	Specified matters / identified areas (Column B)
Interpretation	
Areas identified as 'designated airport building heights area' for the purposes of clause 3(1) of the Regulations - Interpretation	Airport Building Heights (Aircraft Landing Areas) Overlay Airport Building Heights (Regulated) Overlay Defence Aviation Area Overlay
Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	None specified
Areas identified as 'designated flood zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	Coastal Areas Overlay Hazards (Flooding) Overlay River Murray Flood Plain Protection Area Overlay
Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations - Interpretation	Regulated and Significant Tree Overlay
Building Rules: bushfire prone areas	
Areas identified as 'designated bushfire prone areas' for the purposes of clause 98(b) of the Regulations - Building Rules: bushfire prone areas	Refer to <i>Ministerial Building Standard MBS 008 - Designated bushfire prone areas - additional requirements</i>
Areas identified as a 'bushfire prone area' for the purposes of clause 14 of Schedule 8 of the Regulations - Additional requirements for bushfire prone areas	Hazards (Bushfire - General Risk) Overlay Hazards (Bushfire - High Risk) Overlay Hazards (Bushfire - Medium Risk) Overlay Hazards (Bushfire - Outback) Overlay Hazards (Bushfire - Regional) Overlay Hazards (Bushfire - Urban Interface) Overlay
Additions to definition of development	
Areas identified for the purposes of clause 1 of Schedule 3 under the Regulations - Excavating or filling in identified zones or areas	Hills Face Zone Hills Neighbourhood Zone

Planning and Design Code - 26 August - Version 2021.12	Significant Landscape Protection Overlay Hazard (Acid Sulfate Soils) Overlay
Areas identified for the purposes of clause 3 of Schedule 3 under the Regulations - Excavation or filling in identified zones or areas subject to inundation or flooding	In addition to a 'designated flood zone, subzone or overlay', the following: None specified
Exclusions from definition of development - general	
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(i) of Schedule 4 under the Regulations - Council works	Conservation Zone Significant Landscape Protection Overlay
Areas identified as 'environmental areas' for the purposes of clause 2(1)(d)(ii)(A) of Schedule 4 under the Regulations - Council works	Coastal Areas Overlay
Areas identified for the purposes of clause 4 (1)(a) of Schedule 4 under the Regulations - Outbuilding	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(1)(c) of Schedule 4 under the Regulations - Swimming pool	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone
Areas identified for the purposes of clause 4 (1)(d)(i)(B) of Schedule 4 under the Regulations - Fence not exceeding 2.1m in height	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 4(1)(i) of Schedule 4 under the Regulations - Deck	In addition to a 'designated bushfire prone area', the following: Coastal Areas Overlay Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 10 of Schedule 4 under the Regulations - Demolition of the whole of a building	Historic Area Overlay
Areas identified for the purposes of clause 11 of Schedule 4 under the Regulations - Dams	In addition to a 'designated flood zone, subzone or overlay', the following: Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 13(1) of Schedule 4 under the Regulations - Aerials, towers	Hills Face Zone Significant Landscape Protection Overlay
Areas identified for the purposes of clause 13(2) of Schedule 4 under the Regulations - Aerials, towers in the Hills Face Zone	Hills Face Zone
Relevant authority - Commission	
Areas identified for the purposes of clause 4(1) of Schedule 6 of the Regulations - Buildings exceeding 4 storeys	Those parts of the Design Overlay within the following areas: City of Burnside The Corporation of the City of Norwood Payneham and St Peters City of Prospect The Corporation of the City of Unley City of West Torrens City of Holdfast Bay
Areas identified for the purposes of clause 5(1) of Schedule 6 of the Regulations - Developments over \$3m in the City of Port Adelaide	Design Overlay
Areas identified for the purposes of clause 8(1) of Schedule 6 of the Regulations - Developments over \$3m in the City of Charles Sturt	That part of the Urban Neighbourhood Zone identified as 'Bowden Urban Village' in the <i>Concept Plan Technical and Numeric Variation layer</i>
Areas identified for the purposes of clause 11 of Schedule 6 of the Regulations - Developments in the show grounds	That part of the Recreation Zone in the City of Unley shown in Figure Un/1 of Schedule 1.
State agency development exempt from approval	
Areas identified for the purposes of clause 3 of Schedule 13 of the Regulations - Certain development in part of City of Mitcham	The area identified in Figure Mit/1 of Schedule 1

Table 2 – Specified matters and areas identified under the Planning, Development and Infrastructure Act 2016

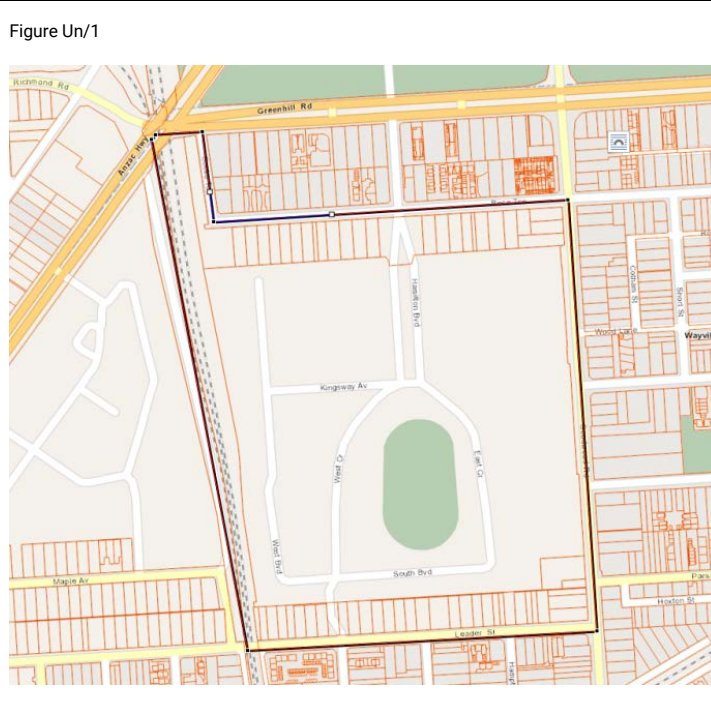

Introduction (Column A)	Specified matters / identified areas (Column B)
For the purposes of paragraph (g) of the definition of development under section 3(1) of the Act - External painting of a building	Any building located within the area identified in Figure Ga/1 or Figure Ga/2 of Schedule 1.
Land identified as an infrastructure reserve for the purposes of section 129 (1)(a)	Land within the Infrastructure (Airfield) Zone located on the Andamooka Road (11km east of the eastern most boundary of Roxby Downs [Municipality]) and / or the site of Olympic Dam mining settlement (as per the approved Olympic Dam mining lease), within 150m north, and 50m south, of the existing road alignment of Andamooka Road, between the eastern boundary of the Roxby Downs (Municipality) and the eastern zone boundary of the Infrastructure (Airfield) Zone is land identified as having a land use that is suitable for infrastructure.
For the purposes of paragraph (f) of the definition of 'development' under section 3(1) of the Act - Works in relation to a local heritage place	The demolition, removal, conversion, alteration or external painting of, or addition to, the place, or any other work (not including internal painting but including, in the case of a tree, any tree-damaging activity) that could materially affect the heritage value of the place
Pursuant to section 102(4) of the <i>Planning, Development and Infrastructure Act 2016</i> , a matter specified by the Planning and Design Code to be reserved on the application of the applicant	Any of the matters in DTS/DPF 1.1 of the Urban Tree Canopy Overlay

Schedule 1 - Figures for Specified Areas

Location	Figures

City of Unley

Part 6 - Index of Technical and Numeric Variations

Part 6.1 Minimum Allotment Sizes

Minimum Site Area
Minimum site area for a group dwelling is 250 sqm; residential flat building is 250 sqm
Minimum site area for a detached dwelling is 100 sqm; semi-detached dwelling is 100 sqm; row dwelling is 100 sqm; group dwelling is 100 sqm; residential flat building is 100 sqm
Minimum site area for a detached dwelling is 1,000 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 1,000 sqm; group dwelling is 1,000 sqm; residential flat building is 1,000 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 1,000 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 400 sqm; group dwelling is 500 sqm
Minimum site area for a detached dwelling is 1,000 sqm; semi-detached dwelling is 600 sqm; row dwelling is 450 sqm; group dwelling is 1,200 sqm; residential flat building is 450 sqm
Minimum site area for a detached dwelling is 120 sqm; semi-detached dwelling is 120 sqm; row dwelling is 120 sqm; group dwelling is 120 sqm; residential flat building is 120 sqm
Minimum site area for a detached dwelling is 1,200 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum site area for a detached dwelling is 125 sqm; semi-detached dwelling is 125 sqm; row dwelling is 125 sqm; group dwelling is 275 sqm; residential flat building is 275 sqm
Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm
Minimum site area for a detached dwelling is 150 sqm; semi-detached dwelling is 150 sqm; row dwelling is 150 sqm; group dwelling is 150 sqm; residential flat building is 150 sqm
Minimum site area for a detached dwelling is 1,500 sqm
Minimum site area for a detached dwelling is 1,500 sqm; group dwelling is 1,500 sqm
Minimum site area for a detached dwelling is 160 sqm; semi-detached dwelling is 160 sqm; row dwelling is 160 sqm; group dwelling is 160 sqm; residential flat building is 160 sqm
Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 180 sqm; row dwelling is 120 sqm; group dwelling is 150 sqm; residential flat building is 80 sqm
Minimum site area for a detached dwelling is 200 sqm; semi-detached dwelling is 200 sqm; row dwelling is 200 sqm

