Part 1 - Rules of Interpretation

This Part sets out how the Planning and Design Code (the Code) implements the requirements of section 66 of the *Planning, Development and Infrastructure Act 2016* (the Act), instructs the user on how the Code is to be read and applied to development assessed under the Act, and provides for other matters relevant to the interpretation and operation of the Code.

Introduction

Section 65 of the Act provides that there must be a *Planning and Design Code* and that the State Planning Commission (the Commission) is responsible for preparing and maintaining the Code as a statutory instrument under the Act. The Code, and any amendments to the Code, as published on the SA planning portal, have been adopted by the Minister.¹

As provided by section 66 of the Act, the primary purpose of the Code is to set out a comprehensive set of policies, rules and classifications which may be selected and applied in the various parts of the State, through the operation of the Code and the SA planning database, for the purposes of development assessment and related matters within the State.²

The Code also provides for other matters envisaged by the Act, and regulations made under the Act.

Commencement and amendments

The commencement date for the Code was 1 July 2019.

The initial version of the Code applied to those parts of the State outside council areas under transitional arrangements put in place to provide for the staged commencement of development assessment under the new Act in place of the *Development Act 1993*.³

The second version of the Code extends to regional areas of the State under the transitional arrangements.

The processes associated with initiating and making amendments to the Code are mainly set out in section 73 of the Act. One important feature is consultation under the Community Engagement Charter, and other consultation that may be required by the Commission, in connection with a particular amendment proposal.

An amendment to the Code does not have effect unless and until it is approved by the Minister. The approval process includes a report to the Minister about the processes undertaken in connection with developing the proposed amendment and certification as to the accuracy of information presented or provided to the Minister for the purposes of gaining approval.

Any amendments, once approved, are published on the SA planning portal. Electronic publication of an up-to-date version of the Code is a key feature of the scheme under the Act, and is supported by a number of related features and processes that facilitate the operation and application of the Code for the purposes of development assessment.⁴

Information about amendments to the Code is set out in Part 13 - Table of Amendments.

Major features of the Code

The Code Library

The Code incorporates a scheme that collates and organises its policies and rules for development classification and assessment into zones, subzones, overlays and general development policies. Together, these components of the Code form a library of policies (the "Code Library"). The policies that make up the library have no application in their own right, but apply depending on the class of development and spatial location under the scheme that is outlined in this Part.

Classification of development

The Code divides development into 3 categories of development depending on whether it is classified under the Code as:

- (a) accepted development (see section 104(1) of the Act); and
- (b) deemed-to-satisfy development (see section 105(a) of the Act); and
- (c) restricted development (see section 108(1)(a) of the Act).⁵

All development is classified firstly by reference to its location and the zone, subzone and overlays that are applicable to the location. Classification tables applicable to each zone identify development as accepted development, deemed-to-satisfy development or restricted development.⁶

Accepted development

Each zone contains a table - Table 1 - which specifies classes of development which will be classified as 'accepted development' under section 104 of the Act in that zone if all of the corresponding criteria in the table are satisfied.

Accepted development does not require planning consent.

Deemed-to-satisfy development

Each zone contains a table - Table 2 - which specifies classes of development which will be classified as "deemed-to-satisfy development" under section 106 of the Act in that zone if all of the corresponding criteria in the table are satisfied, insofar as they are relevant to the nature of the particular development.

Section 106(2) of the Act specifies that if a relevant authority is satisfied that development is deemed-to-satisfy development except for 1 or more minor variations, the relevant authority must assess it as deemed-to-satisfy development.

Deemed-to-satisfy development must be granted planning consent subject to the requirements of section 106 of the Act and therefore does not require assessment against the policies and rules applicable to performance assessed development.

Restricted development

Each zone contains a table - Table 4 - which specifies classes of development which will be categorised as "impact assessed development" and classified as "restricted development" under section 108 of the Act, subject to any exclusions specified in the table.

The Commission is the relevant authority for restricted development.

All policies and rules relative to the spatial location of proposed restricted development, together with all general development policies, are applicable and may be determined by the Commission to be relevant for the purposes of a restricted development under section 110(10) of the Act (but the Commission is not bound by those provisions).

Performance assessed development

All development not classified as accepted, deemed-to-satisfy, restricted or impact assessed development will be categorised as code assessed development and classified as "performance assessed development" under sections 105(b) and 107 of the Act, and will be assessed on its merits against the Code as contemplated by section 107 of the Act.

