Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Performance Outcomes (PO) and Deemed-to-Satisfy (DTS) Criteria / Designated Performance Feature (DPF)

Performance Outcome	Deemed-to-Satisfy Criteria / Designated Performance Feature
Land Use and Intensity	
PO 1.1 Retail, office, entertainment, health , recreation related uses and other businesses provide a range of goods and services to the local community and the surrounding district.	DTS/DPF 1.1 Development comprises one or more of the following: (a) Advertisement (b) Cinema (c) Community facility (d) Consulting room (e) Dwelling (f) Educational establishment (g) Emergency services facility (h) Hospital (i) Hotel (j) Indoor recreation facility (k) Library (l) Office (m) Place of worship (n) Pre-school (o) Public transport terminal (p) Recreation area (q) Retail fuel outlet (r) Service trade premises (s) Shop (t) Tourist accommodation.
PO 1.2 Residential development does not prejudice the operation of existing or future retail, office, entertainment or recreation related activity within the zone.	DTS/DPF 1.2 Dwellings are: (a) developed in conjunction with non-residential uses (b) sited either behind or above non-residential uses on the same allotment
PO 1.3 Tourist accommodation and visitor attractions support the visiting public and holiday makers.	DTS/DPF 1.3 None are applicable.
PO 1.4 Development sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.	DTS/DPF 1.4 None are applicable.
PO 1.5 Changes in the use of land encourage the efficient reuse of commercial premises to maintain and enhance vibrancy within activity centres.	DTS/DPF 1.5 A change of use to a shop, office, consulting room or any combination of these uses where all of the following are achieved: (a) the area to be occupied by the proposed development is in an existing building and is currently used as a shop, office, consulting room or any combination of these uses

- (b) if the proposed change of use is for a shop that primarily involves the handling and sale of foodstuffs, areas used for the storage and collection of refuse are sited at least 10 metres from the site of a dwelling (other than a dwelling directly associated with the proposed shop)
- (c) if the proposed change of use is for a shop that primarily involves heating and cooking of foodstuffs in a commercial kitchen and is within 30 metres of any neighbourhood-type zone boundary or a dwelling (other than a dwelling directly associated with the proposed shop), an exhaust duct and stack (chimney) exists or is capable of being installed for discharging exhaust emissions
- (d) if the change in use involves a gross leasable floor area greater than 250m² and has direct frontage to an arterial road, it achieves:
 - (i) the primary vehicle access (being the access where the majority of vehicles access / egress the site of the proposed development) from a road that is not an arterial road
 - or
 - (ii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared
- (e) off-street vehicular parking exists in accordance with the rate(s) specified in Transport, Access and Parking Table 1 - General Off-Street Car Parking Requirements or Table 2 - Off-Street Car Parking Requirements in Designated Areas to the nearest whole number, except where:
 - (i) the building is a local heritage place
 - or
 - (ii) the required contribution will be made into a relevant car parking offset scheme (other than where a relevant contribution has previously been made)
 - or
 - (iii) the development is located on a site that operates as an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.

Built Form and Character

PO 2.1
Development complements adjacent development within the zone, and mitigates interface impacts on adjoining residential uses in neighbourhood-type zones, through appropriate building siting, scale and design.

DTS/DPF 2.1
None are applicable.

PO 2.2
Buildings are sited and designed to create pedestrian, vehicular and visual linkages between the various built-form elements within the zone and adjoining main roads.

DTS/DPF 2.2
None are applicable.

Building height and setbacks

PO 3.1
Buildings are set back from primary and secondary street boundaries to contribute to the consistent established streetscape.

DTS/DPF 3.1
Buildings are set back from road boundaries to align with buildings on adjoining land.

PO 3.2
Building height is consistent with the form expressed in any relevant *Maximum Building Height Levels Technical and Numeric Variation* layer and *Maximum Building Height Metres Technical and Numeric Variation* layer, and otherwise generally of a low-rise that complements the established streetscape and local character.