Minimum Site Area

Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 450 sqm; group dwelling is 600 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 450 sqm; row dwelling is 400 sqm; group dwelling is 400 sqm; residential flat building is 400 sqm
Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 450 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm
Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 600 sqm
Minimum site area for a detached dwelling is 600 sqm; semi-detached dwelling is 600 sqm; row dwelling is 600 sqm; group dwelling is 600 sqm; residential flat building is 600 sqm
Minimum site area for a detached dwelling is 620 sqm
Minimum site area for a detached dwelling is 625 sqm; semi-detached dwelling is 500 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 625 sqm; semi-detached dwelling is 600 sqm; row dwelling is 600 sqm; group dwelling is 600 sqm; residential flat building is 600 sqm
Minimum site area for a detached dwelling is 700 sqm
Minimum site area for a detached dwelling is 700 sqm; semi-detached dwelling is 400 sqm; group dwelling is 700 sqm
Minimum site area for a detached dwelling is 700 sqm; semi-detached dwelling is 450 sqm; group dwelling is 500 sqm
Minimum site area for a detached dwelling is 700 sqm; semi-detached dwelling is 450 sqm; row dwelling is 350 sqm; group dwelling is 350 sqm; residential flat building is 350 sqm
Minimum site area for a detached dwelling is 700 sqm; semi-detached dwelling is 500 sqm; row dwelling is 350 sqm; group dwelling is 400 sqm; residential flat building is 350 sqm
Minimum site area for a detached dwelling is 700 sqm; semi-detached dwelling is 700 sqm; row dwelling is 700 sqm; group dwelling is 700 sqm; residential flat building is 700 sqm
Minimum site area for a detached dwelling is 750 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 400 sqm; row dwelling is 400 sqm; group dwelling is 400 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 400 sqm; row dwelling is 400 sqm; group dwelling is 400 sqm; residential flat building is 400 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 450 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 550 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 600 sqm
Minimum site area for a detached dwelling is 750 sqm; semi-detached dwelling is 750 sqm; row dwelling is 750 sqm; group dwelling is 750 sqm; residential flat building is 750 sqm
Minimum site area for a detached dwelling is 800 sqm
Minimum site area for a detached dwelling is 800 sqm; group dwelling is 800 sqm
Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 450 sqm; group dwelling is 450 sqm; residential flat building is 450 sqm
Minimum site area for a detached dwelling is 800 sqm; semi-detached dwelling is 500 sqm; row dwelling is 500 sqm; group dwelling is 500 sqm; residential flat building is 500 sqm
Minimum site area for a detached dwelling is 900 sqm
Minimum site area is 1,000 sqm
Minimum site area is 1 ha
Minimum site area is 10 ha
Minimum site area is 100 ha
Minimum site area is 1,200 sqm
Minimum site area is 1.2 ha
Minimum site area is 12 ha
Minimum site area is 1,300 sqm
Minimum site area is 1,500 sqm
Minimum site area is 1.5 ha
Minimum site area is 15 ha
Minimum site area is 16 ha
Minimum site area is 1.7 ha
Minimum site area is 1,800 sqm
Minimum site area is 200 sqm
Minimum site area is 2,000 sqm
Minimum site area is 2 ha
Minimum site area is 20 ha
Minimum site area is 200 ha
Minimum site area is 250 sqm
Minimum site area is 2,500 sqm
Minimum site area is 2.5 ha
Minimum site area is 25 ha
Minimum site area is 2,800 sqm
Minimum site area is 300 sqm
Minimum site area is 3,000 sqm
Minimum site area is 3 ha
Minimum site area is 30 ha
Minimum site area is 32 ha
Minimum site area is 33 ha
Minimum site area is 350 sqm
Minimum site area is 400 sqm
Minimum site area is 4,000 sqm
Minimum site area is 4 ha
Minimum site area is 40 ha
Minimum site area is 420 sqm

Minimum Frontage

Minimum frontage is 22m
Minimum frontage is 25m
Minimum frontage is 30m
Minimum frontage is 40m
Minimum frontage is 45m
Minimum frontage is 50m
Minimum frontage is 7m
Minimum frontage is 8m
Minimum frontage is 85m
Minimum frontage is 9m
Minimum frontage for a detached dwelling is 10m
Minimum frontage for a detached dwelling is 12.5m
Minimum frontage for a detached dwelling is 8m; semi-detached dwelling is 7m; row dwelling is 6m; group dwelling is 6m; residential flat building is 6m
Minimum frontage for a detached dwelling is 9m
Minimum frontage for a detached dwelling is 9m; semi-detached dwelling is 9m; row dwelling is 7m; group dwelling is 18m; residential flat building is 18m

Part 6.3 Building Heights (Metres)

Minimum Building Height (Metres)

Minimum Building Height (Metres)
Minimum building height is 4.5m
Minimum building height is 6m
Minimum building height is 7m
Minimum building height is 8.5m
Minimum building height is 11m
Minimum building height is 11.5m
Minimum building height is 12.5m
Minimum building height is 14m
Minimum building height is 17m
Minimum building height is 21.5m
Minimum building height is 22m
Minimum building height is 27m
Minimum building height is 28m
Minimum building height is 15m
Minimum building height is 8m

Maximum Building Height (Metres)

Maximum Building Height (Metres)
Maximum building height is 4m
Maximum building height is 4.5m
Maximum building height is 5m
Maximum building height is 5.6m
Maximum building height is 5.7m
Maximum building height is 6m
Maximum building height is 6.5m
Maximum building height is 7m
Maximum building height is 8m
Maximum building height is 8.2m
Maximum building height is 8.5m
Maximum building height is 9m
Maximum building height is 10m
Maximum building height is 11.5m
Maximum building height is 12m
Maximum building height is 12.5m
Maximum building height is 13.5m
Maximum building height is 14m
Maximum building height is 15m
Maximum building height is 16.5m
Maximum building height is 18m
Maximum building height is 18.5m
Maximum building height is 22m
Maximum building height is 24.5m
Maximum building height is 25.5m
Maximum building height is 28m

Maximum Building Height (Metres)

Maximum building height is 29m
Maximum building height is 32.5m
Maximum building height is 34m
Maximum building height is 36m
Maximum building height is 43m
Maximum building height is 53m
No prescribed height limit
Maximum building height is 7.5m
Maximum building height is 10.2m
Maximum building height is 10.5m
Maximum building height is 11m
Maximum building height is 20m
Maximum building height is 20.5m
Maximum building height is 28.5m
Maximum building height is 40.5m
Maximum building height is 48m
Maximum building height is 13m
Maximum building height is 17.5m
Maximum building height is 21m
Maximum building height is 15.1m AHD
Maximum building height is 8m restricted to 62m AHD
Maximum building height is 8.3m AHD
Maximum building height is 9m restricted to 53.5m AHD
Maximum building height is 48.5m
Maximum building height is 60.5m

Part 6.4 Building Heights (Levels)

Minimum Building Height (Levels)

Minimum Building Height (Levels)
Minimum building height is 1 level
Minimum building height is 2 levels
Minimum building height is 3 levels
Minimum building height is 4 levels

Maximum Building Height (Levels)

Maximum Building Height (Levels)
Maximum building height is 1 level
Maximum building height is 2 levels
Maximum building height is 3 levels
Maximum building height is 4 levels
Maximum building height is 5 levels
Maximum building height is 6 levels

Maximum building height is 12 levels
Maximum building height is 14 levels
Maximum building height is 15 levels

Part 6.5 Flooding Site and Floor Level

Finished Ground and Floor Levels
Minimum finished floor level is 2.6m AHD
Minimum finished floor level is 20.4m AHD
Minimum finished floor level is 3m AHD
Minimum finished floor level is 3.45m AHD
Minimum finished floor level is 4.15m AHD
Minimum finished floor level is 4.35m AHD
Minimum finished floor level is 5.3m AHD
Minimum finished ground level is 1.7m AHD; Minimum finished floor level is 1.95m AHD
Minimum finished ground level is 1.75m AHD; Minimum finished floor level is 2m AHD
Minimum finished ground level is 1.85m AHD; Minimum finished floor level is 2.1m AHD
Minimum finished ground level is 1.9m AHD; Minimum finished floor level is 2.15m AHD

Finished Ground and Floor Levels

Minimum finished ground level is 2.2m AHD; Minimum finished floor level is 2.45m AHD
Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.55m AHD
Minimum finished ground level is 2.3m AHD; Minimum finished floor level is 2.6m AHD
Minimum finished ground level is 2.4m AHD
Minimum finished ground level is 2.4m AHD; Minimum finished floor level is 2.65m AHD
Minimum finished ground level is 2.45m AHD; Minimum finished floor level is 2.7m AHD
Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.65m AHD
Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.7m AHD
Minimum finished ground level is 2.5m AHD; Minimum finished floor level is 2.75m AHD
Minimum finished ground level is 2.55m AHD; Minimum finished floor level is 2.8m AHD
Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.85m AHD
Minimum finished ground level is 2.6m AHD; Minimum finished floor level is 2.86m AHD
Minimum finished ground level is 2.65m AHD; Minimum finished floor level is 2.9m AHD
Minimum finished ground level is 2.7m AHD; Minimum finished floor level is 2.95m AHD
Minimum finished ground level is 2.75m AHD; Minimum finished floor level is 3m AHD
Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.1m AHD
Minimum finished ground level is 2.85m AHD; Minimum finished floor level is 3.15m AHD
Minimum finished ground level is 2.9m AHD; Minimum finished floor level is 3.15m AHD
Minimum finished ground level is 2.95m AHD; Minimum finished floor level is 3.2m AHD
Minimum finished ground level is 2m AHD; Minimum finished floor level is 2.25m AHD
Minimum finished ground level is 3.1m AHD; Minimum finished floor level is 3.35m AHD
Minimum finished ground level is 3.15m AHD; Minimum finished floor level is 3.4m AHD
Minimum finished ground level is 3.2m AHD; Minimum finished floor level is 3.45m AHD
Minimum finished ground level is 3.25m AHD; Minimum finished floor level is 3.5m AHD
Minimum finished ground level is 3.3m AHD; Minimum finished floor level is 3.55m AHD
Minimum finished ground level is 3.35m AHD; Minimum finished floor level is 3.6m AHD
Minimum finished ground level is 3.4m AHD; Minimum finished floor level is 3.65m AHD
Minimum finished ground level is 3.45m AHD; Minimum finished floor level is 3.7m AHD
Minimum finished ground level is 3.5m AHD; Minimum finished floor level is 3.7m AHD
Minimum finished ground level is 3.5m AHD; Minimum finished floor level is 3.75m AHD
Minimum finished ground level is 3.55m AHD; Minimum finished floor level is 3.8m AHD
Minimum finished ground level is 3.6m AHD; Minimum finished floor level is 3.85m AHD
Minimum finished ground level is 3.65m AHD; Minimum finished floor level is 3.9m AHD
Minimum finished ground level is 3.7m AHD; Minimum finished floor level is 3.95m AHD
Minimum finished ground level is 3.75m AHD; Minimum finished floor level is 4m AHD
Minimum finished ground level is 3m AHD; Minimum finished floor level is 3.25m AHD
Minimum finished ground level is 4m AHD; Minimum finished floor level is 4.25m AHD
Minimum finished ground level is 2.05m AHD; Minimum finished floor level is 2.3m AHD
Minimum finished ground level is 2.8m AHD; Minimum finished floor level is 3.05m AHD
Minimum finished ground level is 3.05m AHD; Minimum finished floor level is 3.3m AHD
Minimum finished ground level is 3.8m AHD; Minimum finished floor level is 4.05m AHD

Part 6.6 Interface Heights

Interface Height

Buildings constructed within a building envelope provided by a:

- (a) 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary):

- (a) in relation to a southern boundary, 30 degree plane grading north, measured from a height of 3m above natural ground at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram:

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram:

Buildings constructed within a building envelope provided by a 30 degree plane measured from a height of 3m above natural ground level at the boundary of an allotment used for residential purposes within a neighbourhood-type zone as shown in the following diagram:

Part 6.7 Primary Street Setback

Minimum Primary Street Setback

- Minimum primary street setback is 0m
- Minimum primary street setback is 2m
- Minimum primary street setback is 3m
- Minimum primary street setback is 4m
- Minimum primary street setback is 6m
- Minimum primary street setback is 8m

Part 6.8 Side Boundary Setback

Minimum Side Boundary Setback

- Minimum side boundary setback is 3m
- Minimum side boundary setback is 2m
- Minimum side boundary setback is 1m
- Minimum side boundary setback is 4m
- Minimum side boundary setback is 1.5m
- Minimum side boundary setback is 1.5m for the first building level; 2m for any second building level or higher
- Minimum side boundary setback is 1.5m for the first building level; 3m for any second building level or higher

Gradient Minimum Frontage (Semi-detached)

Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 15m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m
Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 18m; 1-in-8 to 1-in-4 is 18m; greater than 1-in-4 is 18m
Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 20m; 1-in-8 to 1-in-4 is 20m; greater than 1-in-4 is 20m
Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 21m; 1-in-8 to 1-in-4 is 21m
Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 24m; 1-in-8 to 1-in-4 is 24m; greater than 1-in-4 is 24m
Minimum frontage for semi-detached dwellings where the site gradient is less than 1-in-8 is 9m

Part 6.12 Minimum Dwelling Allotment Size

Minimum Dwelling Allotment Size
Minimum dwelling allotment size is 10 ha
Minimum dwelling allotment size is 16 ha
Minimum dwelling allotment size is 20 ha
Minimum dwelling allotment size is 25 ha
Minimum dwelling allotment size is 30 ha
Minimum dwelling allotment size is 32 ha
Minimum dwelling allotment size is 33 ha
Minimum dwelling allotment size is 36 ha
Minimum dwelling allotment size is 40 ha
Minimum dwelling allotment size is 60 ha
Minimum dwelling allotment size is 8 ha
Minimum dwelling allotment size is 100 ha
Minimum dwelling allotment size is 200 ha
Minimum dwelling allotment size is 300 ha
Minimum dwelling allotment size is 900 ha

Part 6.13 Minimum Future Local Road Widening Setback

Minimum Future Local Road Widening Setback
Minimum future local road widening setback is 10.5m
Minimum future local road widening setback is 11m
Minimum future local road widening setback is 12.5m
Minimum future local road widening setback is 12.9m
Minimum future local road widening setback is 13m
Minimum future local road widening setback is 14m
Minimum future local road widening setback is 16.5m
Minimum future local road widening setback is 18m
Minimum future local road widening setback is 5m
Minimum future local road widening setback is 8m
Minimum future local road widening setback is 9.5m

Part 7 - Land Use Definitions

Land Use Terms

The following table lists terms which may be used in this Planning and Design Code in relation to the use of land.

Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B.

Inclusions and Exclusions

Land uses and activities set out in Column C are to be taken as being **included** in the meaning of the land use term set out in Column A.

Land uses and activities set out in Column D are to be taken as being **excluded** from the meaning of the land use term set out in Column A.

In the event of any inconsistency Column D prevails over Column C.

Ancillary and Subordinate

Unless stated to the contrary, a term set out in the following table which purports to define a form of land use will be taken to include a use which is ancillary and subordinate to that defined use.

No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

Land Use Definitions Table

Land Use Term (Column A)	Definition (Column B)	Includes (Column C)	Excludes (Column D)
Affordable housing	Means housing that meets the relevant criteria for ‘affordable housing’ as determined by the Minister responsible for the <i>South Australian Housing Trust Act 1995</i> under Regulation 4 of the South Australian Housing Trust Regulations 2010.		
Agricultural building	Means a building used wholly or partly for purposes associated with farming, commercial forestry, intensive animal husbandry, dairying or horticulture, or to support the operations of that use, but does not include frost fans or a building used wholly or partly for any of the following: (a) the processing or packaging of commodities (b) the housing of animals for the purposes of intensive animal husbandry (c) the purposes of a dairy.	Farm shed; Farm silo; Horticultural shed; Hay shed; Implement shed; Pump shed	Dairy; Dwelling; Industry; Intensive animal husbandry; Office; Outbuilding; Shop
Ancillary accommodation	Means accommodation that: (a) is located on the same allotment as an existing dwelling; (b) contains no more than 2 bedrooms or rooms or areas capable of being used as a bedroom; and (c) is subordinate to and shares the same utilities of the existing dwelling.		Dwelling
Animal keeping	Means the boarding (short or long term), keeping, breeding or training of animals, except horses and/or commercially kept livestock.	Dog kennelling Catteries	Aquaculture; Farming; Horse keeping; Intensive animal husbandry; Low intensity animal husbandry
Aquaculture	Has the same meaning as in the Aquaculture Act 2001.		Intensive animal husbandry.
Automotive collision repair	Means repairs to motor vehicles involving structural repairs, panel beating, replacement of vehicle body parts or spray painting.		Motor repair station
Bulky goods outlet	Means premises used primarily for the sale, rental, display or offer by retail of goods, other than foodstuffs, clothing, footwear or personal effects goods, unless the sale, rental, display or offer by retail of the foodstuffs, clothing, footwear or personal effects goods is incidental to the sale, rental, display or offer by retail of other goods. Examples– The following are examples of goods that may be available or on display at bulky goods outlets or retail showrooms: (a) automotive parts and accessories; (b) furniture; (c) floor coverings; (d) window coverings; (e) appliances or electronic equipment; (f) home entertainment goods; (g) lighting and electric light fittings; (h) curtains and fabric; (i) bedding and manchester; (j) party supplies; (k) animal and pet supplies; (l) camping and outdoor recreation supplies; (m) hardware; (n) garden plants (primarily in an indoor setting); (o) office equipment and stationery supplies; (p) baby equipment and accessories; (q) sporting, fitness and recreational equipment and accessories; (r) homewares; (s) children's play equipment.		
Caravan and tourist park	Means land used to provide short-term accommodation in caravans, recreational vehicles (RVs), cabins, tents and other similar demountable forms of shelter in a managed setting.		Residential park
Commercial forestry	Means the practice of planting, managing, and caring for forests that are to be harvested (or intended to be harvested) or used for commercial purposes (including through the commercial exploitation of the carbon absorption capacity of the forest).		
Community facility	Means premises used for the provision of social, artistic, educational or community support services to the public but does not include a pre-school, educational establishment, place of worship or indoor recreation facility.	Library; Community hall.	Educational establishment; Place of worship; Pre-school; Indoor recreation facility
Consulting Room	Means a building or part of a building (not being a hospital) used in the practice of a profession by a medical, veterinary or dental practitioner, or a practitioner in any curative science, in the provision of medical services, mental, moral or family guidance, but does not involve any overnight accommodation other than for animals that are recovering from surgery, medical care or in for observation as part of a veterinary practice.		
Cropping	Means propagating, cultivating and/or harvesting of grains, cereals, oilseeds, lupins, legumes, hops, hemp, hay, lucerne or other similar plants or plant products for commercial production.		Commercial forestry; Horticulture; Mushroom production.
Dairy	Means a building or part of a building used for all or any of the operations of commercial milk production (whether mechanical or otherwise) and includes a milking shed, milk room, wash room or engine room.		4473

Planning and Design Code - 26 August - Version 2021.12			
Detached dwelling	Means a detached building comprising 1 dwelling on its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation		
Dwelling	Means a building or part of a building used as a self-contained residence.		Ancillary accommodation
Educational establishment	Means a primary school, secondary school, reception to year 12 school, college, university or technical institute, and includes an associated pre-school or institution for the care and maintenance of children.		
Electricity substation	Means: (a) works for the conversion, transformation or control of electricity by 1 or more transformers, or by any switchgear or other equipment; or (b) any equipment, building, structure or other works ancillary to or associated with works referred to in paragraph (a), other than any such works: (i) that are mounted on a pole; or (ii) that are wholly enclosed in a weather-proof enclosure not exceeding 8.5m ³ ; or (iii) that are incidental to any lawful use of the land which the works are situated.		
Farming	Means cropping, grazing or low intensity animal husbandry.	Cropping; Grazing; Low intensity animal husbandry.	Animal keeping; Commercial forestry; Horse keeping; Horticulture; Intensive animal husbandry; Mushroom production.
Fuel depot	Means land used primarily for the storage of petrol, gas, oils or other petroleum products and within or upon which no retail trade is conducted.		
General industry	Means any industry other than a light industry or special industry.		
Group dwelling	Means 1 of a group of 2 or more detached buildings, each of which is used as a dwelling and 1 or more of which has a site without a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current development authorisation.		
Home care	Has the same meaning as in the <i>Commonwealth Aged Care Act 1997</i> .		
Horse keeping	Means the keeping or husbandry of horses where more than 1 horse is kept per 3ha of land used for such purposes.		
Horticulture	Means the use of land for market gardening, viticulture, floriculture, orchards, wholesale plant nurseries or commercial turf growing.		Commercial forestry; Mushroom production.
Hotel	Means premises licensed, or proposed to be licensed as a general and hotel licence under the <i>Liquor Licensing Act 1997</i> .		
Indoor recreation facility	Means a building designed or adapted primarily for recreation or fitness pursuits.	Bowling alley; Squash courts; Fitness centre; Gymnasium; Pilates studio; Yoga studio; Dance studio; Indoor swimming centre; Indoor trampoline centre; Indoor rock climbing centre; Indoor children's play centre; Indoor skating rink.	
Industry	Means the carrying on, in the course of a trade or business, of any process (other than the generation of electricity using a renewable energy source or a process in the course of farming or mining) for, or incidental to: (a) the making of any article, ship or vessel, or of part of any article, ship or vessel; or (b) the altering, repairing, ornamenting, finishing, assembling, cleaning, washing, packing, bottling, canning or adapting for sale, or the breaking up or demolition, of any article, ship or vessel; or (c) the getting, dressing or treating of materials. The use may include: (d) selling by wholesale of goods manufactured on site (e) selling by retail of goods manufactured on site, provided the total floor area occupied for such sale does not exceed 250m ² (and industrial will be construed accordingly).	General industry; Light industry; Special industry	
Intensive animal husbandry	Means the commercial production of animals or animal products where the animals are kept in enclosures or other confinement and their main food source is introduced from outside the enclosures or area of confinement in which they are kept.	Broiler shed; Feedlot; Poultry hatchery; Piggery; Poultry battery.	Animal keeping; Apiculture; Aquaculture; Horse keeping; Low intensity animal husbandry; Stock sales yard.
Landfill	Land used for the receipt and controlled disposal of refuse through burial and/or spreading over land.		
Light industry	Means an industry where the process carried on, the materials and machinery used, the transport of materials, goods or commodities to and from the land on or in which (wholly or in part) the industry is conducted and the scale of the industry does not: (a) detrimentally affect the amenity of the locality or the amenity within the vicinity of the locality by reason of the establishment or the bulk of any building or structure, the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil, spilled light, or otherwise howsoever; or (b) directly or indirectly cause dangerous or congested traffic		