Application of Policies to Performance Assessed Classes of Development

In particular, for each zone, Table 3 specifies the policies and rules that apply to classes of development within the zone, including by the application of policies within subzones and overlays (applies only in the area affected by the subzone/overlay), together with the relevant general development policies. Table 3 also contains rules for application of the policies, including rules relating to the application of Desired Outcome policies and Designated Performance Features.

The policies specified in Table 3 constitute the policies applicable to the particular class of development within the zone to the exclusion of all other policies within the Code, and no other policies are applicable.

Development that does not fall within one of the specified classes of development in Table 3 will be designated in the table as "All Other Code Assessed Development". To assess such development, all policies from the zone and subzone, and all policies in overlays that have application to the spatial location of the development, and all general development policies, apply for the purpose of assessment.

For the purposes of section 102 of the Act, the relevant authority must assess the development against the applicable policies specified by Table 3 that are relevant to the particular development. For the avoidance of doubt, the relevant authority may determine that one or more of the listed policies are not relevant to a particular development.

Determination of Classes of Development

The Classification and Procedural Matters tables in the Code list classes of development (in the left-hand column). Unless otherwise specified in another class of development in that table, the reference to a class of development includes a reference to a change in the use of the relevant land or building work (including construction of a new building, or alteration/addition of an existing building).

If a proposed development comprises more than one element or more than one class (or form) of development, each of the applicable listed classes of development is relevant. This means that:

- (a) for the purposes of assessment - all applicable policies and criteria must be considered by the relevant authority for the purposes of section 102 of the Act; and
- (b) for the purposes of procedural matters - any development that comprises more than one of the listed classes of development may trigger more than one relevant procedure.⁷

Subject to the preceding paragraph, if there are two or more classes of development listed in a particular table that relate to a proposed development, the class of development that most closely corresponds to the nature of the development (after considering the substance of the development) applies. This is subject to the need to make a practical and realistic assessment of proposed development, and to consider the proper construction of the relevant parts of the Code, in the event of any inconsistency between two classifications as they apply to proposed development.

Policies - Desired Outcomes and Performance Outcomes

Zone, subzone, overlay and general development policies are comprised of desired outcomes (DOs) and performance outcomes (POs). These are applicable to performance assessed development and to restricted development.

Desired outcomes

Desired outcome are policies designed to aid the interpretation of performance outcomes by setting a general policy agenda for a zone, subzone, overlay or general development policies module. Where a relevant authority is uncertain as to whether or how a performance outcome applies to a development, the desired outcome(s) may inform its consideration of the relevance and application of a performance outcome, or assist in assessing the merits of the development against the applicable performance outcomes collectively.

Performance outcomes

Performance outcomes are policies designed to facilitate assessment according to specified factors, including land use, site dimensions and land division, built form, character and hazard risk minimisation.

Designated performance features

In order to assist a relevant authority to interpret the performance outcomes, in some cases the policy includes a standard outcome which will generally meet the corresponding performance outcome (a *designated performance feature* or DPF). A DPF provides a guide to a relevant authority as to what is generally considered to satisfy the corresponding performance outcome but does not need to necessarily be satisfied to meet the performance outcome, and does not derogate from the discretion to determine that the outcome is met in another way, or from the need to assess development on its merits against all relevant policies.

Technical and Numeric Variations

The Code has facilities that set or determine various technical and/or numeric requirements in relation to specified classes of development.⁸

Section 66(4) of the Act provides that the Code may include provisions that provide for the adaptation of the rules that apply in relation to a specified zone or subzone or as an overlay to provide for necessary and appropriate local variations in specified circumstances. The requirements specified or reflected in technical or numeric variations form part of the planning rules to apply to the assessment of development, as relevant, through the classification tables and other provisions that make reference to these matters in specified circumstances. In varying a particular policy, these specific provisions or policies may be spatially applied without the need for the Code to apply the specific policy through a separate zone, subzone or overlay.

One type of adaption of the rules is a variation of a technical or numeric requirement that would otherwise apply under a zone, subzone or overlay that applies to a particular location.⁹ A technical or numeric variation of a technical or numeric requirement operates within parameters specified in the Code and is spatially applied through the operation of the Code and its interaction with the SA planning database.