DTS/DPF 3.2
Building height is not greater than:

- (a) the following:

Maximum Building Height (Metres)
Maximum building height is 8m
Maximum building height is 9m
Maximum building height is 15m
Maximum Building Height (Levels)
Maximum building height is 2 levels
Maximum building height is 3 levels
- (b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)) - 3 building levels up to a height of 12m.

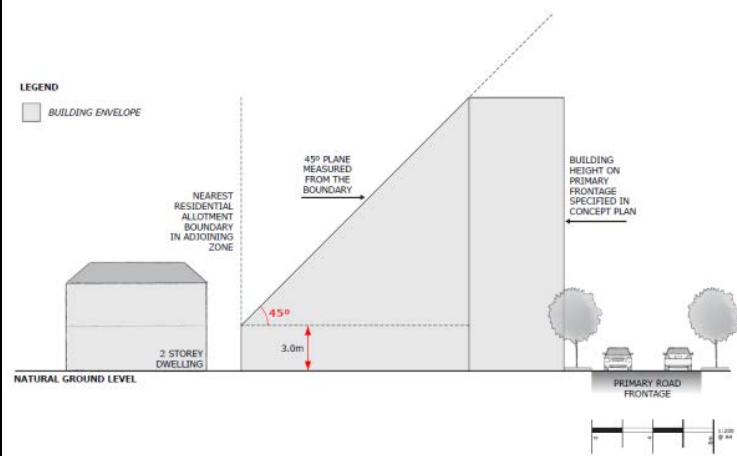

In relation to DTS/DPF 3.2, in instances where:

- (c) more than one value is returned in the same field for DTS/DPF 3.2(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or *Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (d) only one value is returned for DTS/DPF 3.2(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

PO 3.3
Buildings mitigate visual impacts of massing on residential development within a neighbourhood-type zone.

DTS/DPF 3.3
Buildings are constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the boundary of an allotment used

residential purposes in a neighbourhood-type zone as shown in the following diagram (except where this boundary is a southern boundary or where this boundary is the primary street boundary):

PO 3.4
Buildings mitigate overshadowing of residential development within a neighbourhood-type zone.

DTS/DPF 3.4
Buildings on sites with a southern boundary adjoining the allotment boundary of an allotment used for residential purposes in a neighbourhood-type zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

PO 3.5
Buildings on an allotment fronting a road that is not a State maintained road, and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 3.5
None are applicable.

Land division

PO 4.1
Land division creates allotments that vary in size and are suitable for a variety of business and community facilities.

DTS/DPF 4.1
None are applicable.

Advertisements

PO 5.1
Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages

DTS/DPF 5.1
None are applicable.

PO 5.2
Freestanding advertisements:
(a) identify the associated business(es)
(b) are of a size that is commensurate with the scale of the centre and the street frontage
(c) avoid visual clutter
(d) positively respond to the context without dominating the locality.

DTS/DPF 5.2
Freestanding advertisements:
(a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser)
(b) do not have a sign face that exceeds 4m² per side.

Concept Plans

PO 6.1
Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.

DTS/DPF 6.1
The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

Description
Concept Plan 75 - Warrengie Development Area Land Form / Building Module Cross Section - Warrengie
Concept Plan 9 - Blakeview
Concept Plan 21 - Virginia

	Description
	Concept Plan 22 - Virginia Infrastructure
	Concept Plan 50 - Roseworthy Town Expansion
	Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints
	Concept Plan 98 - Mallala
	In relation to DTS/DPF 6.1, in instances where:
	(a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.
	(b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 6.1 is met.