Planning and Design Code - 26 August - Version 2021.12	Version 2021.12 conditions in any nearby road.		
Low intensity animal husbandry	Means the commercial production of animals or animal products (eg meat, wool) on either native or improved pastures or vegetation where the animal's main food source is obtained by grazing or foraging.	Grazing;	Animal keeping; Aquaculture; Horse keeping; Intensive animal husbandry.
Motor repair station	Means any land or building used for carrying out repairs, servicing and/or maintenance (other than panel beating or spray painting) to motor vehicles and / or farm machinery.		Automotive collision repair
Mushroom production	Means the commercial production of mushrooms or any other type of fungi.		
Office	Means any building used for administration or the practice of a profession, but does not include a consulting room or premises where materials are stored for sale or manufacture.		Consulting room.
Organic waste processing facility	Means the commercial processing of organic waste by composting, mulching, shredding, grinding or similar process into organic material for use as mulch, soil improver, growing medium or the like.		
Outbuilding	Means a non-habitable detached building on the same site as a main building which is ancillary and subordinate to the main building and has a use and function which relates to the main building, but does not include a private bushfire shelter.		Private bushfire shelter.
Personal or domestic services establishment	Means premises used for the provision of services catering to the personal or domestic needs of customers. Examples- The following are examples of services that may be available at personal and domestic services establishments: (a) clothing repair and alterations; (b) cutting, trimming and styling hair; (c) domestic pet grooming; (d) manicures and pedicures; (e) non-surgical cosmetic procedures; (f) personal care procedures; (g) self-service clothes laundering; (h) shoe repair; (i) watch repair.		Consulting room; Office; Financial institute.
Place of worship	Means premises used by an organised group for worship and religious activities. The use may include facilities for social, educational and charitable activities associated with the congregation.	Chapel; Church; Mosque; Synagogue; Temple.	Funeral parlour.
Pre-school	Means a place primarily for the care or instruction of children of less than primary school age not resident on the site.	Child care centre; Early learning centre; Kindergarten; Nursery.	
Protective tree netting structure	Means netting and any associated structure that: (a) is designed to protect trees or plants grown for the purpose of commercial horticulture; and (b) consists of a netting canopy attached to a structure (such as poles and cables).		
Public service depot	Means land used for storage and operations connected with the provision of public services (including gas, electricity, water supply, sewerage, drainage, roadworks or telecommunication services) by a body responsible for the provision of those services.		
Recreation area	Means any park, garden, children's playground or sports ground that is under the care, control and management of the Crown or a council, and is open to the public without payment of a charge.	Outdoor public sports courts; Public ovals and fields.	Golf course.
Renewable energy facility	Means land and/or water used to generate electricity from a renewable source such as wind, solar, tidal, hydropower, biomass and/or geothermal. This use may also include: (a) any associated facility for the storage and/or transmission of the generated electricity; (b) any building or structure used in connection with the generation of electricity.	Battery storage facility; Hydropower or pumped hydropower facility; Solar power facility; Wave power generator; Wind farm	
Replacement building	The construction of a new building in the same, or substantially the same, position as a building which was demolished within the previous 3 years and has the same, or substantially the same, layout and external appearance as the previous building.		
Residential care	Has the same meaning as in the <i>Commonwealth Aged Care Act 1997</i> .		
Residential flat building	Means a single building in which there are 2 or more dwellings.		Group dwelling; Row dwelling; Semi-detached dwelling;
Residential park	Means a residential park operating under the regulatory framework of the <i>Residential Parks Act 2007</i> .		Caravan and tourist park;
Restaurant	Means land used primarily for the consumption of meals on the site.		
Retail fuel outlet	Means land used for: (a) the fuelling of motor vehicles involving the sale by retail of petrol, oil, liquid petroleum gas, automotive distillate and any other fuels; and (b) the sale by retail of food, drinks and other convenience goods for consumption on or off the land; and both are operated as and constitute one integrated facility where on-site facilities, systems and processes, car parking and access and egress are all shared. The use may also include one or more of the following secondary activities: (c) the washing and cleaning of motor vehicles		Fuel depot; Motor repair station.

	<ul style="list-style-type: none"> (d) the washing of other equipment or things including dogs and other pets (e) the provision (on a paid or free basis) of facilities for charging electric vehicles (f) the hiring of trailers (g) selling of motor vehicle accessories and/or parts (h) the installation of motor vehicle accessories and/or parts. 		
Retirement facility	Means a facility operating under the regulatory framework of the <i>Retirement Villages Act 2016</i> .		
Row dwelling	Means a dwelling: <ul style="list-style-type: none"> (a) occupying its own site and has a frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation; and (b) comprising 1 of 3 or more dwellings erected side by side, joined together and forming, by themselves, a single building. 		
Sales office	Means the use of an existing building or premises for a temporary period of no more than 2 years to display land parcels or buildings that are for sale, proposed to be sold, or can be won as a prize in a competition.		Office
Semi-detached dwelling	Means a dwelling: <ul style="list-style-type: none"> (a) occupying its own site and has a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current planning authorisation; and (b) comprising 1 of 2 dwellings erected side by side, joined together and forming, by themselves, a single building. 		
Service trade premises	Means premises used primarily for the sale, rental or display of any of the following: <ul style="list-style-type: none"> (a) basic plant, equipment or machinery used in agriculture or industry; or (b) boats; or (c) caravans and recreational vehicles (RVs); or (d) domestic garages; or (e) sheds; or (f) outbuildings; or (g) motor vehicles; or (h) marquees; or (i) trailers; or (j) swimming pools, equipment and accessories; or (k) building materials in bulk supply; or (l) landscaping materials; or (m) garden plants (primarily in an outdoor setting); or (n) agricultural supplies such as agricultural chemicals, fertilisers, seed and animal feed; or (o) rainwater tanks and irrigation supplies; <p>or similar articles or merchandise.</p> <p>The use may also include the servicing and repair of any of the listed items (but not vehicle panel beating or spray painting).</p>	Motor vehicle showroom; Used car yard.	Bulky goods outlet.
Shop	Means: <ul style="list-style-type: none"> (a) premises used primarily for the sale by retail, rental or display of goods, foodstuffs, merchandise or materials; or (b) a personal or domestic services establishment. 	Bulky goods outlet; Personal or domestic services establishment; Restaurant	Hotel; Motor repair station; Retail fuel outlet; Service trade premises; Wholesale plant nursery
Special Industry	Means an industry where the processes carried on, the methods of manufacture adopted or the particular materials or goods used, produced or stored, are likely to: <ul style="list-style-type: none"> (a) cause or create dust, fumes, vapours, smells or gases; or (b) discharge foul liquid or blood or other substance or impurities liable to become foul, <p>and thereby:</p> <ul style="list-style-type: none"> (c) endanger, injure or detrimentally affect the life, health or property of any person (other than any person employed or engaged in the industry); or (d) produce conditions which are, or may become, offensive or repugnant to the occupiers or users of land in the locality of or within the vicinity of the locality of the land on which (whether wholly or partly) the industry is conducted. 		
Stock sales yard	Means land or premises used for the commercial conduct of buying and selling of livestock.		Stock slaughter works.
Stock slaughter works	Means a building or part of a building, or land used primarily for slaughter of stock (including camels, goats and deer) or poultry, This use may also include: <ul style="list-style-type: none"> (a) the keeping of animals prior to slaughter on site (b) processing of animal products for human or animal consumption. 		Retail butcher.
Store	Means a building or enclosed land used for the storage of goods and within or upon which no trade (whether wholesale or retail) or industry is carried on.		Junk yard; Outbuilding; Public service depot.
Student accommodation	Mean premises used to accommodate students in room or dormitory style		Dwelling;

	accommodation that is not self-contained and that includes common facilities for shared use by student occupants such as: (a) shared cooking facilities and/or the provision of meals; (b) common rooms and recreation areas; (c) shared laundry facilities or a laundry service; or (d) shared bathroom facilities.		Residential flat building.
Supported accommodation	Means premises in which residential accommodation is provided to persons requiring/together with regular medical and/or personal care assistance, but does not include home care.	Nursing home; Residential care	Hospital; Retirement facility.
Telecommunications facility	Means a facility within the meaning of the <i>Commonwealth Telecommunications Act 1997</i> .		
Temporary accommodation in an area affected by bushfire	Means the construction or placement of a building or structure on land on which a dwelling, or part of a dwelling, has been destroyed or significantly damaged by a bushfire if: (a) the building or structure is to be used as accommodation by the owner of the land and (b) the building or structure is a minimum of 20 metres from any remaining or regenerating cluster of vegetation (whether that vegetation is on the land or on adjoining land) and (c) the owner of the land complies with any requirements of the South Australian Country Fire Service relating to the maintenance of a clearance area between the temporary accommodation and any remaining or regenerating cluster of vegetation and (d) the building or structure is to be used as accommodation: (i) for a period not exceeding 2 years or (ii) until a Class 1a building on the land is able to be occupied in accordance with regulation 103 of the Planning, Development and Infrastructure (General) Regulations 2017, whichever occurs first.		
Tourist accommodation	Means premises in which temporary or short-term accommodation is provided to travellers on a commercial basis.		Campground
Warehouse	Means a building or enclosed land used for the storage of goods and the carrying out of commercial transactions involving the sale of such goods, but does not include any land or building used for sale by retail.		Store
Wind farm	Means land used to generate electricity from wind force with wind turbine generators. This use may also include: (a) any associated facility for the storage and/or transmission of the generated electricity; (b) any building or structure used in connection with the generation of electricity including a wind turbine, substation, maintenance shed, access road or wind monitoring mast. The use does not include a wind farm principally used to supply and/or store electricity to an existing use of land (e.g., domestic wind generator).		
Workers' accommodation	Means premises used to accommodate workers on a temporary basis while they carry out employment: (a) on the same site as the workers' accommodation; (b) in mining or petroleum extraction. (c) in seasonally intensive rural activities such as fruit picking, pruning, animal shearing, meat processing or similar; or (d) in the construction of essential infrastructure.	Mining camp; Road workers camp; Shearing quarters; Railway workers camp	Tourist accommodation.

Part 8 - Administrative Terms and Definitions

The following table lists terms which may be used to assist with the interpretation of policy used in the Planning and Design Code.

Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B. Column C contains, where applicable, illustrations to assist with the interpretation of the meaning provided in Column B.