Hierarchy of Policies/Modification of Provisions

If there is an inconsistency between provisions in the relevant policies for a particular development, and for the purpose of section 66(3)(b) of the Act, the following rules will apply to the extent of any inconsistency between policies:

- (a) the provisions of an overlay will prevail over all other policies applying in the particular case; and
- (b) a subzone policy will prevail over a zone policy or a general development policy; and
- (c) a zone policy will prevail over a general development policy.

This hierarchy is represented by the following diagram.

Procedural Matters

The zones, subzones, overlays and general development policies may contain sections headed "Procedural matters". Material in these sections provide for various procedural and related matters under the Act and regulations¹⁰, such as some exclusions from the requirement to notify certain applications for planning consent, and referrals to prescribed bodies.

Notification of applications for planning consent

A table headed "Notification" in the section of a policy relating to procedural matters specifies classes of development to be assessed under section 107 of the Act which are excluded from the requirement to give notice of an application for planning consent under section 107(3) and (4).¹¹ The table may also specify cases where notice need not be given to members of the public by a notice placed on the relevant land under regulation 47(6)(a) of the *Planning, Development and Infrastructure (General) Regulations 2017*.

Referrals

The Code also interacts with regulation 41 and Schedule 9 of the *Planning, Development and Infrastructure (General) Regulations 2017* for the purposes of section 122 of the Act. Schedule 9 prescribes classes of development that must be referred to a body prescribed in Schedule 9.

"Referral" tables in various parts of the Code specify classes of development to which an item in the table in clause 3 of Schedule 9 applies, identified by reference to the prescribed referral body.¹²

A "Referrals" table also identifies the purpose of a particular referral (that being a matter that is considered by the Commission under section 66(2)(e)(ii) of the Act as being appropriate to include in the Code).

In relation to development that is to be assessed under section 107 of the Act, if policies from a particular overlay are not listed within the 'Applicable Policies' in Table 3 for that class of development, any referral within that overlay will not apply to that class of development.

Other matters specified by the Code

Specified matters and areas identified under the Act and Regulations

Part 5 sets out areas and matters that are specified or identified for various matters under the Act or associated regulations.

Definitions of land use and land use classes

Part 7 sets out definitions of land use for the purposes of section 66(2)(c) of the Act.

Local heritage places

Part 11 designates places as places of local heritage value for the purposes of section 67 of the Act.

Regulated and significant trees

Part 10 makes declarations for the purposes of the definition of regulated tree(s) and the definition of significant tree(s) under the Act.

Spatial Information and Electronic Databases and Files

The spatial boundaries of zones, subzones and overlays, as they apply in relation to the various parts of the State, are determined through the operation of the Code and may be accessed through the SA planning database.

In particular, the Code spatially applies the zones, subzones and overlays to the various parts of the State. This application results in spatial layers that show the location of the zones, subzones and overlays and, accordingly, applies the policies, rules and other information that are relevant to any specific place within the State. This feature of the Code operates through data that is housed in multiple databases and electronic files. These databases and files interact to produce data that accurately shows the spatial application of the policies, rules and other relevant information within the Code, combining textual information with spatial information.

This electronic feature of the Code works in conjunction with the SA planning database under section 49 of the Act, so that the spatial boundaries of any zone, subzone or overlay, and accordingly relevant textual information, may be accessed and applied through the SA planning database.¹³

The Code and the SA planning database in turn operate in conjunction with the South Australian Property and Planning Atlas (SAPPA) and other related databases and systems and services. The data in SAPPA defines the spatial extent and boundaries of the zones, subzones and overlays established by the Code. This spatial data is developed, maintained, securely stored and delivered through information systems established and maintained by the Department. This functionality allows spatial data and textual data to be brought together in the SA planning database, and in the Code as published on the SA planning portal.