Table 1 - Accepted Development Classification

The following table identifies Classes of Development that are classified as Accepted Development subject to meeting the Accepted Development Classification Criteria

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

PO 3.1 Building height is consistent with the form expressed in any relevant <i>Maximum Building Height Levels Technical and Numeric Variation</i> and <i>Maximum Building Height Metres Technical and Numeric Variation</i> , and otherwise low rise, with height commensurate with the development site's frontage and depth as well as the main street width, so that the impacts of building mass on adjoining properties and the streetscape are minimised.	DTS/DPF 3.1 Building height is not greater than: (a) the following: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th style="text-align: center;">Maximum Building Height (Metres)</th> </tr> </thead> <tbody> <tr> <td>Maximum building height is 8m</td> </tr> <tr> <td>Maximum building height is 9m</td> </tr> <tr> <td>Maximum building height is 15m</td> </tr> <tr> <td>Maximum building height is 7.5m</td> </tr> </tbody> </table>	Maximum Building Height (Metres)	Maximum building height is 8m	Maximum building height is 9m	Maximum building height is 15m	Maximum building height is 7.5m
Maximum Building Height (Metres)						
Maximum building height is 8m						
Maximum building height is 9m						
Maximum building height is 15m						
Maximum building height is 7.5m						

Maximum Building Height (Levels)	
	Maximum building height is 1 level
	Maximum building height is 2 levels
	Maximum building height is 4 levels

(b) in all other cases (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels)):

- (i) where the site has a frontage of at least 25m and depth of at least 50m - 3 building levels up to a height of 12m
- (ii) in all other cases - 2 building levels up to a height of 9m.

In relation to DTS/DPF 3.1, in instances where:

- (c) more than one value is returned in the same field for DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or *Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

PO 3.6 Buildings are set back from rear boundaries (other than where these are also street boundaries) to minimise impacts on neighbouring properties, including access to natural light and ventilation.	DTS/DPF 3.6 Buildings are set back 3m or more from rear boundaries where the subject land directly abuts an allotment of a different zone, except where the development abuts the wall of an existing or simultaneously constructed building on the adjoining land.							
PO 3.7 Buildings are set back from rear access ways to provide adequate manoeuvrability for vehicles.	DTS/DPF 3.7 Buildings are set back from the rear access way have (a) no minimum requirement where the access way is 6.5m or more wide or (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.							
Traffic, parking and access								
PO 4.1 Development minimises the need for vehicle crossovers on the main street to reduce conflicts with pedestrians and avoid disruption to the continuity of built form.	DTS/DPF 4.1 None are applicable.							
PO 4.2 Vehicle parking is located behind buildings away from the primary main street frontage and designed to minimise impacts on residential amenity.	DTS/DPF 4.2 Vehicle parking areas are located behind the building line of the associated building.							
Advertisements								
PO 5.1 Advertisements are sited and designed to achieve an overall consistency of appearance along individual street frontages.	DTS/DPF 5.1 None are applicable.							
PO 5.2 Freestanding advertisements: (a) identify the associated business(es) (b) are of a size that is commensurate with the scale of the centre and the street frontage (c) avoid visual clutter (d) positively respond to the context without dominating the locality (e) are sited and designed to not detract from the main street character.	DTS/DPF 5.2 Freestanding advertisements: (a) do not exceed 5m in height, the adjacent building wall height, or the zone's height allowance (whichever is the lesser) (b) do not have a sign face that exceeds 4m ² per side.							
Concept Plans								
PO 6.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 6.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: <table border="1" style="width: 100%;"><thead><tr><th>Description</th></tr></thead><tbody><tr><td>Concept Plan 21 - Virginia</td></tr><tr><td>Concept Plan 22 - Virginia Infrastructure</td></tr><tr><td>Concept Plan 71 - Hamley Bridge</td></tr><tr><td>Concept Plan 81 - Edinburgh Defence Airfield Lighting Constraints</td></tr><tr><td>Concept Plan 99 - Two Wells</td></tr><tr><td>Concept Plan 100 - Gawler East</td></tr></tbody></table> In relation to DTS/DPF 6.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)

In relation to DTS/DPF 3.1, in instances where:

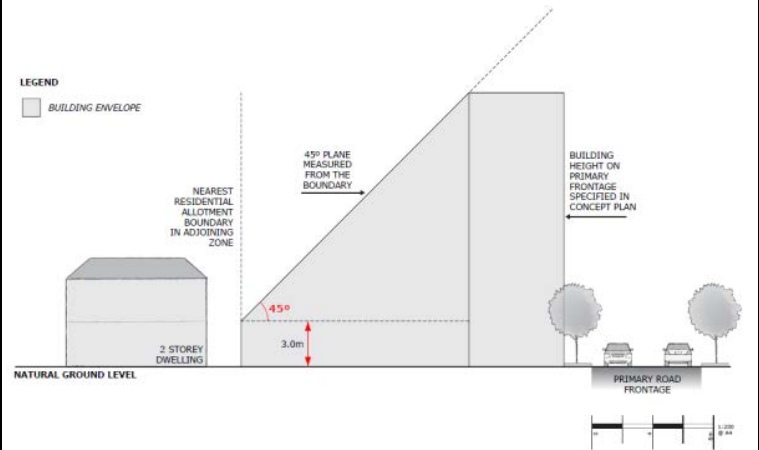

- (c) more than one value is returned in the same field then:
 - (i) for the purpose of DTS/DPF 3.1(a), refer to the *Maximum Building Height (Metres) Technical and Numeric Variation layer* or *Maximum Building Height (Levels) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
 - (ii) for the purpose of DTS/DPF 3.1(b) refer to the *Minimum Building Height (Levels) Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (d) only one value is returned for DTS/DPF 3.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (e) no value is returned (ie there is a blank field), then:
 - (i) for the purpose of DTS/DPF 3.1(a), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy
 - (ii) for the purpose of DTS/DPF 3.1(b), then there is no minimum building height and DTS/DPF 3.1(b) is met.

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Significant Development Sites

PO 5.1
 Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area, which may include one or more allotments) to achieve increased development yield provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 5.1
 Development on significant development sites (a site with a frontage over 25m to a primary road corridor and over 2500m² in area) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing or
- (c) includes at least:
 - (i) three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind
 - D. a range of dwelling types that includes at least 10% of 3+ bedroom apartments
 - E. a child care centre
 - and
 - (ii) three of the following:
 - A. a communal useable garden integrated with the design of the building that covers the majority of a rooftop area supported by services that ensure ongoing maintenance
 - B. living landscaped vertical surfaces of at least 50m² supported by services that ensure ongoing maintenance
 - C. passive heating and cooling design elements including solar shading integrated into the building
 - D. higher amenity through provision of private open space in excess of minimum requirements by 25% for at least 50% of dwellings.

PO 5.2
 Development on a significant development site (a site with a frontage over 25m to a primary road corridor and over 2500m² in area) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 5.2
 Development on a significant development site (a site with a frontage over 25m to a primary road corridor and over 2500m² in area) that:

- (a) is constructed within zone's Interface Building Height provision as specified DTS/DPF4.1
- (b) locates non-residential activities and higher density elements towards the primary road corridor
- (c) locates taller building elements towards the primary road corridor.

Movement, parking and access

PO 6.1
 Development does not result in additional crossovers on the primary street frontage, except where rationalising existing crossovers on consolidated sites and is designed to minimise conflicts with pedestrians and cyclists and minimise disruption to the continuity of built form.

DTS/DPF 6.1
 Vehicular access to be provided:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or
- (b) where it consolidates or replaces existing crossovers.

PO 6.2
 Development is designed to ensure car parking is located to avoid negative impacts on the primary corridor streetscape.

DTS/DPF 6.2
 Vehicle parking garages located behind buildings away from the primary main street frontage.

Advertisements

PO 7.1
 Freestanding advertisements identify the associated business without creating a visually dominant element within the streetscape.

DTS/DPF 7.1
 Freestanding advertisements::

- (a) do not exceed 6m in height above natural ground level
- (b) do not have a sign face that exceeds 4m² per side.