No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

Administrative Terms and Definitions Table

Term (Column A)	Definition (Column B)	Illustrations (Column C)
Activity centre	Means land contained in a Local Activity Centre Zone, Suburban Activity Centre Zone, Suburban Main Street Zone, Township Activity Centre Zone, Township Main Street Zone, Urban Activity Centre Zone, Urban Corridor (Main Street) Zone, Urban Corridor Living Retail Subzone, Urban Neighbourhood Retail Subzone, Activity Node Subzone, Retail Activity Centre Subzone or in relation to the Emerging Activity Centre Subzone in the Master Planned Neighbourhood Zone or the Emerging Township Activity Centre	

Subzone in the Master Planned Township Zone, either:

- (a) land identified for the purposes of an activity centre on a building envelope plan
- (b) an activity centre nominated on a Concept Plan in Part 12 of the Code.

AEP Means annual exceedance probability

AHD Means Australian Height Datum.

ANEF Means Australian Noise Exposure Forecast.

Asset protection zone

In relation to bushfire protection, means an area generally clear of vegetation that is maintained to minimise the spread of fire between areas of hazardous vegetation and habitable buildings.

Asset protection zones may incorporate features such as driveways, vegetable gardens or landscaped gardens incorporating deciduous trees and fire-retardant plant species.

Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes.

Battle-axe allotment

Means an allotment or site that comprises:

- (a) a driveway or 'handle' (and any related open space) that leads back from a road to the balance of the allotment or site; and
- (b) a balance of the allotment or site that is the principal part of the allotment or site and that does not have a boundary with a road.

Note: Battle-axe allotments are often referred to as 'hammerhead' or 'flagpole' allotments.

Building envelope plan

Means a building envelope plan that has been approved under the Planning, Development and Infrastructure (General) Regulations 2017, has been published on the SA planning portal by the Chief Executive, and applies in relation to the site where the relevant development is proposed to be situated.

Building height

Means the maximum vertical distance between the lower of the natural or finished ground level at any point of any part of a building and the finished roof height at its highest point, ignoring any antenna, aerial, chimney, flagpole or the like. For the purposes of this definition, building does not include any of the following:

- (a) flues connected to a sewerage system
- (b) telecommunications facility tower or monopole
- (c) electricity pole or tower
- (d) or any similar structure.

Building level

Means that portion of a building which is situated between the top of any floor and the top of the next floor above it, and if there is no floor above it, that portion between the top of the floor and the ceiling above it. It does not include any mezzanine or any building level having a floor that is located 1.5m or more below finished ground level.

Building line

In relation to a building on a site, means a line drawn parallel to the wall on the building closest to the boundary of the site that faces the primary street (and any existing projection from the building such as a verandah, porch, balcony, awning or bay window is not to be taken to form part of the building for the purposes of determining the relevant wall of the building, provided that the projection is not more than 1.5m).

Bushfire buffer zone

In relation to bushfire protection, means an area of land designed to isolate residential allotments from areas that pose a bushfire risk such as areas with rugged terrain or hazardous vegetation.

Note: this term has been defined for use in the Planning and Design Code. Other organisations or legislation may use the same term but with different meaning and for different purposes.

Central site

Means the site of a row dwelling or dwelling in a terrace arrangement that does not share a side boundary with an allotment outside of the development site.

Class 1 activity

Has the same meaning as in the *Practice Direction 14 Site Contamination Assessment*

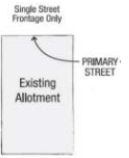

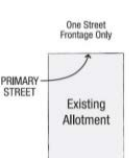

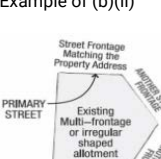

Class 2 activity

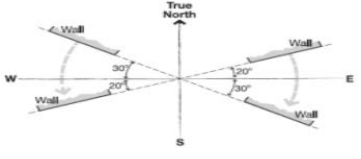

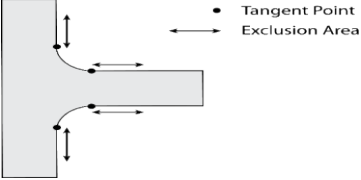

Has the same meaning as in the *Practice Direction 14 Site Contamination Assessment*

Communal open space

Means open space shared by more than one dwelling, but is not publicly accessible.

Planning and Design Code - 26	August - Version 2021.12 It excludes any of the following:	
	(a) private open space (b) public rights of way (c) private streets (d) parking areas and driveways; (e) service and storage areas (f) land with a minimum dimension less than 2.0m.	
Community wastewater management system	Means a system for the collection and management of wastewater generated in a town, regional or other community.	
Defence aviation area	Has the same meaning as in the Commonwealth <i>Defence Act 1903</i> .	
EPA Licence	Means an activity requiring a licence under the <i>Environment Protection Act 1993</i> (and this will determine the applicable referral fee under the 'Chief Executive Schemes and Requirements as to the Payment and Distribution of Fees under the Planning, Development and Infrastructure (Fees, Charges and Contributions) Regulations 2019')	
Exceedances per year (EY)	Means the number of times an event is likely to occur or be exceeded within any given year.	
FFL	Means finished floor level.	
Gross density	Is calculated by dividing the total number of dwellings by the total land area that they occupy (no land is excluded from the calculation) and expressed as dwellings units per hectare (du/ha).	
Gross leasable floor area	Means the total floor area of a building excluding public or common tenancy areas such as malls, hallways, verandahs, public or shared tenancy toilets, common storage areas and loading docks.	
Groundwater	Means water that is naturally contained beneath the surface of the ground.	
Habitable room	Means any room used for domestic purposes other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, stair, dedicated corridor/hallway, lobby, clothes drying room or other space of a specialised nature occupied neither frequently nor for extended periods.	
Heritage agreement	In relation to State Heritage, is an agreement that is registered under section 34 of the <i>Heritage Places Act 1993</i> .	
High net residential density	Means greater than 70 dwelling units per hectare.	
High-rise	In relation to development, means 7 building levels and above.	
Hours of operation	Means the hours that a land use is open to the public or conducting activities related to the land use, not including administration or routine activities normally associated with opening and closing or start up and shut down.	
Human wastewater	Has the same meaning as in the <i>Environment Protection (Water Quality) Policy 2015</i> .	
Liquid waste	Means waste classified as liquid waste in accordance with the assessment process set out in the guideline Liquid waste classification test, re-issued by the Environment Protection Authority in September 2003; as defined in Schedule 1 of the <i>Environment Protection Act 1993</i> .	
Listed waste	Means a substance or thing listed in Part B of Schedule 1 of the <i>Environment Protection Act 1993</i> .	
Low net residential density	Means less than 35 dwelling units per hectare	
Low-rise	In relation to development, means up to and including 2 building levels.	
Medical waste	Has the same meaning as in the <i>Environment Protection (Waste to Resources) Policy 2010</i> .	
Medium net residential density	Means 35 to 70 dwelling units per hectare.	
Medium-rise	In relation to development, means 3 to 6 building levels.	
Mezzanine	Means an intermediate floor within a building level that is open to the floor below and does not extend over the whole floor space.	
More sensitive use	Has the same meaning as in the <i>Practice Direction 14 Site Contamination Assessment</i>	
More than one dwelling on an allotment	Reference to 'dwelling' in this phrase includes any dwelling that: (a) already exists on the allotment or (b) has a valid development authorisation for construction on the allotment or (c) is subject to a development application that is yet to be determined.	
Native vegetation	Has the same meaning as in the <i>Native Vegetation Act 1991</i> .	
Neighbourhood-type zone	Means any of the following: City Living Zone Established Neighbourhood Zone General Neighbourhood Zone Golf Course Estate Zone Hills Neighbourhood Zone Housing Diversity Neighbourhood Zone Master Planned Neighbourhood Zone Master Planned Township Zone Neighbourhood Zone Residential Park Zone Rural Living Zone Rural Neighbourhood Zone Rural Settlement Zone Rural Shack Settlement Zone Suburban Neighbourhood Zone Township Neighbourhood Zone Waterfront Neighbourhood Zone Urban Renewal Neighbourhood Zone	

<p>Net residential density</p>	<p>Is calculated by dividing the total number of dwellings by the area of residential land that they occupy (excluding other land uses, roads, public open space and services) and expressed as dwelling units per hectare (du/ha)</p>	
<p>Non-sensitive use</p>	<p>Means use of land other than sensitive use.</p>	
<p>Power system</p>	<p>Has the same meaning as in the <i>Electricity Act 1996</i>.</p>	
<p>Prescribed approved activity</p>	<p>Means any of the following:</p> <ul style="list-style-type: none"> (a) the on-site storage or disposal of domestic waste (b) a regulated beverage container activity (c) a regulated drop-off station for e-waste (d) the temporary on-site storage of waste (other than tyre waste) while awaiting transport to another place (e) incineration by way of thermal oxidation using fuel burning equipment for the disposal of solid trade waste with a processing capacity not exceeding 100 kilograms per hour (f) the storage or disposal of tyre waste in a manner approved by the Environment protection Authority (g) the disposal of human wastewater or sewage to land in a manner approved by the Environment protection Authority. 	
<p>Prescribed factors</p>	<p>Has the same meaning as in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>	
<p>Primary street</p>	<p>In relation to an existing or proposed building on a site is:</p> <ul style="list-style-type: none"> (a) in the case of a site that has a frontage to only 1 road - that road; (b) in the case of a site that has a frontage to 2 roads: <ul style="list-style-type: none"> (i) if the frontages are identical in length - the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocating numbers to building and allotments under section 220 of the <i>Local Government Act 1999</i>; or (ii) in any other case, the road in relation to which the site has a shorter frontage; or (c) in any other case, the road that forms part of the street address of the building as determined by the council for the relevant area when it is allocated numbers to buildings and allotments under section 220 of the <i>Local Government Act 1999</i>. 	 <p>Example of (a)</p>  <p>Example of (b)(i)</p>  <p>Example of (b)(ii)</p>  <p>Example of (c)</p>
<p>Private open space</p>	<p>Means a private outdoor area associated with a dwelling that:</p> <ul style="list-style-type: none"> (a) is for the exclusive use of the occupants of that dwelling (b) has a minimum dimension of 2.0m for ground level areas and 1.8m for balconies (c) is screened from public view by a building, fence, wall or other similar structure with a minimum height of 1.8m above ground level and a maximum transparency of 20%. <p>Private open space may include verandahs, alfrescos, balconies, terraces, decks where not enclosed on all sides. Private open space does not include areas used for bin storage, laundry drying, rainwater tanks, utilities, driveways or vehicle parking areas.</p>	
<p>Proclaimed shipwreck</p>	<p>Means:</p> <ul style="list-style-type: none"> (a) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1981</i>; or (b) a historic shipwreck or historic relic within the meaning of the <i>Commonwealth Underwater Cultural Heritage Act 2018</i>. 	
<p>Quarantine waste</p>	<p>Means waste that is subject to quarantine under the <i>Quarantine Act 1908</i> of the Commonwealth.</p>	
<p>Relevant certificate</p>	<p>Means a certificate by, or on behalf of, the South Australian Country Fire Service certifying that:</p>	