The status of the SA planning database is further supported by any standards established by the Commission under section 51 of the Act and, importantly, section 52 of the Act supports the electronic publication of statutory instruments, including the Code. A version of the Code, published on that part of the SA planning portal that states that instruments published on that part are certified by the Chief Executive of the Department under section 52(1) of the Act, is able to be presumed (in the absence of proof to the contrary) to be a complete and accurate record of the statutory instrument (as amended from time to time and as in force at a specified day).¹⁴ In addition, any information produced on the SA planning database as to the application of planning policies, rules and information to a specified place within the State (as envisaged by section 49(1) of the Act) will be presumed, in the absence of proof to the contrary, to be accurate and correct (and may be relied on for the purposes of the Act).¹⁵

Furthermore, as part of the SA planning portal and in connection with the SA planning database, the online atlas under section 50 of the Act provides a search facility to search across the database that is relevant to the spatial application of the Code. The online atlas enables the viewing and searching of the spatial mapping feature of the Code, and enables viewing of the location of zones, subzones and overlays by reference to council areas. This feature may be viewed as replacing an aspect of the scheme under the *Development Act 1993*.

The official sources for planning spatial data under the *Development Act 1993* are the various hard copy maps of a Development Plan for a council area. With the implementation of the SAPPA and Online Planning and Design Code Enquiry (OPD) application, pre-defined and printed maps are no longer relevant or required. Rather, the scheme under the Act provides for the electronic publication of the Code, facilities to identify the policies, rules and information that apply to any place in the State, and the authorisation and verification of an electronic version of the Code as in force at any particular time.

Interpretation

Definitions and other rules of interpretation

A term used in the Code may have a meaning specifically assigned to that term by one of the following:

- (a) the *Planning, Development and Infrastructure Act 2016* (the Act);

- (b) the Acts Interpretation Act 1915;
- (c) the definitions in Parts 7 and 8 of the Code.

In the event a term has been assigned a meaning in more than one of the Code's parts (i.e., a zone, subzone, overlay, or general development policy), the meaning contained in the part that sits highest in the hierarchy of policies described above will prevail.

A reference in the Code to an Act includes a reference to any regulations or instrument made under that Act, and where an Act, regulation or instrument has been amended or replaced, if the context permits, includes a reference to the amended or replaced Act, regulations or instrument.

A reference in the Code to a specific resource document or standard, means the latest version of the resource document or standard.

Unless otherwise indicated, a reference in the Code to a Part, section or table is a reference to a Part, section or table of the Code.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
None specified	None

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)
1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is not adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone. Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Industry	Light industry
Shop	Any of the following: (a) shop with a gross leasable floor area less than 1000m ² (b) shop that is a restaurant.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 4 -Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)
1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any kind of development where the site of the development is not adjacent land to a site (or land) used for residential purposes in a neighbourhood-type zone. Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)
1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.
2. Any development involving any of the following (or of any combination of any of the following): (a) advertisement (b) agricultural building (c) air handling unit, air conditioning system or exhaust fan (d) building work on railway land (e) dwelling alterations or additions (f) farming (g) fence (h) internal building works (i) navigation structures, boat berth, pier, pontoon or similar structure (or any combination thereof) (j) private bushfire shelter (k) protective tree netting structure (l) public amenities (m) recreational pontoon (n) replacement building (o) retaining wall (p) shade sail (q) solar photovoltaic panels (roof mounted) (r) tree damaging activity (s) temporary accommodation in an area affected by bushfire (t) water tank.	None specified.
3. Demolition.	Except any of the following: 1. the demolition of a State or Local Heritage Place 2. the demolition of a building (except an ancillary building) in a Historic Area Overlay.

Placement of Notices - Exemptions for Performance Assessed Development

Pursuant to regulation 47(6)(c) of the Planning, Development and Infrastructure (General) Regulations 2017, the requirement to place a notice on the relevant land under section 107(3)(a)(ii) of the *Planning, Development and Infrastructure Act 2016* does not apply in the Coastal Waters and Offshore Islands Zone.

Placement of Notices - Exemptions for Restricted Development

Pursuant to regulation 47(6)(c) of the Planning, Development and Infrastructure (General) Regulations 2017, the requirement to place a notice on the relevant land under section 110(2)(a)(iv) of the *Planning, Development and Infrastructure Act 2016* does not apply in the Coastal Waters and Offshore Islands Zone.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

PO 2.1
 Building height is consistent with the maximum height expressed in any relevant *Building Height Technical and Numeric Variation* or otherwise generally consistent with the prevailing character of the locality and height of nearby buildings.