Concept Plans

PO 8.1
 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.

DTS/DPF 8.1
 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:
 In relation to DTS/DPF 8.1, in instances where:

- (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning

and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant.
 (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 4000m ² (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

PO 4.2
Buildings on an allotment fronting a road that is not the primary corridor (ie a State maintained road) and where land on the opposite side of the road is within a neighbourhood-type zone, provides an orderly transition to the built form scale envisaged in the adjacent zone to complement the streetscape character.

DTS/DPF 4.2
None are applicable.

Significant Development Sites

PO 5.1
Consolidation of significant development sites (a site with a frontage over 25m to a primary road corridor and over 1500m² in area, which may include one or more allotments) to achieve increased development yield, provided that off-site impacts can be managed and broader community benefit is achieved in terms of design quality, community services, affordable housing provision, or sustainability features.

DTS/DPF 5.1
Development on significant development sites (a site with a frontage over 25m to a primary road corridor and over 1500m² in area, which may include one or more allotments) up to 30% above the maximum building height specified in DTS/DPF 3.1 (rounded to the nearest whole number) where it:

- (a) incorporates the retention, conservation and reuse of a building which is a listed heritage place or an existing built form and context that positively contributes to the character of the local area
- (b) includes more than 15% of dwellings as affordable housing or
- (c) includes at least:
 - (i) three of the following:
 - A. high quality open space that is universally accessible and is directly connected to, and well integrated with, public realm areas of the street
 - B. high quality, safe and secure, universally accessible pedestrian linkages that connect through the development site
 - C. active uses are located on the public street frontages of the building, with any above ground car parking located behind

PO 5.2
Development on a significant development site (a site with a frontage over 25m to a primary road corridor and over 1500m² in area, which may include one or more allotments) designed to minimise impacts on residential uses in adjacent zones with regard to intensity of use, overshadowing, massing and building proportions.

DTS/DPF 5.2
Development on a significant development site (a site with a frontage over 25m to a primary road corridor and over 1500m² in area, which may include one or more allotments) that:

PO 8.1 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.	DTS/DPF 8.1 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant: In relation to DTS/DPF 8.1, in instances where: (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 8.1 is met.

PO 5.1
 Where practicable, buildings provide vehicle access via a side street or rear lane access way that is designed to:

- (a) via side streets or rear lanes provided there is no negative impact on residential amenity within the zone and in adjacent zones or
- (b) where it consolidates or replaces existing crossovers.

PO 6.1
 Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code.

DTS/DPF 6.1
 The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:

Description
Concept Plan 5 - Bowden Urban Village
Concept Plan 34 - Bowden-Brompton
Concept Plan 3 - Mount Barker and Littlehampton

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Site Coverage	
<p>PO 3.1</p> <p>Building footprints consistent with the character of a waterfront neighbourhood and limited to:</p> <p>(a) allow sufficient space around buildings to limit visual impact</p> <p>(b) provide an attractive outlook</p> <p>(c) provide access to light and ventilation</p> <p>(d) on sites with a dual frontage, to maximise use of available land.</p>	<p>DTS/DPF 3.1</p> <p>The development does not result in site coverage exceeding:</p> <p>(a) on sites 300m² or less and with a dual frontage to the waterfront and a public street, 80%.</p> <p>(b) in all other cases, 60%.</p>
Building Height	
<p>PO 4.1</p> <p>Building height is consistent with the form expressed in any relevant Maximum Building Height Levels Technical and Numeric Variation and Maximum Building Height Metres Technical and Numeric Variation, and is otherwise generally low rise, or complements the height of nearby buildings.</p>	<p>DTS/DPF 4.1</p> <p>Building height (excluding garages, carports and outbuildings) is no greater than:</p> <p>(a) the following:</p> <p style="text-align: center;">Maximum Building Height (Metres)</p> <p>Maximum building height is 8m</p> <p>Maximum building height is 8.5m</p>