	<ul style="list-style-type: none"> (a) a Bushfire Attack Level assessment of the development has been undertaken within 3 months prior to lodgement of the application for planning consent in respect of the development and (b) the Bushfire Attack Level is –19 range. 	
Representative buildings	Representative buildings referenced in Historic Area Statements and Character Area Statements and mapped in the South Australian Planning and Property Atlas are buildings which display characteristics of importance in a particular area. The identification of representative buildings in a particular area is not intended to imply that other buildings in an historic area are not of importance.	
River Murray protection Area	Means a River Murray Protection Area under the <i>River Murray Act 2003</i> .	
Secondary street	In relation to a building is any road, other than the primary street, that shares a boundary with the allotment on which the building is situated (or to be situated).	
Sensitive receiver	Means: <ul style="list-style-type: none"> (a) any use for residential purposes or land zoned primarily for residential purposes; (b) pre-school; (c) educational establishment; (d) hospital; (e) supported accommodation; (f) tourist accommodation 	
Sensitive use	Has the same meaning as in the <i>Environment Protection Act 1993</i> .	
Sewerage infrastructure	Has the same meaning as in the <i>Water Industry Act 2012</i>	
Site	Means the area of land (whether or not comprising a separate or entire allotment) on which a building is built, or proposed to be built, including the curtilage of the building, or in the case of a building comprising more than 1 separate occupancy, the area of land (whether or not comprising a separate or entire allotment) on which each occupancy is built, or proposed to be built, together with its curtilage.	
Site contamination	Has the same meaning as in the <i>Environment Protection Act 1993</i> .	
Site coverage	Is calculated by adding the total roof area of all roofed buildings/structures on a site (excluding any eaves surrounding a habitable building) dividing this by the site area and then multiplying it by 100. Site coverage is expressed as a percentage.	
Soft landscaping	Means landscaped areas that are pervious and capable of supporting the growth of plant species. It does not include artificial turf or any form of pervious paving or paved/hardstand areas used for pedestrian and/or vehicle movement.	
South	Means true south.	
South facing	In relation to building orientation, a side wall is south facing if the wall is orientated anywhere between E20°N/W20°S and E30°S/W30°N.	 <p>Example of south facing walls.</p>
Standard sea flood risk level	Means the 1% AEP sea flood level (tide, stormwater and associated wave effects combined) plus an allowance to accommodate 100 years of land subsidence.	
Tangent point	Means the end point of a road's curve at the point of intersection, measured at the kerb.	
Terrace arrangement	Means a group of 3 or more detached dwellings erected side by side and abutting each other but not joined by way of a party wall or party walls.	
Total floor area	Means the sum of the superficies of horizontal sections of a building or other roofed area made at the level of each floor (including any mezzanine floor), inclusive of all roofed areas and of the external walls and of such portions of any party walls as belong to the building.	
Treatment	Is taken to have the same meaning as defined in section 3(1) as in the <i>Environment Protection Act 1993</i> .	
Wall height	Means the height of the wall measured from the top of its footings but excluding any part of the wall that is concealed behind an eave or similar roof structure and not visible external to the land.	
Waste	Means waste within the meaning of the <i>Environment Protection Act 1993</i> .	
Wastewater	Means waste principally consisting of water and includes: <ul style="list-style-type: none"> (a) human wastewater (b) sewage (c) water containing food or beverage waste (d) wash down water or cooling water (e) irrigation runoff or contaminated stormwater (f) water containing any other trade waste or industrial waste (g) any other water that has been used in any form of human activity (h) a combination of any 1 or more of the above. 	

Part 9 - Referrals

Notes: Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code.

Part 9.1 Referral Body: Environment Protection Authority

Referral Body: Environment Protection Authority

Class of Development / Activity		Policies Relevant to the Referral	Purpose of Referral	Statutory Reference
Energy generation and storage facilities	Wind farms	Development that involves the establishment of a wind farm where 1 or more wind turbine generators (whether or not located on the same site) are used to generate electricity that is then supplied to another person for use at another place.	To provide expert technical assessment and direction to the relevant authority on the assessment of the potential harm from pollution and waste aspects arising from activities of environmental significance and other activities that have the potential to cause serious environmental harm.	Activity of environmental significance to which Schedule 9 clause 3 item 9 of the Planning, Development and Infrastructure (General) Regulations 2017 applies.
	Energy recovery from waste	<p>Development involving energy recovery from waste, including <i>anaerobic digestion</i> and thermal activities such as <i>direct combustion</i>, <i>pyrolysis</i> and <i>gasification</i> used to generate gas, heat, electricity or a combination.</p> <p>In this class of development / activity:</p> <p>anaerobic digestion involves a series of processes in which microorganisms break down biodegradable material to biogas in the absence of oxygen</p> <p>direct combustion involves burning in excess oxygen (from air) to produce heat or release energy contained in the fuel</p> <p>pyrolysis involves the thermo-chemical decomposition of organic or inorganic material- for example synthetic tyres - at elevated temperatures in the absence of oxygen</p> <p>gasification of waste is a process that converts organic or fossilised organic material such as coal, at elevated temperatures and with controlled amounts of oxygen, into a synthetic gas (syngas).</p>		
	Energy generation	<p>Development involving an <i>electricity generating plant</i> (other than a <i>battery storage facility</i> or <i>pumped hydroelectricity production works</i>) using any other energy source (excluding <i>fuel burning</i> and solar photovoltaic) with a capacity to generate or store 30 megawatts (MW) or more.</p> <p>In this class of development / activity:</p> <p>battery storage facility means a facility for the purpose of 1 or more batteries that are capable of being charged, storing energy and discharging in into the State's power system</p> <p>electricity generating plant means electricity generating plant within the ambit of paragraph (a) of the definition of electricity infrastructure in section 4(1) of the <i>Electricity Act 1996</i>.</p>		
	Pumped hydroelectricity production works	Development involving the conduct of works or a facility for the generation of electricity by means of passing water through a turbine with a total full-load sustained output capacity of 30 megawatts or more (EPA Licence).		
Petroleum and chemical	Chemical storage and warehousing facilities	The storage or warehousing of chemicals or chemical products that are, or are to be, stored or kept in bulk or in containers having a capacity exceeding 200 litres at facilities with a total storage capacity exceeding 1,000 cubic metres. (EPA Licence)		
	Chemical works	The conduct of:		

		<p>(a) works with a total processing capacity exceeding 10 tonnes per year (EPA Licence required at processing capacity exceeding 100 tonnes per year), involving either or both of the following operations:</p> <ul style="list-style-type: none"> (i) manufacture (through chemical reaction) of any inorganic chemical, including sulphuric acid, inorganic fertilisers, soap, sodium silicate, lime or other calcium compound (ii) manufacture (through chemical reaction) or processing of any organic chemical or chemical product or petrochemical, including the separation of such materials into different products by distillation or other means <p>or</p> <p>(b) works with a total processing capacity exceeding 5,000 tonnes per year involving operations for salt production. (EPA Licence)</p> <p>or</p> <p>(c) works for the production of hydrogen with a production capacity of more than 100 tonnes per year (EPA Licence).</p>
	Coke works	The production, quenching, cutting, crushing and grading of coke. (EPA Licence)
	Hydrocarbon storage or production works	<p>The conduct of works or a facility:</p> <ul style="list-style-type: none"> (a) for the storage of hydrocarbon or hydrocarbon products in tanks that, in aggregate, have a storage capacity exceeding 100m³ (EPA Licence required at more than 2000m³) or (b) for the production of hydrocarbon or hydrocarbon products, being works having a total capacity exceeding 20 tonnes per hour. (EPA Licence)
	Petrol stations	<p>The conduct of a petrol station, being a facility for the storage and retail sale of petroleum products or other liquid organic chemical substances. (EPA Licence)</p> <p>In this class of development / activity:</p> <p>petroleum product has the same meaning as in the <i>Petroleum Products Regulation Act 1995</i>.</p>
	Timber preservation works	The conduct of works for the preservation of timber by chemicals, but excluding the preservation by a primary producer of timber for use in the course of primary production carried on by the producer. (EPA Licence)
Manufacturing and mineral processing	Abrasive blasting	The cleaning of materials by the abrasive action of any metal shot or mineral particulate propelled in a gaseous or liquid medium (otherwise than solely by using blast cleaning cabinets less than 5m ³ in volume or totally enclosed automatic blast cleaning units). (EPA Licence)
	Hot mix asphalt preparation	The conduct of works at which crushed or ground rock aggregates are mixed with bituminous or asphaltic materials (by heating in a furnace, kiln or other fuel fired plant) for the purposes of producing road building mixtures. (EPA Licence)
	Cement works	<p>The conduct of works for the use of <i>argillaceous</i> and <i>calcareous</i> materials in the production of cement clinker or the grinding of cement clinker. (EPA Licence)</p> <p>In this class of development / activity:</p> <p>argillaceous means having to do with or resembling clay</p> <p>calcareous means having to do with calcium carbonate</p>