DTS/DPF 2.1
 Other than on a Catalyst site in the St Andrews Hospital Precinct Subzone, development does not exceed the following building height(s):

Maximum Building Height (Levels)
Maximum building height is 1 level
Maximum building height is 2 levels
Maximum building height is 3 levels
Maximum building height is 4 levels
Maximum building height is 5 levels
Maximum building height is 6 levels
Maximum building height is 14 levels
Maximum Building Height (Metres)
Maximum building height is 4.5m
Maximum building height is 8.2m
Maximum building height is 9m
Maximum building height is 10m
Maximum building height is 11.5m
Maximum building height is 12m
Maximum building height is 12.5m
Maximum building height is 15m
Maximum building height is 18m
Maximum building height is 18.5m
Maximum building height is 43m

In relation to DTS/DPF 2.1, in instances where:

- (a) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation* layer or *Maximum Building Height (Metres) Technical and Numeric Variation* layer in the SA planning database to determine the applicable value relevant to the site of the proposed development
- (b) only one value is returned (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other
- (c) no value is returned (i.e. there are blank fields for both maximum building height (metres) and maximum building height (levels), then none are applicable and the relevant development cannot be classified as deemed-to-satisfy.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Dwelling	Dwelling that is ancillary to a non-residential land use and will not result in more than one dwelling on an allotment.

Table 5 - Procedural Matters (PM) - Notification

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Class of Development (Column A)	Exceptions (Column B)
1. A kind of development which, in the opinion of the relevant authority, is of a minor nature only and will not unreasonably impact on the owners or occupiers of land in the locality of the site of the development.	None specified.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 - Restricted Development Classification

The following table identifies Classes of Development that are classified as Restricted subject to any 'Exclusions'.

Class of Development	Exclusions
Shop	<p>Any of the following:</p> <ul style="list-style-type: none"> (a) shop with a gross leasable floor area less than 1000m² (b) shop that is a bulky goods outlet (c) shop that is ancillary to an industry on the same allotment (d) shop that is a restaurant.

The following table identifies, pursuant to section 107(6) of the *Planning, Development and Infrastructure Act 2016*, classes of performance assessed development that are excluded from notification. The table also identifies any exemptions to the placement of notices when notification is required.

Interpretation

A class of development listed in Column A is excluded from notification provided that it does not fall within a corresponding exclusion prescribed in Column B. In instances where development falls within multiple classes within Column A, each clause is to be read independently such that if a development is excluded from notification by any clause, it is, for the purposes of notification excluded irrespective of any other clause.

Buildings contribute to the prevailing character of the neighbourhood and complements the height of nearby buildings.

DTS/DPF 4.1
Building height (excluding garages, carports and outbuildings) is no greater than:

(a) the following:

Maximum Building Height (Metres)
Maximum building height is 4.5m
Maximum building height is 5.6m
Maximum building height is 5.7m

(c) more than one value is returned in the same field, refer to the *Maximum Building Height (Levels) Technical and Numeric Variation layer* or *Maximum Building Height (Meters) Technical and Numeric Variation layer* in the SA planning database to determine the applicable value relevant to the site of the proposed development.

(d) only one value is returned for DTS/DPF 4.1(a) (i.e. there is one blank field), then the relevant height in metres or building levels applies with no criteria for the other.

PO 4.2
Additions and alterations do not adversely impact on the streetscape character.

DTS/DPF 4.2
Additions and alterations:

(a) are fully contained within the roof space of a building with no external alterations made to the building elevation facing the primary street
or
(b) meet all of the following:

- (i) do not include any development forward of the front façade building line

PO 5.1
Buildings are set back from primary street boundaries consistent with the existing streetscape.

DTS/DPF 5.1
The building line of a building is set back from the primary street boundary:

(a) at least the average setback to the building line of existing buildings on adjoining sites which face the same primary street (including those buildings that would adjoin the site if not separated by a public road or a vacant allotment)

(b) where there is only one existing building on adjoining sites which face the same primary street (including those that would adjoin if not separated by a public road or a vacant allotment), not less than the setback to the building line of that building
or
(c) in all other cases, no DTS/DPF is applicable.

Secondary Street Setback

PO 6.1
Buildings are set back from secondary street boundaries (not being a rear laneway) to maintain the established pattern of separation between buildings and public streets and reinforce streetscape character.

Table 3 - Applicable Policies for Performance Assessed Development

The following table identifies the policies that are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development. Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 2 - Deemed-to-Satisfy Development Classification

The following table identifies Classes of Development that are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'. Provisions referred to in the table are Deemed-to-Satisfy Criteria. Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.