Primary Street Setback	
PO 5.1 Buildings are setback from primary street boundaries to contribute to the existing/emerging pattern of street setbacks in the streetscape and the waterfront environment.	DTS/DPF 5.1 Other than development on allotments/sites with dual frontage to both a waterfront and a public road, the building line of buildings set back from the primary street boundary: (a) at least the average setback to the building line of existing buildings on adjoining sites which face the same primary street (including those buildings that would adjoin the site if not separated by a public road or a vacant allotment) (b) where there is only one existing building on adjoining sites which face the same primary street (including those that would adjoin if not separated by a public road or a vacant allotment), not less than the setback to the building line of that building or (c) not less than 5m where no building exists on an adjoining site with the same primary street frontage.
Secondary Street Setback	
PO 6.1 Buildings are set back from secondary street boundaries to achieve separation between building walls and public streets and contribute to a suburban streetscape character.	DTS/DPF 6.1 Building walls are set back from the boundary of the allotment with a secondary street frontage at least: (a) at least 900mm or (b) if a dwelling on any adjoining allotment is closer to the secondary street than 900mm, at least the distance of that dwelling from the boundary with the secondary street whichever is less.
Boundary Walls	
PO 7.1 Dwelling boundary walls are limited in height and length to manage visual and overshadowing impacts on adjoining properties.	DTS/DPF 7.1 Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, side boundary walls occur only on one side boundary and satisfy (a) or (b): (a) side boundary walls adjoin or abut a boundary wall of a building on adjoining land for the same, or lesser length and height (b) side boundary walls do not: (i) exceed 3m in height from the top of footings (ii) exceed 11.5m in length (iii) when combined with other walls on the boundary of the subject development site, exceed a maximum 45% of the length of the boundary (iv) encroach within 3 metres of any other existing or proposed boundary walls on the subject land.
PO 7.2 Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.	DTS/DPF 7.2 Dwelling walls in a semi-detached, row or terrace arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.
Side boundary setback	
PO 8.1 Building walls are set back from side boundaries to provide: (a) separation between dwellings in a way that contributes to a suburban character and (b) access to natural light and ventilation for neighbours.	DTS/DPF 8.1 Other than walls located on a side boundary, building walls are set back from side boundaries: (a) at least 900mm where the wall height is up to 3m (b) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m and (c) at least 1900mm plus 1/3 of the wall height above 3m for walls facing a southern side boundary.

Rear boundary setback	
<p>PO 9.1</p> <p>Dwelling walls are set back from rear boundaries to provide:</p> <ul style="list-style-type: none"> (a) separation between dwellings in a way that contributes to a suburban character (b) access to natural light and ventilation for neighbours (c) private open space (d) space for landscaping and vegetation (e) a consistent character when viewed from a waterfront. 	<p>DTS/DPF 9.1</p> <p>Dwelling walls are set back from the rear boundary at least:</p> <ul style="list-style-type: none"> (a) where the rear boundary fronts a waterfront, no less than the average rear setback of any existing dwellings on adjoining allotments. <p>PO 10.1</p> <p>Development is compatible with the outcomes sought by any relevant Concept Plan contained within Part 12 - Concept Plans of the Planning and Design Code to support the orderly development of land through staging of development and provision of infrastructure.</p>	<p>DTS/DPF 10.1</p> <p>The site of the development is wholly located outside any relevant Concept Plan boundary. The following Concept Plans are relevant:</p> <p>In relation to DTS/DPF 10.1, in instances where:</p> <ul style="list-style-type: none"> (a) one or more Concept Plan is returned, refer to Part 12 - Concept Plans in the Planning and Design Code to determine if a Concept Plan is relevant to the site of the proposed development. Note: multiple concept plans may be relevant. (b) in instances where 'no value' is returned, there is no relevant concept plan and DTS/DPF 10.1 is met.
Built form and character

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.