Ceramic works	The conduct of works for the production of any products such as bricks, tiles, pipes, pottery goods, refractories, or glass that are manufactured or are capable of being manufactured in furnaces or kilns fired by any fuel, being works with a total capacity for the production of such products exceeding 100 tonnes per year. (EPA Licence)
Concrete batching works	The conduct of works for the production of concrete or concrete products that are manufactured or are capable of being manufactured by the mixing of cement, sand, rock, aggregate or other similar materials, being works with a total capacity for production of such products exceeding 0.5m ³ per production cycle. (EPA Licence)
Drum reconditioning or treatment works	The conduct of works for the cleaning, repairing, reconditioning or other treatment of metal or plastic drums or containers for the purposes of their reuse, including any associated storage facility. (EPA Licence)
Ferrous and non-ferrous metal melting	The melting of ferrous or non-ferrous metal in a furnace or furnaces that alone or in aggregate have the capacity to melt: <ul style="list-style-type: none"> (a) in excess of 50 but not in excess of 500 kilograms of metal during the normal cycle of operation but excluding facilities more than 500m from residential premises not associated with the works or (b) in excess of 500 kilograms of metal during the normal cycle of operation. (EPA Licence)
Metallurgical works	The conduct of works at which ores are smelted or reduced to produce metal. (EPA Licence)
Mineral works	The conduct of works for processing mineral ores, sands or earths to produce mineral concentrates. (EPA Licence)
Pulp or paper works	The conduct of works at which paper pulp or paper is manufactured or is capable of being manufactured, being works with a total capacity for production of such products exceeding 10 tonnes per year. (EPA Licence required at production exceeding 100 tonnes per year)
Surface coating	The conduct of: <ul style="list-style-type: none"> (a) works for metal finishing, in which metal surfaces are prepared or finished by means of electroplating, electrolyse plating, anodising (chromating, phosphating and colouring), chemical etching or milling, or printed circuit board manufacture, being works producing more than 5 kilolitres per day of effluent (EPA Licence) or (b) works for hot dip galvanising (EPA Licence) or (c) works for spray painting or powder coating with a capacity to use more than 100 litres per day of paint or 10kg per day of dry powder (EPA Licence).
Timber processing works	The conduct of works (other than works at a builders supply yard or a home improvement centre) at which timber is sawn, cut, chipped, compressed, milled or machined, being works with a total processing capacity exceeding 4,000m ³ per year. (EPA Licence)
Maritime construction works	The conduct of works for the construction or repair of ships, vessels or floating platforms or structures, being works with the capacity to construct or repair ships, vessels or floating platforms or structures of a mass exceeding 80 tonnes. (EPA Licence)
Vehicle production	The conduct of works for the production of motor

		vehicles, being works with a production capacity exceeding 2,000 motor vehicles per year. (EPA Licence)
	Fibre-reinforced plastic manufacturing	The conduct of facilities for the purposes of manufacturing fibre-reinforced plastic products, but excluding facilities more than 300m from residential premises not associated with the facility.
Resource recovery, waste disposal and related activities	Waste recovery (excluding a prescribed approved activity)	
	Waste recovery facility	<p>The conduct of a <i>waste recovery facility</i>, being a depot, works or facility (including, but not limited to, a transfer station or material recovery facility) that, during a 12 month period, receives for <i>preliminary treatment</i>, or has the capacity for the <i>preliminary treatment</i> of:</p> <ul style="list-style-type: none"> (a) more than 100 tonnes of solid waste or matter or (b) more than 100 kilolitres of liquid waste or matter <p>prior to its transfer elsewhere for lawful reuse, further treatment or disposal but excluding a prescribed approved activity or an activity in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p> <p>In this class of development / activity:</p> <p>preliminary treatment of waste or matter, includes sorting, aggregating, compacting, baling or packaging the waste or matter as defined in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>
	Waste reprocessing (excluding a prescribed approved activity)	
	Composting works	<p>Being a depot, facility or works with the capacity to treat, during a 12 month period:</p> <ul style="list-style-type: none"> (a) in the case of works located wholly or partly within a water protection area - more than 200 tonnes of organic waste or matter or (b) in the case of works located wholly outside of a water protection area - more than 1,000 tonnes of organic waste or matter <p>for the production of compost, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>
	Scrap metal treatment works	Being a depot, facility or works for the treatment of scrap metal (by processes involving electrically heated furnaces or other fuel burning equipment or by mechanical processes), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)
Tyre waste treatment works	<p>Being a depot, facility or works with the capacity to treat more than 5 tonnes of <i>tyre waste</i> during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p> <p>In this class of development / activity:</p> <p>tyre waste means waste comprised of tyres or tyre pieces as defined in Schedule 1 of the <i>Environment Protection Act 1993</i>.</p>	

Waste lead acid battery treatment works	Being a depot, facility or works with the capacity to treat more than 500 waste lead acid batteries during a 12 month period, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)
Other waste reprocessing facility	<p>Being a depot, works or facility (other than a waste reprocessing facility specified above) that, during a 12 month period, receives or has the capacity to treat:</p> <ul style="list-style-type: none"> (a) more than 100 tonnes of solid waste or matter or (b) more than 100 kilolitres of liquid waste or matter <p>for the production of energy or materials that are ready for use (without requiring further treatment), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)</p>
<i>Waste disposal (excluding a prescribed approved activity)</i>	
Landfill depot	Being a depot, facility or works for the disposal of waste to land, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)
Liquid waste depot	Being a depot, facility or works for the reception and disposal of liquid waste, or the reception, treatment and disposal of liquid waste, but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)
Incineration depot	<p>Being a depot, facility or works for the disposal, by incineration, pyrolysis or gasification by high temperature chemical decomposition, or thermal oxidation using fuel burning equipment, of solid waste, a listed waste or quarantine waste (EPA Licence), but excluding:</p> <ul style="list-style-type: none"> (a) facilities with a processing capacity not exceeding 100 kilograms per hour and more than 500m from residential premises not associated with the facility or (b) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority.
Wastewater treatment	
Wastewater treatment works	<p>Being sewage treatment works, a CWMS, winery wastewater treatment works or any other wastewater treatment works with the capacity to treat, during a 12 month period:</p> <ul style="list-style-type: none"> (a) in the case of works located wholly or partly within a water protection area - more than 2.5 ML of wastewater (EPA Licence required at more than 5 ML) or (b) in the case of works located wholly outside of a water protection area - more than 12.5 ML of wastewater (EPA Licence required at more than 50 ML).

Activities involving listed wastes	
Activity producing listed waste	<p>The conduct of an activity in which a <i>listed waste</i> is produced as waste or becomes waste, but excluding any of the following:</p> <ul style="list-style-type: none"> (a) a domestic activity (b) retail pharmacy (c) medical practice (other than the practice of pathology) (d) nursing practice (e) dental practice (f) veterinary practice (g) the conduct of a nursing home or other residential aged care facility (h) the conduct of an immunisation clinic (i) the conduct of a hospital with capacity of fewer than 40 beds (j) a <i>prescribed industrial activity</i> (k) an activity in which the waste produced is lawfully disposed of to a sewer (l) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence) <p>In this class of development / activity:</p> <p>prescribed industrial activity - means any of the following:</p> <ul style="list-style-type: none"> (a) building work (b) carpentry or joinery (c) film processing (d) plumbing or gas fitting (e) dry cleaning (f) primary or secondary school education (g) agriculture or horticulture (h) french polishing (i) manufacturing jewellery (j) painting or decorating (k) panel beating and associated spray painting (l) an activity that results in the production of less than 50 000 litres of waste oil per year (m) an activity authorised by a lease or licence under the <i>Mining Act 1971, the Petroleum and Geothermal Energy Act 2000 or the Roxby Downs (Indenture Ratification) Act 1982</i> where the waste is lawfully disposed of to land and contained within the area of the lease or licence (n) an activity authorised by a lease under the <i>Mining Act 1971</i> where the waste is lawfully disposed of to land and contained within the area of a miscellaneous purposes licence under that Act adjacent to the area of the lease.
Reception or storage of listed waste	<p>The conduct of a depot, facility or works for the reception or storage of a <i>listed waste</i>, but excluding the following:</p> <ul style="list-style-type: none"> (a) the temporary on-site storage of such waste while awaiting transport to another place (b) an activity consisting only of storing or distributing goods, in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority (c) the reception or storage by a council or hospital of medical waste produced in the course of a <i>prescribed medical activity</i> (d) the reception or storage by a retail pharmacy of <i>personal sharps waste, pharmaceutical waste</i> or other medical waste, in connection with a return system for such waste. (EPA Licence) <p>In this class of development / activity:</p>

		<p>personal sharps waste means medical sharps that have been used in a domestic situation for medical purposes</p> <p>pharmaceutical waste means waste comprised of medicines or other pharmaceutical products</p> <p>prescribed medical activity - means any of the following:</p> <ul style="list-style-type: none"> (a) a medical practice other than: <ul style="list-style-type: none"> (i) medical practice at a hospital or (ii) the practice of pathology (b) nursing practice other than at a hospital (c) dental practice other than at a hospital (d) operating a nursing home (e) veterinary practice (f) operating a hospital with a capacity of less than 40 beds (g) operating an immunisation clinic.
	Treatment of listed waste	The conduct of a depot, facility or works for the treatment of a <i>listed waste</i> , or <i>wastewater</i> containing a listed waste, by immobilising, stabilising or sterilising the waste by any process (before its further treatment or disposal), but excluding an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors that a referral is not necessary and has provided written confirmation of this to the relevant authority. (EPA Licence)
Activities in specified areas	Brukung Mine Site	The management of the abandoned Brukung mine site and associated acid neutralisation plant situated adjacent to Dawesley Creek in the Mount Lofty Ranges. (EPA Licence)
	Discharge of stormwater to underground aquifer	Discharge of stormwater from a catchment area exceeding 1 hectare to an underground aquifer by way of a well or other direct means where the stormwater drains to the aquifer from: <ul style="list-style-type: none"> (a) land or premises on which a business is carried on in the council area of the City of Mount Gambier or (b) a stormwater drainage system in the council area of the City of Mount Gambier or (c) a stormwater drainage system in Metropolitan Adelaide. (EPA Licence)
Animal husbandry, aquaculture and other activities	Feedlots	Carrying on an operation for holding in a confined yard or area and feeding principally by mechanical means or by hand: <ul style="list-style-type: none"> (a) not less than an average of 500 cattle (EPA Licence), or 4,000 sheep or goats per day over any period of 12 months or (b) where the yard or area is situated in a water protection area - not less than an average of 200 cattle (EPA Licence), or 1,600 sheep or goats per day over any period of 12 months <p>but excluding any such operation carried on at an abattoir, slaughterhouse or saleyard or for the purpose only of drought or other emergency feeding.</p>
	Aquaculture or Fish Farming	The land based propagation or rearing of marine, estuarine or fresh water fish or other marine or freshwater organisms that involves the discharge of wastewater into marine or inland waters, or onto land but excluding where wastewater is discharged to an approved wastewater management system.
	Saleyards	The commercial conduct of yards at which cattle, sheep or other animals are gathered or confined for the purpose of their sale, auction or exchange, including associated transport loading facilities, being

		yards with a throughput exceeding 50,000 sheep equivalent units per year [sheep equivalent units: 1 sheep or goat = 1 unit, 1 pig (< 40kg) = 1 unit, 1 pig (> 40kg) = 4 units, 1 cattle (< 40kg) = 3 units, 1 cattle (40-400kg) = 6 units, 1 cattle (> 400kg) = 8 units]. (EPA Licence)
	Piggeries	<p>The conduct of a piggery (being premises having confined or roofed structures for keeping pigs) with a capacity of:</p> <ul style="list-style-type: none"> (a) in the case of a piggery located wholly outside of a water protection area - 1,300 or more <i>standard pig units</i> (EPA Licence required at 6500 or more standard pig units) or (b) in the case of a piggery located wholly or partly within a <i>water protection area</i> - 130 or more <i>standard pig units</i>. (EPA Licence required at 650 or more standard pig units) <p>In this class of development / activity:</p> <p>standard pig units is a unit of measurement of pigs determined:</p> <ul style="list-style-type: none"> (a) by reference to clause 4.3 of the <i>National Environmental Guidelines for Piggeries 2010</i> (second edition (revised)) prepared by Australian Pork Limited or (b) in a manner approved by the Environment Protection Authority and published on a website determined by the Environment Protection Authority.
	Poultry farms	<p>The keeping of <i>poultry</i> in confined or roofed structure(s) exceeding 1,000m² (EPA Licence required for the growing of <i>poultry</i> meat only where the total area of the sheds or structures used to keep the <i>poultry</i> is 13,500m² or more.</p> <p>In this class of development / activity:</p> <p>poultry means chicken, turkey, guinea fowl, duck, geese, pheasants, quail, squab (pigeons), muttonbirds or other avian species but does not include ratites.</p>
	Dairies	Carrying on of a dairy with a total processing capacity exceeding more than 100 milking animals at any 1 time in a <i>water protection area</i> .
Food production and animal and plant product processing	Meat processing works	<p>The conduct of slaughtering works for commercial purposes for the production of meat or meat products for human or animal consumption, being:</p> <ul style="list-style-type: none"> (a) in the case of poultry or poultry meat products - works with a rate of production exceeding 100 tonnes per year (EPA Licence required at rate of production exceeding 200 tonnes per year) or (b) in the case of any other animal meat or animal meat products - works with a rate of production exceeding 50 tonnes per year. (EPA Licence required at rate of production exceeding 100 tonnes per year)
	Breweries and cideries	The conduct of works for the production of beer (EPA Licence only for beer production), cider or any other alcoholic beverage (excluding wine and spirits) by infusion, boiling or fermentation, being works with a production capacity exceeding 5,000 litres per day.
	Fish processing	<p>The conduct of works for scaling, gilling, gutting, filleting or otherwise <i>processing fish</i> for sale (EPA Licence), but excluding:</p> <ul style="list-style-type: none"> (a) works with a processing output of less than 100 tonnes per year where wastewater is disposed of to a sewer or CWMS or (b) works with a processing output of less than 2 tonnes per year where wastewater is disposed of otherwise than to a sewer or

	<p>CWMS</p> <p>or</p> <p>(c) processing of <i>fish</i> only in the course of a business of selling <i>fish</i> by retail.</p> <p>In this class of development / activity:</p> <p>fish has the same meaning as in the <i>Fisheries Management Act 2007</i></p> <p>processing fish does not include freezing, chilling or packing the fish.</p>
Milk processing works	The conduct of works at which milk is separated, evaporated or otherwise processed for the manufacture of evaporated or condensed milk, cheese, butter, ice cream or other similar dairy products, being works at which milk is processed at a rate exceeding 5ML per year. (EPA Licence)
Produce processing works	<p>The conduct of works for processing any agricultural crop material being:</p> <p>(a) works for the processing of agricultural crop material by deep fat frying, roasting or drying through the application of heat with a processing capacity exceeding 30kg per hour (EPA Licence)</p> <p>or</p> <p>(b) works at which more than 10ML of wastewater is generated per year and disposed of otherwise than to a sewer or CWMS. (EPA Licence)</p>
Rendering and fat extraction works	The conduct of works at which animal, fish or grease trap wastes or other matter is processed or is capable of being processed by rendering or extraction or by some other means to produce tallow or fat or their derivatives or proteinaceous matter, being works with a total processing capacity exceeding 25 kg per hour. (EPA Licence required at processing capacity exceeding 250 kilograms per hour)
Curing or drying works	<p>The conduct of works at which meat, fish or other edible products are smoked, dried or cured by the application of heat or smoke:</p> <p>(a) with a total processing capacity of between 25kg and 250kg per hour but excluding works that are more than 200m from residential premises not associated with the works</p> <p>or</p> <p>(b) with a total processing capacity exceeding 250kg per hour. (EPA Licence)</p>
Tanneries or fellmongeries	<p>The conduct of works for the commercial preservation or treatment of animal skins or hides being works processing more than 5 tonnes of skins or hides per year, but excluding:</p> <p>(a) the processing of skins or hides by primary producers in the course of primary production activities outside township areas</p> <p>or</p> <p>(b) the processing of skins or hides in the course of taxidermy. (EPA Licence)</p>
Woolscouring or wool carbonising works	The conduct of works for the commercial cleaning or carbonising of wool, but excluding cleaning or carbonising of wool in the course of handicraft activities where the wool is further processed for sale by retail. (EPA Licence)
Wineries or Distilleries	The conduct of works for the processing of grapes or other produce to make wine or spirits, being works at which more than 50 tonnes of grapes or other produce are processed per year, but excluding works for bottling only. (EPA Licence required for wineries or distilleries processing more than 50 tonnes of grapes or other produce per year in the Mt Lofty Ranges Water Protection Area or processing more than 500

		tonnes of grapes or other produce per year outside of the Mt Lofty Ranges Water Protection Area)
Materials handling and transportation	Bulk shipping facilities	<p>The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any wharf or wharf side facility (including sea-port grain terminals), being facilities handling or capable of handling these materials into or from vessels at a rate:</p> <ul style="list-style-type: none"> (a) of between 10 tonnes and 100 tonnes per day, excluding facilities that are more than 300m from residential premises not associated with the facility or (b) exceeding 100 tonnes per day. (EPA Licence)
	Bulk storage	<p>The conduct of facilities for bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals to or from any commercial storage facility at a rate exceeding 100 tonnes per day, excluding facilities more than 300m from residential premises not associated with the facility.</p>
	Railway operations	<p>The conduct of any of the following activities associated with a <i>railway</i>:</p> <ul style="list-style-type: none"> (a) the construction or operation of <i>rail infrastructure</i> (b) the operation of <i>rolling stock</i> on a <i>railway</i> (c) other activities conducted on <i>railway land</i> (EPA Licence required for the above activities but not the following exclusions) <p>but excluding:</p> <ul style="list-style-type: none"> (d) any activities associated with any of the following: <ul style="list-style-type: none"> (i) a <i>railway</i> with a track gauge that is less than 600mm (ii) a <i>railway</i> in a mine which is underground or predominantly underground and used in connection with the performance of mining operations (iii) a slipway (iv) a crane-type runway (v) a <i>railway</i> used solely for the purposes of horse-drawn trams (vi) a <i>railway</i> used solely for the purposes of static displays (vii) a <i>railway</i> at an amusement park used solely for the purposes of an amusement structure (viii) the transfer of freight into or onto, and unloading of freight from, <i>rolling stock</i> (ix) an activity in respect of which the Environment Protection Authority is satisfied, having regard to the prescribed factors, that a referral is not necessary and has provided written confirmation of this to the relevant authority. <p>In this class of development / activity:</p> <p>rail infrastructure means infrastructure associated with the operation of a railway and includes (but is not limited to) railway track, associated track structures, over or under track structures, supports, tunnels, bridges, stations, platforms, train control systems, signalling systems, communication systems, electric traction infrastructure and buildings, but does not include any workshop or repair facility</p> <p>railway means a guided system designed for the movement of rolling stock which has the capability of transporting passengers, freight or both on a railway track, together with its infrastructure and associated sidings or crossing, or passing loops, and includes a railway in a marshalling yard or a passenger or freight terminal</p> <p>railway land means any of the following:</p>

	<ul style="list-style-type: none"> (a) land within a rail corridor or rail reserve, including any associated sidings (b) railway yards (c) other land over which a railway track passes <p>rolling stock means a vehicle (whether or not self-propelled) that operates on or uses a railway track, but does not include a vehicle designed to operate both on and off a railway track when the vehicle is not operating on a railway track</p> <p>Examples of rolling stock - A locomotive, carriage, rail car, rail motor, light rail vehicle, train, tram, light inspection vehicle, road/rail vehicle, trolley, wagon.</p>
Crushing, grinding or milling	<p>Processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or in any other manner) of any of the following:</p> <ul style="list-style-type: none"> (a) chemicals or rubber at a rate: <ul style="list-style-type: none"> (i) of between 1 tonne and 100 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility or (ii) in excess of 100 tonnes per year (EPA Licence) (b) agricultural crop products at a rate: <ul style="list-style-type: none"> (i) of between 50 tonnes and 500 tonnes per year, excluding facilities that are more than 300m from residential premises not associated with the facility or (ii) in excess of 500 tonnes per year (EPA Licence) <p>but excluding non-commercial processing for on farm use</p> (c) rock, ores or minerals at a rate: <ul style="list-style-type: none"> (i) of between 100 tonnes and 1,000 tonnes per year, excluding facilities that are more than 500m from residential premises not associated with the facility or (ii) in excess of 1,000 tonnes per year (EPA Licence) <p>but excluding processing of wet sand.</p>
Dredging	<p>The conduct of capital dredging being the excavation of more than 10m³ of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means and any associated disposal of dredged material to land or waters (EPA Licence), but excluding any of the following:</p> <ul style="list-style-type: none"> (a) <i>maintenance dredging</i> (b) works associated with the establishment of a visual aid (c) any lawful fishing or recreational activity <p>In this class of development / activity:</p> <p>marine waters has the same meaning as in Section 3 of <i>Environment Protection Act 1993</i>.</p> <p>maintenance dredging means the excavation of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means for the purpose of maintaining a previously dredged (approved) depth, width and area in marine or inland waters.</p>
Coal handling and storage	<p>The handling of coal or carbonaceous material by any means or the storage of coal, coke or carbonaceous reject material at facilities with a total handling capacity exceeding 100 tonnes per day or a storage capacity exceeding 5,000 tonnes. (EPA Licence)</p>
Extractive industries	<p>The conduct of operations involving extraction, or</p>

		extraction and processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or any other manner), of sand, gravel, stone, shell, shale, clay or soil, being operations with an extraction production rate exceeding 100,000 tonnes per year. (EPA Licence)
Other	Aerodromes	The conduct of facilities for commercial or charter aircraft take-off and landing, being facilities estimated to be used for: <ul style="list-style-type: none"> (a) more than 200 flight movements per year, excluding facilities more than 3km from residential premises not associated with the facilities or (b) more than 2000 flight movements per year in any case. (EPA Licence for aerodromes used for more than 20000 flight movements per year)
	Fuel burning	The conduct of works or facilities involving the use of fuel burning equipment, including flaring (other than flaring at hydrocarbon storage or production works that do not have a total storage capacity or total production rate exceeding the levels respectively specified in 'Hydrocarbon storage or production works' above) or incineration, where the equipment alone or in aggregate is capable of burning combustible matter: <ul style="list-style-type: none"> (a) a rate of heat release exceeding 5MW (EPA Licence) or (b) at a rate of heat release exceeding 500KW and the products of combustion are used: <ul style="list-style-type: none"> (i) to stove enamel (EPA Licence) or (ii) to bake or dry any substance that on heating releases dust or air impurities. (EPA Licence)
